

BUILDING STANDARDS WHAT YOU, OUR CUSTOMERS, ASKED FOR 2007 - 2008

YOU SAID

“Could the council explain the inspection requirement once I have obtained my warrant?”

“Can you advise what paper work is required once I have completed my work?”

“The downloadable building standards register is very large as it covers all applications, can this be document be split up into individual years?”

WE DID

We have now published a guidance document, which explains the inspection requirements for projects.

We have now published a guidance document, which explains the documents that may be required on completion submission by Building Standards.

The temporary building standards register has now been split into individual years. We are still working with our software supplier to provide a live interactive register.
