Planning, Economic Development and Regeneration
Environmental Health & Trading Standards
Health and Safety Service Plan 2018/2019
OVERVIEW

In order to meet the requirements of the National Local Authority Enforcement Code (national code), West Lothian Council is required to develop and approve an annual health and safety service plan. The national code is given legal effect under Section 18 of the Health and Safety at Work etc. Act 1974.

The plan outlines how health and safety will be monitored and enforced within West Lothian businesses. Whilst the main responsibility for ensuring health and safety remains with the businesses and individuals who create the risk, environmental health officers have a statutory duty in ensuring effective risk management, supporting businesses, protecting the West Lothian community, and contributing to the wider public health agenda.

The service plan covers:
- service aims and objectives;
- authority background;
- service delivery;
- partnership and working with others;
- staff development and performance management;
- quality assessment; and
- service plan review.

A safe working environment is something many would take for granted. There is unfortunately significant confusion created by those who use health and safety as an excuse to avoid any type of risk. Very little of this has any bearing on real issues of health and safety and the necessary controls which should be in place to protect workers and members of the public. Ridiculous health and safety excuses grab headlines whilst essential work in protecting workers and the public goes largely unnoticed. Local authority enforcement officers and the Health and Safety Executive have shared responsibility for ensuring public and worker protection throughout the UK. The consequences of workplace accidents, ill health and fatalities are a significant burden on public health and the economy. Sensible, proportionate and firm management of health and safety is essential for everyone’s benefit.
SECTION 1 ~ SERVICE AIMS AND OBJECTIVES

1.1 Corporate Plan & Single Outcome Agreement Links

Priority 7: Delivering positive outcomes on health.
Priority 8: Protecting the built and natural environment.
(web link https://www.westlothian.gov.uk/article/1952/Corporate-Plan)
SOA7 We live longer, healthier lives and have reduced health inequalities.

1.2 Commitment

Our commitment is to protect and enhance the health, safety and welfare of people living and working in West Lothian by ensuring risks in the changing workplace are properly controlled.

In delivering this service plan we acknowledge and contribute across the six strategic themes of ‘Helping Great Britain Work Well’ – HSE, Health and Safety Strategy:

- Encouraging and recognising improvements, being increasingly joined up to deliver improved outcomes and minimise unnecessary burdens on businesses;
- Continuing to promote the risk-based, goal-setting regulatory regime that has served health and safety in Great Britain so well;
- Working with partners in the system to make workplaces safer and healthier, providing a level playing field for responsible employers with regulators and co-regulators, by advising, promoting, and where necessary, enforcing good standards of risk control;
- Using proportionate, risk-based regulation to support better outcomes, innovation and the safe use of new technologies;
- Developing services and products that contribute to improved management and control of risks, sharing our knowledge, and
- Continuing the dialogue and conversation with stakeholders to make the system better, always looking to provide simple, pragmatic advice and support.

A safe and healthy working environment also contributes to the health and wellbeing of the population within West Lothian. This is recognised within the Joint Health Protection Plan for Lothian agreed by NHS Lothian, and West Lothian Council, City of Edinburgh Council, East Lothian Council and Midlothian Council.

1.3 Our priorities

The service has to be delivered on a priority basis. This reflects the nature of the work undertaken and that the service cannot be divided up into uniform time units for
The Costs of Health and Safety

The financial and human costs of work related illness and injury are vast and impact individuals, businesses and taxpayers. In 2015/2016 the cost to the UK was £14.9 billion. The largest costs impact on the individuals effected, not just in terms of financial cost but quality of life or loss of life. The impact is valued at £8.6 billion. The cost to employers is £2.9 billion, and the tax payer costs are £3.4 billion.

http://www.hse.gov.uk/statistics/cost.htm

SECTION 2 ~ AUTHORITY BACKGROUND

2.1 Profile

West Lothian is a mixed rural and urban authority covering a geographical area of 42,504 Ha. The population is approximately 180,130*. The Environmental Health & Trading Standards service is located in Linlithgow Partnership Centre, Linlithgow. There are 2443** premises within the area ranging from offices, retailers, service sector, warehouses, leisure and public events. (*National Records of Scotland mid-year estimate 2016, **As of 01/04/18)

2.2 Organisational Structure

The service structure is as per appendix 1. The plan will be delivered by officers within the commercial team.

The commercial team is part of the Environmental Health & Trading Standards service which is part of Planning, Economic Development and Regeneration.
2.3 Scope of the Service

The scope of the service is outlined as follows:

- To inspect business premises within West Lothian, in accordance with recognised inspection frequencies in order to secure a safe and healthy workplace environment in accordance with relevant legislation, approved codes of practice, EC directives and other initiatives;

- To investigate accidents, work-related diseases and dangerous occurrences reported to the service, as required by the local accident investigation criteria, taking enforcement action where necessary and giving advice as appropriate;

- To react to public and business complaints and enquiries in relation to health, safety and welfare within West Lothian workplaces;

- To provide health, safety and welfare advice and guidance and to ensure compliance of new business and businesses transferred to new owners;

- To ensure activities that are necessary to support, compliment and develop the work of the health and safety service are carried out; and

- To prepare relevant reports, statistical, and other relevant information to local businesses and other service units within West Lothian Council, Central Government, professional bodies and any other interested parties as appropriate.

2.4 Demands on the Service

The service shares enforcement and regulatory responsibilities for health and safety with the Health and Safety Executive. The main demands on the service are driven by routine risk rated inspections and interventions, accident reports and investigations, and concerns and requests for service regarding health and safety. The term health and safety has taken on a very negative and trivialised interpretation due to risk averse and claims conscious organisations using it as a broad brush excuse for avoiding certain activities. However, the real issues which officers have to address in protecting public health include:

- Prevention of serious and fatal accidents.
- Preventing injuries from falls from height, slips trips and falls, manual handling and upper limb disorders.
- Preventing exposure to harmful substances (chemicals, asbestos, fine particulates, carbon monoxide etc.)
- Preventing injuries from vehicles and machinery (e.g. fork lift trucks).
• Preventing health impact issues (asthma, dermatitis, infectious diseases, legionella, stress, violence etc.)

Services are available from 8.30am to 5.00pm Monday to Thursday and 8.30am to 4.00pm Friday. The team, however, has to accommodate working out with these times due to operating times of businesses. On occasion evening and early morning work is necessary to carry out the inspection and intervention programmes. There is generally no proactive work for events at weekends. Emergency contact details have been provided to appropriate partner agencies in regards to incident management should these occur out with normal working hours.

There is a regular turnover in many of the businesses with new owners and changes in operation of the business. In the last five years there has been a 7.2% increase in registered food businesses (25% in the last 10 years). However, the overall business profile for health and safety enforcement has reduced by 3.2%.

In line with the enforcement policy, officers are required, when necessary, to take appropriate enforcement action. This may include service of notices, prohibition of activities and equipment, and reports to the Procurator Fiscal leading to prosecutions and time in court.

The principles of better regulation have been a key aspect of how the service is delivered for a number of years. As well as workplace safety inspections and interventions, officers in the commercial team will also carry out a number of food safety and smoking enforcement inspections. This is done to ensure best use of resources and avoid unnecessary additional visits to premises. It is encouraging to note the positive feedback from business consultation exercises in relation to their experience of inspections and enforcement activities.

It is, however, vitally important to remember that the principal purpose of the service in West Lothian is public health protection. In previous years a number of changes were made to the approach taken to inspections e.g. prioritisation of workload, changes in inspection reporting and recording, changes to inspection and workload allocation and geographical distribution, better use of flexible working and council buildings. Further streamlining of the service will be required during 2018 and beyond. We will ensure that attention continues to be given to positive outcomes irrespective of the breadth of service provision in future. Some of these issues are highlighted in 6.3.
The Importance of Health and Safety to Business

A survey of employees and employers by the Health and Safety Executive highlighted the importance of health and safety in the workplace. Employers tended to see the importance more acutely than employees in many cases (where other work considerations were a higher priority) – however this may be reflective of the general sense that workplaces are in the main safe and controlled environments. There were however a number of responses from employees which raised concerns that their current working environments were not safe. Although a smaller percentage it still amounts to a significant number of workplaces if translated across the whole of the UK.

The majority of employers say that health and safety requirements benefit their company as a whole (73%), save money in the long-term (64%) and defend them against unjustified compensation claims (57%). Most employers also disagree with the contentions that health and safety requirements hamper their business (78%) and are biased against small businesses (54%).

The response from West Lothian business customers has always been favourable for any contact with officers from this service. Customer survey responses are outlined in appendix 5.

2.5 Enforcement Policy

In terms of the national local authority enforcement code the service has a written enforcement policy which has been approved by the Council. The policy has undergone an equality impact assessment, and is followed by officers. The policy has also been cited as a good example in the recently approved Scottish Regulators Code of Practice. A copy of the policy is available to anyone on request and is also available on the West Lothian Council website. (http://www.westlothian.gov.uk/environmental-health)

SECTION 3 ~ SERVICE DELIVERY

Officers in the commercial team contribute to the development and implementation of this plan. This section outlines areas of work to which they contribute.

In order to meet ever changing demands, the service is always looking at ways of working most effectively. Performance management is a key factor in ensuring this can be achieved (see section 4.4). The quality of the service delivered is essential in protecting public health,
and the service is working to ensure that everyone plays a part in delivering the best service possible.

3.1 Inspections and interventions

There are currently 2442 businesses and work places within West Lothian which are allocated to the service for the purpose of monitoring and enforcing health and safety. Inspections and interventions are determined in line with the national local authority enforcement code and LAC 67/2 (rev 7) issued by the Health and Safety Executive. An annual inspection and intervention policy is outlined in appendix 2 and is based on national and local priorities for health and safety.

To ensure best use of resources, inspections and interventions are linked, where possible, to the food safety inspections due and are set as an internal performance indicator. Non-food premises will be targeted in a way which is proportionate to the relevant risk nature of the business. This will range from full and unannounced inspections, to targeted issue specific interventions, interventions for officer development purposes, and general advisory letters / communications to the very lowest risk establishments.

Officers will also have an input to on site safety at public events. There will be input through discussion with organisers, the licensing process and meetings with other council services.

Premises profiles and intervention information is outlined in appendix 3.

3.2 Accidents – investigation / prevention

There is a statutory duty on employers to report injuries, diseases and dangerous occurrences within certain criteria and timeframes. A risk based and proportionate approach is taken by the service to the investigation of any reports received. It is often said that accidents just happen, however that is not true and the reality is that every accident has a cause. The nature and frequency of the issues reported is used to help identify local priorities for intervention, and any more immediate follow up response required.

A key part of any inspection or intervention is to identify the approach being taken by business operators and staff to reduce the likelihood of accidents and address any issues resulting from these engagements with businesses.

Information on accidents reported in West Lothian is found in Appendix 3.
3.3 Requests for service and concerns regarding safety

Officers will investigate concerns raised by employees or others regarding health and safety in West Lothian premises. The nature of concerns can vary from failure to provide basic welfare provisions for staff, to serious concerns regarding dangerous working practices.

These will be responded to on a priority basis. Appendix 4 has a breakdown of business types and risk bands in relation to service requests received. This information will help inform local elements of the health and safety intervention policy.

3.4 Advice and support to Business

All officers will be involved in giving advice to businesses on workplace safety issues as part of routine visits. Advice can also be given to new businesses. This is an important aspect of work as it helps to ensure that businesses which request help can be set up complying with the necessary legal requirements. It has been established as one of our priorities for higher risk businesses and fits the model of targeting upstream intervention.

The service recognises that a well run and viable business will most likely be a safe business. Officers will direct business owners to support and help from colleagues working through Business Gateway. Information sheets are left at every inspection with details of where businesses can get further help and support in this and other aspects of workplace safety. This all works towards protecting public health and reducing the financial impact of compliance on businesses.

The ongoing work with established businesses is assisted by a number of helpful information sheets, guidance booklets, and other educational resources. A great deal of useful information is available on the Health and Safety Executive website, and through organisations such as Healthy Working Lives. The service web pages provide links to these and other web sites.

3.5 Primary Authority Partnership

West Lothian Council has no formal agreements in place to act as a primary authority partner.

There are however a number of national companies trading in West Lothian who have made such arrangements with an appropriate local authority, and due consideration is given to the context of these partnership arrangement in terms of our interventions and potential enforcement activity.
3.6 Liaison with Other Organisations

It is important to realise that the commercial team does not work in isolation from other internal services or external organisations. Internally, the team works with planning, building standards, economic development, licensing, legal, occupational health, and corporate communications, to provide a joined up service.

The national code requires local authorities to work together, liaise and carry out appropriate peer review in terms of ensuring consistent application of statutory requirements and aspects of the national code itself. West Lothian Council is part of the Lothian and Borders Health and Safety Liaison Group. This group meets approximately 4 times a year and group members will continue discussion through email and other forms of communication to ensure shared understanding and consistency of application on various issues. The group also has representation from the Health and Safety Executive, and discussions can take place with the designated local authority unit staff as and when required.

SECTION 4 ~ RESOURCES

4.1 Financial Allocation

There is no specific budget allocation for delivery of the health and safety service. The service delivery is shared by officers within the commercial team along with delivery of other environmental health functions. This includes delivery of the food service plan.

West Lothian has the second lowest costs per 1,000 population for environmental health (Scottish average is £16,117, and West Lothian is £8,460 – figures from Local Government Benchmark Framework 2016/2017). There will, however, be some variability between local authorities in terms of the level of service delivered.

4.2 Staffing

The service is staffed as per the structure indicated in appendix 1.

The current FTE allocation available for service delivery is 1.25 officers. However, currently 7 members of staff are authorised and contributing to the workload along with other environmental health functions.

Health and safety is only one element of the role of environmental health. The pressures on the whole service increase year on year with changes in legislation, increasing population and demand on the service having to be managed on a priority basis. We are therefore
targeting priority areas of work, delivering aspects of the service differently, reducing or removing aspects previously delivered, and continuing to work as effectively as possible to protect public health.

4.3 Staff Development Plan

As per the national code and the Health and Safety at Work etc. Act 1974, the service has a statutory duty to “make adequate arrangements for enforcement” and to legally appoint suitably qualified officers. The service has to ensure that officers have suitable and ongoing competence in order to exercise duties and powers in terms of the Act.

'Section 26 of the Health and Safety at Work etc. Act 1974’ allows local authorities to indemnify inspectors appointed under that Act under specified circumstances. It is the policy of this authority to indemnify inspectors appointed under that Act against the whole of any damages and costs or expenses which may be involved, if the authority is satisfied that the inspector honestly believed that the act complained of was within their powers and that their duty as an inspector entitled them to do it, providing the inspector was not wilfully acting against instructions.'

Training and development needs are therefore assessed during individual Appraisal and Development Review meetings held in accordance with the council’s Investor in People accreditation, and during monthly 1-2-1 meetings with line manager.

It is also recognised that knowledge and awareness of different sectors, work activities and processes needs to be maintained. As the national focus for inspections and interventions has changed this has reduced the onsite activity of officers to maintain familiarity and experience in a number of areas. This has potential consequences for competence of officers in addressing serious issues should they arise. Therefore the interventions plan for West Lothian will aim to ensure that interventions within different business sectors and activities continue to ensure officer skills, knowledge and competence is not lost.

A health and safety competency framework for officers is being developed to help give more detail to skills and knowledge pertinent to the different work areas. This was produced in support of national guidance – the Regulators Development Needs Assessment (RDNA). It will provide officers with links to necessary legislation, guidance, technical information, scientific papers etc. and will continue to develop over time. The framework is also being extended to other areas of the environmental health service.
4.4 Performance Management

Everyone working within the service has a responsibility for ensuring the delivery of the best service possible. To help deliver a positive and productive performance culture the service ensures targets are established which focus on outcomes and outputs.

Performance is monitored and assessed by various methods and reported internally and publically. Performance expectations and standards are outlined and reported in the following ways:

- Legislation, enforcement and technical guidance.
- Internal working documents and procedures – e.g. enforcement policy, customer service standards, council HR policies and procedures etc.
- Health and safety service plan.
- Internal monitoring of performance – e.g. team meetings, one to one discussions, monthly reporting to senior officers, public reporting of performance through Pentana, accompanied visits, customer survey and service complaints.
- Performance review and personal development planning.
- Training and professional development of officers and management.
- Reporting to external agencies – e.g. LAE1 to HSE.
- Internal reporting to elected members – performance committee, Environment PDSP, Council Executive.

SECTION 5 ~ QUALITY ASSESSMENT

5.1 Quality Assessment

The Environmental Health & Trading Standards service participates in the West Lothian Assessment Model. This is West Lothian Council’s adaptation of the European Foundation for Quality Management. This is being used to help deliver continuous improvement of the service in years to come. The service is assessed as part of the corporate Customer Service Excellence award.

Internal monitoring of procedures and customer feedback is also used to assess the quality of the service provided. Customer consultation is a key development issue and a customer and business consultation survey is carried out once a year.
SECTION 6 ~ SERVICE PLAN AND OPERATIONAL PLAN REVIEW

6.1 Review against Service Plan

The service plan will be reviewed in six months.

Internal plans, policies and procedures are reviewed annually, or as and when required.

6.2 Identification of any Variance from the Service Plan

There was a big impact on the 2017/2018 plan due to staffing vacancies within the commercial team. There was a re-alignment of workload across this plan and the food service plan commitments within the team based on a scheme of prioritisation. This gave priority to certain food safety activities. The focus for health and safety is mainly on routine interventions and service request related activities. The vacant posts were filled during 2017/2018 and this will hopefully allow for a more positive outcome for the 2018/2019 work plan.

The targeting of inspections and interventions has been tackled on a priority basis. During 2017/2018 70.7% of interventions were completed by the target date. This was a drop in performance for inspections by target date and there was a reduced number of on-site inspections from previous year.

There was a reduced performance in terms of response to service requests, and there was drop in the number of requests for service having to be dealt with.

There was an increase in accidents reported to the service from the previous year.

There was a large increase in the number of businesses being written to rather than receiving a site visit.

The business satisfaction responses for those businesses we engage with remains very positive.

Performance and workload comparisons are made in appendix 3.

6.3 Areas for Improvement / Challenges.

The following have been identified as the key challenges for 2018/2019 and ongoing:

- Ongoing demands on officers from challenging premises and incidents in terms of workplace safety and public health issues.
Health and Safety Service Plan

- Ensuring that officers are supported, developed and capable of dealing with challenging, time consuming and high risk workload.
- Ensuring workload priorities are appropriately aligned with available resources to deliver and maintain the best achievable levels of public health protection, alongside a culture of positive business engagement.
- Managing customer expectations for service requests, accidents and incidents in line with service priorities.
- Further development of alternative approaches to business engagement to attain maximum benefit for the council and businesses, including improving web content information and links to assist local businesses.

All inspections and focused interventions for 2018/2019 are outlined in appendix 3.

The plan for 2018/2019, and beyond, is to ensure the service focuses resources at priority areas of work, and takes the correct action to protect public health when risks are identified.

Appendix 1 – Environmental Health and Trading Standards Structure (April 2018)
Appendix 2

EH&TS West Lothian Council
Health & Safety Intervention Policy & Matrix

Introduction

The purpose of this document is to outline how officers will engage with businesses on health and safety matters whilst following LAC 67/2 (Revision 7) and the National Local Authority Enforcement Code (the code). The objective is to promote safe and healthy workplaces by encouraging compliance with health & safety legislation through various interventions, taking enforcement action where appropriate and proportionate.

Local Authorities are required to visit premises under various pieces of non-health & safety legislation. Where West Lothian Council also enforces health and safety in these premises it will be an opportunity review the level of health & safety compliance, having regard to current guidance. Officers are expected to deal with matters of evident concern or other major health & safety issues. Advice or guidance on general health & safety matters may also be given. Additionally where a visit coincides with the due date under the risk rating scheme, the risk rating will be reviewed and where necessary re-rated.

West Lothian Council is also required to keep its premises database as accurate and up to date as possible. Regular contact with businesses is therefore essential and as such all premises due for review under the risk rating scheme will receive a mailshot as a minimum intervention.
In line with the National Local Authority Enforcement Code new business will be provided with an advisory visit.

West Lothian Council, and its officers, will use health & safety powers appropriately and not abuse powers of entry to gain access to premises, or information, to follow up non-health and safety issues.

National Local Authority Enforcement Code

The Code sets out what is meant by ‘adequate arrangements for enforcement’. It replaces the existing S18 Standard and concentrates on the following four objectives:

- Clarifying the roles and responsibilities of business, regulators and professional bodies to ensure a shared understanding on the management of risk;

- Outlining the risk-based regulatory approach that LAs should adopt with reference to the Regulator’s Compliance Code, HSE’s Enforcement Policy Statement and the need to target relevant and effective interventions that focus on influencing behaviours and improving the management of risk;

- Setting out the need for the training and competence of LA H&S regulators linked to the authorisation and use of HSWA powers; and
• Explaining the arrangements for collection and publication of LA data and peer review to give an assurance on meeting the requirements of this Code.

LAC 67/2 (Revision 7)- Targeting local authority interventions

Summary of Appropriate Interventions

Proactive Inspections

Proactive inspection should only be used for:

• Specific projects/programmes of inspection identified by HSE for LA attention
• High risk premises /activities within the specific LA enforced sectors published by HSE (See List of activities/sectors for proactive inspection by LAs); or
• Locally identified potential poor performers. This is where specific local intelligence indicates that risks are not being effectively managed.

Intervention Types (Details in LAC 67/2 (Revision 7) – Annex C)

All premises will be reviewed at the beginning of the financial year, and based on nature of establishment, local intelligence and other elements of LAC 67/2 (Revision 7), will be allocated a suitable intervention utilising appropriate elements from those outlined below;

• Influencing and Engaging with Stakeholders, Others in Industry and Large Employers
  • Partnership
  • Motivating senior managers
  • Supply chain
  • Design and supply
  • Sector and industry-wide initiatives
  • Intermediaries

• Engaging with the workforce
  • Working with those at risk

• Working with Other Regulators and Government Departments
  • Working with other Regulators

• Creating Knowledge and Awareness of Health & Safety Risks and Encouraging Behaviour Change
  • Education and awareness

• Promoting Proportionate and Sensible Health and Safety
  • Encouraging compliance
  • Recognising compliance

• Inspection and investigation
  • Inspection (as per the code and proactive inspections above)
  • Incident and ill health investigation (HSE Incident Selection Criteria)
- Dealing with issues of concern and complaints
  - **Enforcement**
    - Enforcement ([WLC, EH&TS Enforcement Policy](#))
    - Other Interventions
### List of activities/sectors for proactive inspection by LAs – only these activities falling within these sectors or types of organisation should be subject to proactive inspection

<td>Where no visit, for non health &amp; safety purposes, or other intervention is planned and local intelligence shows risk concerns then a focused advisory visit will be allocated. In other circumstances the business will be subject to the other intervention strategy**. The premises will be re-rated with the previous risk score for the date of intervention. Interventions for officer development purposes.***</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Category C</td>
<td>Premises in this category are generally not suitable for proactive intervention, however a combination of the remaining interventions in Annex C may be used. May be suitable for advisory visit where there is intelligence showing that risks are not being effectively managed.*</td>
<td>Where a food hygiene inspection or other visit, officers will have regard to matters of evident concern or potential major health &amp; safety concerns. Where that inspection or visit coincides with the due date under the risk rating scheme, the risk rating will be reviewed and where necessary re-rated. Where no visit, for non health &amp; safety purposes, or other intervention is planned and local intelligence shows risk concerns then a focused advisory visit may be allocated. In other circumstances the business will be subject to the other intervention strategy**. The premises will be re-rated with the previous risk score for the date of intervention. Interventions for officer development purposes.***</td>
<td>Y (where premises was due or significant change to business or fall in standards)</td>
</tr>
<tr>
<td>New Business</td>
<td>LAs are able to rate a new premise by desktop assessment, an advisory visit, or in exceptional cases a proactive inspection. Often the information available in relation to the new premises will be minimal and as such a visit is usually necessary.</td>
<td>Advisory Visit. Any matters of evident concern, or matters of potential major concern will be addressed in line with enforcement policy.</td>
<td>Y</td>
</tr>
<tr>
<td>Revisits</td>
<td>Used to follow up enforcement action and advisory visits</td>
<td>All enforcement activity will be followed by a revisit to confirm compliance or institute further action. Where requested or agreed, and where appropriate, further visits may</td>
<td>Y (where significant</td>
</tr>
<tr>
<td>Accidents and service requests (premises complaints, etc)</td>
<td>In relation to RIDDOR reports, follow the <a href="https://www.hse.gov.uk">HSE Accident selection criteria</a>.</td>
<td>All accidents recorded, reviewed. Investigations as appropriate. All service requests are recorded, reviewed and investigated in line with council policies, but having regard to the code.</td>
<td>N</td>
</tr>
</tbody>
</table>

*for local planning purposes business sectors identified as more significant in terms of accident reports, and service request demands will be focus of proactive inspection or intervention visit.

**Other intervention strategy can include visits (project / advisory), but mainly will consist of non-visit communication and information provision.

***Officer development visits will be appropriate to certain business types and activities. These visits will most likely be pre-announced.

#### Workload Priorities

<table>
<thead>
<tr>
<th>Priority</th>
<th>Category</th>
<th>Description</th>
</tr>
</thead>
</table>
| 1        | Emergencies and threats to public health | • Fatalities / serious accidents.  
• Public health incidents.  
• Revisits to secure compliance.  
• Formal action to protect public health (prohibition notices etc.)  
• Serious workplace safety concerns. |
| 2        | Highest consequence proactive | • Routine workplace safety inspections:  
• Risk band A and B1. |
| 3        | High consequence proactive / reactive | • Guidance to potentially high risk new establishments.  
• Project / support activities to address high consequence public health issues. |
| 4        | Medium consequence proactive / reactive | • Routine health and safety interventions:  
• Unrated.  
• Risk band B2.  
• Street traders certificates of compliance, and Section 50 |
|   |   | certificates (Licensed establishments).
|   |   | • Project / support activities to support service delivery and customer / business information access. 
| 5 | Lower consequence proactive / reactive | • Alternative enforcement interventions:  
|   |   |   • Risk band C.  
|   |   |   • Consultations / comments – licensing of events, planning etc.  
|   |   |   • Guidance to low risk new establishments. |
Appendix 4 – Accident Notifications and Requests for Service Review

A review of accidents reported and requests for service to the team between 2012 – 2015 was used to identify issues for consideration as part of the intervention policy and matrix. A review of the nature of accidents and injury types was considered against business types and risk grades for businesses. The three year period was felt appropriate in order to get enough data to do a meaningful assessment. It will therefore form part of the intervention policy for the next three years (2016 – 2019), and thereafter on a rolling 3 year assessment and plan.

Table 1.

Of the accidents reported most came from the wholesale shops and warehouses, and retail shops sectors (see table 1). Catering services sector was the next highest reporter.

Table 2.
The highest number of reported accidents came from businesses within risk band C. (Table 2) These are generally the premises rated as lowest risk following inspections. These along with B2 rated premises (next highest reported) are not highlighted within HSE guidance as routinely requiring inspection. However, this local data would suggest further intervention and consideration is required.

The types of accident being reported and types of injury resulting were also analysed for all premises and those within risk bands B2 and C. The results highlight the same 3 prominent issues for accident types and for injury types in all cases. See table 3 and 4 below.

3 most reported accident types:
- Slips, trips and falls (same level)
- Handling / lifting etc.
- Hit by moving / flying object.

3 most reported injury types:
- Contusion / bruising.
- Fracture.
- Cut or abrasion.

<table>
<thead>

<td><strong>Hit by moving/flying object</strong></td>
</tr>
<tr>
<td><strong>Contact with moving machinery</strong></td>
</tr>
</tbody>
</table>

Table 3.
Table 4.

Table 5.
Table 6.

Table 5 and 6 look at the requests for service received by business sector and risk band. A large number of requests dealt with by the service did not have an allocated business type. However, the information supports the data in regard to the top 3 business sector categories and risk banding for accidents outlined above.

This data helps provide a focus for the local intervention strategy within West Lothian.
Appendix 5 – Business customer satisfaction

Business Customer Satisfaction. (Percentage of businesses who rated officer’s explanation of how to comply with legislation as good or excellent)

Overall customer satisfaction remains high. It is encouraging to note that officers input to business visits is viewed so positively. Business customers are surveyed annually to help us ensure that officers are providing the best service possible. It remains a difficult balance when officers are having to take enforcement action and convey challenging information. Other information gathered in our annual surveys is highlighted in the table below.

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Staff overall knowledge and professionalism (good/excellent)</td>
<td>100%</td>
<td>100%</td>
<td>90.9%*</td>
</tr>
<tr>
<td>Overall level of service (good/excellent)</td>
<td>100%</td>
<td>90%*</td>
<td>90.9%*</td>
</tr>
<tr>
<td>Treated fairly at all times (good/excellent)</td>
<td>100%</td>
<td>100%</td>
<td>90.9%*</td>
</tr>
</tbody>
</table>

*all other responses rated satisfactory

This feedback would tend to support the view that local businesses support the visits to their premises and the assistance offered by officers.
## Appendix 6 – Customers / Partners / Stakeholders
