

## FINDING THE DETAILED PLANS

Plan 5 opposite shows the index for the detailed maps with the core paths grouped by settlement area. Each map, or set of maps for one path, has a scale bar beneath the north point. The maps range in scale from 1:10,000 to 1:15,000 approximately.

As there is overlap between many of the maps any paths not described by the text opposite or beside the map are more faintly marked as they are covered by another sheet. To find a particular path use the path index below. To look at a particular settlement or area use Plan 5.

Because of the number and length of paths in Livingston it has been difficult to fit the paths onto A3 pages and keep the scale to a reasonable level. The inset in the bottom corner is designed to assist you in choosing the correct page. For some of these paths, and other longer paths in the plan, it has been necessary to split them between two or even three maps.
