Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	It may also be an idea to honour the statutory distance to provide school transport and not the additional reduced distances the council provide.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I am not a bus user myself but I know my elderly neighbour uses the bus and she and her friends use it frequently and this is a great service.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	need to be careful you don't cut off small outlying communities who rely on public transport	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Yeah cut bus subsidies etc, no real commitment to this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	As long as people are not left without adequate transport, there are already complaints about local bus services. Here, a well-publicised survey, online if cheaper would be very useful.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Not sure how successful the Dial-A -Ride schemes actually are though? My elderly Mother was aware of them but rarely used one even although she could have, because it was too much of a faff to organise and didn't always either give her time or alternatively gave her too long to have to wait for the return journey.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	As pensioners, we do make use of the Concessionary rail schemes into both Edinburgh (fairly regularly) and also into Glasgow (very occasionally), so we would feel the loss of these, however I do appreciate that savings need to be made and although it doesn't affect us personally	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	If a bus route is not self-sustainable then it shouldn't exist.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	should only offer subsidies that are paid directly by government	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The council should remove all bus subsidies. The concessionary rail scheme is absurd as it encourages West Lothian people to travel to Edinburgh and Glasgow in favour of supporting their own high street and communities. I am sure that those that wish to continue to do this can afford it without subsidies from all of our council tax payers.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	In theory, this is a sensible proposal. In practice it is likely to be highly contentious especially "... removal of all subsidies for bus routes that are not commercially viable." How and by whom will this judgement be made? As a pensioner, I use and greatly value the concessionary rail scheme. I would be sad to see this go but see its demise as almost inevitable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Good 👍	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree - if people used the buses the council would not have to subsidise uncommercial routes. It is terrible (for the council's budget but also for the environment) to see buses running regularly with no-one on them. The council would be cheaper paying for taxis.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Sounds sensible in the current climate, although there will no doubt be campaigns to save the underused bus routes!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This seems reasonable	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Good idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Seems ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	They got legs, they can walk	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Again, a review to ensure maximum uptake and service efficiency is a good thing.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Free bus travel is very good for under 22's.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Good idea more is needed one from winchburgh to allow people from the village to go to aldi/Lidl would be great.	1. The respondent advised that they agree with the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Good idea.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Sounds sensible. For example I like the idea of our local bus, however it passes twice an hour and is often empty which I feel must be a waste of resources.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Totally agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agreed. Use them or lose them.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I agree with removing the cheap rail travel for pensioners with Bus passes.; The public transport system in West Lothian is pretty poor - irregular timetables, delays and high prices, so the few who do pay the full price are put off using them. Again, I thought the way forward for Scotland was a better public transport system. The majority of people who seem to travel on the buses, don't actually pay the full fare or any fare. However, some need this vital service to get to jobs, hospital appointments etc and have no other means to do so.	1. The respondent advised that they agree with the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I can understand the need to remove certain services particularly if they are not being utilised but feel for residents in small villages out with Livingston who may not have any other form of transport.	1. The respondent advised that they agree with the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Fantastic	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	If there's two services on the same route at the same time; something has to give. Don't subsidise unless it's a critical, unviable route.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I strongly believe the concessionary rail scheme should be removed. This scheme is a luxury for pensioners, they are not trying to get to work, to hospital appointments, but are using the cheaper travel to enjoy a trip to the city for coffee with friends or there partner simply because they can.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	After reading the above, I will continue to trust your decisions in the areas I have no experience in , but thank you for the opportunity to co-operate !	1. The respondent advised that they agree with the proposal.	Thank you for your comment
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Public transport needs a complete overhaul, It does not meet requirements and perpetuates the use of personal vehicles which does not help our green strategy	1. The respondent advised that they agree with the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I agree plenty people over 60 can afford to pay for this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Fine as long as the elderly and less affluent in our communities are not discriminated against by the proposed measures.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I would welcome a review of public transport. I live in Blackridge, and buses only go one way, East. The nearest village is Harthill, to the south around one and a half miles away, where we could get on an express bus to Edinburgh or Glasgow, but there is no connecting bus. There is no bus to our nearest large supermarket in Armadale. That is why the buses are under-used, because they don't go where people want them to go.	1. The respondent advised that they agree with the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	It is the case that the council needs to cease some services, particularly those that are not being used in significant numbers. Indeed, there are other options for the elderly disabled in our communities. I don't. feel that concessionary rail schemes should be axed as this is a service used by many.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	There is currently an overlap between service buses and school transport - worth reviewing whether both are required on some routes.	1. The respondent advised that they agree with the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	As long as it doesn't mean that people who are living in remote areas can still accessing travel and get to where they need to. Removing services completely will mean most vulnerable people are disadvantaged.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	"The council would also propose to remove concessionary rail schemes with are in additional to existing national schemes"??? ; Spell check required.; But free transport for under 21s and over 60s seems excessive and unnecessary.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Although a vital service , most buses have one or two people, if any in them . There must be efficiencies to be made here.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree, however would be concerned for those in our outlying communities accessing services.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree, subsidising services that aren't able to stand on their own should stop. So long as proper alternatives are available for vulnerable groups like the elderly who made depend on the services	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Only if necessary and doesn't leave communities cut off.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree but care to be taken not to isolate groups of people just because they live somewhere that isn't on a popular bus route	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I support this proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I agree with this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree that we cannot fund non profitable routes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree with this proposal.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Sensible strategy	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Totally agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Good.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Yes that is required	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This is not needed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Makes sense,	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I agree with this proposal.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree. I fail to see why the council subsidises any local bus companies. Let people buy a rail card if they wish discounts on the train to Edinburgh. Ridiculous that council tax payers are paying for this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This makes sense.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Don't use it so good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	A pity but makes sense to save money here	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree with proposal to remove subsidies for bus routes that are not commercially viable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Most of that sounds fair - no point in driving around in an empty bus, damaging the environment.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	makes sense, we see too many buses with barely anybody on them.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Makes sense	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I think this is a fair proposal, I often see buses with few or no passengers. You are right, this is no viable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agreed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Sounds like a reasonable approach.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Yes, it's more than a bus	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Fine	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Bus service is pretty abysmal - however I don't blame WLC for this. I support removing the rail scheme as this is an additional scheme that WLC are paying for,	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agreed, further savings should be expected here as most buses have NO passengers. What a waste of money this is.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agreed. Sadly most buses out with peak hours have very few commuters and as such are not a good use of resources.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	agree re consolidating public services that are not utilised - these must be followed through even though some resistance will be present from the public; - as transport initiatives are also implemented from a Scottish Government perspective, there should be revenue streams provided from the SG for vulnerable adults, and those with a bus pass, etc	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	It cannot be a licence to print money, but instead needs to separately identify the need to deliver efficiently heated homes to council tenants, encourage local food miles eating solutions for the least advantaged in their bailiwick, encourage climate change friendly local transport solutions, and encourage waste reduction by making it easier for households to reduce, reuse and recycle. A major component of all this lies in the education of our people, to help them make the right choice, and to make the right choice the most affordable choice. Where the most affordable choice route is not (yet) available, we need to make the right choice free for those on benefits.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Service reviews are a must as some services are completely over the top where as others are too infrequent and do not connect effectively. Sadly it's a dismal area at the moment for many people being left stranded as services fail to operate as expected. This impacts mental health, family life work life balance and cost effectiveness.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree in principle, but any withdrawal of subsidised services must take into consideration the ease or difficulty that would be created by any such service withdrawal (i.e. location of footpaths, cycle lanes)	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The council needs to be careful not remove the only method of transport to residents who do not have alternative methods of transport. I agree that late night buses that are under-utilised should be removed from schedules.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Shame, but demonstrates the cost of providing services to a population with many small villages - should concentrate new development on intensifying and making best use of bigger towns, especially Livingston.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Stop supplying private taxi's and staff to pick up and drop of kids with learning disabilities to school for families that are already receiving mot-ability cars, carers allowance and to families earning over a certain amount of income, its ridiculous.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Fully support the removal of concessionary rail schemes - this should be applauded	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Robbing Peter to pay Paul. Transport provided to ALL young Scottish people, whether they can afford it or not seems like a poor use of public money.;	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I benefit from the concessionary rail scheme but do not object to its ending. Nevertheless the Council would seem to be cutting low carbon public transport which is entirely the wrong direction of travel. Coupled with the threatened reduction in community centres life is going to be increasingly isolated for the lonely.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Very sad but understandable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	as all under 22 now have bus passes, subsidies less needed as more passengers make routes viable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Many buses are underutilised, wasting staffing, money, fuel and not being environmentally friendly.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Long overdue!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Ending the concession rail scheme makes sense.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Whilst I agree with stopping subsidies for bus routes that are under-utilised as I see plenty of buses driving around West Lothian with little or sometimes no passengers.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Needs to be done very carefully to ensure people are not isolated and can get to where they need to	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I agree, these things must be looked at, along with everything else. From my own position I don't use the bus service very often as a number of them are unreliable. Which has become more apparent as the children have been given free bus travel and have been trying to use them more. The free travel is a great idea they are more familiar and happy to jump on a bus than some adults and parents aren't using vehicles to collect children. Going forward this can only be good for environment in the future. The cost of the Rail travel is very expensive I have a son going to Uni and it's £13.00 per day for him to attend.	1. The respondent advised that they agree with the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This makes sense, the number of empty buses running in west lothian is scary. A more efficient way of moving people around this region should be explored and this sounds like a solid first stage.	1. The respondent advised that they agree with the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Liase with staff in this area...	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Underutilised services should be cut.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree there should be some form of rationalisation of underused routes but strong access to on public transport needed for both work and environmental reasons.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree with removing concessionary rail	1. The respondent advised that they agree with the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I think the concessionaire train costs are not required if there are adequate bus provision.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Sort out public transport people need buses for over decade pensioners are losing their vital public transport bus routes change more than traffic lights do	1. The respondent advised that they agree with the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I constantly see empty buses driving around West Lothian. Based on savings needed, don't see how the council can justify using scare council tax payers money to subsidise bus companies to drive almost empty buses around West Lothian. There must be more economical ways to deliver transport to those that really need it.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Why do we have to subsidise the public transport in the community?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	get rid of all subsidized buses. One of the most obvious and sensible things proposed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Bus routes not being used, makes sense to cut them but don't want to stop people being able to travel.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	No point in running buses that aren't being used but not everyone has the money for transport.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Yes, agree. Underutilised resources and infrastructure should be removed after careful review. Wastages should not be tolerated as we're living in such difficult times. Good stuff. See if that cost-saving can help improve services in other areas. I'm sure you would have already thought about it.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	No Bus Routes should be subsidised, if bud services do not stand on their own, then they should be removed. It would be better to extend the free bud travel scheme to include, everyone during peak travel times. This would allow commercial businesses to increase provision at key times, and reduce as required. (Requiring no subsidy) Also since all under 22s can travel free on commercial routes why do we still provide school transport, this should also be removed and kids can travel on commercially available routes.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree with removal of concessionary rail as this can mean that working people over 60 get a reduction in the work travel?! However, is there any options to mitigate by changing the threshold? For example maintaining for disabilities and for over 70s? But I agree this provision should be removed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I don't understand why the council has to subsidise any public transport, either rail or bus. These bus companies have the council over a barrel. They constantly threaten to drop bus routes until the councillors capitulate and give them more money.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I don't think councils should fund any bus services. I'd support removing all funding support to bus services and use the limited funding to target groups that need support most - Dial-a-Ride etc.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I really hope the concessionary rail travel is removed. It is not a priority for WLC	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Removal of free bus travel for school children unless required due to household income.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Savings not nearly ambitious enough. Would have expected more.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree council can't afford to subsidise under used bus services	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Good ideas	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Seems reasonable on the face of it to provide more targeted support where required.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	stop funding all buses. Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Private taxis and chaperones for families/children on benefits are a huge waste of public money.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Fair enough if they are not utilised.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	It public transport isn't used it should not be subsidised. Take all this money off. If people don't use the service they can't complain when it's not there any more.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Would using smaller buses on certain routes not help, less fuel consumption. 1 person on a full sized bus for a journey is surely not cost effective.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I agree on removal of concessions on rail esp as we have free buses	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	As long as above there are enough alternates in place to help those that require it and at affordable costs as many people with disabilities particularly mental health are unable to travel on public transport.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Tough call but if unused maybe even a taxi or mini bus service would be cheaper	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	; I agree with the Council looking to remove concessionaire rail schemes where additional national schemes are in place.;	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree. We can use technology more to support with schemes such as dial a ride.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Busses are important to local communities but if they are not being used then this needs to be looked at - but new timetables need to be issued to people who use these and local consultation is required. ; Removal of rail scheme - people can use the bus if required.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	stop spending money on buses. Not a council job	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I very seldom use public buses. I would agree with the comment that buses seem underutilised as there does seem to be a lot of very empty buses on the roads at times. Good to see that alternatives are being considered.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	With so many new schools being built in locations that previously had none, eg Winchburgh and East Calder, one would like to think that the school transport cost would begin to diminish and of the other services mentioned, how many are the Council legally required to provide? And I ask this question as a recipient of the concessionary rail scheme which I use very rarely and am happy to give up if it gives us better roads.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This is a very difficult area especially in light of my answer to 4A. Sometimes the public transport services are underused because they are still not good enough to tempt people out of their cars ...and there are insufficient disincentives to choose the car. We must invest in our public transport services if we are to achieve the necessary fossil free future.; Although it would adversely affect me I agree with stopping some concessionary schemes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	A review of transport is a good idea as long as it not to the detriment of isolated communities	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Great, the most honest question so far. Could have gone a bit further in defining the £2.2 million though, but in general it doesn't make sense to run buses with a couple folk in the current public spending context or give folk additional or duplicate concessions. Please congratulate the person that was honest enough to write this question.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This would only be possible if private bus companies have better services. Children have the Scottish Government funded bus passes but not all children are able to use this so school transportation would still need to be provided for ASN and those in rural areas.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Stop this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree with proposal as long s it is fair	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree with proposal but local scheme buses are a disgrace	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I'm shocked that the council currently subsidise as much as this. With the free child bus travel across Scotland, the council should not be providing additional subsidies unless it's for those pupils who have special needs.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Do away with free travel for over 60s most people either don't use it or can afford to travel and pay bus fares	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree this should be investigated but need to access who & how people be impacted. E.g . Will it stop health care staff being able to get to their place of work?	1. The respondent advised that they agree with the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Most areas have shocking bus services. If that is subsidised then removing it cant make it worse at this point. ; ; Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The taxi scheme for kids to go to schools is an expensive option. Surely an another way is better. ; ;	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Concessionary rail schemes West Lothian discount is much appreciated, but are a bonus. Railcards can be purchased. ; ;	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This one might be ok but you have to be careful in particular with our older people	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	please remove concessionary rail schemes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree - this has to be a priority not only to deliver a saving but to stop further increases in costs due to inflation etc. It is bad for the environment to have half empty buses running around. Concessionary rail has to go - it is a subsidy for rich people to spend money out with West Lothian.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	It is important that supply meets demand but a restructuring is definitely needed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Comment made earlier, a transport grant provided for all current users of council based transportation. I accept there are special needs for some pupils. Given the volume of taxis that arrive with one child defies logic. Surely transportation will be provided at a special agreed price? Rather than a tariff based service.; By paying a travel grant then parents can support their own transport to get their child to school, or have the funds to pay family, friends etc to provide transport doubling up ie car share. ; This facility is available to higher education students and although may not be suitable for all pupils for the majority it would be. ; Mentioned was the bus support of 20% surely logical routes would help provide a suitable service at a far reduced cost, or more efficient.; I accept that this may all be conjecture, I do not have the facts, but thoughts of an observer at the start and end of the school day.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Please consider taking more advantage of the free bus provision for young people. This could reduce school bus costs.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Unsustained routes being removed is sensible	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Bus routes absolutely need to be looked at. Buses run through our village empty often. Rather than buses running every 20 minutes could they not run every half hour or hour so buses would have more passengers on each run.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree with most of this as long as alternatives are safe and do not combust.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	cancel or revise all the bus routes that are not used or increase the fares to a more realistic level and give a smaller grant	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Promoting other methods of transport to elderly or disabled is not publicised enough nor promoted through health, social policy, hospitals etc.; There are plenty national rail schemes to apply for, WLC should not need to supply concessionary rail travel.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Again this makes sense, if the customers needs are being considered.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Reducing the support for some bus services sounds reasonable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	If children are going to schools within the catchment area why are school buses needed?? ;	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree. A full survey on utilisation should be carried out. As long as elderly or infirm can access town centres and hospitals, students access local colleges.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Commercial focus is appropriate given financial constraints, although community need should be part of decision making.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	4B Agree with removing subsidies from non-viable services and use the money to provide community transport on a couple of vital routes as identified by the community.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Trains are limited users put the funding into the bus links	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Concessionary transport schemes need to be overhauled.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree - end subsidies to public transport.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	review needed but i think if services were more readily connected and timetable we could see an uptake	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I feel public transport should be reviewed as important part of the community to ensure people can get to work etc	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Fair, in particular with free bus travel for under 22s and elderly. Additional funding from central government suggested if subsidies are necessary	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Demand responsive transport would be a better solution instead of subsidised services which are expensive to run and under utilised. I am not sure a national entitlement card is necessary. Public transport in general should be made more affordable for ALL users.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	We must have wasted a fortune during the pandemic subsidising empty buses. Would probably be more cost effective to subsidise taxis!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Ditch the subsidized rail fare's.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	If there are inefficiencies and under-utilised services, this is fair.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	It makes sense to remove under-utilised transportation. Some school buses could be removed where the pupils are within a reasonable walking distance. This helping the carbon footprint too.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Unavoidable. We are paying for empty or near empty bus provision, It is an environmental affront,	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree - I see many buses with 0 or just 1 or 2 passengers	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	We personally don't understand people getting free passes to go their work!!! It use to be free travel after rush hour and before evening rush hours. You don't get state pension till passed 65 why do you get a bus pass before then	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree as long as it's based on actual usage and cost to implement the route/travel. Focus on the needs of the many, not the needs of a few.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Could not imagine it was possible to have a worse more expensive public transport sport system than we do. I think that wealthy parents should not get free taxis for primary school kid just because they choose in live in mansions far away. They could subsidise the transport for children who can't afford the bus fare.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Reducing buses....yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I would agree about removing the rail scheme as this is getting more expensive perhaps work with a bus to the gyle or Edinburgh Park where day tickets for combined bus and travel in Edinburgh are only £4.50. Maybe offer subsidies to bus companies to try new routes so residents build trust that the buses will turn up. Right now it's a bit of a vicious circle the busses are so unreliable people don't use them, the buses get cut because they are nor viable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I agree to removed the additional rail schemes.; Before any services are cut, alternatives need to be put in place.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Rail concessionary rail schemes should not be required due to the national existing schemes; ; Could it be looked into with the new scheme of free bus travel for everyone under 22 - could public buses be used for school runs rather than a subsidized bus through the council	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	If the services are under utilised then unfortunately a cost saving has to be made, could it be a smaller bus used for school transport. If the route is not commercially viable could they be joined up with another route? it may mean an earlier start for some however the cost and viability of the service needs to be taken into consideration.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Whilst it would be disappointing to lose local services and transport links, if there has to be a reduction in funding somewhere, this would be an area I would support. This is providing that services remained available for the most vulnerable	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	i dont use the train much, maybe 6 or 7 times a year to edinburgh but its not much cheaper than off peak prices so i could stretch to paying that extra or get the bus,	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The buses aren't reliable enough, better to encourage active transport	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agree partly	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I support removing concessionary rail schemes where there are equivalent national schemes in place.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I agree with reprioritising Transport for passengers as not everyone has cars. Public transport is very important to get people to work	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Whole villages are now cut off due to public transport being so poor. Services constantly being cut are resulting in the public not even being able to get to their place of work.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	At the moment villages are being cut off due to no buses being in service, if this increases people will not be able to get to work and again this would impact on public services. Also in a time of environmental concern encouraging people to use cars instead of public transport goes against every advice given by environmental leaders.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I am lucky that I drive as I suffer from motion sickness, but my reason for taking car is that bus routes are too long what can take me 10mins to drive can take anything from 45mins upwards on a bus and I have to turn into places that are not even on my journey, there are no direct routes, if the transport was more direct, I would ditch my car for public transport. Ceasing services usually means to more rural areas and for the poorer in our society this can have an adverse effect on their health and opportunity to earn forcing people to move away from family to find work.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This is again taking vital services away from the people and pushing the increasing cost of fares to them as a result of the termination of the subsidies	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Removing rail concessions will impa pensioners and the disabled disproportionately.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Here's hoping that when you get a subsidized bus that you don't add loads of extra added time on detouring here there and everywhere getting to your destination - a lot of people rely on concessionary schemes so not a good thing for them as means extra to pay on top of everything else	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Non commercially viable routes are the reason they are subsidised. If they where viable the bus companies would run them themselves. Removal of some routes will leave areas cut off, unless you get 2-3 buses on a protracted route, increasing environmental footprint print.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This would remove an essential resource for elderly, young people and many others who rely on these devices for well being, social engagement and essential appointments	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This is going to marginalise residents. Surely the job of the council is to subsidise non commercially viable options- or they would be run by commercial operators?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Are the services underutilised as there has already been cuts so far back that the bus times do not accommodate the need for workers to get to work etc and they have had no choice but to drive to work?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Any cut to services which enable communities to connect should not be considered. Perhaps an agreement can be reached with companies where data is collected and WLC pay per travelling passenger. Most people using these services see it as a lifeline to engaging with others and protecting health and wellbeing.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The free and concessionary services are vital and must be maintained	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Again rural areas will be greatly impacted, less opportunities for people living there to access work, people rely on public transport.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Access to public transport is important for many vulnerable people, including the elderly to support their engagement with community and access to facilities in towns. The negative impact of withdrawal of services should be fully researched before any changes are made	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Think very carefully about this. Public transport in our county is poor enough as it is. Do not make it worse. A bus from Bathgate to Livingston that takes over an hour is ridiculous enough already, for what is a 15 minute journey. Do not make this sort of stupidity worse.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council continually reviews service provision using our Best Value Framework to ensure that we deliver value for the public and continue to achieve the expected levels of performance. There are rigorous internal scrutiny arrangements in place to assure the quality of our services and we are also subject to external audit and inspection.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	These services are underutilised not because people don't want to use them, but because they've been cut left right and centre over the years to the point of them being completely ineffective and unreliable modes of transport. We NEED effective public transport. Effective public transport comes from investment, increasing availability and making it more affordable. WLC are proving to be particularly effective at doing just the opposite. Another step towards cutting off communities and lowering living standards further. Great job.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Ensuing communities are not cut off should be key to these decisions.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council continually reviews service provision using our Best Value Framework to ensure that we deliver value for the public and continue to achieve the expected levels of performance. There are rigorous internal scrutiny arrangements in place to assure the quality of our services and we are also subject to external audit and inspection.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Some of these services are the only ways that people have in accessing relatives, services and conducting their business. By reducing the options, it may bring pressure to other services due to increased mental health issues, a reliance on requiring help in the home, commute to workplaces and increased missed appointments therefore there needs to be careful consideration before decisions are made to ensure people are not cut off especially in rural areas.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council continually reviews service provision using our Best Value Framework to ensure that we deliver value for the public and continue to achieve the expected levels of performance. There are rigorous internal scrutiny arrangements in place to assure the quality of our services and we are also subject to external audit and inspection.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This may be counter productive to reducing co2, with a potential increase in household drop off and pick up. It would also create unsafe parking around schools.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I understand the need to make savings, but there are many people who would have no practical access to public transport if the subsidised routes were removed. eg most of Murieston, We do not all drive and cannot all afford to rely on taxis. As I understand it dial a ride and handicabs are only for those with disabilities and not available to the rest of the community	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Without subsidies the young people who cannot drive will struggle to get to work as will many of working age who cannot afford a car/petrol thus impacting the economy and making it more unappealing for people to find employment. We should be removing obstacles to encourage people to work, not adding them.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Discouraging the use of public transport, not the right thing to do when you are supposedly trying to encourage people to use their cars less. Typical of council attitudes.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This breaks my heart. As a non driver in a town with few active travel options this will leave me and others who cannot drive, a demographic that is majority poor and female isolated and forced to rely on taxis we can ill afford in this financial climate.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Inevitably some bus routes will not always be "commercially viable". This does not mean they are not required.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.

The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Transport in West Lothian is non existent in some areas; People want to use public transport but the lack of choice & high prices puts people off; Transport needs to be looked at again before making any decisions	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	How do you expect to commit to Net Zero without offering viable bus routes and train	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Please don't isolate us further. The only chances some have to return to the workplace is via the buses and public transport.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This will have severe impact on isolated communities hitting the most vulnerable hardest. Review should focus on impact not just cost.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	For a lot of people this is their only to get out and about. By removing this availability you are encouraging isolation.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Absolutely NOT! The concessionary rail scheme is a life line for disabled people getting to hospital appointments and education provision. For example, expecting a disabled person to go 2 hours on a bus to a 10 minute hospital appointment in Edinburgh and then 2 hours back is shameful. Must be nice to be a rich Tory and being able to afford a car and fuel and parking. Again, the council are determined to remove all services for the disabled community. Taxi cards have already been removed and blue badges are no longer free, so it's essential concessionary rail remains.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I imagine that removing subsidies for SOME of the bus routes that are not commercially viable would probably have a bigger impact on those who live in more rural areas and NEED them.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The concessionary rail scheme is very important to me as it allows me to access health and support services in Edinburgh that aren't available in West Lothian. If this goes I probably won't be able to access these services as much leading to social exclusion and working of my health.; I'd be fine with the bus as an alternative but it's about a 3hr round trip on the bus to get to my weekly appointments in Edinburgh. Why not make a direct bus from Livi to Edinburgh centre which doesn't stop 300 times on the way	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	People in remote areas need access to transport or else they become isolated.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Council tax payers are entitled to the same level of concessionary travel as in all other parts of Scotland. By national schemes if you mean buying the rail cards then those that wouldn't travel enough to recoup the costs are being penalised.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The bus service in Winchburgh is already a joke through terrible service provision from what was First bus and now McGills. Removing or reducing these services for those who can't have cars seems thoughtless for the more vulnerable in our region	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Goes against trying to get people to use public transport and less reliance on cars	2. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The last sentence makes no sense? "The council would also propose to remove concessionary rail schemes with are in additional to existing national schemes." Public transport in West Lothian is and always has been poor and overpriced. With Lothian Country removing some services this month, please do not remove any more buses	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Appalling suggestion. How extensive a cost benefit analysis have you done? Seriously.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This completely goes against trying to encourage use of public transport.The more vulnerable members of society, elderly and disabled will be unfairly penalised and unable to get about independently.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	So existing people having worked for 40 plus years will now not have any concessions, but higher bills and less facilities. A bus to let cal town is a great day out to a lonely pensioner.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Transport links for everyone is important around all of west lothian still need enough services so people that can not drive can get to places.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Some villages are already seeing cuts to service which is no goof	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The labour-Tory council coalition has some serious questions to answer if this goes ahead.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I am lucky enough to have a car so can't comment but this must be fully discussed with people who actually use the services as they are the only people who can tell you the impact of this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Bus service is very poor currently and further reduction will have major impact on vulnerable groups such as the elderly.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Not a good idea	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	not a good idea	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	We should be trying to encourage more public transport use, not cutting it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Removal of bus services and also concessions for rail travel will adversely affect people with fixed low budgets.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Elderly people rely on this service.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Less money , less cars more demand for public transport which you want to cut?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Removal of bus services to communities affects those on the lowest incomes and reduces their access to shops, banks and other facilities	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Local public transport services are dire and worsening due to the cutback in subsidies from WLC. I have a young daughter who encounters so many episodes of her scheduled bus not turning up to get her to work/university. I see on many local community pages the struggles that residents here have just trying to get to work and its getting worse all the time. I real effort needs to be made so that we can encourage our young people to stay in local employment with a decent public transport provision. Not everyone can afford a car, and climate change and the wish to reduce emmissions should be a part of this cost consideration too.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Rail concessionary travel is important and sometimes only way older people can get out of their home and avoid social isolation which impacts on their health.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Some communities within West Lothian are rural and people depend on public transport. There should be no erosion of service for these communities	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	In regards to removing concessionary rail schemes I think this is disgusting!; By taking such benefits from people will impact on their health and well being. Alot of people use public transport as a means to get out and about, this helps with mental health, taking it away would be a disaster.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	As some one who can not drive and has to use the bus I need them. I live in Blackburn and have been told that two of the bus i use will stop as of the 20th of November this year. This is a problem for me as I have to use walking sticks to get about. Plus one bus has had it route moved which means I can not get to the hospital without going in to Livingston first.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	More regular buses to allow for increase in children/young people using buses with the free bus passes. More routes to make; West Lothian easier to access	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Don't agree with providing under 22's with free public transport, however the handicapped and elderly should receive assistance where appropriate	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Public transport in West Lothian is already woeful - I don't support this approach	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Sounds like changes that could be more harmful.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Ceasing services will leave the most vulnerable unable to move around the community	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Again people will be forced to stay home. How can the public who rely on these services go about their daily business and get to the appointments they need to go to	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Local transport is a nightmare it barely exists. It is the worst transport I have ever came across. It isolates people and is so expensive. Whether your elderly or have disabilities transport is inconsiderate and in 2022 that's not acceptable but just gets worse.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Village communities cannot be cut off. This leads to villagea becoming ghost towns. A daily bus is not too much to ask	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Not a good idea	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Unacceptable!!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Nat all happy with this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Transport concessions should not be changed It's bad enough trying to get around for older people The cost of living crisis is bad enough without cutting this. People need to live	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	We need more bus services in Livingston not less. Removing concessionary rail schemes would not save a lot of revenue.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I would be very sad to see the concessionary rail travel go. I find it very useful and a much better option than the bus.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I do not agree with this proposal, this will impact on senior citizens with costs their budget off their pensions and would restrict them being able to get out and about. I know a lot of people depend on the dial a ride scheme to get their shopping and at times is the only time they get out the house. This would damage their well being in general.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Some routes need to be subsidised due to low passenger numbers but that does not mean the routes are not required. For a lot of people these services are essential and their only means of travel. Removing these subsidies and routes can have a very negative impact on people's lives. I would strongly recommend that this does not happen if anything the subsidies should be increased.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Whilst I personally don't use the rail service very often, I do feel that the local concession makes using the railway more affordable for many older people on limited incomes.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Money is very tight for many people of my age, and the removal of the existing rail concession would be a major disappointment for myself, and many others like me.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	As a 1950's woman who has already had her state pension age moved out by an additional 6 six years without prior notice, I feel the proposed removal of the local concessionary rail schemes would be yet another severe blow, not just to myself and my cohort, but to the older population in general.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I don't understand why cutting off essential bus services seems to be a priority especially after the much lauded £250,000 that was given to the council in regards of public transport.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	There needs to be a better alternative than, essentially, cutting whole sections of WL off from each other.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	No cuts	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I do not think there is enough public transport and I would be opposed to the ceasing of bus routes as they provide a vital link for communities that are not central to town centres etc.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This could increase the number of cars on the road so not good for 'green' targets. In addition it will put more pressure on the road networks which are already struggling, particularly the state of the roads (potholes etc).	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	See previous comment about school busses - DON'T remove them! A reduced town service rather than completely removed town service would be better for our elderly and disabled constituents	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	You should be encouraging people to use public transport instead of taking opportunities to use public transport away.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I do use the concessions on the buses and trains. If these were removed i feel that a lot of older folk would not use the services and be stuck at home which is not good for anyone's health. The reduction in services would also be detrimental to those who do use it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Whilst some routes might not be commercially viable, they are necessary for some people - before removal of routes, proper understanding of impact needs to be examined.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Some bus routes may not be commercially viable but are a lifeline to those who use them. This could isolate elderly people.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Commercial viability should not be the deciding factor in decisions. Concessionary rail schemes provide a lifeline to a number of otherwise marooned residents in the outlying communities. I believe that this should be subject to careful consideration.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	With so many post-industrial rural communities in West Lothian, reductions in servicing will need to be carefully managed to limit isolation and desperation in some of the outlying communities.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I am totally against any such attempts to effect savings in this area in what has been declared in Scotland as a climate crisis.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	All such measures will do is increase further the usage of more expensive private car travel and emissions. Bus services have already been cut in the Linlithgow ward and the withdrawal of the excellent EX2 direct service to Edinburgh under cover of Covid has been one of the more glaring errors. So, in aggregate terms, this scandalous blinkered proposition is not a cost saving measure. It is a cost shifting exercise by the Council onto other sectors in the community, mainly hard pressed households, that also defeats measures to reduce emissions and stabilise climate change.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Keep the free bus travel scheme	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Not enough buses and some are already being cut	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Concessionary transport is vital for the elderly people giving us a chance to get out and about and see people, whether in shops or on the bus. Avoids feeling depressed and stuck at home with no contact.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Please also consider that many customers of subsidised rural services are elderly and disabled. One of the other proposals is digitising access to services, many elderly do not have access to the Internet. If a regular bus service is taken away and replaced with a dial a bus that is booked online then many elderly as disabled in more rural areas will be entirely unable to access essential services and unable to meet their needs. What plans does the council have to support the mental health and physical welfare issues that cuts such as this will cause?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	As a resident of a rural part of West Lohian I see how essential some of these not commercially viable routes are. Please do not cut off rural communities, especially those with council houses. People are penalised for not taking council homes offered to them but if taking them would mean that they are stuck rural with no way out then our rural communities will die.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Ending all unprofitable bus routes is a terrible idea and not good for the climate.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Bus routes are mainly used by people who are closer to the poverty line, they are important to communities.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Another proposal which will affect the poorer in our communities- those that rely on public transport may live in rural areas, and reduces services further (many of which are pretty poor already) will only isolate the most vulnerable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The bus services are already reduced without further reductions. This has caused a lot of stress for the public sector especially if they use public transport to get to work. Yes some routes may not be commercially viable but how are people supposed to get out...Some of people are out of work and have no means of transport, possible cant afford bus fares either. Could be why some routes are underutilised.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I do not agree with removing concessionary rail schemes for passengers over 60 years old. My wife and I are regular users of the Uphall to Edinburgh rail service as the concessionary price of the ticket enables us to prevent car journeys into Edinburgh. I cannot use the alternative Park and Ride with a bus service as I have a disability that requires frequent use of a toilet and this facility is not available buses whereas it is available on trains.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Bus routes have changed dramatically lately and not very efficient for customers anymore especially in more rural areas. 1 journey shouldn't take over an hour. Although I understand savings must be made and I'm sure there are more efficient ways of working this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This needs to be thought out carefully as people in more rural or villages on the outskirts of towns are already struggling to access this and need to take 2 buses to destinations on a restricted service.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Remove concessionary rail schemes in addition to national schemes, but please do not isolate those in communities who do not own their own cars by removing the only bus services.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This will greatly impact on those in poorest areas that cannot afford cars and will impact on general accessibility to everything. It's also a greener way to travel and more people will be forced to use cats and taxis. Meaning more pollution of green spaces. I urge you not to take away bus subsidiaries.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The bus service across West Lothian is terrible. The council should be looking to resolve the infrastructure to allow people to get to jobs, hospitals etc not reducing services further. People would pay for a service that was reliable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	That will cause loneliness and isolation for many who can't afford full payments for travel especially pensioners	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I have seen bus services diminish in other areas and its devastating, especially for people who do not have the luxury of a car. alternates like handicabs/dial a bus etc are probably even less cost effective and if already in use by someone else still leaves others without transport.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Care needs to be taken to ensure a balance between business case & community care.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Like so many people I would take public transport more if I could but it unreliable and patchy. There is a bus that runs twice a day from the western general hospital to Livingston. When I get this 90% I am the only person on that bus. It would be cheaper for the council to pay for my tax. I am not saying cancel this service I am saying increase this and subsidies it. The number of NHS staff and patients that would use this is high. If only there was more buses and service routes. You can't give young people transport cards and then remove the buses particularly in deprived rural/semi rural areas.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Living in a semi rural area, I would be concerned about any loses to bus routes. We are within 25 minutes or so of Edinburgh, and the bus service is already unreliable - when it could be so much better. Those routes that are not commercially viable at the moment likely could be if the service was reliable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	not removing subsidised bus services as this will have a devastating impact on those without access to a car, roughly a third of households. This is a shocking proposal.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Bus services do not need to be cut. People heavily rely on them. In many ways!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Come on absolutely shocking stripping people of their public transport are you serious dial a ride wtf there are taxi companies and people use vital public transport get a bus company take them on full time just proves that you will stop the public use of buses but dump us with bins that are overcrowding streets not repair elderly bungalows or even repair any social housing that's 40 years old	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Vulnerable people rely on concessionary bus services. West Lothian is a big authority in terms of its size, elderly people rely on decent transport services.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Investment in public transport to reduce the use of cars etc within a busy Livingston area. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	most people use buses through necessity and taking busses off routes because they are under used could mean people in areas which are rural ie Westfield and torphican would struggle to afford to go to shops or social activities	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Need to ensure that communities are served with transport for the elderly etc.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	goes against green transpor policy - either people will be trapped at home or have to use cars.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	What about young people who are eligible for concessionaries that need the structure and normalcy of a regular bus. Would this cause isolation for groups within the community.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Areas in WL are already challenged with commute issues and connectivity - crucial this is handled carefully generally but with these outlying areas in particularly as a large elderly population exists and are badly affected.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	We need to ensure that people can still access their jobs by using public transport	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Public transport figures have been reducing given the pandemic and more towards homeworking and hybrid working arrangements so a review of public transport makes sense. However, as a stereotype it would be people in poorer paid jobs travelling that would require to use a bus so there needs to be a way to ensure connectivity with workplaces. West Lothian is not the same as city populations where bus use is more easily accessible and used by a wider range of the population and there for community bus schemes should be investigated. For example can a community take ownership of a bus provision based on their community need (travel to doctors, travel to shops and to organised community entertainment events etc), not necessarily running every day but on specific days for a specific purpose where the council supports this through provision of the actual bus or undertaking the maintenance?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Subsidised services can be vital for some communities. Even currently, public transport is being cut by providers leaving some communities with no public travel services at all. Dedridge west will have no bus service at all from November leaving residents unable to access shopping, health or social services. Given our drive to be more environmentally friendly we should be increasing public travel services in order to encourage people to use public services rather than personal cars not cutting provision.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Concessionary rail schemes should not be cut	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The removal of subsidies will cause more traffic on roads, this will cut off St John's Hospital by many. I'm sure the removal of concessionary rail travel to Edinburgh will also cause more traffic. For the above reasons I would be against removal of subsidies and concessionary rail scheme, especially to Edinburgh being removed.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This will destroy the ability for people who require public transport to have independence so should not be considered.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	By reducing some transport services, many people could potentially become more isolated, particularly the elderly or those who do not have transport. It can already be difficult to get buses with many routes already limited.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	In craigshill from 20th November we will only have one bus coming through which is diabolical especially for the elderly and disabled people	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	If you withdraw support on routes that are not viable what alternatives does that community have	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Bus service is unreliable however as the Scottish Government has given free travel to so many under 22 and over 60s needs still to be in place.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I disagree. Climate crisis requires us to use our cars less. We need to use buses more.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Removing concessionary rail schemes would completely some people off who rely on such schemes to travel.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Are you mad! The people that rely on this will be isolated!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This will affect the poorest society of people who can not afford a car. It will also affect the elderly who rely on public transport. It will also have an affect on shops when these people are unable to get to them. The people making these decisions don't rely on buses though and have no idea how it can affect a person's life.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Transport services need to improve and not be reduced	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	still need important busses for main routes.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	subsidies for remote bus routes should not be removed, as this would isolate villages. Subsidised rail travel, if this was reduced or taken away it may encourage people to use public transport including underutilised us services	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Council should insure not community is completely cut-off from public transport, if subsidised buses are withdrawn.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This seems to contradict the move to make better use of public transport. Small communities in WL are already disadvantaged disproportionately and cutoff from mainstream transport routes this may just isolate those most in need of transport even further.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The removal of concessionary rail schemes would mean no concessionary travel links to Glasgow from for example Bathgate. The x51 bus from Livingston to Glasgow was withdrawn.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Cant leave the young and elderly stranded	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Bus routes are being reduced at a time when young people are being encourage to use public transport. I find this crazy,;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Bus service seem to be poor at the moment and it is important to encourage people to use public transport not discourage.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Any spend on bus subsidies should be providing value for money. The transport strategy needs to reflect that.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Disagree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Strongly disagree these are life lines	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Disagree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Public transport within WL is a disgrace already. Further cuts would be to effectively remove public transport as an option.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	i think this should stay the same	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Buses shouldn't have to be 'commercially viable', they are there to provide connections for those without other means of transport.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	In some areas in West Lothian there are already no or limited bus services and this can be isolating for people as not everyone can afford a car and the running of a car or can in fact drive. People still need to be able to commute to their work without the journey taking an excessive time. Perhaps it may be possible to reduce services but not cancel them completely.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Even uncommercially viable bus routes are needed. Not every one has a car, etc. Not many people many use them but they are VITAL for the people that do. May be look at smaller more efficient busses to reduce the cost.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Public are asked to use public transport but it won't happen if you keep taking concessions away and rising the prices!!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The bus my son uses is always busy so; Not sure why that would be removed. How would he get to school in the morning. We live over 2 miles from the catchment school.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Public transport needs protected not everyone has a car and reductions will lead to people becoming housebound	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Terrible idea. Generally the underutilised bus routes are from remote and isolated locations so stands to reason already poor provision will become worse. Also, people don't generally work 9-5 and public transport needs to be available to accommodate this group. This will only increase the use of cars and have an adverse effect on climate change policies. Could Handicabs and Dial-a-Ride be better utilised e.g. used early morning to replace some quieter bus routes.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Isolating rural communities even more which pushes more people to invest in personal travel and the effect that has on the environment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Consequences on isolated communities could be dire if no public transport link available	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I agree about doing away with subsidised routes of underutilised services, but I and my spouse do not drive so it would depend on the proposal of what would be cut. The exploring of updated transport model is required but again Linlithgow does have a good local service the national service by the new Commercial Owners is not the best, the idea of concessionary bus, Handicabs and Dial-a-Ride schemes is a reasonable strategy to look too. The removal of all subsidies for bus routes that are not commercially viable I thi8nk this would depend on what routes you are looking at. The proposal to remove concessionary rail schemes and existing national schemes this seems a bit harsh due to the way of cost of living is going, I feel this should be put on hold till as most people that use this would not have the cost the rail companies charge for travel at this time a possible recession.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Spell check!!! Do not remove concessionary rail scheme, please.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Our public transport system is a joke! The residents of Deans South in particular are about to be left with 1 bus service and no bus service on a sunday, excellent!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Rural communities rely on being able to access essential services including their GP other health support services as well as shops by taking a bus. I understand many subsidised services are not utilised effectively but can these other options suggested give a reliable means of transport service for residents?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Our local bus service is avoided because it can't be relied on. I took a lower paying job closer to home rather than having to rely on that bus service to get home and collect my child from nursery before it closed. So it has a direct impact to the economy when you remove provision of transportation to employment. So I think this could be a false economy. Removing transport leading to underemployment or unemployment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Rural communities would be hard hit by the removal of vital bus services.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Public transport is necessary for people to get to work or for attending appointments. Careful consideration as to what is cut must be undertaken to ensure that people are able to get to and from work etc. This could also impact mental health as public transport is a lifeline for visiting families and friends.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This sounds like some people might lose links between communities and I would disagree with cutting funding for transport, as this kind of service is vital for people without other modes of transport available.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Concessions on buses & rail should remain as we try and stop people use their own transport.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I am concerned about the impact on vulnerable people who rely on public transport if 'non commercially viable' transport routes are removed. Might reductions in frequency of well used routes be better than removal of less used routes altogether. Livingston and Bathgate seem to be very well served fir public transport options whereas Linlithgow has 1 option to move around the county on a bus. Is there an assumption being made about car ownership?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Providing transport for those who HAVE to travel is a great provision however the criteria for this should be addressed as those that live near should not be requiring this. Also a better logistical approach for route planning would be required.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The transports links across west Lothian continue to be not fit for purpose, anyone without a car needs to get 2 buses to get to Livingston if they live out with that town	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	its the people in commercially non-viable areas that probably need this most	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	As usual the outlying villages will suffer most, will make people buy cars again making the argument about environmental rather silly	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I think the Council should seek where possible to maintain this area of service given the rurality of most of WLC.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	As the current cost of living crisis, removal of services will not help those who can't afford other methods of transport	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Reducing options for public transport will encourage more residents to buy cars/motorbikes/etc. this will increase pollution levels across the authority.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Definitely need to align services with demand but make bus travel easier and more attractive. Is seems mad to reduce bus services when trying to achieve Net zero.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Taking away the train subsidy goes against the push to remove cars from the roads. Train tickets are expensive & removing the subsidy seems to go against that. If the trains are running surely having a subsidised fare is better than no fare. Put limits to travel time, if that is not already in place	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The removal of non-commercially viable routes has a significant impact on individuals who do not have access to their own transport. It also encourages those with the option to choose to drive resulting in increased car use and subsequent environmental impact.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Disagree with transport being cut- need to be reviewed. Buses to operate so people can get to much needed services.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The priority has always been east -west travel not north -south. It can take hours with multiple changes and often means going into Edinburgh and back out. Needs a full review of where people actually want to go not just what makes the bus companies profit. Need to keep concessionary fares for 60+ as otherwise would be unaffordable on a pension. You have to distinguish between value and price. The rail concession probably doesn't have much take up so not that expensive to provide, but for those that need it there is great value.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Please leave subsidised transport	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	in the first sentence; If the council "subsidises" 20% of bus routes it will become expensive because of the loss of buses. Concessionary rail schemes for the elderly are a strong motivation for these beneficiaries to maintain their ability to use rail services. Trying to make savings from this should NOT proceed.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The climate crisis which requires provision of inexpensive, high-quality public transport links to reduce the use of private fossil-fuelled transport. Such transport also reinforces links between communities and supports those unable to use private transport. This is the wrong direction to be heading.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Again as long as it doesn't affect current services.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Totally against removal of the concessionary rail scheme. You spout Green issues as being a concern yet you seek to cancel buses that many people rely on on a daily basis eg bus from Bathgate to Linlithgow. Totally against these proposals.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	So long as service provision and support for disabled people is still available	2. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Don't agree, public transport expansion should be the priority to encourage people to use buses. If a bus is only once an hour or bypasses somewhere how are people supposed to get to places without jumping into cars?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	With an essential bus service now cancelled from 20th Nov in Eliburn, more help is desperately needed to get a reliable bus service back for my community	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	In a climate crisis, it is essential that people be encouraged to use public transport wherever possible. This has to be accessible to people with and without cars, and options like train travel should be a more attractive options than personal cars. Removing concessionary rail schemes will have the affect of more current recipients of this scheme choosing cars which is the opposite of what we needs to encouraged to help fight climate change.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Some routes have already been cancelled meaning that less people are able to use public transport. Will this result in more people being unable to travel for work appointments etc.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	School transport needs to be urgently reviewed. Taxi services are being used & prices quotes by the tendering companies are heavily inflated & have been for years, the tendering process needs to be reviewed & operators being given more school Co tracts than they have cars to cover should stop	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Public transport links between Linlithgow and Livingston (St. John's and the shopping centre) are minimal at best. Providing a regular reliable service on such routes is essential for older and younger people to access these services/ routine appointments/ visiting relatives. Not everyone can drive, and we are supposed to be reducing car use to save the planet.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	the public bus services are not underutilised, reducing bus services in prominent areas where bus pass users reside is not the same as passengers not requiring a service. im a disabled bus servie user, i cant gain access to busses as they dont show up, change there route last minute, or watch you coming up to a stop and leave early causing you to fall and break your knee, which takes months and months to remobilise. if you can ... you think people are going to want to use a service that actively avoids them when it causes them damage when they use it. medical patient transport is a necessity but they dont have enough services and i cant get to all of my appts, cause of the fricking public bus services immobilised me into a potetntial long term disability, so i cant use them. so thanks for the cost cutting	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Efficient, well developed public transport facilities are going to be essential to deliver climate targets. Any incentive to encourage public transport use must be a good thing.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Ohhhh not sure this is worthy of cutsespecially school transport...and transport for disabled	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Concerned about impact on rural communities if some routes are removed.	2. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	All areas require a suitable public bus service. At present not all areas of west Lothian have this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	It is ridiculous that we are unable to access a bus service from Dedridge West to Edinburgh or from Dedridge west to Dedridge east. This will make it impossible for those without a car to be able to get to Morrisons for work or for shopping and the pharmacy. Those who use the bus service are unable to pay the money that a private taxi would cost.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Analysis of subsidised bus routes would show where these are essential to combat isolation particularly in the elderly.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Transport is a major issue which links to the environment. Looking at the number of cars in every household. Public transport needs to be pushed make it harder to travel into town by car.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Removal of routes which are not commercially viable will impact directly on more vulnerable parts of communities who do not have access to other forms of transport.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Do not further isolate rural communities who already feel cut off from support and investment in the area. People rely on public transport, it should be efficient but accessible and useable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Transport needs to be more easy to access	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	tough one, even if the bus is only for one person it could be a lifeline for that person. as long as there is an alternative	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Transport services are one way to meet the ongoing ecological and environmental challenges we face at large. Providing quality public transport services and access means less cars on road and has an ecological benefit. Routes have already been restructured and services cut. This is likely to impact mental health for some if they cannot get and around their local community.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Some of the routes are used primarily by young people or elderly who have free cards. These routes might not be commercially viable, but are important to our Young and elderly. Other areas in Scotland have have buses that sit in town centres and can be phoned to go somewhere. Inveraray seems to have a good model.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Non viable bus route can be a lifeline to older members of the community who use the service in rural areas.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Bus services are already poor	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This will affect youngsters and pensioners the most and is morally wrong	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I cannot drive so reducing bus service is nightmare for me.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	If removing subsidies though, prices are likely to go up and this could particularly affect those who will also be financially impacted by the proposed removal of the concessionary schemes. It may also prompt more people to use their cars.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The difficulty with public transport is that the service delivered, in my experience from buses, has been below the standard needed both in terms of the number of services and reliability. Subsidised services may be underutilised for this reason.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	For some people this is an essential service and should not be cut if it can be avoided	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Cutting public transport services reduces accessibility and will encourage people to use private cars. The accessibility and quality of the services needs to be at the forefront of any changes.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Reducing transport options will send those who are more deprived into further deprivation.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Getting rid of the only service to Dedridge Croft head poses a danger to young and old being kept safe	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	No, I do not agree that cutting bus routes is the way forward. Vulnerable groups rely on buses, particularly on uncommercial routes. You risk leaving elderly and young people isolated and unable to travel. Not everyone has a car or is able to drive, it is the council's duty to protect those vulnerable groups.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I agree.....public transport are lifelines for many people who struggle to pay even subsidised rates	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The bus services are terrible .	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Some of the trasport links are essential for the elderley in particular to get around. It would be a tragedy to lose these services as the impact on the people that rely on them would be massive	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The provision of this service in conjunction with community outreach provides my wife with her only opportunity to leave the village on her own and during winter of term her only chance to leave the house	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Already not enough bus services for people to get to work, with commercial services already leaving area. Concessionary schemes won't work if there are no buses.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Public transport in West Lothian is already extremely poor, which is why it is under used and pushes people towards car use. Its no wonder routes are not commercially viable- I don't want to take a bus from Bathgate to Livingston that takes 40 minutes when I can drive in less than 20. It's appalling for the environment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Living rurally in West Lothian the bus services, particularly with free bus travel for young people, is an absolutely critical socio-economic enabler. Without transport many other questions about services become irrelevant as communities will become cut off. How will the viability of any particular route be determined? And weighed against the proportion of that community who are car-owning?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This is a backward move removing subsidised rail service when public transport is being encouraged and provide a fully integrated public transport	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Bus services are terrible at the moment with services late or not running at all. This only encourages more car use, affecting green strategies, but also leaves remote communities in danger of becoming more remote.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Those that have money have cars. Those with less money, therefore potentially on benefits, may rely on these services. It is important that people don't lose access to transport to services, medical appointments, care & treatment services etc.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Less than ideal as these subsidised services, while not fully used will have major benefits for those who do. Focusing on commercially viable routes only will have an impact on travel, particularly as those in less well connected areas would then either be isolated or it would lead to an increase in the number of cars, which would have a negative impact on the environment and climate change.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Two members of staff who work in my school cannot now get to work unless they walk 3 or 4 miles due to Buses being cut. The members of staff now face more dangers in the dark mornings trying to get alternative modes of transport (where there are none) no trains. They do not earn enough for Taxis. This is not appropriate	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Too many early morning buses taken off routes that people need to get to work; Not everyone is 8-4,9-5 what about ppl that start anytime from 4am	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Need to have public transport for all young people available in small places	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	These services are underutilised because WLC is woeful at publicising that they exist in the first instance!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This is going to leave some rural communities without a bus service, which can have an impact on getting to work, access healthcare, etc. the present system is already not acceptable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Please do not remove all routes that are not commercially viable. Some of us rely on local bus services and the removal or further reduction will leave some of us and vulnerable people cut off. By all means reduce frequency but at least leave some availability to access medical appointments and shopping etc.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	the concessionary traveller won't notice anything different as most of those are 8am - 8pm travellers, but for folks like me who start at 6am and on alternate shifts til 10pm 7 days a week, this would be a disaster for me...(i have to get a bus at 4.51 from bathgate to get me to broxburn for a 6am start....this is the ONLY service that can get me direct to my work (there is one other way but its multiple buses, via livingston)	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Under-utilised does not necessarily equate to not needed! Removal of 'not commercially viable' services and ceasing services from Handicabs and Dial-a-Ride schemes will without question impact the most vulnerable in our community and isolate people in their homes!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Transport is vital to elderly and reduces social isolation.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I appreciate my bus pass and having rail travel at a cheaper rate has enabled to see my family who live out with our region without that I would have no access to family, I feel it is essential to have the bus and rail travel especially since I had to give up driving	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Surely the non-commercially viable bus services are the most important ones to continue subsidising? The commercially viable ones could pay for themselves but the non-commercial ones will be withdrawn by companies who don't want to lose money. This is a ridiculous proposal.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Sounds sensible but masks specific issues in rural areas. Poor access to public transport in our rural areas is a constant issue raised. Anything that makes things even worse for these communities will be detrimental on both individuals in these areas and the local economy as a whole. Need more detail.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I would reconsider this proposal as concessionary travel is a lifeline for people.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Services are under utilised in my area as the service is so poor people use other transport!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I think we just have to be clear that this is a car only part of the country. We'll end up with people trapped in their own homes though. What about a tram network? Think big, and go lobby for the funding. Open us up, don't close us down.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Murieston Circular is important as there is no other public transport available. The timetables on bus stops and the web should be updated to reflect the current bus times. If the times are not all advertised (as is the case now), the service will not be used.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Buses have been cut through Broxburn to two services which are not reliable and now folks struggle to get where they need to be.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The bus service is West Lothian is disgusting and you need to do more not less. Why can't people get to work or appointment or school on time buses not turning up or being extremely late	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Public transport is required especially if want people to use their cars less but if not enough public transport then people will not reduce car use. Areas with less public transport use could still have buses running even if a reduced timetable. School buses should all be kept running for children as a safety aspect so they are with their friends and age appropriate people on the bus around them they may not feel safe when only 12, 13, 14 using public transport.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Subsidising of well used met bus routes would seem appropriate and important. Less used could be justified savings	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Concessionary travel is a must for certain people as its a means of getting out and about	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Removing buses must surely go against the fight to save our planet & reduce the amount of cars burning fossil fuels. How on earth will transport targets & West Lothian's green transport strategy be met if opportunities for more green travel such as buses are removed. This surely flies in the face of the Climate emergency that the Scottish government declared. Removing buses surely disadvantages the elderly & disabled who either can't drive or can't afford to. Try getting rid of the many many transport quangos and fat cat boards that dictate to local communities	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Need electricity buses on roads. and more bus routes	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Needs to be better promoted. Rural communities rely on cars as there isn't much option for buses/ trains due to infrequency and strikes	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Poor public transport services = more people using cars. Just take a ride peak time in Livingston.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Regular bus should be top priority for us working people. Taking off an important bus x27 is not good enough	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Dial a bus is ok for older people but what about the rest of us that need to travel from Whitburn to livi or the hospital we have to get on 2 buses. A shambles	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Who will this hit most - workers who needs to get to work, elderly and people who can't afford their own transport! Public transport needs to be more accessible and cheaper.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Please don't remove the rail concessionary travel UNTIL X38 is sorted ie reliable and adequate frequency!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Cancel nothing! There are already not enough busses about at it is! We need more, not less!!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	We want to people to use more public transport but if you take away incentives they won't. There is also an issue with buses being unreliable especially since McGills took over the contract in West Lothian. Because of staff shortages buses are cancelled at short notice. If they are being relied on for work or appointments this will mean buses won't be used anymore. There should only be one operator like in Edinburgh City that is in effect a Council service not driven by profit. Routes should not be cut as it will be only the profitable ones that are kept. Bus companies use the profit they make on main routes to subsidise the routes to rural areas. ; It will impact some areas massively, many will be cut off if they don't have a car that need to get to hospital or don't have any shops.; Again you are asking for a comment without knowing the facts. How much does the Rail scheme cost? It probably doesn't have that much of a takeup so not that costly, but will be of value to those that use it. This needs a full review not one question.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Subsidy given for transport for convenience of the public must not be disturbed	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Be very careful not to "TRAP" people in their own villages/areas, do not forget hospital appointments/visiting hours etc. Free bus passes are great, BUT only if there is a bus to use!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Stopping the current concessionary rail scheme will result in fewer older people taking advantage of the opportunity of leaving their homes, visiting other places and keeping more active.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Bus services have already be reduced in West Lothian making it difficult for people getting to and from work . Meaning people's safety is compromised if working night shifts etc	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Speaking personally I would really miss the concessionary rail scheme.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This is an absolute joke! As a parent of a child with severe disabilities your transport department already is incompetent and causes stress every single year. Stop targeting the vulnerable!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	People in rural locations already have very few transport options and what there is doesn't tie in with trains arriving and a bus being available to complete a journey.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Cheaper bus and rail fares are sometimes the only way elderly people can get to shop for food and clothing when there are no shops in the area that cater for these things even if it means limiting the amount of times they can use the services to once or twice per week would be better than nothing.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I think this doesn't sound ideal	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This would effect a lot of rural and smaller villages in the area. This might isolate community's and especially the elderly who rely on public transport.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Bus services have already reduced and are inadequate leaving people with limited access	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Some services may be under-utilised but they are a lifeline for those that use them. Do not cut bus services any further as it is the most disadvantaged that suffer when you do. They are experiencing enough hardship as it is.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Raiol service concession provide an opportunity and improved quality of life for many elderly people.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	older people not to lose concessionary travel	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Cutting subsidies to uneconomic bus routes will result in increase in car travel for those able to do so and social isolation for those unable to do so. Cutting concessionary rail travel will result in the senior / concessionary population being unable to access Glasgow and the golden jubilee hospital treatment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Do not agree with removing pensioner entitlement of concessionary rail fare to Edinburgh. As a carer of an Alzheimer sufferer, it is the one quick way to visit Edinburgh for us both.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Where has the encouragement to use public transport gone to? It is certainly disappeared in West Lothian. In a survey 3 years ago I suggested that the rail subsidy was removed as the bus service adequately gave folk transport. That has gone up the Swanee since then but if the bus service can be sorted the rail subsidy should be removed.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I very much doubt that the council is serious in focusing on connected communities and business in a way that is affordable and effective. I feel they will just say we can't afford that and leave folk without their own transport very disadvantaged. Lothian buses used to provide a fairly good service in the area but in recent weeks it has become most unreliable. a 45-minute wait is becoming common and in a few weeks the number 280 service is being withdrawn. McGill who has taken over the First bus also have the buses missing and it feels like the bus companies are colluding on the times they take buses off the road. To their due WLC did provide a taxi bus service and that was replaced by SD travel no 6 Service. This doesn't work as the 29 coming back from up from Falkirk often arrives back in Avonbridge after the no6 returns to Westfield and onto Whitburn. If the buses connected folk would be able to get out into central Scotland without have to go via Edinburgh or Glasgow. Other routes to be considered is a bus to Bathgate another to Linlithgow and onwards from there either by bus to Falkirk or by Scotrail.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I cannot support the removal of any bus service in West Lothian, in fact we need to increase bus provision. I am fully aware of the current difficulties in providing services that are underused, but we need to reopen bus routes so that people can get to where they need to go when they need to get there. To achieve net zero, we must be able to offer a public transport service that enables people to give up their cars to get to their places of work and study, or leisure. Removing any public transport service at this crucial time is short-sighted and will have long-term negative impacts on community and environment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Services being unviable is the rationale for subsidising them in the first place. Bus routes must continue to be subsidised if the Edinburgh LEZ is to be implemented.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Don't cut buses are bad where I am. They don't turn up a lot. I am struck without them because I don't drive.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Buses are terrible in WL. They are not regular or trustworthy as a lot of the time they don't turn up. I cannot plan or depend on them. Make better not worse.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	To all transport to get better and not cancel.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Bus services are poor at the moment. I can't depend on them and I have to make sure I get a bus as they don't turn up alot of the time. I can't afford a car so I will be stuck. Can't afford a taxi wither.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The bus service where I am are terrible at the moment with buses late or not at all. I am stuck without buses because I don't drive and less buses will make it worse.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Poor bus services at moment worse if there's some services stopped, I don't have a car and I will have to request lifts from family and friends - less independence for me. The council cuts to services will mean that I will not travel as much outside of my local area limiting my choices	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	definitely no to transport cuts	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	absolutely no to transport cuts	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	absolutely no to transport cuts	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I didn't realise the council had a concessionary rail scheme	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Would these children/ parents have to pay for these?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Does this mean more an more bus routes cut	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Further detail/local consultation would be required before commenting	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Kids travel free on public transport but are charged to get to school and back?? School buses are being reduced- what about childrens safety?! Parents who work can't just leave work to go collect children	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	How would this look in practice? Which services would be cut?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Nothing to add	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	no opinion	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	no comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	no comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	n/a	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Very difficult to comment without more detail	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Not enough detail to assess impact of changes proposed - generally not acceptable	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I am unable to provide further input as the level of detail within the estimated saving briefing doesn't allow me too.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	No comments.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I use my own car so cant comment on this.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I do not use the bus network therefore I cannot comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Sorry again we have do not have much say as we are not in control of funding, the whole world is in a bit of a state due to Covid and mismanagement at local UK and Scottish Governments. Although we realise that cuts will be made, it is a very depressing read with cost of living, Covid Recovery and world events, Leaving EU etc. My answers will be mostly similar throughout this consultation as I would not like to make decisions as when it comes down to it, people will lose jobs. I believe that we have to support Economic Development and Employability, we need to try and invest!	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I do not have an adequate knowledge of these functional areas to comment on this.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	If you make public transport and rail less accessible and costly how are you ever going to get people to use it?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	i hit oaps and disabled people typical tory /labour policy	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Didn't even know there was concessions on rail locally.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	How will this impact on climate change and reaching net zero?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Children from the age of 5	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Transport is a huge problem.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	A problem being older need public transport from my area in Howden. In November the x27 moving to craigshill area, we only have bus 26 to centre for shopping. Going to Edinburgh need to change over for Edinburgh Bus. My husband and I depend on Transport from howden area. One bus is no good every half hour. If missed have to wait in the cold over the winter months. Will we be given another bus coming to our area? We know it won't be easy for you to come to a decision	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This has to be based on need rather than utilisation. Where routes are removed (or subsidies are removed), what is the alternative for the community, or those who do use the services, and how do we maintain that access to transport at the same level of affordability for them? We can't isolate those who have no alternative but to make use of concessionary rail tickets either.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Utilisation of bus services is a challenge but understandable. For an extra-urban authority with a large rural element encouraging usage is tricky - on demand services are an interesting alternative. I struggle to see how individual car use can be discouraged while public transport availability falls below a critical mass - pushing more to cars.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Good and cheap public transport is essential and a lifeline for many people.	4. The council is already doing this.	The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Involve those that currently use these services to ascertain why they use it (to get to work, to connect with other people, etc.). Is there an alternative they could use? Would cutting the current service negatively impact them?	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Again, this transport is required, for instance, getting young people to school/education to try and raise the attainment level and reduce the gap!	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	It is cheaper to drive around west Lothian than take the bus, many would take the bus, however the fares are extortionate and there is no joined up thinking re connections to other town or train stations. This is consistently fed back to WLC yet no action is ever taken, hence many services are underused and what is the point of surveys.; We need buses that will connect people to train stations in Uphall, Livingston, Linlithgow so people can get to the cities,. There is no public transport between certain towns unless everyone has to bus to Livingston first. ; If i train Glas to Linlithgow, how do i get to East Calder, / West Calder / Mid Calder? ; If i train Edin to Uphall, how do i get to East Calder, / West Calder / Mid Calder? ; The infrastructure needs to be streamlined with connections that people actually need put in place.	4. The council is already doing this.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This again hits those with lower incomes as they will rely on buses. Why not stop subsidising but give transport discounts to those on lower incomes?	4. The council is already doing this.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	If walkable paths / cycle routes were more available, then perhaps buses wouldn't be required so much (I know there is some work underway to remedy this in some areas).	4. The council is already doing this.	Road repairs: Road Maintenance is carried out annually within the available resources and improvements are carried out in partnership with Sustrans. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Full exploration of alternatives to be considered first	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This should be done on a town by town basis rather than a blanket scheme as what's 'viable' for one area may not be for others and could leave remote communities cut off for people who don't/can't drive.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This may cause low income person to struggle to access movement across the authority and beyond. Possible solution is to means test these provisions, those who can pay do pay, those who cannot receive subsidies travel.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	School transport must remain a high priority.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Public transport services in outlying villages is unreliable. This needs to be investigated to allow ALL access to transport to places of employment/travel for appointments and socialising.	4. The council is already doing this.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The whole point of publicly funded services is to provide for services that would not otherwise be commercially viable. If they were commercially viable private enterprise would provide them and public provision would not be required. Commercial viability is therefore a poor basis to judge services.	4. The council is already doing this.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	School transport costs could be managed much more efficiently . I live close to a local school and have witnessed on one occasion 9 Taxis dropping children off at school, surely a minibus would be more cost efficient it could pick up more than one pupil and would also save staff hours?.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Working with places like Sustrans to create cycle, walking and running friendly routes would help.	4. The council is already doing this.	The council has a Cycling Walking and Safer Streets partnership with Sustrans and accessibility funding when made available.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Focus should be on green transport such as walking or cycling. This is cheaper to build and maintain than roads and car infrastructure.	4. The council is already doing this.	The council has a Cycling Walking and Safer Streets partnership with Sustrans and accessibility funding when made available.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Need to be move imaginative and innovative in our transport approach.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Priorities should be public transport for working people	4. The council is already doing this.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Would there not be an even more estimated saving if we reduced the amount of Taxi's that are used to return a young person home from school to put on the required uniform for that school	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The bus routes and services need a huge review. ; There's often buses going from the same area to the same destination.; There needs to be a a quick bus route from towns to Livingston.	4. The council is already doing this.	The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	If also means- tested (e.g pensioner bus passes based on annual income) then some savings could be made here. Rural connections are essential though.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Public transport is a big weakness in West Lothian, as it's not particularly good (i.e. old buses, takes a long time to get to places) which is probably why people don't use it. Given that the highest Carbon emissions for West Lothian come from transport, I would think that this area actually needs substantial investment to ensure that WLC meets its carbon emissions targets.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	the bike shelters are totally inadequate for bikes and you really think many will park a £4k ebike there !!! with no security presence or cameras	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Bike shelters are standard installations, however the cost implications to install, maintain and manage security systems as suggested would not be cost effective.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	In addition, support for bus services needs to be increased not removed. Planned changes to Lothian Country services mean from November there will be no buses serving Eliburn. This will mean a 30 minute walk to the nearest bus stop at St John's. Please explain how the elderly and disabled will be able to manage that! This will massively impact access to essential community, education and medical services as well as food shopping. Totally unacceptable.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The transport in West Lothian is diabolical!! There is a HUGE requirement to invest here - NOT take away!	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Need more buses from everywhere to Livingston, as that is where everything is moved to! Again difficult for older, disabled people	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Some older customers cannot/do not like driving, so public transport is a boon to them. Is consideration being given to the more public transport provision to rural and isolated areas of WLC's areas, which are a vital community lifeline?	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Lack of PR on the Council's part. Also the only transport between Linlithgow and Livingston is the 31 bus which meanders through the ward. Surely a direct bus service is required?	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Concessionary rail scheme for younger people - similar to the bus/young Scot card travel - would be a positive inclusion.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Need to invest more into public transport if you are wanting to improve our carbon footprint - you cant take public transport away or reduce it then expect people not to use cars to get to places.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Elderly disabled and kids transport on bus and train to be protected. Disagree with taking away train concessions for elderly...this should be open to kids too they should get free train transport	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	West lothian bus services isn't the best to so maybe rather than cut services you need to look at a streamlinecand also the night services running back from Edinburgh	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Buses are nigh on non-existent and barely run. We need more, not less! Then they'd get used.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I think their should be a budge given for child that need to pay for school bus to get to primary as stay far away but if only like small amountnvif distance you have no resources I currently need to pay nearlyv£7 a week for my 5 year old to get school bus as I have Asmara abd I can't do that hill everyday 4 times a day up and down but cost of bus is shocking think this area should be looked at even a small reduced rate of buse fair but £7 a week is alot to any parents single or nit	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	If a household with a disabled child has a mobility car why is this not used to transport son or daughter to and from school?	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The council continually reviews service provision using our Best Value Framework to ensure that we deliver value for the public and continue to achieve the expected levels of performance. There are rigorous internal scrutiny arrangements in place to assure the quality of our services and we are also subject to external audit and inspection.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Transition is needed here - please don't alienate those who need transport - survey the passengers on these routes and ask them what they need - accessible taxis - supermarkets providing funded mini-buses - help from charities??	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I feel we could improve public transport to work as i travel by bus to work sometimes and feel the service isn't that good as I end up being late for work which isn't good I am always good at timekeeping but I feel the public transport lets me down	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Some of the villages cannot be reliant on public transport as it doesn't always show. When people have commitments and they cannot get to work etc, when they expect to be able to travel, causes issues.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	we need a smart transport system not multiple 90 -100% empty busses running round the same roads at the same time just because the end destination is different get on 1 on common part and change to get to final destination. ;	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Feedback that I have had re Handicabs and Dial a ride are that the service has deteriorated with customers unable to book in advance and a lack of booking availability etc - It seems that these services are now provided at least partly by volunteer drivers who are not reliable as "employed" drivers and passengers are unable to build rapport as they keep changing.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Having smaller buses on rural routes... Also the reason people don't use the buses are two fokd: firstly, the timetable is rubbish. Not early enough for work or colleges depending on route. Secondly, the cost. IEven on subsidised route the cost is extortionate. £1.80 singke for mile.. You need smaller electric buses but without spending a fortune....	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Utilise your underutilised bus route... Consolidate services accessed by these bus routes.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I don't make use of public buses as I find it far too confusing having only lived in West Lothian since March. Maybe look into simplifying that	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Alderstone Road particularly is an area where plenty of people drive but could take the bus instead, what are the plans for helping this behaviour change to happen?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	All West Lothian citizens should have a chance to be consulted before bus routes are changed or cancelled as for some, they will be a life line.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I thought the council wanted to reduce car use - any reduction in buses will mean that more people use their cars more so I don't understand how this would work. I do think that offering taxis for children to go to school could be stopped instantly. I also don't really know why children who now have free bus travel anyway need a school bus - surely a bus pass means that they could use the normal bus service and that would stop the huge costs of providing school buses that have no other function.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Public engagement. Not everybody knows about services etc.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Again metrics in trial data must show this approach works first	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	If bus services are being removed, you must ensure that there is a suitable alternative for those who rely on the buses.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	We live in Armadale and have kids with ASN. I hope they will become more independent as they grow. The bus service in Armadale is dire. The journey to Edinburgh takes 1.5 hours! It does limit options for those who will perhaps never be able to drive. Surely with environmental concerns it would be better to have a reliable and actually usable public transport network. That way everyone gets a chance to reach their potential. Also as someone with older teen with a disability this is the first I've heard of a West Lothian rail scheme. We rarely use the train due to cost. Young Scot discount is not much and purchasing a disabled railcard is not cost effective for the small saving. Would have been nice to know about this and have a chance to benefit from it.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Buses are essential for persons to get to from work and should be promoted for use as an effective environment tool to reducing carbon footprint also reducing road traffic as a result of more people used the services. Then subsidising would be cost effective. Where as at the moment it's still cheaper to buy petrol than a bus ticket.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Working with the elderly will be a massive part of this work so that they can still get out of the house and do their shopping	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Supply buses that pick them up if need be as part of a route especially for people who can't drive but stop the private taxis!	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Instead of removing services completely why not remove service during low usage times and allow service to continue and keep communities connected	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Transport across West Lothian is poor especially for outlying areas such as Blackridge/Breich, how do you propose to support these areas. Handicabs and dial-a-ride are good for older people but what about young families who cannot afford their own transport and rely on buses.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	We maintain bus routes to town centres but don't restrict car usage. Make it harder to use a car in central locations and buses will be fast because they won't be held up in meaningless traffic, therefore more time efficient. It's a 100% fact spending goes up in areas with low car use as pedestrians spend more time visiting, which correlates to spending money.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	There needs to be an honest impacts discussion linked to all these ideas. Will this be forthcoming?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This is a sore one. West Lothian is not particularly well connected between north and south. But if we can't afford buses driving around empty then we need to find something better. Could West Lothian develop a car-sharing initiative?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	As I can afford it at present I am happy that concessionary schemes are being looked at and would be willing to pay a small sum to the cost of travel when using public transport	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Is there a way of making it more cost effective	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Removing bus services that are not commercially viable is also better for the environment, dial-a-ride / community buses would be more sensible.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This will be a loss to the local's that rely on the bus services however putting on other services to those most in need is a positive outlook, provided there is sufficient availability for people to use them. ; It should be considered though that people may not like the stigma attached to using the services which would indicate to other's that they have underlying issues (health etc).	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Bus routes must be made viable, a lot are under-utilised. The concessionary rail scheme is a luxury and Senior Rail cards could be purchased instead or use the buses.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	We should review services to ensure the users accessing the services are covered without wastage in terms of funding and staffing.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	We need to ensure that people, especially the elderly and disabled, who do not have access to private transport are not forgotten when underutilised bus routes are removed.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Why not charge a small fee to enable some subsidiaries to continue to provide a life line to some communities	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	BUS SERVICES ARE UNDERUTILISED BECAUSE THEY NEVER TURN UP ON TIME. LOVE HAVING MY BUS PASS BUT WOULD BE PREPARED TO PAY 50PENICE.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The council should consider running the public transport system in the manner of Lothian Regional Transport to ensure communities are not left behind and cars are kept off the road as per the Climate Crisis needs. Underutilised services often means that they are poorly strategised and not integrated into the needs of all.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Introduce a council bus for staff - staff to contribute to cost - reduce omissions	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	an Electric bus that picks up council workers	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Please ensure that you do not cut off communities and make it hard for people to get to their employment if they do not work 08:00 -18:00.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	bus services are vital for people getting to work/college etc - so timing of new services would be crucial	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	More money could be generated, and services improved, if WLC followed other authorities like East Lothian, in introducing tariffs and overstay charges for the newly installed EV charging infrastructure. At present it is nigh on impossible to use the lovely new chargers because people abuse them by parking their car on the rapid charger and then leaving them until the next day. Those who are on a journey or who can't install a charger at home are prevented from using the facilities by those who could charge at home but want to get free motoring courtesy of the council tax payer. Overstay charges would prevent this and free up chargers for use as has happened in Edinburgh, midlothian and East Lothian.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	If the council could generate enough electricity, then electric vehicles would save on fuel bills	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Travel by public transport is already an issue for some, so whilst a review is applauded, careful thoughts is required. This is particularly true of cross county boundary services.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Problems for rural areas. Could school transport for older children be provided on standard buses given that children are now entitled to a free bus pass?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I would be concerned that some will be left feeling isolated if the subsidised routes are cut but if the Dial-a-Ride scheme and other options are communicated well then hopefully this will mitigate this issue.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	WLC needs to provide cost effect travel to Edinburgh through subsidising. These bus routes are busy and viable. There is a real issue that getting to the hospital is a nightmare from some of the major towns, this shouldnt be the case. An examination of how you can provide this service is required and if you can provide this without subsidising then that is fine.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Public transport routes are vital to those who do not have access to car or are trying to reduce carbon footprint when journeys can't be undertaken by foot or bike. Some routes are not used as vehicles are old and outdated and the timetables very restrictive. Affordable, 'green' alternatives would be most welcomed.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	There is still a need for public transport services. So it would need a lot of careful consultation with those who use them. Maybe use smaller and more economic vehicles.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Support refocusing the transport strategy on concessionary bus, Handicaps and Dial-a-Ride, and removing subsidies for bus routes, The Scottish Government does not provide any funding to councils for this purpose and it is not sustainable for this subsidy to be funded solely by council tax payers in West Lothian.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	It is important that any changes are consistent with addressing the climate crisis agenda and continuing to support the viability of smaller communities across West Lothian.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	A decent bus service linking communities would allow people to seek work, make sure train and bus times align, work with Falkirk, North/South Lanarkshire, city of Edinburgh to share resources	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I would support increasing the concessionary rail fares, but not their removal - that could be a false economy, with elderly people less encourage to maintain their health by getting out and about.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Smaller buses on some routes rather than larger buses with only a few folk on might be a good idea	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I think I addressed part of this earlier. However instead of taxis and escorts being hired use school mini-buses with one escort in each of these buses.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	It is important that all services are not withdrawn from small communities as some people do not have their own transport. Could smaller minibuses not be used Instead on underutilised routes to reduce running costs without removing the service. You often see big busses with nobody on them in the early hours of the morning especially.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Bus routes are essential for remote villages, so adjustments to timetables would be sensible rather than complete removal of a bus route.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Your services are often under utilised as they do not meet likely requirements of potential users and are additionally unreliable. Work should be done to properly asses viability of properly run routes (having account of peak demand, which should be understood not to necessarily correspond to existing services) and consider providers who abuse a system e.g. what incentive is there for a driver who knows that their is rarely anyone looking to board on a particular route to keep to a timetable if they can complete the run quicker and have an extra 30 min break at the end. Particular care should be had on this proposal as there is a very real risk that communities can become disconnected. I would have significant reservations in trusting parties currently responsible for policy or management in this area to get this particular brief right.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Please consider ensuring reliable and comprehensive bus services. Unavailability of buses will lead to increased car use. which contributes to climate change/ pollution.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Make people pay more for the transport rather than make cuts?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Proceed carefully and do not create inequality in which people in poverty or who have accessibility issues face tougher times accessing essential services and jobs.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	More routes to be considered. and you introduced the bus to the airport buses to the airport. Buses to the local country parks to be introduced	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	more buses from Kirkliston to Livingston. more poverty friendly. buses to country parks to help children become more active	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	direct shorter bus route from Winchburgh to broxburn	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Winchburgh more buses to route for growing community	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I would like better transport links from Whitburn West End to all surrounding areas.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Again the people who have no access to their own vehicle penalised, If you look European models we could drive this forward but as usual Scotland talks but no action.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Council services have been removed form Linlithgow and transferred to Livingston. Yet the public transport from Linlithgow and Livingston is abysmal and is only that provided by 31 bus. It is not surprising that most people go by car! Is Linlithgow recognised by the West Lothian Council?	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	If there has been a failure of service on our part and you are dissatisfied please use the formal complaints process to escalate this issue. Each complaint is fully investigated, reviewed by Senior Management and improvement actions are taken, where appropriate. The Council has a formal Complaint Handling Procedure, which all staff must follow, this is monitored by the Scottish Public Services Ombudsmen, who also deals with escalated complaints where a customer is dissatisfied with the council's response.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The elderly NEED reliable transport links as not everyone has their own transport, however companies such as Horsburgh are NOT the answer as buses are wrecks and completely unreliable	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	miroslava cervenakova	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Your planners have permitted the expansion of towns like Winchburgh with hundreds of houses but no integrated transport provision. ; The bus service is unreliable so people cannot depend on it so won't use it; this leads to figures that indicate a not commercially viable service. Transport service licences should include conditions on reliability before assessing whether something is viable. ; Also train station promised for Winchburgh has not materialised despite demand being high	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Agreed in discussion with existing bus operators, can a route be altered to make it more viable for example buses terminating at Blackridge, could the route be altered that would take in harthill and whitburn and make the service more viable.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Many services are underutilised because it is not a seamless system. Equally there is no direct route to Glasgow or Edinburgh airport which will have a negative impact on Livingston in particular economy	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	and maybe if people would confront the wee (redacted) destroying shelters by kicking out the perspex or burning the bins or you put a camera on nearby lampposts to look for this shit so it gets stoppped.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Members of public are encouraged to report any crime or vandalism in the community to the Police.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	impose a max fee on taxis so they are not ripping off people who need them	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	the over 65 need their bus passes ,Not too happy about young ones with their passes,we had to pay out of our wages at that age or walk?	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	As someone who travels across West Lothian to work, I have just discovered that Lothian Buses (the only bus company whose fare prices I can afford) is withdrawing from the area in 10 days. I now have to decide whether to quit my job because I cannot afford the only competitors bus fares, or ask for a reduction in working days so I can afford travel costs. I cannot walk 3.5 hours to my job and train options are not viable physically or monetarily. I cannot understand how these routes are underused - most of the days I travel it can be standing room only on my routes. We SHOULD charge for children and OAP's. That is why bus companies are failing. Instead of cutting links between towns, cut out the pointless local town services.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	It takes me 2 buses and a 45 minute journey to get the 8 minute drive to my work. Here is your answer. Fix this, you fix the under utilisation of the routes	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Having a usable bus service that actually runs on time and it disabled friendly. 1 Bus from Dedridge to St John's Hospital...9 mins the others 40+ minutes	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	School busses and elderly free passes should stay and not be given to the young who can walk or pay for the services.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Some routes are under-utilised due to the fact the services are either late or no shows at all!	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	It is my understanding that all parking (or almost all parking) at rail stations is inadequate. Perhaps if this was better, more spaces, perhaps more would utilise it?	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Public services are already struggling massively with shortages of drivers which is having a negative impact. My partners relies on buses to get around work as a social care worker and often has buses late, not turning up or cancelled. Some services have just changed and are cutting out towns with routes that are absolutely needed.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I dont use the bus much but when I do find them very unreliable re timings or even turning up	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	My mum already can't get a bus to her work in the mornings as the service was added this is because there are no bus drivers make the service better and people will use them more.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This is the price of 'free' bus travel!!! We all know it's not free and a bus pass is no use to anybody if there's no bus service. Charge a small fee to all and prevent social isolation.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I have found the bus service to be very unpredictable with busses often never turning up at all.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The so called bus service has been shocking for years and getting worse. If you could make buses run when they are supposed to and get us to work and home without standing an hour that would be great.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	How can we use public transport anyway ? Its unreliable!	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	It takes an unacceptable 45 minutes to travel to Livingston from armadale.; The bus service is being reduced already but the bus is often so busy that there is folk standing, therefore suggesting at times this is not under-utilised.; There needs to be an express direct service. ; If you want people to use public transport it needs to be an easy, efficient, reliable, cheap service	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Bus well ghost busses nevet show turn up.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Bus routes are already too low in some areas and are unreliable on a regular basis. Companies need to be held accountable for poor service and funding withdrawn.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This is redoc. Public transport is a joke! Costs more for 1 person to travel a journey than the petrol would cost. Busses never on time and never reliable. Always dirty too.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	There is no transport strategy for residents of Kirknewton traveling to and from Edinburgh. Unlike x27 which is on time almost always, x28 fails to be in time most of the time and is over priced. Residents have raised it many times, the quality of x28 has got worse and worse and worse. Now it's a lottery if and when the bus arrives at all - the tracker doesn't correspond to what's happening on the ground - suggest the Greens instead of adding more bins get seriously involved in ensuring the residents from Kirknewton or East Calder have reliable and affordable services as options to car use.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Public transport continues to be too expensive country wide - take away all funding and build better path networks	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Probably necessary. Concessionary schemes could be means tested to avoid unfairness.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	As a bus user, a big factor in the underutilization of services on a daily basis is the unpredictability of them. We need to be able to trust a bus will turn up when we need to get to an appointment etc. ; ; Concessionary bus travel is essential to many.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Consider review of when free bus passes are given out. Retirement age is 66, bus passes given at 60, so they are being used to get to work. ; Don't have a problem with the removal of rail benefits.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The services are underutilised because they are infrequent and unreliable. Check Murieston area for example. The providers do not seem answerable or the service supervised in order to ensure it is providing what it was paid for. A well run reliable service will be used.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Why not charge £1 for dial a ride and handicaps. These are door to door services and would be a good source of income.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Please consider not everyone has a car for ease of transport, we have to rely on public transport but they are not reliable and you can't always get to where you need to go. The services to St John's Hosp are terrible.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	as transport initiatives are also implemented from a Scottish Government perspective, there should be revenue streams provided from the SG for vulnerable adults, and those with a bus pass, etc	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The present Handicaps and Dial-a-Ride schemes would appear to be unaffordable in their present form and should be reviewed, the present service offered to the over 60 should not be removed	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Would it be possible to look at a digital strategy for car sharing to help on non-viable routes. It is understandable that one person using a bus is not value for money, but they do still need to get to their place of work and other modes of transport like Taxi are not financially viable to them.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	If public transport was more affordable more residents would use it.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Perhaps the free bus pass for over 60's could be means tested.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Free passes excellent, alternative charge a minimum of 50p or £19 or £20 a year a nominal fee.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Large buses appear to be regularly underused. Is there a benefit in reducing size of vehicles, recognising that staff costs would remain. Is there a benefit in reducing vehicle size so that lower grade of driving licence can be permitted.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Although there are many uneconomic bus services, how many people will be trapped in their own town without access to key services in other parts? Will the other initiatives be able to fill the gap? And if not, by how much?	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The bus services out this way (Calderwood) are not fit for purpose. The service is unreliable and very stressful. Twice this week the X27 has not turned up at morning rush hour - my husband had to wait nearly 2 hours to get a bus in to work.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Some of the richest people I know use their bus passes when they could afford to pay a bit. Too many subsidies, no wonder routes aren't viable. For a full paying fare the buses can be expensive.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Another recent problem is that routes X24 and 26 have recently been too full, resulting in drivers refusing to let passengers board - resulting in a lot of waiting time for passengers including school children	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Eliburn is served by X24 and X27. Of this X24 service is erratic and X27 appears set to go away in November. Would it be possible to mandate both services for Eliburn even if the fare has to be slightly higher.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Bus services are vital parts of our community. The council must work with bus operators in any review of networks. The commercial network should be the main focus with the council only having to support in a way that gets passengers to the main network. Right now in West Lothian, a large council owned company is running duplicate operations across a long serving commercial operation. Completely wasteful use of resources and it's unsustainable. Whilst it might look good to see so many buses operating in the area the fact is the network demand is not there to meet the number of buses operating sometimes within a few minutes of another bus. This model can only cause long term damage. The impact could be felt by the council as commercially viable routes disappear due to duplication on main corridors. These will end at some point and the council could have huge holes in the network to fill when the dust settles.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I have battled for bus services in my area since the eighties. First Bus were useless and their drivers were very rude with people on occasion. Things improved with Lothian Country but now they are becoming as unreliable as First/McGills. There are already cuts to bus services beginning on November 20th and I for one am very angry about it. The x27 will no longer travel the route through Dedridge West as in up round by Nigel Rise, Crofthead, Talisman, Staunton etc. Elderly people living in the area of Staunton/ Talisman Rise etc will have no bus service to Edinburgh. This is a ridiculous state of affairs. We are the largest town next to Edinburgh. You say many of the bus services are underutilised, well everytime I am on a Lothian Country x27 or x28 the buses are packed. Reason being there are usually buses that do not turn up. When a bus service becomes unreliable, people tend to stop going for that bus or walk to another stop, so of course it looks like the buses are under utilised. West Lothian is in many areas, still a rural county and people depend on a bus service, especially for doctors/hospital appointments and shopping. I use the bus service frequently for collecting my grandchild from school. I will now have an extra 20 minute walk to another bus stop, so that I can get a bus to East Calder to collect my grandchild. This is because the x27 will no longer serve Nigel Rise. You go on about Climate Change, leave your car at home, use the bus, save energy etc. How can you leave your car at home when the bus service is taken away? The decision to take away the x27 from the Nigel Rise/ Dedridge West route is saving the company or the council how much exactly? I can only speak for the area I live in, but what I will say is, give us a decent, reliable bus service with buses arriving on time and we will use it. Yesterday, going into Edinburgh it took me an hour and a half on the bus to get from Dedridge to Edinburgh, it was ridiculous and the faffing about at Kirknewton with get on the next bus etc. The driver apologised as this next bus was half an hour late and it was just about standing room only. How can you say the buses are underutilised, when they are not even turning up at all? The public transport in West Lothian has been dire for years, and I know because I fought for decent services from the eighties, when I needed to get the bus into Edinburgh for work. You need a public consultation regarding public transport and you need to do it and	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	So, let the oil companies and govt charge us unconscionable rates for fuel for our cars, to encourage us on to public transport? What public transport?	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The cost of taxis needs to be looked at.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I want to buy a bus season ticket as I do a season senior train ticket. I would not like to lose my train pass.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Carr before horse needs to be considered. Why not make it easier to use busses and cycle networks and harder to drive....Livingston is very car heavy with lots of parking despite so many people being within a walk of a bus to visit. Make parking too expensive, cocking easy And the bus a better option.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The reason many are under utilised is simply because they are currently not good enough. This is the case across the whole of the UK. A fully functioning and integrated transport system (as in Germany) is paid for by the way it allows the public to get to work, to shops, restaurants, to the doctors, to school, to job centres... A system that offers any less than this will of course not be used. Especially if it is expensive. And especially not if they have their own mode of transport. But if you can't afford to run it, you can't afford to run it.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Public Transport is too expensive and unreliable.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The train service needs improved. I can't get a train at the weekend in the morning. Why do they start late morning? Do you want people to drive?	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Buses need to run on time then probably more people would use them. Also you need to run a huge advertising campaign (Facebook would do if you don't want to spend money) encouraging the use of public transport. I have relatives all over the country and everywhere I visit have better transport systems and links. Let's not forget not everyone can or wants to walk and cycle to where they want to go.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	More bus services should be put in place to connect towns in West Lothian and additional bus services to Glasgow are necessary. Current services like the 280, x18 and x25 should run more frequently. The government should fund bus apprenticeships or other schemes to encourage more drivers, and pay bus drivers more.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	making subscription	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	lower age on bus passes	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	reduce the age of young scot card to 20 and make a council bus for employees	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	reduce the age on the free bus pass NIC so the buses will make back money; ; companies should make their own company bus for their employees	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	making it a subscription for the busses	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Electric busses	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Pity about the 280!	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Means test free bus travel for the elderly. My parents both benefit from this and have the means to pay, they do not 'need' this benefit. It would be better to retain it for young people to encourage their use of public transport and for others who cannot afford it.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Sell your shares in Lothian buses as they are removing half the routes anyway and leaving folk with a shell of a bus service. How do you expect to get folk out of cars on our congested streets with cuts to bus services and funding?	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I think the Council should lobby the Scottish or UK Governments, if necessary, to look at a change in the free bus pass scheme. ; As the retirement age has increased the age at which a person can apply for a bus pass should also rise in alignment.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The bus services in West Lothian are diabolical anyway. The X27 service for example is now going to parrot the X28 route almost for its entirety. Yet WLC have said or done nothing!	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	complete overhaul of bus routes is required. bus operators should be more strictly monitored and penalised if agreed service is sub standard.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The free buses for under 22's is a fantastic idea ! I don't have the need for it but appreciate that many other do and it appears to be well utilised.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	A scenic Heritage Tramway around the entire County of West Lothian would be literally printing money.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The public transport within West Lothian is a joke when the bus companies run their service within one minute of each other, then people have to wait for an hour, especially at night	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Buses to Edinburgh from West Calder should be available during rush hour time. Living on the A71 and having to get a bus to the centre to get another to Edinburgh our capital city is beyond me. I also strongly recommend that there should be better communication for services running late or cancelled and consequences for buses that do not show up	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Get the supermarkets to fund buses around their locale - they have been the cause of the demise of the high street - the least they could do is ensure that customers can get to and fro around town.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Bus service (X38) in Winchburgh is poor and when are we getting the train station - an actual clear update is required for residents	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	A review of the time tables would probably help with this.; The buses often leave the railway station one or two minutes before the train is due to arrive.....Why? Re-align the time-tables - it would make a lot more sense.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	What wrong with providing an Uber like service ?	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I know of some services that are definitely underutilised as their timetable results in the bus stopping at a simliar time to another service. That means, whichever bus arrives first, gets all the passengers - so a service running only minutes after another will look as if it is unused when, in fact, it is just that its timetables doesnt make sense. My 80 year old mother periodically travels to West Calder for healthcare visits etc and often asks me to take her there and back. Going is often ok but the return can sometimes leave her waiting almost an hour for a bus (due to the way services have been timetabled). Every bus stop should have live bus info - or at least clearly show the number/website where people can get that info.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I strongly feel that elderly rely on subsidised buses to get them out and about meeting up with others possibly a small charge say 50p or £1 with the bus pass might help.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The west end of Dedridge is once again about to be affected by the removal of an essential bus service, the number 27 bus to Edinburgh, which I think stops running this route on 20th November 2022? This is an essential service for anyone who doesn't drive or have access to a vehicle. This has happened previously, but the service was reinstated, much to the delight of those who live on this side of the town. That means that all bus services to Edinburgh passing through the bus station head in an easterly direction and the west side of Livingston is left un-serviced. This can't be allowed to happen again.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	free passes to the under 25 should be stopped now .	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Looking at cost- more people might use the services	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	1. Fast and long route trains.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	4. Easy access to bus and train station.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The whole bus system is shot. Buses .dont show, they do not run when and where you want them too. A couple of commuter buses that run around livingston would do well. Like the number 9abc horsborough bus in murieston.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Make getting into Edinburgh and Livingston easier in other ways e.g. parking at tram stops, train stops, park and rides into town that's a bit cheaper.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Reduce public transport ticket price and more people will automatically switch.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Bus tracking apps are excellent but imperfect. I appreciate these will be third party owned but any improvement you can elicit there may offset impact of service reduction.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	There is no public transport, can't catch a bus	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Scotland has the most expensive rail and bus tickets in Europe and so the solution is to remove subsidies. Luxembourg recently introduced free bus travel across the country for everyone. Interesting to see how two small countries are tackling the same problem.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Services may be underused and yet a vital lifeline. It's important that this doesn't lead to rural communities being cut off completely	9. The respondent made a comment on the survey question.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Luckily I ma not affected by this, but I would imagine more remote communities needing some kind of provision.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	transport is so important when someone does not have a car	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Concerned when I reach retirement there shall be nothing left at all.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I don't have experience of this to comment but would be concerned for those who currently use this service.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I have to drive my disabled child around and have not tried the schemes and don't know much about them however I'm sure they are valuable to many.	9. The respondent made a comment on the survey question.	Thank you for your comment
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	It is ironic that this section is titled '4 Environment, Climate Change and reducing energy use'. How can the council claim to take climate change seriously, while pursuing policies that will lead to less public transport, and so force people to use cars more? This is also very isolating for people who do not have cars, and especially for those living in more rural/less accessible parts of West Lothian.	9. The respondent made a comment on the survey question.	Thank you for your comment
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	It would not be right to offer feedback without a sound understanding of the services this relates to and the im0act on its service users.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	We are doomed if we apply standard cost cutting methodologies to fighting climate change.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	My wifes bus to Livingston is packed every day she uses it. The 276 is being withdrawn due to being underutilised. Now she has the option of McGills and if that bus doesn't turn up she'll have to walk 6 miles to work and back every day.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I hope you dont expect my autistic daughter to get 2 buses to school that is outside blackburn for her school starting at 8.3am. The council demolished blackburn academy so my daughters chatchment school is bathgate, blackburn doesnt have a direct bus to it so there is no way my she would get on 2 buses. 😞	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This sounds draconian. Many rely on concessionary fares.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Essential service	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	i tippical lab /con hit the oaps and disabled as per ueual	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	now have bus passes for older children who can travel themselves but younger children and people with mobility problems i think this should still be in place.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Concerned for older school children who live in more rural villages not having a bus service for them to get about especially as they have been given free bus travel recently by the Government	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This is lacking	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I don't fully understand this part	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The format of this survey is poor and does not lend itself to true scrutiny of the proposals. The survey is badly designed and off putting to many given the large blurb of text under each heading - the language is in business speak which is essentially meaningless. There is a lack of clarity on the proposals and the reader is left to assume what the blurb is getting at. This survey should have been in plain English with examples of the proposals which would support greater engagement with the activity. There should be space for feedback on the methodology being used also - this has not been made available which adds to suspicion that the whole process is already decided, and course of action is already determined. The council and COSLA must do more to protect our communities and demand a fair settlement from the Scottish Government. This exercise highlights the political failure of the funding model and it will be the local community that suffers as a result. The end of the survey does not have a 'Finish' button, merely a 'Next'. Overall - very poor approach.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Maybe services are underutilised owing to the poor frequency of the service? In other words, it's not a convenient option for people.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Not sure I understand removing subsidies for all non-commercially viable routes. If a route is commercially viable then presumably it doesn't need a subsidy, so is this saying that all bus subsidies will be removed? Doesn't sound good for some of the smaller communities	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Again not telling which routes or reducing the subsidies are as yet again I am unable to comment on this. You are not telling us enough information.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Unviable bus routes are the difference between someone getting to work or not, please make sure that you are not stranding some communities.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Once again, vulnerable groups are suffering.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	The lack of real facts and figures about what is going to change makes it a challenge to comment effectively. More information is required before any meaningful consultation can take place. We should be provided with a statement for each section and the option to agree, disagree or have no opinion. I would strongly urge the council to re-present this consultation in a more user friendly format.	9. The respondent made a comment on the survey question.	Thank you for your comment about the survey, the council will carefully consider all feedback and use it to review and improve our consultation approach.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	that will have a big impact on elderly	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Again, bus provision is important. It can't be denied that certain routes are 'underutilised' but there may be a minority demand that should be recognised. The reduction of concessionary rail travel to 'national schemes' isn't great but might be palatable; and I don't know how much it is used.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	In general, I believe that bus services are under utilised because they are so unreliable. I would be happy to use more public transport if I thought it was actually going to turn up.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	bus service is a joke right now with buses not showing or canceled the whole day near enough	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	At the moment the busses are very unreliable and with reduced number of taxi services since the pandemic it needs to be more reliable.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Well, I will just have to invest in a new car. Fabulous incentive to be environmentally friendly. How about investing in a future?	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	As a resident I do not understand what this will mean to the services I receive due to the vague and broad terms used in this consultation document.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	As a resident I do not understand what this will mean to the services I receive due to the vague and broad terms used in this consultation document.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Do not understand last sentence - "The council would also propose to remove concessionary rail schemes with are in additional to existing national schemes.";	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	This may isolate some people.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	I can't see any point in continuing this survey as it is a waste of all our time without the information, we need to give an informed opinion.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Please retain the murieston route as it is essential	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Yes, no matter if we are disabled or not, we still have to pay, right? For god sake?!	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Concerned this could increase isolation for older people	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Could have better transport system	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	More efficient bus and train services	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	Wow, this is depressing	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4B Reprioritised Passenger Transport Strategy	All members of the public including young people must have reliable accessible transport system	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Taxi etc should also be stopped	1. The respondent advised that they agree with the proposal.	The Public Transport Unit keep school transport provision under constant review and identify savings where it is possible to implement them. Schools only use taxis where necessary to support effective delivery of the curriculum, or the welfare of a child or young person.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Could work but may need a trail first as may cause issues to public travel?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This is a good idea. I have already seen an increase in our community in the number of children using public transport to get home (currently within the 2 mile radius) Use of the NEC cards would be a good saving for local authorities.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	They should use commercial buses	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agreed, where applicable use existing bus services.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Bikes and walking buses - better organised routes (nominal payment?) incentivise walking for youngsters?.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Think we should utilise free bus transport as this is already subsidised by the government.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	make it the statutory levels let parents get children to school	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This is long overdue. I totally support moving to the statutory legal minimum for school transport, especially now that bus travel is free for young people. This should take priority over reducing support for general bus services.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Maintaining the present cut-off for free transport is unsustainable. It does not accord with other aspirations such as carbon reduction air pollution control, physical activity, physical fitness, and p[romoting use of alternative transport methods.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Falling back to government standards can only be supported if funding is so tight now.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	well since travel in now free for upto 21 year olds, school buses could be reduced	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Again let school pupils educate themselves using public transport to and from school ; Primary kids still need transport	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Its okay for kids to walk to school as long as there are safe paths or cycle paths	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Moving to statutory provision makes sense. Not sure what potential impacts free bus travel will have on this for older children anyway. Could reduce the secondary provision at least.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	yes completely agree with this! (as long as there are sufficient public bus options)	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree, children should walk, it's good for their mental health.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Do it. If it can be made more efficient, go ahead.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	No objections	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Support and agreement for this approach; which in many instances will help encourage safe and active travel	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This is an excellent idea.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Yes cancel the school transport, plenty of service buses	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	School buses are helpful, but if there is a public bus the kids can use then I think that would be fine to use as well.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Seems fair, so long as pulis ad not refused travel on commercial routes. However, many school buses go straight passed the bus stops so not sure how you can make savings.. Only ever see the secondary pupils catching the bus very few primary. This day and age 2 and 3 miles is a lot and Dan be dangerous especially in dreich weather	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Distances in west lothian don't necessarily have commercial bus routes (e.g. kirknewton to balerno) so this review would need to be considering logistics and individual safety and not just distance	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	So, does this mean the young person's National Entitlement card will remain in place? If so, it might set back some of the problems for young adults but what about other adults and the elderly?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	As long as there's a service to get children from their homes to school the new bus passes would cover travel anyway	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	If the children all get the young persons national entitlement scheme this sounds a good idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Apply the statutory limits for buses. (There may be a pickup point nearby that those that fall within the 2 mile / 3 mile route could utilise but would require them to walk to such a destination but is close enough to justify?)	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Remove free school buses. The system is badly run.	1. The respondent advised that they agree with the proposal.	If there has been a failure of service on our part and you are dissatisfied please use the formal complaints process to escalate this issue. Each complaint is fully investigated, reviewed by Senior Management and improvement actions are taken, where appropriate. The Council has a formal Complaint Handling Procedure, which all staff must follow, this is monitored by the Scottish Public Services Ombudsmen, who also deals with escalated complaints where a customer is dissatisfied with the council's response.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Easy to achieve if you get rid of separate Catholic schooling	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	The schools transport with Taxis is just a joke!! If people chose to live in a remote area then it's up to them to get the kids to school. I agree there is a need for buses but not taxis seen this abused so many times.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	As above. The transport should be looked at. I was told if a taxi picks up a child and they are late coming out. If the driver leaves the school grounds and has to return within a few minutes it's a double charge. Terrible waste of money. Over a million reported in the papers paid to a dodge taxi company in Livingston!! That where the money is going.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	statutory requirement should be what's provided	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree strongly with this proposal. Given the challenges to fund council services, this must be reduced to statutory limits in line with most other areas of Scotland.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	pupils will benefit from walking or cycling to school.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Since the introduction of the Young Persons National Entitlement scheme this proposal seems reasonable	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Quality stuff thanks	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree - if the Scottish Government doesn't provide sufficient funding, the council can only afford to do the statutory minimum and nothing more	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Perhaps children could walk to school All children have bus passes that can be utilised therefore no need for a school bus.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Ok as long as those who are vulnerable are looked after	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Free travel on the normal busses would be great as long as there is a service provided that works to the same times the children would need.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This would be fine if the public buses were in any way a reliable method of travel.	1. The respondent advised that they agree with the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This seems reasonable providing there is an acceptably safe route to walk to and from school.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Acceptable as helps children take ownership of travel needs.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Providing commercial buses have capacity, and route regularity.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Maybe positive move...what about safety?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Cautiously I agree. But no child should have to walk 3 miles to get to school.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I do however agree that anyone who is outside their own school catchment should not get subsidised transport as that is a matter of personal choice.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	Good, should start with stopping the concessions to private bus companies so they're not polluting the atmosphere with ancient buses picking up school kids and giving them asthma	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Sorry - should have read this one first - seems like a plan - should be able to get a normal bus by the time they are at secondary school.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agreed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	As long as there are appropriate local buses though	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	ok - so long as this doesn't endanger school pupils travelling to and from school.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This is a good idea for secondary schools as long as there is sufficient provision for walking and cycling, yet the council has been putting speed limits in urban areas up from 20 to 30. Walking more is great, with many benefits, but it is to be safe, particularly during the winter when kids are walking in the dark. Bringing back the 20 speed limits would be a great start, along with more cycle lanes.	1. The respondent advised that they agree with the proposal.	The annual Accident Investigation and Prevention programme delivers casualty reduction and improves road safety.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I believe this to be true. Most families drive and even children who get free rides everywhere in Scotland still do not use public transport as often as possible. However, the school services is a different situation. If the council provides direct links (only 1 bus journey) to school then I believe it is viable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Reduce the amount of pupils being taxied around..save a fortune.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agreed. Don't think I ever got subsidized transport to school!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Sounds fine. Make it possible for kids to use active travel. Make safe spaces for kids and secure places for travel equipment	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	couldn't the new free under 22 bus scheme be used where a public service bus is already taking the same or similar route, for secondary school kids at least.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	After reading the above, I will continue to trust your decisions in the areas I have no experience in , but thank you for the opportunity to co-operate !	1. The respondent advised that they agree with the proposal.	Thank you for your comment
Environment, Climate Change	4C Reprioritised School Transport Strategy	I agree, particularly where parents opt for out of area school placements (denominational schools), this should be the responsibility of the parent	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I agree with this as long as the child as the YSC which would mean no additional costs to the family.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Completely agree, it's nonsense for the Council to be funding this when buses are free for young people. Obviously it will be necessary to maintain specialist transport for children with learning disabilities or physical disabilities.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	It is important that our children get to school safely and feel that what is being proposed supports the school transport strategy. The Young Persons national entitlement scheme is very much welcomed and will promote student independence.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Provided service buses operate regularly on these routes then this could work.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Seems reasonable, money-wise, but what about all the buses you're going to cancel? What will the youngsters use their free bus pass on?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Using your Young Scot card for smaller group school outings, yes would be good and would save you money, would not be annoying the public as it wouldn't be constant! Would also help some kids get used to a bus!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Use public transport as it is free (for under 22s) and remove school bus altogether.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This does not seem necessary, or at least should be subsidised not free.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This has been the case for years me and my family has this with public transport when we were at school	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Seems sensible if there is a commercial bus route available and there is free travel for children and young people. Younger pupils though may find this difficult.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This sounds acceptable although I don't have much experience of it.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	School transport is rubbish. Just run regular buses at key times and let kids pay or use Young Scot cards	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agreed that the national entitlement scheme is a good alternative.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Happy with this proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree most kids do live within walking distance. Have always thought if its a well lit route and not isolated and unsafe then kids should walk. Buses are an unnecessary part of school life.; Public transport could be used as all kids have free passes anyway. This way the environment would benefit and kids can get exercise if walking distance is viable	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I also think you have to look at the children who are taxing as I'm sure this costs a lot of money also	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I agree with this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	school bus service. Is good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Makes sense.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree with this proposal.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Yes, there is a need for this service	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Fine.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Seems fair enough in saving costs	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Good idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree. it's done elsewhere	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	No issues with this proposal.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I would agree with this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Yes agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Reasonable proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Reasonable proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	walking is good exercise	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Yes that is required	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree on the whole.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree with proposals.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Good idea.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	Sensible proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I agree to this, pupils should be travelling to the nearest school or use the existing bus routes.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree that provision should be within Statutory requirements.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I totally agree with this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I agree that this would save money and if there is public buses then kids could use these	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Seems fair	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agreed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Sounds like a reasonable change.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	this seems a sensible idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Makes sense	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I support this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Supportive of this proposal. The Young Person's National Entitlement Scheme can offset some of the change resulting from this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This makes sense.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agreed - council should only provide what is statutorily required. Children can easily walk 2-3 miles (I understand other procedures are in place for disabled children etc)	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Sounds like a reasonable approach.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Crazy, that public money is currently being spent to provide a service that is not statutory. This is shameful and should stop immediately.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree with this. Under 22's can obtain free transport cards so no need for school buses	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree but rural locations need careful consideration. Safety is an issue.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	residents in villages should be encouraged to walk to school; - agree re implementing statutory legal minimum limits for providing transport	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Need to ensure we understand how many pupils will be disadvantaged by not living near a commercially viable bus route, and any pupils likely to be put at risk by being the only person on the bus getting off at an isolated bus stop.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree, however this will almost certainly drive an uplift in use of personal vehicles to transport children to school. Are there plans to introduce alternative options such as "walking bus" or suchlike to encourage pupils to walk/cycle?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	I support this proposal, as it will provide a pragmatic solution to maximising underused employment land to the West of Livingston. However, this requires to be properly masterplanned, with thorough consultation to ensure sufficient greenspace, health infrastructure, active travel routes and employment opportunities etc. This is a highly accessible part of Livingston and with the energy and cost of living crises can provide a home to families that may not be able to own a car, but can still access employment, community and leisure opportunities easily.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	As youngsters now have the free travel on local transport I agree with this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	If someone is receiving carers allowance and a mobility car and a top up on their benefits because their kid is disabled surely it is their responsibility to take their kids to school just like anyone else.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Good, as long as well-lit and well-maintained footpaths are available between pupil's homes and their schools.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	ok - not statutory. get on with it	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I walked to school every day of my school life - too many buses provided for children who should be taking some exercise. I can't comment positively or unbiased on this subject.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Aligning with statutory limits appears to be fair and equitable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	parents should be responsible for kids to get to school.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	agree - but would like to see the effect of this on pupils once the data is collected	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Reduce	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	If there is a bus route they can use then cancel other buses that pick them up	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	The current system although working the actual buses are antiquated, pupils have a Young Scot card therefore can use local bus services, in the statement above you talk about cutting transport how will this help. These services at present are not being utilised by pupils so may be cut before they need them.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Use commercial bus routes using the YPNES is a great idea. Stop school buses.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	If young people under 22 are getting free transport then they should use their bus pass to and from school.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I hope this wroks out well and no kids are disadvantaged.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This seems to be a fair way to save costs however it must be remembered that very small children aged 5 would not be able to travel on a public bus alone so perhaps it should be considered that there be a cut off age say 8 years old unless there are extenuating circumstances	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree. Children and parents can walk.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Personally I think the changes made in this area so far have been positive. As long as the safety of the school children is not compromised.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Safety of children should be paramount and if public services are reduced children may not be able to get to and from school in a timely manner	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree. Let secondary pupils use their entitlement cards to get the service bus to school. (or walk) This would also generate income for the bus companies who claim they need their under used routes subsidised by the council	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	What are the statutory limits? It is hard to comment without those being made clear. I do not see a problem with secondary school pupils using their entitlement card to travel to school on public transport but the council needs to ensure there are routes to do this, with a high enough service level to cope.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This is not the case in Polbeth. Children are bused to Parkhead Priamry when they could easily walk. Stopping the buses will save thousands of pounds and encourage a healthier lifestyle.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	As long as the kids can use commercial bus routes instead then this seems reasonable	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	If you are going to remove school buses and get the young people to use their free travel passes. There needs to be a decent bus service, as in buses that actually turn up, for them to use this.; As it is, most young people that I see seem to be driven by their parents/carers to school. It's incredible that we have all this money to give for concessionary travel passes, but not it seems, to actually provide a clean, decent, reliable bus service.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I believe if parents chose to live out with the school catchment area it would be the parent's responsibility to transport their children to school. Also, the free bus pass for the children offers them more opportunity to use the buses at different times. If they attend school clubs, visit friends etc do we really need the cost of these and private Taxis ??	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	As above, the Council should be looking at who is eligible for taxis.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agreed assuming that the reduction doesn't involve pupils having to walk through rural areas with insufficient footpaths and lighting.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	You need to start this measure before then reducing public transport as you may find services that were under used become more viable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Walking and cycling is the way to go. However, recent developments in Livingston, for example, have made this dangerous for many people. The roads are too busy and the drivers too dangerous, and a town that was once designed with underpasses and foot bridges, not requires pedestrians to have a working knowledge of the lanes and traffic light systems of a given roundabout, knowing when to dart across the road between light changes, hoping that the driver indicates (they don't) and that they are in the correct lane (they're often not).	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree on these savings but if this is to happen you cannot also drastically reduce public transport services. Need to ensure adequate public service at school times.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	May be problematic if you plan to remove bus routes.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Support as long as there are commercial bus services pupils can use their under 22s concession on	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree especially as new schools in Winchburgh should reduce travel distance for local children	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Stop the buses to Parkhead ps. Need to look at making parents more accountable for getting their own kids to school. That is key when you look at house, so why is the council left to pick up the bill.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Stop using taxi services for pupils whose parents have the ability to take and collect their children themselves.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	the use of the young persons free travel card would be a lot less expensive than putting on school transport and a big saving	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Would make sense to use the free bus passes, rather than the council paying for the running and maintenance of buses.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I can understand the concern and the decision to update the distance threshold for using the statutory school transport but not I would be less convinced if the Young person scheme were to be removed entirely. I'm not saying you said that but just pre-empting my concerns.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I agree with this proposal, however measures will need to be in place at schools to reduce volume of traffic (car free zones, double yellow lines, walking buses co-ordinated by the council etc) as people are lazy and will turn to cars.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	The commercial network should be used to support school travel, secondary pupils, as the government is already funding this provision so why should the council be paying bus companies as well for bus transport. Surely there are enough main routes which do past schools to allow this to happen?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Of course we should move to statutory levels for school transport - are we not trying to encourage walking and reducing our carbon footprint?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This is a good idea. More walking to school makes good sense for keeping children healthy. However if the child is disabled this needs to be an exception to your rules including children with severe learning needs.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	As youths can make their own way for free, then scrap all school transport which would save more money.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	People should be at a school within walking distance of their homes there is enough schools within the catchment areas to accommodate this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Makes sense as buses empty and my children had to walk as missed out by centimetres	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	So long as public transport can accommodate and children are not out at risk walking rural roads alone	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	As long as children are kept safe agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Seems sensible. I would assume ASN transport wouldn't be affected by this tho?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	However, perhaps scrap taxi services for those living in countryside, unless they are active farm businesses. Those in high-value converted steadings etc should not be subsidised.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Using commercial bus routes does sound cost effective but how would WLC ensure pupil safety?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I believe that there is an absurd amount of money spent on school taxis. This needs to be seriously reviewed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	There is the free bus pass scheme that all school pupils have been able to apply for so they can already take a bus for free. There should be a review of the number of school taxis used to transport pupils to and from school when their parents choose to live in the countryside. It is their parental responsibility to get their child to school. They should pay for their own taxis.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This is only possible due to the Young Persons bus scheme - otherwise these distances in a Scottish winter would be unacceptable	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Would additional provision be in place for secondary school children who have identified needs that could prevent them using public transport? E.g. a child with autistic spectrum disorder who finds crowds of people (especially those they don't know) as a trigger? Otherwise this makes sense.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Do what is statutory required	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Commercial bus routes should be used	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Excellent idea. Young people can easily walk the distances outlined. It would have a positive impact of pupil health and on their learning. If they couldn't walk the distance then that would be reflected in the statutory provision.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	LET THE KIDS WALK WOULD GIVE THEM EXERCISE.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree with proposal. School children should be encouraged and, where required, supported to apply to the Young Persons national entitlement scheme. This may assist with the viability of routes in 4B.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree - kids should walk to school more - would help with keeping them physically active, improve learning, reduce obesity. This may encourage more parents driving them to school increasing issues of parking at the school gates.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	OK	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This seems sensible.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	In favour of this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I agree with this proposal.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agreed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	A good approach- particularly exploiting the existing government support	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Yed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Seems fair	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	You would need to ensure a reliable public transport system at least for to/from school hours but I think this is a good idea.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Provided that a direct route was in place on public transport. The public transport doesn't always align with start and finish times of schools.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree - encourage walking and less vehicular travel.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Although this will probably mean more cars on the road at peak times, it's ultimately the parent's responsibility to get their children to school, so I would support this strategy.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Go to a local School or use your bus pass	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I agree with this strategy what happened to pupils walking to school, as the Scottish Government complaint that children need more exercise, what a great a way walking to school.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	High time WLC STOPPED paying out fortunes to taxi companies ! 1 child in each taxi, it's ridiculous and it's the people of West Lothian who fork out for it via our CT which WLC put up yet again ! Find alternatives, and research which families truly need the transport scheme, stop picking up children who live just a few 100meters from their school !	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	There is a lot of waste with transport in private taxis etc	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Use of the free travel for children would be very beneficial	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I think this service is abused by the public, I live rural and see the school bus collecting kids while parents with two cars at the door sit at home or in the garden, especially now with most working from home.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Sounds appropriate	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree, if people choose to live away from school they should pay their own transport or use existing services	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Great, another honest question. Agree, saving should be made.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This is fine if commercial buses are fit for purpose and who is going to maintain the safety for non school passengers on the bus	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This is not a one size fits all so agree this could be implement but with caveats in place for those with a neurodiversity, physical or learning disability to be protected and still have transport provided.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Abolish School transport, Umbrellas could be provided to prevent Weather related illness.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	The free concession card is a great idea and then the council wouldn't have to put on school buses	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Secondary pupils could use public buses.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	As an ex taxi driver (who never done school contracts), i was always angry at the multi £m's freely given out to drivers for school contracts. Its a joke that ANY driver can be paid hundreds of £'s every week for contracts. The normal metered fares (or set fares) were peanuts compared to the extortionate fees openly paid out by WLC.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. The survey contains specific questions regarding school transport.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Makes sense	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I agree with reprioritising Transport for schools. Transport is very important to get people to school	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This would be a good way to reallocate resources.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree you could go further by reviewing the taxis; That take kids to school that needs to stop	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	Given that young people can get free buses anyway seems sensible but there would need to be a review of routes especially for younger children as they shouldn't be expected to cross busy roads	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	'Statutory minimum limits';- seems comprehensible and in line with economies elsewhere.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	agree. The bus pass scheme for kids for free travel is amazing and all kids should be enrolled.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree parents chose where they live it's up to them to get kids to school. Why should the public pay for this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Fair enough. Don't do both either free school bus or free travel. Cut the school buses send them commercial	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	remove concessionary rail schemes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	School buses (especially for secondary pupils) needs to move with the times - there is a new development in free transport for young people paid for by the Scottish Government. The council needs to design a new approach around this development.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Good idea - as long as the services are in place to allow Young People to travel, eg to school, etc	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This linked to my above comments makes total sense, although this is for the general school population I tend to think that additional needs pupils require to be looked at.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Again agree as there is some individuals who could use public transport free with young scot card	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This sounds suitable if a public bus service which was reliable was evident.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Encouraging pupils to have the entitlement card and trvuding to the statutory level makes sense	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	These free travel cards are a waste of money for young people, bikes and feet need to be pushed as healthier options as well as better for the environment.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Does there still need to be as many secondary school buses now there are young person bus passes. ; Could the bus operators and council work together to provide transport for pupils on normal service buses which at the same time may allow less viable services to remain.?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Seems fairly reasonable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Stop using taxi services for pupils who use inflated costings	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	encourage this to all pupils as west lothian have a good bus service in most areas so make them use this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	With free bus travel for all with young scots cards do we still require school transport in secondary area?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This might work, as long as the YP could access a bus easily and they ran to time.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	We shouldnt provide travel less than the legal requirements. This is a sensible change. However if no safe walking route for particularly primary children the Council needs to provide transport. The YP entitlement card being available to all children, then particularly secondary students can travel on commerical buses.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Encourage walking/cycling to school. Currently there does not appear to be any impact studies on parents dropping their children off at school gate. The pollution caused by this and the increase in traffic can be viewed as a reason for pupils feeling it's unsafe to walk/cycle to school. More secure bicycle parking could also be provided at schools.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This should be implemented straight away so Scot Gov shoulder the cost otherwise paying twice!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	100% for the young persons national free travel. This has given our kids a greater sense of independence which in turn is giving them responsibility and driving home good travel habits too. It also helps connect communities.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Taxi's are provided to children who should be walking or parents should be responsible for them. Not all children who receive free taxis warrant them.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I guess children that live in the local villages that can walk to school should. It will help with the environment as well.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Fully this measure, providing the service at the statutory distance is already in place in many other councils in Scotland. It would also be good to encourage walking and cycling to school which would support the climate change emergency that the council declared.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree and the use of private taxis this needs reviewed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	Assuming there still are commercial bus routes.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	If children are going to schools within the catchment area why are school buses needed??	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Combining school and public bus services makes sense.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	remove free taxi rides to school	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	remove free taxis too - surely its the guardians responsibility to get the child to school	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	The Scottish Government should fund free school transport under their free bus travel for under 22 years scheme. Since they don't then if there is a viable public bus route to school then the school should not be expected to provide a separate bus at a cost, pupils should use the free public bus.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	The use of taxis for children to get to and from school should be stopped, this would be a great saving in it self.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	stop subsidising buses. That's the Govt's job	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Cut school busses to legal minimum. Reduce transport subsidy for attendance at Gaelic Schools, and music, dance and sport centres.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Pupils pay for bus passes who are not in benefits! Stop sending a taxi with 4 seats to collect 1 child!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	All young Scots have free public travel on bus routes. Either remove that completely or remove the Private Companies providing school buses and have secondary school pupils use the bus passes for school transport. Those pupils currently under the statutory distance already do this so remove the statutory distance and all Secondary pupils use public transport.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agreed, kids can use their free bus passes to get to school and alternatively trains if needed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	possibly a more targeted approach is needed?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Consider savings by reducing transport costs.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree, but also think the Council needs to look at safe cycling routes to schools as well.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Seems fair assessment and potential savings to be made	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Remove contracts for rotten school buses and encourage pupils to use public service bus using nec card where there is a direct route served	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	You should charge people who send their kids to a school further away when there is a school closer	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This is interesting. This would do away with a lot of school buses as we know it, getting access to the young person's entitlement card is not easy so needs to be made easier!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Yes I agree that the limits should be applied. The health benefits, global footprint benefits of waking over taking the bus such short distances must be addressed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Good idea. It will also help with fitness.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	No brainer, reduce school transport provision in line with statutory measures. Kids can use there free bus passes for travel - can they not use this rather than have the council pay for additional buses. This would increase uptake on the public bus routes and make for a better service.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	There's many kids who get the bus to the local school that live less than a mile away. ; Far too many kids are driven to school which is a huge issue but not for the council to save money on. Closing roads or school gates and making kids walk more can only be a good thing, socially, environmentally, mentally.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	As long as the safety of the kids is not put at risk then this should be looked at.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	As a boy I had to walk to primary and later secondary schools, both were 30 minutes in each direction, local families organised "Walking Buses" leaving children just the last 5 minutes or so to finish/start journey to school. Rain / Hail / Sleet / Snow made no difference to us, we made friends / chatted and arranged to meet up after school and weekends, a lot better than waving through a car window!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Statutory limits for school transport should apply.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Reduced school transport if fine as long as there is plenty public transport available to allow pupils get to school and home again	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	If high school young people now have access to a free bus pass, there should be limited need for school buses?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	That's fine for older pupils as long as buses are running at a time suitable to ensure pupils arrive in school on time	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Ridiculous that some children get picked up in taxis etc and dropped off at school (unless council funding). Their parents chose to live there - why do the council pay for their choice? At the very least needs means tested.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	If the Lothian buses were reliable this would be ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I don't think children need buses to school if they live 2 miles away	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This would be an idea if there was an actual public transport that covered all the schooling areas.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Better use of this is a good plan but again buses need to be reliable. When I was at school the buses were late and so made the pupils late the deputy heads response was catch an earlier bus. Not the safest option especially in winter standing about and walking in the dark even earlier than you already are.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Agree with proposal but taxis to school to be reassessed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I voiced this in the above question and feel that with the free travel on commercial bus routes the council should no longer provide school transport. However it would need to be looked into to ensure all pupils can get a bus to get them to their school in sufficient time, it may mean being 30 minutes early but the school is usually open so there is a safe place for them to be	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I agree with this, provided suitable commercial routes were supported for pupils relying on public transport	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I think that school transport should be looked at. I frequently pass schools in Livingston where there are buses waiting to transport pupils. Pupils should live within walking distance of the schools. Obviously, pupils from outlying villages may require transport especially if the council is going to cut subsidies to pupil transport.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Feel free to scrap school transport now the children have an entitlement card but use the savings from that to help keep some of the beleaguered bus routes going.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Assuming that no users of the current services who cannot make their way safely to school without the bus service continue to have that access, or other arrangements are made for them, this would seem sensible.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Commercial bus routes are not reliable	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4C Reprioritised School Transport Strategy	School buses being reduced would result in more parents driving children to school. This in turn is not good for the environment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	If school buses are cut again this will increase car usage and pollution in the air..	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	How does pushing young persons to commercial bus routes reconcile with ceasing services above ?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This is a joke, i pass by schools going to work and, in my opinion, it would be better if transport was laid on rather than having irresponsible parents driving them to and from school, dropping and picking up children causing traffic mayhem and usually results in huge tailbacks in traffic, as parents illegally park, or double park on one-way streets etc.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	The commercial buses are not reliable enough to get children to school on time. It would take my child 50 mins to walk to school. I say no to this proposal.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Some routes are not safe for children to walk even though less than 2/3/ miles	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Not everyone has a commercial bus route to school and those that do, do not always have a timetable that aligns with school start/end times. Also section/proposal 4B will do away with some of these routes.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Again, this transport is required, for instance, getting young people to school/education to try and raise the attainment level and reduce the gap!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	School transport must not be stopped	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	School buses service for children who live far from school is essential for working parents	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	So, there's one bus. ONE BUS, that operates through our village (following successive years of cuts). So all of the children from the village (and nearby villages too) who rely on multiple buses going to different schools, are now going to have one bus. ONE BUS. FOR ALL OF THEM? Please tell me how you expect this to work WLC, as I am truly stumped. I think what you're more likely to see is falling attendance rates at schools, along with horrific traffic congestion around school drop off and pick up times. Oh, and more car accidents and collisions with pedestrians/children. Just when I think your plans can't get any worse...	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council continually reviews service provision using our Best Value Framework to ensure that we deliver value for the public and continue to achieve the expected levels of performance. There are rigorous internal scrutiny arrangements in place to assure the quality of our services and we are also subject to external audit and inspection.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This would make sense if you were not planning to remove many of those commercial bus routes as stated in 4B	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	If you wish schoolpupils to be late or not turn up daily then go this route as ghost buses on apps don't turn up ...some buses 2 hours late...children young people miss classes and education this is not a good idea at all. Our young population will get frustrated waiting on busses...not the best day to the start of the school day.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Is this viable, some school catchment areas are far and wide and some childre may need more than one bus. Thisay affect attendance rates and punctuality of pupils. You should also review the number of taxis being used for one pupil, this should only be provided where absolutely necessary.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Your statement is incorrect as it is over 1.5 miles and 2 miles respectively. This service is badly run and unfairly administered.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	If there has been a failure of service on our part and you are dissatisfied please use the formal complaints process to escalate this issue. Each complaint is fully investigated, reviewed by Senior Management and improvement actions are taken, where appropriate. The Council has a formal Complaint Handling Procedure, which all staff must follow, this is monitored by the Scottish Public Services Ombudsmen, who also deals with escalated complaints where a customer is dissatisfied with the council's response.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This is not safe for Primary school pupils to get on a public bus service. There would be no one on the bus safeguarding the children and ensuring that they get off at the correct stop. Totally unsafe.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	The buses that will no longer be running because you are withdrawing funding forcing operators to change routes? Does the council do joined up thinking at all?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Pupil safety must be at the heart of this. Routes to school where walking pupils are exposed to a greater level of danger should not be considered for transport cuts.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	But yous want to cut bus routes.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	So the kids and parents are impacted once again!?!	2. Environment, Climate Change	4C Reprioritised School Transport Strategy	The young persons entitlement card is a great provision by the Scottish government and should be utilised to full effect. I think that transport should still be provided for pupils under thr age of 10.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Pupil safety must be taken into account and each case should be reviewed individually.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Commercial routes would be unable to deal with the volumes of children and commuters at peak times so unclear how this would work in practice	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I'd like to know if ANY WLC candidate walks 3 miles to work. I doubt it. Disgrace.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I don't think this change should apply to primary pupils or to those with additional support needs, due to the struggle these pupils will have with independence.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Perhaps opening Winchburgh academy for pupils from S2 to S6 instead of having them on the school bus to Linlithgow Academy could perhaps save money and the environment	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	Need to be available of schools will be blocked by cars and also more children walking on dark morning in terrible weather	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I thought it was currently 2 miles for secondary - is the proposal to move to 3 miles which is the legal minimum? If this changes, who provides the bus services to get those children to school who currently get a free bus - are there commercial bus routes with enough capacity? Eg currently many children from Springfield in Linlithgow get the bus to Linlithgow academy, some for free, some paying (as under 2 miles). They will still need to get to school - what will the replacement provision be?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	OK, so the other suggestions have targeted kids food, clothing, childcare, education, fostering and youth programs. And now they'll ALSO all have to walk. Let's make all the lazy 5 year olds walk those miles...guessing this is supposed to be character building for them? Is this an elaborate joke from the council?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Again ridiculous and unfair burden on families with children. Families cannot be expected an addition cost of getting their kids to school, and the young persons free travel card scheme is surely not the responsibility of a single council but that of the Scottish Government who I don't believe have restrictions on its use.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	With all these children in normal transport, which you say is also being cut, how will everyone get to work or school on time? ; How many more taxis will be used for children who may manage on a school service but won't manage public service?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	School Bus - the contract with Horseburgh only exist due to their cheap fee. This service is abysmal. Not only are the children suffering from fumes but the environment as a whole is. You are supporting this. It's been made quite clear to me over the last 5 years that neither the Council nor Horseburgh care about the welfare of the children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	If there has been a failure of service on our part and you are dissatisfied please use the formal complaints process to escalate this issue. Each complaint is fully investigated, reviewed by Senior Management and improvement actions are taken, where appropriate. Environment, Climate Change	4C Reprioritised School Transport Strategy	What are the statutory legal limits for school transport, also high school pupils may feel safer getting to school on school bus rather than public transport and school buses take them straight into their school.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Would this negatively impact children making their way to school? Potentially? Could this damage school attendance figures? Potentially. Surely that can't be good for children, the education system, the council etc.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	If services are removed in rural areas where there isn't a great bus service running, then a service would need to be put in place for kids to get to school.	2. Environment, Climate Change	4C Reprioritised School Transport Strategy	Commercial buses are too dangerous and unreliable. Wouldn't send my child to school in it	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Kids can go for free on the non school buses but these need to be available. Buses need to run past schools in morning and afternoon for them to be utilised. ; Unless there's a bus service, more parents will drive the little darlings to school and practically right up to the front door!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	The labour-Tory council coalition has some serious questions to answer if this goes ahead.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Environment, Climate Change	4C Reprioritised School Transport Strategy	Don't get me started on this. Buses are a nightmare and an absolute rip off. How can that be good use of money who moderates that?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Child care arrangements need to be considered parents who work need to know that their children can safely get their by school bus	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Requiring many of our young people to have to potentially manage a number of buses to get to school with a direct link to their school. This will result in parents driving their children to school and adding to heavily congested roads, add to pollution.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Things seem to be strangely set up regarding the school catchment. I chose my kids to go to a nearer school by 2 miles closer to home, however 3 miles closer to home. However by doing this I had to forfeit my school transport even though it is still over the 2 miles. The bus service to the furthest school is also known to be dangerous, limited and not fit for purpose on many occasions. School catchment needs to be assessed and save money on transportation.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	If the bus routes are cut in alignment with the scheme mentioned above then cutting the school buses could result in pupils not being able to get to school on time. Again this one needs to be carefully thought out and done on a case by case rather than blanket formul.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	No don't agree. That's just passing the buck to someone else. NEC has only been provided to young people for a short period of time so what happens once that scheme stops? Then what?	2. Environment, Climate Change	4C Reprioritised School Transport Strategy	Also, school transport needs to be safe and in line with the school day - sticking our children on commercial routes that might not even get them safely to the school gate is quite worrying.	2. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This would have a significant impact on families that are already struggling. The school I work in has a large catchment area. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Sounds reasonable for secondary aged pupils but perhaps not for the primary aged pupils	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	As long as commercial bus round are in place this is a viable option. In my personal case it is not feasible for the young people who live here to access their catchment high school via public transport.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Environment, Climate Change	4C Reprioritised School Transport Strategy	Oh my dog	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This only works if you look at this in conjunction with 4B above otherwise you potentially cut the routes which pupils would use to get to/from school especially if they are involved in after school activities.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Kids need school buses, not public transport. A pensioner will not get on a bus for say the doctors in the morning if going to get 100 teenagers shouting and screaming around them	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I prefer that to keep the school buses service for children in the catchment areas as not all of them able to use their free travel on commercial bus routes because can't walk alone to bus stops as scared from dogs and no self confidence in the early ages till 14 years old, of course not for all children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Children should have safe access to school from anywhere in West Lothian not just there catchment school.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Another cut for schools? We are a rural council not a city council.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Environment, Climate Change	4C Reprioritised School Transport Strategy	Clever, reducing the Burdon on council budgets and transferring it onto central Government budget. I admire your ingenuity, but this could impact the most vulnerable children hardest. If there is no alternative public service for those living further than 2 miles it may incentivise them to just not be in school	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Where is the Health and Safety with this anyone could sit next to your child on that bus, they could say anything to your child on that bus. Do you think all children will cope with that. I don't think they will. This is a bit different from going out with 2 or 3 friends to the centre on a bus. What do you do when the adult gets annoyed at the noise or just by the pure fact the bus he has to get to is daily filled with kids. I don't think this is a good idea for either of them.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	How will this work when all the school kids pile onto the same bus, which they will do to get to school on time and then the workers at the next stop who are paying can't get a seat because it's full.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Environment, Climate Change	4C Reprioritised School Transport Strategy	3 miles is an hour long walk on average. That's 2 hours a day. It's only going to affect those who don't have alternative travel options therefore impacting most on the poorest in society again	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	for those old enough to travel alone this is fine but for children who through no fault of their own may be living in a different area for a small while for example if temp accommodation through homelessness or fleeing for an abusive relationship and are not old enough to travel alone they would still require help to get to school which is the one thing that is still stable in their lives	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	How does ensuring the staff on public buses are safe to transport pupils to and from school. Currently, PGE is required for the taxi and bus drivers. Does that not matter anymore because money's tight?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Will increase the amount of vehicle around school. Also look at cost to council of taxi contracts. A recent journey for a pupil was three times more when using Pecos than if we just paid cash for the journey.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This would only work if the commercial bus routes were still available. If the 4B and 4C are not managed together it would cause issues on routes.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4C Reprioritised School Transport Strategy	There needs to be an overhaul of this. ; Many children have to travel to school for various reasons. The council should have better control of numbers in schools and closely monitor where the children are living and how much travel is involved. It should be as short a journey to school as possible hence making things more cost effective.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	How would students get to school?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This would only work if there was a reasonable bus route in place. Please also consider the younger children. Getting on public transport themselves may not be safe or comfortable for the S1-S3's.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Not all children can go off on a bus safely so having actual school transport helps getting more kids to school safely .	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Unacceptable!!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	no	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Not happy with this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	It is unbelievable	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	dissagree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Disagree with this	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This would add further costs to already overstretched family budgets.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Rather dangerous in my eyes as you don't know who is on the bus !!!!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	You cannot honestly expect school kids to walk up to 6 miles a day, in our weather?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Great I'll look forward to not getting a seat and being verbally abused and threatened on my way to and from work. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	So let me get this straight you want to remove school buses and put them on local busses which you are pulling off the network as you can't subsidise them. Here's a thought maybe ask them to walk? Better for them and the planet that they are intent on throwing as many energy drinks on the floor as possible of.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I hope you dont expect my autistic daughter to get 2 buses to school that is outside blackburn for her school starting at 8.3am. The council demolished blackburn academy so my daughters chatchment school is bathgate, blackburn doesnt have a direct bus to it so there is no way my she would get on 2 buses. 😞	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This is complete nonsense who can you expect the current infrastructure of the bus network to cope with the school run as well. Blackburn to Bathgate academy for instance is 2 double decker buses this is not visible or safe for the children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This is fine for secondary age children and would work hut unfortunately the pupil transport service in West Lothian can nit be depended on	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	My children relie on the school buses there is no other way to get them to school on time the public buses are only every hour and don't always turn up and only other option would be for them to walk which isn't safe.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I do not want the school bus transport to be removed. Relying on public buses is not viable I have relied on public transport and have been late for work on numerous occasions due to the un reliable bus services in Blackburn. I also worry about the safety of the children being expected to use public transport.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Children should not be expected to way three miles in Scotland variable climate. The use of young persons national entitlement scheme will merely transfer the costs, remember Scotland ultimately has a single budget.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	If children have free passes for transport then transport to school should also be free. I do not agree with charging young people to use a school bus.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	No cuts	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Not a responsible solution, many children still may not have a young persons entitlement card. Public buses are not reliable or on time. At what time do you expect children to get on these buses safely in the mornings and what about the public being overrun with children going to & from school. The children's safety is a must this will not be a safe journey for them during the darker mornings when public buses are too busy or late!!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	My younger sister is autistic and takes the free school bus to academy. She does not have the capabilities to get on a public bus without suffering severe issues, and this would in turn destroy her educational standards. The free school buses have been running since long before I was a child (early 2000's) and allow children a stress-free and relaxed journey to their education. Removing them could prove incredibly detrimental to their education and mental health. Perhaps if the council could learn to budget properly and not waste money on overpriced vanity projects, they wouldn't be in the situation where they are having to remove services that a council should be providing.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	See previous comments on school busses. Commercial busses are not reliable and those with additional support needs use this service as an essential part of their school day.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	At a time of climate crisis, this will only add to additional cars dropping-off children at school, increasing pollution and, importantly, increasing the likelihood of accidents in areas around schools. More should be done to encourage bus use, not less and it will be an incredibly dark day for West Lothian if this proposal was to go through. I really urge you not to proceed with this cut!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This is a disgusting proposal and one that will cause significant harm not only to those directly affected but the entire community. At a time when we should be encouraging group transport we should be making it easier, not harder, to access. In addition, there are a number of areas that are not served by public transport operators where the child could make use of their national entitlement card and therefore a school bus provision is the only service that can be used. I am proud to live in West Lothian where we don't stick with legal minimums but actually offer services for the benefit of the population.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Safe travel to school is imperative for the young people and if the parent's are unable to provide transport then I feel that it should fall to the Council to cover the costs - GIRFEC/ UNICEF Rights of the Child.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	I think that you need to take into consideration the income for the families involved and the availability of appropriate footpaths and street lighting on the route to school.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	If the council withdraws school transport then it will have to accept responsibility for the consequences.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This is a discriminatory measure against pupils in neighbourhoods that are situated further away from the catchment school, leaving pupils at risk of unreliable commercial providers and the community at further risk of climate emissions increase from additional use of private transport. Its doubtful if the running cost savings realisable would justify such a measure.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This could cause problems if commercial bus didnt turn up for dome reason snd pupils didnt get to school at correct time. Also commercial timetable eould need to fit in eith school times	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Should still have the free buses. Not all children would be able to get on a public bus	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Shouldn't matter where you live, should get free transport if needed	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Some children are not mature enough or developmentally able to use commercial bus routes. Identified school transport should remain to safeguard the pupils.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I disagree with this proposal. Staff and service cuts are not a viable option	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Simply, parents don't feel comfortable letting kids make their own way due to the nature of cars. This issue makes itself worst.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This change would exacerbate the problems associated with the school run, where children who live inside the new minimum would more than likely need to be dropped of in school car parks. Many of these car parks are far too small to cope with the drop-off at the moment. It's illogical to have fewer pupils on the same bus, and an increase in traffic caused by "the school run", where air pollution would obviously increase. This change would be detrimental to the Scottish Government goal of net zero. Please reconsider.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	One of your other proposals is to remove school transport and have children use their NECs. My children use school transport, we are under the legal distance but like on a country road without a safe path or lighting. What will happen to children like mine. The rural subsidised service that runs by our house is already only once an hour. Are they to stand on a national speed limit country road in the dark to get a bus that won't get them to school on time? This is utterly ridiculous and actually quite disgusting	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	My children use this service. We are under the legal distance but it is not a safe walking route due to no lighting ans narrow paths next to a national speed limit road. These specifics must be considered properly, especially given that it will impact the same communities as the cutting of rural subsidised bus services. Primary aged children cannot be expected to stand in the daek (in winter) on thin paths next to national speed limit roads waiting to use their bus pass on public services that have been cut by the council. This is dangerous and not at all an acceptable solution for rural communities. This will cause children to be at risk of death	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Public transport in West Lothian is poor and badly organised.School buses are vital for safe transport of children. The elderly and disabled should not be penalised because they need more help	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This is not suitable for every child and every situation	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	How can this be when Council have just stated in previous question that some routes are not commercially viable!!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Children should not have to make their own way to school It is unreasonable to expect children with no parents to transport them, to walk to school before the school day. Arriving tired, sweaty, and risking personal safety is not on.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Again, this is detrimental to children and family wellbeing. If you change, the distance of child has to live from the school before offering transportation, you're endangering and preventing children from attending school.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	Not all villages will be covered by a commercial bus service for pupils to use their free bus pass on to get to and from their school.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Fudge! That's such obscure wording, I've read it twice and I'm still no more informed what you're changing or withdrawing here. Sounds like you want kids back in their parents cars being ferried around everywhere to me. Not very good for the environment methinks.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	school buses have always been an issue in safe travel. given the large numbers, this may impact on commuters.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	There is no public transport available in many rural communities so school transport has to be provided.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	There is no bus for children via Wester inch to Bathgate academy. Making the youngest of our secondary children walk on particularly busy road in dark winter months. ; Parents would pay for a co-ordinates bus service to the school.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Although we don't use this entitled service I would be reluctant to remove it as many people that access it live on unsafe road routes which prevent children from safely walking to school. Eg for us it is the unpaved Clifton road. Not all families can afford a safe cargo bike to get kids to school like we do.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Kids won't use this scheme if the buses are taken off as per 4B above!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	The use of the Young Persons national entitlement scheme for free travel on commercial bus routes is absolutely essential for all young persons. It provides them with the freedom and independence they need at a critical stage of a young person's growth and development. Without this invaluable service there would be a detriment to the mental health and wellbeing of many young persons across West Lothian.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Large parts of WLC is inaccessible by footpath. If it was then walking to school wouldn't be an issue for many children. However, often cars are used to minimise travel times or avoid having to walk a longer way over a short distance.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Improvement needed	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Children are required to attend school and transport should be provided if they are attending their catchment school but it is too far to walk.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	The bus passes have helped many families and young people. I feel this should remain in place	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	School transport is already a continued issue/problem in our area. A reliable, safe and appropriate bus service is essential for all pupils' to enable attendance at school.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Essential service to get our children to school	2. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	If transport is provided outwith 2 miles, surely it should pick up pupils on the way?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	All children should have access to free bus travel to and from school, especially when it's raining, cold, icy ect	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I am sure this will cause more cars as parents transport their 'precious children' to school rather than them walking.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	School buses should not be removed as this will impact attendance and attainment levels. Education first!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This has to be looked at as 2 miles for a secondary pupil to walk is approximately 45 minutes which is unacceptable! 90 mins per day.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	"Town" buses are currently frequently missing/late. If pupils have to rely on these to get to school there may be a negative impact on attendance.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	This doesn't tell you what the statutory distance is. Very unhelpful! I wouldn't want my 11 year old travelling to high school on a public bus. That is not safe.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I don't agree. Commercial bus use doesn't work for school day.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This would be a huge problem for many families where we live. Even for parents who currently pay for the school bus where we live there are not enough tickets available each week to meet demand and parents have been asking for a second bus for a while. Many rely on free passes. Either removing the bus or taking away passes for families who live too far to walk will cause hardship	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Again what about the people who rely on this and can't afford any other option???	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	And in doing so reduce the attendance of pupils at secondary school or increase car journeys for school runs especially at primary schools. Adversely effecting parents disturbing work patterns, increasing fuel costs and air pollution around schools. ; Why not have a free bus pass for mainstream bus routes for secondary school students and keep the current primary school bus distance in place	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Once again increasing barriers for those who are less well off. This will lead to reduced attendance.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Bey you wouldnt walk 6 miles a day for your work, why should we expect kids to!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This will only work if: Commercial buses would need to run on appropriate routes at appropriate times. Passing on the responsibility to commercial transport risks health, education and safety being compromised across the authority, in particular with the disadvantaged..	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This will only work if: There are safe routes to school with reduced speeds for traffic on those routes at key times and other traffic calming measures in those zones.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Disagree this will disadvantage rural communities	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I disagree....rural communities will suffer	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Strongly disagree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	No you don't!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Disagr33	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Not all children feel safe or have the capacity to navigate public transport, this is disappointing.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	The use of free travel is only good for people that live in towns/villages where there is a decent bus service. My children live in stoneyburn and there is not a direct bus to Blackburn where their school is. This would mean a 45 min journey to Bathgate and a change of bus to get to Blackburn. or similar journey changing at Whitburn. This is not a suitable means for children to get to school, and certainly not in winter months where it is darker nights.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	So is this saying that all school transport will be stopped if there is a commercial bus route? Not sure that makes sense, and for 'green' reasons it would seem best to have a full bus of school children rather than lots of cars taking kids to school	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	Ridiculous suggestion. These are essential for getting kids to school safely. ; We rely on school transport. ; In our area - the local bus doesn't start until 9:20am meaning my child would miss registration and a full period of school every day. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Not everyone is on a main bus route and can make a reasonable journey time to school using normal public transport. Especially when you are cutting some back (see 4B). The increased travel time will have a direct impact on their learning as more time will need to be spent travelling leaving less for study.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	And therefore encourage more anti social behaviour on these means of transport utter disgrace	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Environment, Climate Change	4C Reprioritised School Transport Strategy	What are the legal limits. How would my child get from wester inch to Armadale academy? My son would likely leave school at the early opportunity if the school bus is removed resulting in a less education	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Use of commercial bus for young people may sound a reasonable saving, but does come with concerns on safety and reliability.; This may be a viable choice for 15+ pupils, but not so much for younger pupils.; For example, there is no control of who else is in the bus and pupils may be exposed to alcohol and drug use and potential harassment in the bus.; There is also no supervision on whether pupils leave the bus at the right stop, potentially resulting in pupils getting lost.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	How can you do this when bus services are likely to be reduced? How can you ensure that everyone has access? Possibility of kids being put in danger here	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Environment, Climate Change	4C Reprioritised School Transport Strategy	my step son is autistic and this change moving from paid school transport to public would be upsetting. There is no bus stop near my home that would take him on a direct route to the school unlike the school bus which picks up very close by	2. Environment, Climate Change	4C Reprioritised School Transport Strategy	People who have issues with mobility still have the option of taxis to and from school ; ; There are some areas that use school transport that could walk to school (Springfield), but some areas cannot walk due to lack of walking paths ; ; Pupils will have to wake up earlier therefore getting less sleep causing a fall in engagement and mental health may take a toll ;	2. Environment, Climate Change	4C Reprioritised School Transport Strategy	; It will be a very dark day across West Lothian (from the extra pollution at least) if these proposals go through.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	; It is absolutely outrageous that this is even being discussed never mind seriously considered. We should be promoting free school transport to help reduce climate pollution and dangerous situations in streets around schools at drop off and pick up.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I cannot believe you are seriously considering removing bus transport entitlements from young people across West Lothian. We should be incredibly proud of exceeding the legal minimum limits, particularly at primary school, and we absolutely must not cut this. West Lothian does not have a high quality public transport infrastructure that would replace current school transport provision at primary school (and do we really want to be putting lone primary 1 children onto a commercial bus to fend for themselves??);	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This would need to be considered alongside any reduction in buses and also whether the current timetable allows for timely arrival at school (and not 40 mins early or bang on time leaving no time for traffic, walking from stop to school etc). Also this should only be where safe walking alternatives are available.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I don't use public transport so don't feel I have a view on this apart from school transport I think this needs to be kept to ensure some children coming from poverty can make it to school.	2. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I think school transport needs to be kept, I don't think the general public would be very happy with a bus full of school children/pupils in the morning/afternoon.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	There is no commercial bus route from our village to the secondary school. And there is no safe cycling routes either.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	In addition, we have an environmental crisis and WLC promoting car use to schools is outrageous.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I beg you, do not reduce the eligibility of school transport to legal minimums.	2. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	If West Lothian had decent public transport links then the young person national entitlement could possibly be used on school routes...but as there are only a handful of public bus links in the entire district this is a complete non-starter.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	We should be proud to go BEYOND the legal minimum distances for transport and I would worry about children who are currently eligible losing that status...in addition it will only add to traffic, pollution and road safety issues around schools, which are already appalling, but you are actively choosing to make it worse.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Yet again we are impacting on the most vulnerable in society.;; All children should be encouraged to take school transport and access should be widened, not reduced.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Attendance at school is vital to ensure our children attain the best results that they can. Some children cannot afford to pay for transport due to home circumstances and this needs to be taken into consideration.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	To ask pupils (primary or secondary) to walk these distances daily to and from school if transport is not provided could impact attendance. My daughter starts high school next year and we live less than 3 miles from the school by road, however the path to school is much longer and also, in my opinion when you hear local news about muggings and beatings, not safe for a child to walk, especially in the darker months.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	At first hand this sounds very reasonable but it will impact much more so on those who have least money ie will increase inequalities	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This will impact on some and seems likely to have some negative effect on the education for some who live in certain difficult to access areas. I'd recommend that the application of the change is not done on a purely distance based approach.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Removing school buses causes me great concern as a parent, particularly given that I stay in Blackburn, where the number of commercial buses has been greatly reduced. With only one bus per hour, which is not big enough to accommodate all young people, how are my children supposed to get home safely? Children's safety seems to be compromised to save money, which is unacceptable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I'm not a fan of cutting school buses this.;; This massively increases the risk of children being killed by speeding cars.;; My nephews go to parkhead primary and they live in Polbeth your asking young children to make their own way home crossing 1 of the most busiest roads in West Lothian with countless accidents each month that's a disaster waiting to happen.	2. Environment, Climate Change	4C Reprioritised School Transport Strategy	I would be concerned about this in terms of suitability of walking routes where school transport would be ceased.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	disagree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	disagree with any reduced distance	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	No cuts to school bus services.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	You have to make sure that pupils can actually get to school on standard public transport without multiple changes and not too early set off times. It is not as easy as saying they can use their YP card. You need a more in depth survey with actual users	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	The children of Wester Inch who attend Bathgate Academy need a safe transport system to and from school. This is especially required in winter time but also give the climate of our country this should be a full time resource available to them.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Sounds reasonable in general but what if there isn't a suitable alternative bus available (especially with routes being cut) or if it isn't safe for children to travel by these?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	As a parent, I feel putting children on commercial travel is putting them at greater risk. Not only would they be placed on buses with persons who have not had disclosure Scotland checks but you are also relying on commercial bus route who may not have capacity to take all children and may not run regularly or pick up / stop neat their home or school, again placing them at greater risk. Possibly having to leave earlier in the morning and arriving home later at night, which in the winter will be dark. Their is also opportunity for any predators on buses to follow them home from buses, knowing exactly where they get off, times and routes walking home.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Taking away bus options for children who live closer to their schools will increase traffic around schools during drop off and pick up hours, increasing emissions around schools and making it less safe for children who wish to walk or cycle to school.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	You need to ensure that McGills & Lothian Buses can offer routes/timetables to ensure that all children can access their place of education. ; ; A published timetable doesn't mean that the buses are turning up, are fit for purpose etc	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I don't see how that will work in thus scattered and rural community. Especially without reliable and regular bus services.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Utterly shameful to remove the ability of children to access school transport. What now happens with those children currently receiving school transport but will then need to pay...in the cost of living crisis this is a cost that many will not be able to afford.; ; We should be encouraging more use of school transport.; ; Public buses in West Lothian are, frankly, dire, and the chances of a bus service being suitable to replace a dedicated (and safe) school transport service is ZERO!; ; I beg you, do NOT do this! Find another way to save funds (I can think of a few ad have already submitted these suggestions elsewhere).	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I appreciate that young people have bus passes but not all schools are linked by bus routes - and parents are not happy about sending kids on public buses	2. Environment, Climate Change	4C Reprioritised School Transport Strategy	It is currently very difficult to get a ticket for the Williamston school bus as it is always sold out. Another bus would be useful and parents are happy to pay a reasonable fee.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This would be good however there is not always a bus service in place from our location to our school and some require more than one bus. Additionally there would not be enough space on the bus for all the children. Would children then be left stranded?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Some students live in areas where commercial buses do not travel within a reasonable distance. It could also mean more students arriving late/leaving early and missing teaching time because of the timetables set up by bus companies.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Another absolutely ridiculous idea. I wonder whether this impacts on those proposing the change. A child starting school cannot be expected to walk 2 miles to and from school each day, likewise those of secondary school age should not be expected to spend two hours a day getting to/from school. In this era of raising attainment and levelling-up the very opposite is proposed here. Children in more rural communities are frequently those who can benefit from extra time spent studying/engaging with worthwhile activities -- this shortens their time available to spend on activities that they benefit from both emotionally and educationally.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Children paying for the cuts again. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Distance shouldn't be a factor. Every child should have the right to get to school safely via transport provided by the council. The mileage calculated doesn't consider path terrain, weather and child safety.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	no way my child would be walking 2 miles to the school - i wouldnt be comfortable with him having to walk that distance ; armadale academy kids dont get picked up from westfield - transport should be provided and the kids miss school as there is no way to get there	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	We must strive to get pupils to schools, this should not be reduced. Widen the tender?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	No ask walking in winter and darkness could be dangerous	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Use of commercial routes can be very daunting for some learners, especially the younger ones or more vulnerable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	No. You have a responsibility to provide transport so that every child can receive an education. Local buses are not always reliable and I would have huge concerns surrounding child protection.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I would not want the provision of transport to specialist provision stopped as many of these children wouldn't be able to access. ; Some catchment secondaries do not have adequate and safe walking provision this should be looked at alongside any change to transport thinking of the most vulnerable in our society. For example children in Bathgate going to Armadale as catchment	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	School bus routes need to continue for primary children and children with additional needs to get to school. Older children should be taking advantage of the government free bus passes scheme.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	ASN children are currently taxed to school - will this be affected? How will parents get their children to school considering the majority of children in specialist provisions do not live in their school's catchment area?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	School transport services are safer and more reliable than public services.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I agree with this as free transport for all children at secondary school	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	The focus should be children's safety and the environment. Not just cost cutting. The last thing needed is more cars taking young people to school	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Means test.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Don't like the idea of children using commercial travel. Possibly additional risks for children's safety	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I personally can't see this working out. ; A mass of secondary school students in the morning and the end of the school day on a commercial bus routes is an accident waiting to happen.; The bus routes don't go directly to and from the schools.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Not sure i understand the wording of this one, but Large numbers of school Children would need some kind of supervision besides a bus driver on public transport it would leave vulnerable children open to bullying otherwise. Children should attend the school closest distance to their homes. Hundreds of children attend schools outwith their catchments some within walking distance.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Children should be going to school within their catchment. If not possible (out-with their control) they should be given the same opportunities (transport wise)	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	It is opposite from the above question. If regular bus service is reduced, pupils can't go to school.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Sadly I feel this was inevitable	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	All children are entitled to an education. Apply a bit of common sense to this one and think about the safety of the children.; The travel to High School for two pupils from the same outlying village may differ so that one pupil has to travel equal too or just over the 3 miles whilst the other pupil is just below the 3 miles. Consider the route the pupil just under the 3 miles would need to travel by foot and realize that both pupils should receive the same free transport from the village to their place of education. In the previous paragraph you are talking about reducing public transport. Why should pupils from one end of the village be entitled to free transport and those in adjacent streets be forced to pay for their journey. Really be very careful about this one	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Does this mean that children would use their entitlement card on public transport to get to school? This would not necessarily be suitable for those who do not live near a bus route and could result in children missing school more frequently.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	You can't rely on commercial; Buses as they don't turn up half the time am happy to pay for my child's school bus	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Need to have more school bus and reduce private hire taxi . Only disable people should get private hire taxi . This will reduce cost a lot	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Maybe older secondary students would manage this ok but for the the younger secondary students and primary students should definitely be a separate service.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	As long as pupil lives on a safe route that gets them to and from school on time. We do not want increase in parents in +++ car's driving to the school with negative environmental impact	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	And reduction of a school bus services needs to be replaced with a viable alternative. As there is none, I do not support this measure in any way	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	There is no commercial bus nor any Footpath nor safe walking route to westfield primary. If you take away the school bus, our children will be unable to get to school.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Well. We have no public bus routes, no cycle lanes and live on a national speed limit road. There is no way my child will walk along these unsafe roads to get to their school. A request to install cycle paths and reduce the speed limit were declines by the council as too expensive. What should the kids do? Flap their arms and fly?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Assess on a school by school basis. A country mile ≠ to a town mile for suitable routes.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	my boys love the fact that they can use their young scot card to travel. We live more than 5 miles from school and so the school bus is a necessity and there are plenty of children using it to make it worthwhile. however, there are children living a very short walk from us who get a separate bus/taxi when they could very easily walk to the main school bus pick up. This is mainly down to fears about road safety so I think any change that results in children walking rather than getting a bus should include road speed reductions etc.; Increasing the number of children using commercial bus routes to get to school will also require an increase in some services and/or a change to their timetable so that children do not find themselves coming out of school having just missed a timetabled bus and so having to wait just short of an hour until the next one	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	For primary aged children? No. Inappropriate.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I have concerns about what this means for families who currently rely on the school bus.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This would be unbelievable to cause more obstacles in the way of young people getting to and from school.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Another proposal that would encourage more cars on to the road-not good for the environment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	It would be utterly shameful for West Lothian Council to increase the distance required for primary pupils to be eligible for school transport. Please do not do this, I beg you! School transport is a lifeline for many and we should be proud of prioritising our pupils beyond what the law states we must do.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Road safety and young people should be the priority and not saving money many families would struggle paying additional transport costs to access education	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This will only work if local bus services are fit for purpose (they currently are not).; There is also the danger of pupils having to make risky walking trips to school or missing school due to lack of transport.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This relies on the info structure for public transport being place. Means test or ask parents to contribute especially if less than the statutory distance. I would have concerns about children attending school if relying on public transport.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	I think it is shameful that the council are proposing that our children should travel to school using commercial bus routes rather than school transport. There must be so many safeguarding issues that would arise from this. There are so many families where there is no other option than to send their child to school on the bus. If they then are faced with having to send young children, alone, on public transport, this would be a cause of great concern! School transport should be free for all children. The Young Persons national scheme may be scrapped in a few years, what then!? Do our children then just have to accept paying on public transport or walking for 3 miles before their school day starts!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This would likely have a negative impact on attendance in school if young people find it hard or are unable to be driven to school or live off a commercial bus route.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	That might be OK in some parts but not in others.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This is a shame, as it could lead to more disadvantaged children having a tougher start to their day.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Since you are cutting the commercial routes how will they use them!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Disagree - this sounds like we are reducing access to education, albeit unintentionally. 4C doesn't seem to square with the reductions in 4B above.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	There will need to be some realigning of services to ensure there is services around school times.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Safety of children must be paramount here.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	What happens to the children that cannot utilise the 'Young Persons National Entitlement Scheme' because there are no buses in their village, because they fall within a commercially non-viable route? Serious question, because the bus service in our village is poor to say the very least!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	If I understand the national guidance correctly, this would mean children aged 9-11 who live between 2 and 3 miles from their school having to walk or be transported by car, presumably by parents? That's too long a walk for that age, and too dangerous if it is not all lit and on pavements, and increasing car traffic is generally highly undesirable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Offset by increased car travel to school?!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I'm sure parents would appreciate this service	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	school buses provided.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This would be fine for secondary pupils but the use of commercial bus routes for young primary pupils would create many safety issues.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Sounds sensible but masks specific issues in rural areas. Poor access to public transport in our rural areas is a constant issue raised. Anything that makes things even worse for these communities will be detrimental on both individuals in these areas and the local economy as a whole. Need more detail.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Yes but vulnerable young people must be considered	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Paid for school transport service encourages independence for older students and provides convenient support for working parents. As it stands I do not know if we have bus provision that would be a suitable alternative which would mean we would then have to drive our child to school, with the environmental impact as well as the impact on our working lives. I would be strongly in favour of keeping school transport, with the option to review fares	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Pupils should be encouraged to walk to school if less than 2/3 miles. Wish there was some way to reduce congestion due to unnecessary 'school runs' in cars.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	Public transport is a joke and you making children rely on it is pathetic and if you think for a second that parents should take their child primary age to school you are again hindering working parents or parents on low income cause they don't have a entitlement card !	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Ridiculous expecting kids to get public transport. West lothian Council will be held liable for anything that happens to the child on this public transport.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Again as I put before a child's safety should be priority so school buses should stay in place so they can be with people from school they may not feel safe or confident at only age 12,13,14 to travel on public buses.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This is disgusting to read, poor kids cant go to schools in their own towns cos the council knocked them down so kids have to go outwith. The buses are getting less & you have said you will cut transport. How do you expect kids to get 2 buses to school (my case) be there for 8.30 am. You have already told me my childs walking route isnt safe but you now expect them to make their own way there. As there is fewer buses how do you expect public transport to have skool kids & folk trying to get to work on the same bus? There wont be enough room on the buses. I totally disagree with you cutting the school buses !!!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Lifeline for some parents getting the kids to school	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Irrespective of the distance from school, pupil should be provided with free transport.; ; Please remove this limit of 2 miles from Primary School.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This could cause more congestion on the roads and neighbours streets to schools as parents use their cars for drop offs. This is not only an environmental cause for concern but also safety for residents and children as almost all are inconsiderately/ dangerously parked for sometimes 30 mins.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	If you propose to reduce some school buses and get secondary school pupils to use commercial bus routes please bear in mind additional needs/ASD kids may find it harder initially to adapt without full information on nearest bus stops to school, timetables etc.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Would this affect pupil safety? Especially primary school kids? It is a mistake to remove this for under 14s. ; Over 14s could use commercial bus routes but it looks like in your 4B Reprioritised Transport Strategy, you could be removing or reducing the very service you expect to rely on here. ; Are you 100% certain that the Scottish government won't eliminate the "free" travel scheme for young people in their efforts to cut costs centrally?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

Environment, Climate Change	4C Reprioritised School Transport Strategy	Makes sense.but buses would have to run past schools to enable pupils to get in on time. Right now this just ain't happening .	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Disgusting that pupil who live just under two miles away can't use the school bus. Most parents/carers would be more than happy to pay for the school bus for their child/children as it's a safer option in this day in age, or use their free bus pass.; Can't reduced public bus service and then expect young people to use that service to get to school	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	All well and good if the schools are sorting the passes, trying to sort 1 for my son last Yr was actually impossible! As soon as he turned 16 he sorted it in 1 council visit...what's That all about? ; Will WLC take responsibility when not all children who need to travel to school have received theirs and therefore cannot make it to school?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	It is not guaranteed that there is a public bus route for all pupils to the school they attend. Or that it is at a reasonable time or doesn't require multiple changes. There shouldn't be an arbitrary cutoff mileage as it could be on roads that are not safe to walk alone on. ; Safety and ease of travel should be considered otherwise it will just mean parents go back to using cars. So more emissions and more vehicles on the road.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Sorry the busses would be a night mare for the public. It is safer for the children and the public to have them on their own transport ; Perhaps using taxis to transport children needs looking at	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Existing system of Milage must not be disturbed	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	I don't agree with this distance because in very bad weather is 2-3 miles too long distance to walk!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Ensure that no pupils needlessly travel more than three miles some of travel because the school they attend is more convenient to their parents place of work, this forcing local children to travel further.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	There is no public bus service between Linlithgow and Blackburn. The closest alternative is a bus to Bathgate and another bus from there, which is plainly unacceptable. A school bus must be maintained on this route to meet the obligations of denominational education.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	We are in rural West Lothian. If there is no school bus, my primary aged children would be unable to get to school. There is no commercial bus and no footpath walking path.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	P1s to p5s 1.9miles away on a public bus on their own not safe makes harder for parents to work	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This must not be allowed to happen. Many children rely on school transport who are currently eligible. By withdrawing this service from them you are not only denying them opportunities but also significantly adding to the "cost of the school day" to those parents. Do NOT proceed with this cut, particularly to primary pupils.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	So in the case of families who live in rural areas where there are no public footpaths to the local school are you going to reappropriate that 1.4 million in savings to establish footpaths to the local schools when you withdraw the transport links ? Or as usual do you expect the parents to further stretch their already stretched budgets to include school runs ?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This has a disproportionate impact on those that attend catholic schools as they have a wider catchment area. Would not agree with this proposal. How would those on low incomes be able to afford travel to school when they are struggling to heat their homes or eat food on the table. This would disproportionately impact those on the lowest incomes not in favour of this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	We still need school buses please	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Make sure school transport keeps going and always there.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	It is very dangerous for the primary kids to have to go on a public bus	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	can't have young kids on the bus on escorted	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	children need school bus transport. Under 22 bus pass allows our children to travel all over Scotland	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	It is not safe to allow young people to travel everyday to and from school by regular buses	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Would any review of 4B take into consideration the increase in potential passengers from outlying villages/locations that may have or be part of routes, currently not commercially viable.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	What about localities that have a poor bus service	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	so kids walk to school?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	no comments, other than to ensure sustainable transport hierarchy is at the core, where walking, wheeling is first, then cycling, followed by public transport then finally private car. There are so many organisations/funding pots which are designed to achieve this and I don't see it particularly happening in West Lothian even though I don't have children/see what happens in schools	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Can we be advised what the statutory legal minimal limits are.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	Unable to comment again due to lack of available information.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Very difficult to comment without more detail.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I can't see any point in continuing this survey as it is a waste of all our time without the information, we need to give an informed opinion.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I am unable to provide further input as the level of detail within the estimated saving briefing doesn't allow me too.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I have used this and its good transport	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Young Persons national entitlement is good.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	undecided	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	undecided	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Don't use this device as son has to walk to and from school	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	See 4B, WLC will need to choose. Will the provision of segregated cycle lanes be provided to aid safety if these buses are removed?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Road repairs: Road Maintenance is carried out annually within the available resources and improvements are carried out in partnership with Sustrans. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Interesting to see how that would work because a large amount of school children use school transport.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	ensure adequate review as there are limited commercial bus routes	4. The council is already doing this.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4C Reprioritised School Transport Strategy	For journeys less than 2 miles, better walking and cycling infrastructure is required, which would reduce carbon emissions and increase physical activity. This requires more investment in active travel, better education, skills training and more commitment to carbon emissions targets. Strategic active travel routes should be planned alongside strategic public transport routes. These can also be aligned with green networks.	4. The council is already doing this.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Provide better quality buses for those travelling on school buses. Ensure that the routes parents applied for are stuck too (current child, bus takes a different route everyday, that's if it even picks them. Up); Reprimand operators who fail to ensure consistency.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Impact of this to be examined to ensure safe walking alternatives are available to affected pupils. Pupil safety must override any cost saving measure.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	If there are suitable services- however an adult would need to accompany them on a public bus - will this be subsidised?	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	It is essential that children living in rural communities, whilst they make be less than 2 miles away, are considered within this decision.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	It's important that this is linked with 4B above to ensure there is a viable public transport option for any young person who would be impacted by the withdrawal of school transport.	4. The council is already doing this.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Why are pupils from mid Calder sent to west Calder high school? This is illogical... increased costs, travel, pollution etc... they are also in a high school which is nowhere near their homes. Redesign the catchment areas and gain a long term saving.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	As long as you measure the 2 & 3 miles using safe crossings and not as the crow flies	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Maybe a focus on using bikes (with appropriate / safe bike routes) could be an option in some cases where there wouldn't be a need for too much investment, or could be future investment?	4. The council is already doing this.	Road repairs: Road Maintenance is carried out annually within the available resources and improvements are carried out in partnership with Sustrans. Approved industry wide road materials and infrastructure are used on the public road network as required.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	We need good transport options that all children either get free or pay for (full or subsidised).	4. The council is already doing this.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Send people to their closest school as default, not as a want from a parent. ; I was going to be bussed from bogall to St Kents for school, when I could walk to the academy in 3 mins.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Support safe cycling routes to schools	4. The council is already doing this.	The council has a Cycling Walking and Safer Streets partnership with Sustrans and accessibility funding when made available.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Need to review pedestrian routes to ensure all are well lit and safe, are under informal scrutiny by passing vehicles, ; and that improved cycle path provision is made where appropriate.; A parallel "use bike" campaign might be appropriate.	4. The council is already doing this.	Street lighting: appropriate lighting is required by law to enhance public safety. The council has an LED replacement programme as this is the most sustainable and energy efficient option that is currently available. Cycleway improvements are carried out in partnership with Sustrans.
Environment, Climate Change	4C Reprioritised School Transport Strategy	More children wouldn't require buses if it was safe to travel to school on foot or bike.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	If someone chooses to send their child to a school which is not their closest or out with catchment then we would not provide free travel. The division between RC schools and non-denominational is not right, people should not get priority with a placing request based on their religion. If we took away this division and made every school non-denominational then we may not need to spend as much on travel.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I think encouraging all eligible pupils to apply for their National Entitlement Card is a must.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I support free bus travel for young people.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	School transport relies on various sources to provide this service. Could this not be streamlined?	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	If this results in more pupils walking to school, the council should ensure there are safe walking routes for pupils.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Look at all the schools any overlap.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Also build a school within Calderwood would cut a lot of school transport	4. The council is already doing this.	The Council is already considering and addressing requirement for school places within areas of new housing, including extending the new Calderwood Primary School.
Environment, Climate Change	4C Reprioritised School Transport Strategy	We stay over 2 miles from our children's primary school and would be very happy to cycle there each morning and back but there are no safe paths for our children to do this - they need the school bus. Or if the council will build a safe path for my children to get to school, we'd be happy to forego the bus and cycle instead. The council can't cut one thing without supplying a safe alternative for families.	4. The council is already doing this.	Road repairs: Road Maintenance is carried out annually within the available resources and improvements are carried out in partnership with Sustrans. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4C Reprioritised School Transport Strategy	The safety of pupils traveling to and from school must be the priority.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Why not have a small charge I had to walk 3 miles to high school	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	If children already qualify for free travel on commercial bus services, could school buses have limited stops en route to schools to pick up non-qualifying pupils.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	All members of the public including young people must have reliable accessible transport system	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Make local school for local students a priority stop busing for miles to suit old fashioned ideas	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Cut the school transport, you pay for taxis which is wrong!	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Cut the school transport, you pay for taxis which is wrong!	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Travel to school by taxi should be abolished. It should be the parents responsibility to get their children to school if they do not live close to school, especially if they have access to transport e.g. I know of a family living on a farm who have two taxis picking up and dropping their children off even though both parents drive and have their own cars. Such a waste of public money!	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The council continually reviews service provision using our Best Value Framework to ensure that we deliver value for the public and continue to achieve the expected levels of performance. There are rigorous internal scrutiny arrangements in place to assure the quality of our services and we are also subject to external audit and inspection.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Go to closer school	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Review catchment so that pupils attend their closest school. This currently is not the case.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Parental choice is a legal requirement, and parents can choose to attend schools other than the closest or catchment school.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	How much does the ID card scheme for children using WLC school buses cost? Why do kids getting on a school bus need to show a laminated photo ID to prove they are entitled to travel to school?	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your response.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Transport subsidies are a joke for school provision. seems to be selective areas, ie upper class areas or poverty stricken, middle class / working class areas ignored.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Cancel the Horseburgh contract and show some concern for the health of the future generation	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	If there has been a failure of service on our part and you are dissatisfied please use the formal complaints process to escalate this issue. Each complaint is fully investigated, reviewed by Senior Management and improvement actions are taken, where appropriate. The Council has a formal Complaint Handling Procedure, which all staff must follow, this is monitored by the Scottish Public Services Ombudsmen, who also deals with escalated complaints where a customer is dissatisfied with the council's response.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Why not try the yellow school buses so beloved in America.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your response.
Environment, Climate Change	4C Reprioritised School Transport Strategy	The service bus would need to turn up though, not always the case in Winchburgh.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	There would need to be a priority to ensure the safety of children and members of the public on commercial bus routes.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Include the School Transport Strategy into the Transport Model for West Lothian - referenced above.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Would t it be easier to use minibuses instead of actual buses if they are under utilised.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Could pupils/parents not; Just pay for these services if required rather than removing them altogether?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Public buses at no cost should be used as an alternative, however means of support for parents off the regular routes should continue to be supported.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Maybe council should support buses to be more greener and pull in external money to support changes.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This move should co-incident with active travel infrastructure provision, otherwise it will just lead to even heavier traffic at school run times	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	If school transport is under used any in any way, can others use the spare space (consolidating services to one area / shuttle bus service?)	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Ensure bus capacity / size is appropriate. Utilise spare spaces on the bus for travel to community hubs (shuttle buses)?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	NEC card makes sense. ; What about the amount spent on taxi's, will this be explored?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	The Council spend far too much money on Taxis and Buses for school this service should be provide but there should be a charge to the parents on this especially for the Taxi's. Kids living out with the catchment area Parents either have to take their children to school or make alternative arrangement or pay towards the taxi service provided	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	My neighbours child was taken to school in a mini bus on their own as they wanted to attend a different school, surely this should be funded by parents if its not the local school or SEN	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Schools must do more to discourage "the school run" and encourage local children to walk to school.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Parent engagement	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Again metrics in trial data must show this approach works first	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	Still need to be care here as impact on kids getting to school?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Reviewing the location of schools services could open up ways to reduce costs for transport as with developments under way new schools are being built across a various councils and this is an area multiple councils could work together on to resolve to ensure the most cost effective and appropriate schools are available as an option in terms of catchment areas perhaps without impacting negatively upon those who would be present within their first choice catchment however.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	What infrastructure is available at schools for secure bike parking? Surely if we could make that a priority then kids could enjoy the cycle to school together..	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I think this should be in place for S3 and up.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I would only cut the 'outwith' transport and have all children meet at a central stop for the school bus	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Again you need to work with commercial operators here. It's fine to ask young people to use the free pass, but bear in mind the impact that will have on the commercial service. It could overload the route at peak time's meaning that people going to and from work are stranded. Operators would need to review vehicle types used on heavy corridors. Also I doubt that any of the commercial routes would want to divert onto school premises. So you have to consider safety of the pupils as well.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This could work for high school aged children. But again only if buses remain subsidised. I'm less keen on the idea of doing this for young primary aged children	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	That's fine providing that there are alternative commercial buses are operating that can be used as three miles is too far for kids to walk if there are no alternative buses in operation.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Younger kids would still need help with buses.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	For this to be implemented, external funding should be sought to ensure safe routes to school for all. Children having to walk or cycle further to get to school where there are no safe routes is unacceptable. This needs to be factored into this proposed cut too.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	You need to more strict with who you give free travel too and review it better. There are people moving homes who are abusing the free bus pass and still use it even though they now live below the minimum distance. Where is the review of that when pupils update addresses? Williamston bus is very busy and everyone is happy to pay! We don't it for free, we want it to get our kids to school.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I think that transport for children to ASN schools should be means tested and not a given. I am aware of a number of families who's children attend ASN schools and are transported by taxi. The council cover the costs of these taxi's however the families are in receive of benefits which include a very high level of mobility benefit. Why is this money not used for the taxi costs ?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Commercial bus routes are poor/non existent in some areas. A paid for bus service by parents could be an option?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	There needs to be exemptions for children with ASN needs and also parking at schools for the people who will now need to take their children to school.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Review before cuts	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	child bus pass past to be more accessible some have difficulty getting it online	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your response.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Good luck with this one! Seem to remember this policy has also been in the last 2 versions of this document and it always gets removed...	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	My son does not get free transport because we are means tested. We live in the furthest away property and all of our neighbours children receive free bus passes. I was told there was an administration error that cannot be resolved. Just lies! Means tested as we all know.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	If there has been a failure of service on our part and you are dissatisfied please use the formal complaints process to escalate this issue. Each complaint is fully investigated, reviewed by Senior Management and improvement actions are taken, where appropriate. The Council has a formal Complaint Handling Procedure, which all staff must follow, this is monitored by the Scottish Public Services Ombudsmen, who also deals with escalated complaints where a customer is dissatisfied with the council's response.
Environment, Climate Change	4C Reprioritised School Transport Strategy	As an ongoing issue, I am fighting for the ability to pay for my son to use the school bus that leaves from the end of our road. Council policies and procedures mean this is not an option on our route. This year's review of school transport for our area has been a disgrace and the clear cost cutting measures to appoint the cheapest contract has already resulted in some serious concerns and near misses to pupil safety.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	If there has been a failure of service on our part and you are dissatisfied please use the formal complaints process to escalate this issue. Each complaint is fully investigated, reviewed by Senior Management and improvement actions are taken, where appropriate. The Council has a formal Complaint Handling Procedure, which all staff must follow, this is monitored by the Scottish Public Services Ombudsmen, who also deals with escalated complaints where a customer is dissatisfied with the council's response.
Environment, Climate Change	4C Reprioritised School Transport Strategy	feel some of kid's buses that are used are not safe for pupils	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	If there has been a failure of service on our part and you are dissatisfied please use the formal complaints process to escalate this issue. Each complaint is fully investigated, reviewed by Senior Management and improvement actions are taken, where appropriate. The Council has a formal Complaint Handling Procedure, which all staff must follow, this is monitored by the Scottish Public Services Ombudsmen, who also deals with escalated complaints where a customer is dissatisfied with the council's response.
Environment, Climate Change	4C Reprioritised School Transport Strategy	School transport from Kirknewton to Balerno has got worse to worse to worse - Prentice nice buses got replaced with falling apart Horseborough buses, this is a strategy?	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	If there has been a failure of service on our part and you are dissatisfied please use the formal complaints process to escalate this issue. Each complaint is fully investigated, reviewed by Senior Management and improvement actions are taken, where appropriate. The Council has a formal Complaint Handling Procedure, which all staff must follow, this is monitored by the Scottish Public Services Ombudsmen, who also deals with escalated complaints where a customer is dissatisfied with the council's response.
Environment, Climate Change	4C Reprioritised School Transport Strategy	miroslav cervenak	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	J	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Safety	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Ensuing adequate and safe commercial services are available must be in place before other services are cut.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4C Reprioritised School Transport Strategy	OK but little public transport that meets pupil to school in the Town of Linlithgow. Witness the Academy	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Services right now are not reliable which is being shown by children who already use public transport having difficulty being on time.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Punctual bus services would help	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This appears to have detail. You need to provide a one stop entitlement card approval service for this to be equitable.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4C Reprioritised School Transport Strategy	If public transport is made more reliable, routes made more functional and held accountable for poor service this is a good way to save money.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Reduce the school buses current ticket price for all children in catchment areas as not all can walk from their homes because scared from animals such as dogs.; Allow children to use the free cards in trains similar to buses as it can help families with life cost of living.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	This proposal is out with the control of West Lothian Council.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	the commercial bus routes been to be reliable, regular, decent times for travel offered before this could be done!!	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is currently reviewing its Passenger Transport Strategy. The council currently subsidises 20% of the local bus network. The remaining 80% is provided by the commercial market and therefore the council has no authority over its operation, however the council has formed a partnership with local bus operators and transport partners with a view to improving public transport links in West Lothian.
Environment, Climate Change	4C Reprioritised School Transport Strategy	There would need to more more service buses available at start and end of school days as they are already full most days and that's with school buses being used too.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4C Reprioritised School Transport Strategy	What would you do to ensure standarisisation for commercial busses running the school route to ensure people can get to school on time. Busses have a tendency to not run to schedule.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Means testing for the Young Persons Transport as not all families will need it for their children of school age. And not all young Adults will need the extra support for transport as they don't go onto poorly paid jobs	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Need to legally inforce drop off of children within cars, no matter what if they can walk or get a bus as that is ridiculous	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	The school transport is a joke, the buses are not fit for purpose and are never on time. We are supposed to be teaching children about the ways of the world how important it is to be on time and we fail almost daily to get them a bus service on time.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	If there has been a failure of service on our part and you are dissatisfied please use the formal complaints process to escalate this issue. Each complaint is fully investigated, reviewed by Senior Management and improvement actions are taken, where appropriate. The Council has a formal Complaint Handling Procedure, which all staff must follow, this is monitored by the Scottish Public Services Ombudsmen, who also deals with escalated complaints where a customer is dissatisfied with the council's response.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Free bus travel for children needs to be utilised more.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Consider opening schools four days a week an option?	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Currently schools are required to open on a set number of days, but this suggestion could be pursued with the Scottish Government on a national basis.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Get the commercial buses to run more useful abs less extortionate services.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	needs clarified prior to comments	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	It would not be right to offer feedback without a sound understanding of the services and service users this relates too.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	I don't fully understand this part	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	The format of this survey is poor and does not lend itself to true scrutiny of the proposals. The survey is badly designed and off putting to many given the large blurb of text under each heading - the language is in business speak which is essentially meaningless. There is a lack of clarity on the proposals and the reader is left to assume what the blurb is getting at. This survey should have been in plain English with examples of the proposals which would support greater engagement with the activity.; ; There should be space for feedback on the methodology being used also - this has not been made available which adds to suspicion that the whole process is already decided, and course of action is already determined. The council and COSLA must do more to protect our communities and demand a fair settlement from the Scottish Government. This exercise highlights the political failure of the funding model and it will be the local community that suffers as a result. The end of the survey does not have a 'Finish' button, merely a 'Next'. Overall - very poor approach.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	The lack of real facts and figures about what is going to change makes it a challenge to comment effectively. More information is required before any meaningful consultation can take place. We should be provided with a statement for each section and the option to agree, disagree or have no opinion. I would strongly urge the council to re-present this consultation in a more user friendly format.	9. The respondent made a comment on the survey question.	Thank you for your comment about the survey, the council will carefully consider all feedback and use it to review and improve our consultation approach.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4C Reprioritised School Transport Strategy	Ok - as long as routes are safe for children to walk I assume? Pavements, crossings, adequately lit...? ; Young persons - this isn't clear are you saying free bus travel would be removed for commercial routes or what, not clear.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	This consultation survey does not give me the information I need to confidently comment on the projected savings. I would be concerned if school transport was impacted because this may lead to lower attendance levels at school because children and young people are unable to get to school. This would need to be discussed further with Head Teachers and other stakeholders. This may mean that children living in poverty will miss out on an education that will allow them to get well paid jobs. School is often the safest place for some children and if they are unable to get to school then it puts children at risk. This needs much more thought so it doesn't impact those who need help the most.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	What are the minimum limits? This is not clear what is being changed at all.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	As a resident I do not understand what this will mean to the services I receive due to the vague and broad terms used in this consultation document.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	Why not state what the statutory limits are for comparison? Difficult to assess any impact as to whether it might be acceptable	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4C Reprioritised School Transport Strategy	What does this mean in practical terms.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I have never used it but actually had no idea it existed, maybe it has not been advertised well, for me if animals can be rehomed in a safe and stress-free way that benefits their welfare, I would be happy.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	A shame but I can understand why it loses money. A bigger investment would have to be made to make it a paying attraction.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Makes sense, but as for some other proposals it is difficult to put a figure on this - the animal attraction at Beecraigs Country Park might be providing access to nature, animals and an experience that some families wouldn't otherwise be able to access/afford.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Shame it's closing but if not getting the visitors then just have to close as long as the animals are relocated ok	1. The respondent advised that they agree with the proposal.	The council will consider all options for the rehoming of all the animals.
Environment, Climate Change	4D Revised Country Parks Service	Shame but if there is no alternative funding- and animals are relocated locally	1. The respondent advised that they agree with the proposal.	The council will consider all options for the rehoming of all the animals.
Environment, Climate Change	4D Revised Country Parks Service	small charge to see them? total shame to close this. some low-income families may use this instead of a zoo etc as free. its a lovely walk also	1. The respondent advised that they agree with the proposal.	The council has previously considered options to charge for visiting the animal attraction but this option was not considered as being viable.
Environment, Climate Change	4D Revised Country Parks Service	If this is making a net loss then it needs to go- the organisation is not a charity.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Makes sense if running at a loss as its not sustainable	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Sad to see it go but can't keep it while other more important matters need to be addressed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	As long as the animals are rehomed in suitable facilities.	1. The respondent advised that they agree with the proposal.	The council will consider all options for the rehoming of all the animals.
Environment, Climate Change	4D Revised Country Parks Service	Sad but please ensure animals are placed appropriately	1. The respondent advised that they agree with the proposal.	The council will consider all options for the rehoming of all the animals.
Environment, Climate Change	4D Revised Country Parks Service	well ,if that has to happen,as long as the animal are to be safe and looked after	1. The respondent advised that they agree with the proposal.	The council will consider all options for the rehoming of all the animals.
Environment, Climate Change	4D Revised Country Parks Service	Go ahead.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	No objection, although the savings impact is minimal.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agreed. Preference to seek to retain animals for display elsewhere in West Lothian.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Although this would be a great shame if operating at a loss it does not make sense to keep this open	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Rather sad, but if it is loss making then it is not sustainable. Is there scope for The 3 Sisters to take some on?	1. The respondent advised that they agree with the proposal.	The council will consider all available options to rehome the animals.
Environment, Climate Change	4D Revised Country Parks Service	Seems reasonable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Understandable unfortunately as have only been once in 10 years. Please make sure no animal is put down.	1. The respondent advised that they agree with the proposal.	The council will consider all available options to rehome the animals.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	That's a shame.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	makes sense	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Great idea! Please ensure the animal welfare is top priority when choosing where their new homes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Times are tough and if this is an option. People can see animals at other attractions.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree if venues are local and suitable	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I visit Beecraigs, but don't think it would have a huge effect on people if it was to close.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Shame, but this place has been a lose making facility for years. A shame again you only look at this now instead of wasting money for years.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is a good idea, the council does not need to run this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	If it is operating at a net loss this would seem like a cost effective option.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	The petting pens didn't cost £95,000/yr. Tell me all those animals at Beecraigs aren't kept for people to look at????!! Let those farmers run a business, keep animals for a legitimate farming reason and people can still walk round and see that!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Great job.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Shame but hard times ahead so agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Sad to see this go. Hopefully something else is done with the space	1. The respondent advised that they agree with the proposal.	All options relating to the future use of the land and how it is managed without grazing will be considered by the council.
Environment, Climate Change	4D Revised Country Parks Service	Makes sense maybe Mill Farm could take some.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	As long as it is not at the expense of animal welfare in any way. The council would have to ensure that a similar level of care and space was accorded to the animals.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This would be a loss to the community but I understand the saving although it seems minimal.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Better for animals. We go to Beecraigs for walks and not to watch animals in cages or pens	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This seems reasonable	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Good idea . Beecraigs was once an animal attraction with deer and it's turned into a farm . Far to many sheep and cows .	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I agree with this point.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	What a shame for the animals but as long as this is properly planned with animal welfare put first then fair enough. Seems like a tragic closure of a beecraigs attraction for something that will only save a relatively small amount of money.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Bee Craig's has always ran at a loss especially the restaurant	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Good idea - the space would still be excellent wihout the animals	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Good idea.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Sad, I like beecraigs, but makes sense	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agreed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This I agree with, provided animal welfare is paramount.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Disappointing however understandable. West Lothian has limited visitor attracted this will be a blow.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	The is a shame but if cuts are needed, then this would be an area with least human impact.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Okay	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	After reading the above, I will continue to trust your decisions in the areas I have no experience in , but thank you for the opportunity to co-operate !	1. The respondent advised that they agree with the proposal.	Thank you for your comment
Environment, Climate Change	4D Revised Country Parks Service	I didn't even know this existed or was funded by the Council. Let it go.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I would reduce this area, with a more condensed animal attraction with much better media promotion/presence.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	as long as the animals have an appropriate relocation set up, i think this is fine. there are other areas in WL where people have access to seeing animals, although granted this incurs a cost. This seems like a completely reasonable thing for the council to do given the current financial difficulties. Much more appropriate than say social care or education budget cuts.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I understand that the animal attraction is not making any money therefore I agree with the proposal to close it, as long as there are still people who will visit the park and that it remains open.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Do it, as long as the animals are treated well.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Never really understood the usefulness of animal attraction, inclusion of local farmers would be far better.	1. The respondent advised that they agree with the proposal.	Thank you for your comment
Environment, Climate Change	4D Revised Country Parks Service	This would be a small saving but is probably sensible as very few visitors to the park spend time at the animal section.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Such a shame however, I would agree that in the current economic climate this would be a necessary efficiency measure.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Sad, but so long as the animals are rehomed carefully, then it makes sense	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This sounds like a good idea to avoid closure.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Seems reasonable. ; It is believed transport options to Beecraigs Country Park are too limited therefore limiting visitor numbers further.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	It is sad, but understand that there are farms and zoo's that many parents take the children to.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is a sad loss but a fair decision if the attraction isn't being used.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I agree with this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is a shame but understandable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Would agree with this as long as the animals are safely relocated	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Very good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree with this measure	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree with this proposal.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Totally agree with this. Need to prioritise essential services over 'nice to have' services.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Great idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	ok - sensible	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Makes sense	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Remove	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agreed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I have no issues with this proposal.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This seems a sensible suggestion	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Good idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Yes.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Yep agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Sensible proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	No issues it should not be running at a loss	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Operating at a loss is not sustainable so yes, I agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	If nobody's really visiting them then fair enough. I'm not for the commercialisation of the outdoors really.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I agree with this, those visiting the park should be looking at nature not "farm" animals.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree - animal attraction venue is a non-statutory service and should be relocated out with council operations.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree there's plenty of laces to visit animals	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I agree with this as although it is nice to see the animals it is not essential to visiting Beecraigs	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Sad but fair	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is a shame but understandable	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agreed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Animal attractions are not needed, close it.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Sad but yes.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	As long as it improves core services.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Needs must	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	If it's making a loss then fair enough	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Support	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I agree with this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Sad but necessary.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree it is lovely but won't affect visitor numbers	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Sad to see this go. However nice to have and not essential in the current climate.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Sad but makes sense	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is a shame, but makes sense in the current economic climate.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	OK with this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	If it's not making money, they may as well do this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	If they're not making money from it, why have it?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	That makes absolute sense. I'm assuming, based on the statement less profit means not many visitors go to the park.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is a shame, but we're not attracted to visit Beecraigs to see the animals as such.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I agree with this proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Sounds like a reasonable approach.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Good idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Sad but yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	As long as the animals are all found good homes then I support this,	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agreed, I frequently use Beecraigs park and I believe the animal part is a waste of money	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	agree; the park is a stunning beauty area, and this should not be impacted in any way	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This sounds like a simple and easy saving	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree the animals should be in a facility that can better cater for them if beecraigs is not a financially viable option.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	If it's operating at a loss clearly a no brainer	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	No issue with the removal of the animals, but we need the country parks to still be maintained to a decent level for allowing families and community to get out and about.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Without a lot of money spent to improve this attraction it isn't likely to improve it's financial standing, I agree this is the best course of action.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I didn't even know there was such a thing! - And I've lived in the district over 25 years!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Beecraigs is a lovely place to go for a walk or picnic or to fish for minnows in the pond. The animals are not really required.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agreed. I don't believe the animal attraction actually attracts visitors. There is plenty more in beecraigs to attract visitors.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	I love Beecraigs and all it offers, but I can't argue for the animal attraction to remain open in the current climate.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Sad but necessary.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Reasonable proposal.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	If it is currently running at a loss then no point in continuing as long as animals relocated to good venues where looked after	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Best to send animals to Five Sisters Zoo or Edinburgh Zoo, to help the animals	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Beecraigs is too far away and there are no buses that go there. This could be good idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I agree although never knew there was an animal attraction at beecraigs apart from fish	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	give the animals to five sisters zoo	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	agree - this area is not particularly engaging or interesting.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	No comment, the animal attraction is not utilised enough and there are plenty of other animal attractions across West Lothian.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	If the park is making a loss then there's no point in continuing losing money. As long as animals are looked after in alternative accommodation.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	An actual plan that I can understand! If it makes sense then yes, close it!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I actually didn't know this existed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Could the zoo at Polbeth help with taking animals? Would be a shame to lose them from West Lothian	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Happy with this to gappen	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Sounds like an actually good idea. This is the first good idea that I have read.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I wouldn't miss the animals being at BeeCraigs and I have young children. I feel that this is a good area in which savings could be made.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is very sad, but I do understand if there is money to be saved. You cannot operate animal attractions at a loss, animals are an expensive upkeep. As long as the animals are sent somewhere where they will be humanely cared for.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is a nice thing to have but unfortunately there has to be sacrifices.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Could be moved to nearby country park that already has animal attractions and keeps everyone happy.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree, my children really liked walking within Beecraigs and looking at the animals, but I was always surprised by the lack of commercialisation of this. If the attraction is operating at a net loss, I would suggest that ways to generate greater revenue from the venue would be better than moving the animals.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	No issues there as long as the animals are relocated to a safe place where they will not be harmed and none will lose their lives to save the council money.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Close it. These things need to be commercially viable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I assume we are talking about the deer. As long as the animals are relocated and treated well I see no problem with this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I think this is a fair proposal as long as the animals are rehomed suitably. I have been to Beecraigs many times and never actually viewed the animal attraction, I'm sure many others are the same.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	OK; But why was the parking facilities expanded 18 months ago?	1. The respondent advised that they agree with the proposal.	The car park facilities were extended to accommodate all visitors to the park and not solely for the animal attraction. Prior to the extension being opened the car parking facilities could not cope with visitor number in peak periods.
Environment, Climate Change	4D Revised Country Parks Service	As long as steps are taken to ensure the animals are appropriately cared for at alternative venues, and families of animals are not split up	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Or yes close the attraction and relocate the animals. What would happen with the land, can it be leased to SRUC or farmer?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Disappointing but agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Yes the cost does not reflect the benefit of the facility	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	OK	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Fine with this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Nice	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Seems a shame but understand.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Happy with that	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I'm in agreement.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	That would be a loss but an acceptable necessity I think.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	i support this. no one wants to make a loss. the demand clearly is not there so it should be closed or made private.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Close it	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Animal welfare is of priority ,	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	If net loss then seems logical currently.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	move them, never visited	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I think you're right - most people go for a nice walk -	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I personally have never had been to the Beecraigs Country Park as I would be unable to walk to the park and we both do not drive. it runs a net loss then I agree it should close and the animals relocated.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Even though this saddens me to read, if the park operates at a net loss then it's a no brainer to close and relocate the animals.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Hopefully visitor numbers will not fall as a result	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I live inside Beecraigs park this animal attraction is a joke, most of the animals are in fields far removed from the park, and most visitors drive by them thinking it's just farmer's cattle & sheet. Why do they have over 300 sheep & around 70 cattle, I strongly believe this is got out off control by managers & their family members. Wee should be looking to plant more trees for carbon figures & not having more & more animals polluting the air with their presence	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Although it is a shame, I have no objection to this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	While sad this seems a viable long term saving option	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	; The remains of the fish farm that was closed in 2009 still lie, a complete eyesore, unsafe and rotting in the Park for all to see with no action. Is the same planned for the AA? What is planed for the future?	1. The respondent advised that they agree with the proposal.	The council will consider all options for the future use of the land.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	Not enough detail to make constructive comments. Indeed those proposing the savings don't know enough as have never asked! The animal attraction (AA) is just that an attraction, has never been suggested to try and run at a profit or in a more efficient financial manor. The AA has in excess of 300 animals which will not be able to be relocated but will have to go to be culled either straight away or in a very short time frame. There are in excess of 1.4million visitors to Beecraigs the cost to those who come to see rare native Scottish breeds is minute compared to the pleasure and experience given. Tourist come specifically to see these animals close up and learn about the breeds. Volunteers, work placements, educations programmes with the Royal Highland Educational Trust and further education provided to SRUC college at Oatridge are a few of the benefits that this value for money service provide to people. As for the environment there are tree planting projects, hedgerow management, minimal ploughing, reduced fertiliser use, use of legumes, wild bird seed projects, all working towards carbon capture farm plans to use the AA as an exemplar and educational resource in this time of climate emergency when we have all to change to manage more efficiency.;	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	There is a zoo in the area, animals could be relocated there.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	as long as the animals are moved somewhere safe and are cared for then no issue with this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	as long as they get a nice home	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Sad to see it go but as long as there are some places near by in which to take kids to see up close without paying to enter	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree - however this is a very good example of the lack of forward thinking and CMT and elected members not making the difficult decisions. The council invested significant funds into building the new facility a few years ago when the correct decision was not to do it in the first place.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Would support that, not a fan of animals in cages.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is a shame but operating at a net loss is unsustainable	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	We've been a few times but it doesn't merit a visitor attention by any means	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	A small achievement.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Sounds reasonable. The main attraction at Beecraigs is the play park, cafe and walks.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is a shame for the animals but as long as they are deboned and not put to sleep.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Regrettable I suppose, but everything is currently being streamlined.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Sad but may be necessary .; Didn't realise you had an animal attraction there	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I like the animal attraction but think it makes sense to move the animals to save money!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	As long as the animals are safely rehomed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	The council should ensure the highest animal welfare at any relocation sites	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	Although this would be an unfortunate loss, it is understandable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	If it runs at a loss it should be closed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	this should be done as the taxpayer should not be paying for something that is running at a lost	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	ok never even knew you could see animals at beecraigs apart from the deer	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	can understand this however i think people go there alot to see the deers and the farmy bit with the cows	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Beecraigs is used alot for dog walkers and they are not allowed into the animal enclosures so I see this as a good move to close the animal enclosure and rehome them in a place where they shall have 24/7 care.; There has been times where animals have been disturbed by less caring visitors, if animals were moved it would be unlikely they would suffer at the hands of people less caring.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Animals need to be rehomed in the one place. Less staff would be required and care would be covered with a consistent team of knowledgeable people.;	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Would be a shame for it to go but wouldn't stop me visiting	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I didn't know they had anima attractions at beecraigs	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	That seems to be a shame but I suppose makes sense. More job losses though.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Whilst sad as was great with toddlers visiting the animals this seems a sensible cost daving albeit very small.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Didn't now there was an animal attraction	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agree fully with this, it is not a core service. Would also support a review to see what scope there is for further savings in Country Parks.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Shame about this. But there is always Muiravonside. The farm there is much better anyway.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	A shame but there are many other options to see animals in West Lothian.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I agree. ;	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Ok, it is pretty rubbish although the Beecraigs park is generally very good!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Sounds fair enough to transfer if it's losing money	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	No major concerns, but presume e.g. deer will remain.	1. The respondent advised that they agree with the proposal.	No, the deer are part of the animal attraction and would need to be sold and/or rehomed.
Environment, Climate Change	4D Revised Country Parks Service	This is a shame but there is only a small number of animals currently at Beecraigs it is worth for it for this level of saving.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agreed, not appropriate for the council to provide.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I agree. We use that park for kids attractions and walks but never visit animal attractions	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Not the most important priority with the mess the country is in	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is not a core service - agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Personally I didn't even know the animals were there so will have to try and go and see them before this happens!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Unless you drive Beecraig not accessible. Makes sense to relocate/house the animals to an animal attraction venue. Eg Five Sister Zoo or Almond valley heritage centre.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Shut it down and put funding elsewhere	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	As long as the animals are well cared for, this makes sense. ; ; Thank you for making this one clear!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	cut the service	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Seems an easy saving, but could have a knock on effect on visiter numbers?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I would be delighted if you close it! It is a health hazard.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	I think this could be a good saving	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This sounds fine as it is making a loss.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Fair assessment here as operating at a loss.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This makes sense. Love the Oreo cows but it doesn't have high footfall.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Happy to support this move.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Often visit Beecraigs and personally very rarely go to see the animals. Dont think this would be a big loss to visitors as long as animals were going to be well cared for in new accomodation.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	That's a shame. But if its running at a loss then you have to do something.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Reuse the animal areas for bike tracks or similar additional adventure exercise.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Environment, Climate Change	4D Revised Country Parks Service	Sad but agree it's necessary	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Yes close it as a lot of money is required for a natural environment otherwise it is cruel to keep them confined.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Agreed, but ensure that locations are displayed at Beecraigs showing where the children's (and adults) favourites have been moved to and if possible staff that the animals are familiar with are re-employed with them.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Such a shame as I didn't even know such an attraction existed. Perhaps with greater promotion this may not have been a loss making service. ; I'd expect safe standards of animal care in the alternative locations.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	As long as the animals are relocated to services where they are properly cared for I would see this as being sensible.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I agree...relocate the animals	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	The only proposal so far to have an actual action that I understand! Seems reasonable under the financial restrictions faced by the council at this time.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I did not even know about this so perhaps either loose it or advertise it better?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	If this is running at a net loss and it will have minimal impact on visitor numbers then it is very unfortunate but a necessary decision.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Whilst disappointing if savings require to be found then this is an area which could be supported, provided animals were suitably rehomed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Never knew Bee craigs even had an animal attraction. Maybe at a net loss because it is not well known. If a small number of people see it and the animals are accessible nearby then it shouldn't adversely affect the local community.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	With no personal transport of my own a visit to beecraigs is a rare pleasure so I would not miss the animal attraction and it could be closed with the animals responsibly rehomed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Have a facility/parks where kids can go to see the animals and their natural habitat	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I'm dumbfounded that this 95k saving could have such a massive impact on this valuable community service - this sounds like a very small saving and would have a massive impact on the passionate and committed team whom have invested so much of themselves in the project - this clearly has not been thought through	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	It is acknowledged that this proposed saving will have an impact on the team that delivers the service. However, the council needs to consider all available saving options.
Environment, Climate Change	4D Revised Country Parks Service	This will be a loss for local communities	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	what animals ? thats well advertised then !. maybe if you stop expanding livi on all sides with stupid badly planned streets and badly made houses (2-4 solar panels taking up a wee bit of roof will do Nowt for bills, fill it up and make all the roof area south or west facing as std) we would have nature to view on our doorstep thats free to view.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Open as a public park with staff not needed	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Staff are required to ensure all the council's parks and open spaces are maintained in a safe and fit for purpose condition for all visitors.
Environment, Climate Change	4D Revised Country Parks Service	This is all good and well, but some families cannot afford animal attractions such as zoo's, so we are taking away much needed resources	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	People go to see the animals. Offer a more hands on experience, let visitors pay to feed the animals, charge a small fee for parking. No one buys venison so involve schools to educate and learn about wildlife. Beecraigs is a huge part of West Lothian identity and attracting visitors is key. Closing the animal attraction is killing the identity and essence of beecraigs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has previously considered options to charge for visiting the animal attraction but this option was not considered as being viable. The Ranger Service currently provide free educational events for the public and laise with schools.
Environment, Climate Change	4D Revised Country Parks Service	Not enough of a saving to warrant closure	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This would be a real loss to the park. It is a big attraction for families who then go on to spend at the café. Would it be possible to look at alternative ways of raising income from visitors to support this?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has previously considered options to charge for visiting the animal attraction but this option was not considered as being viable.
Environment, Climate Change	4D Revised Country Parks Service	You will struggle to place those animals in good homes. I know eg Muiravonside (different council authority) is also closing their animal attractions and face rehoming many animals. I cannot understand why the Council does not charge for these attractions. Even a nominal £2 per person and car parking charge would help cover costs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will consider all options for the rehoming of all the animals. The council has previously considered options to charge for visiting the animal attraction but this option was not considered as being viable.
Environment, Climate Change	4D Revised Country Parks Service	Would be a shame to see this happen; Families need to be encouraged to visit outdoor centres as part of wellness and good health. It's important to teach children how to look after our environment for future generations	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The Ranger Service currently provide free educational events for the public and laise with schools.
Environment, Climate Change	4D Revised Country Parks Service	There is no promotion of Beecraigs Country Park as an animal attraction centre which may be one of the reasons it runs at a loss.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Beecraigs Country Park, including the animal attraction is advertised on the council's website and via social media.
Environment, Climate Change	4D Revised Country Parks Service	Not everything has to make a profit. Some things are investments into communities.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Where will the animals be relocated? Will it be within West Lothian or is this another learning resource/ attraction being removed?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	It is still to be determined where the animals will be located to. However, the council will look at all available options for the rehoming of the animals.
Environment, Climate Change	4D Revised Country Parks Service	I would disagree with the no effect on numbers as people travel from all over the world to see the Highland cattle and sheep. I personally have had an American visitor cry and shake with joy because I let her get close to a highland cow from the other side of the fence and she got to clap it. Animals are a must. The viewing shed is busy all day with visitors going to see what animals are in there each week.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	To see the animals why don't u charge a 1.00 fee.....	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has previously considered options to charge for visiting the animal attraction but this option was not considered as being viable.
Environment, Climate Change	4D Revised Country Parks Service	Also reviewexpenditure on salmon ladders, was this the best use of public purse, can't see them bringing tourists to west lothian.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council doesn't own any salmon ladders.
Environment, Climate Change	4D Revised Country Parks Service	But children who do go to Beecraigs Country Park are well rewarded.; Savings of £95,000 are small compared with other savings proposed. ; Savings are mainly staff costs?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The savings relate to all the operational costs associated with the operation of the animal attraction including staff costs.
Environment, Climate Change	4D Revised Country Parks Service	I can understand this, but it will be a disappointment to many people as often visiting Beecraigs is not just to see the woodland or the play facilities, but also to see the animal attractions	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	A lot of people visit Beecraigs to see the animals, especially families with children. I think removing the animals would mean less familes wanting to visit and therefore could impact on the overall park.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This would be a loss for a huge generation of young visitors. Contact with agricultural animals is an important part of understanding the countryside and the food chain. At such a small cost, surely the value it brings to visitors is more important. Visitor numbers are immaterial but on a cost-benefit analysis, £95,000 is insignificant when compared to what it provides.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I really enjoy seeing the animals there, maybe some reminders that they are there would be good to boost visitor numbers?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Beecraigs Country Park, including the animal attraction is advertised on the council's website and via social media.
Environment, Climate Change	4D Revised Country Parks Service	I think this is a shame. I visit here regularly with both my children and have done for the past 11 years!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	If used extensively by schools then I would not support unless alternative options were available within the Council boundary	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This seems a shame. Surely you need animals to graze the land?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	All options relating to the future use of the land and how it is managed without grazing will be considered by the council.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	This seems a real shame for a relatively small saving.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Such a shame for this to be removed, as it is always well used by many famous in West Lothian. I'm sure by cutting some of the CEO salaries/councillors expenses, that amount could be saved that way!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	These suggestions are getting more and more depressing. How about we relocate west Lothian Council outwith the area. I'm sure local citizens would expect this to have minimal impact.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	It would be sad to lose this attraction.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	So many years of investment put in the bin!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	If its operating at a loss why do you not do something to entice people to visit.; Welcome to West Lothian!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is a real shame. Beecraigs is a fabulous resource in West Lothian and the animals are a huge part of that. Perhaps the shutting of the visitors centre at the animal park location has reduced income as the new cafe/centre is further away.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is terribly sad and a huge loss to the local area	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	We need our parks, they need to be funded.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	The labour-Tory council coalition has some serious questions to answer if this goes ahead.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Environment, Climate Change	4D Revised Country Parks Service	A shame	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Environment, Climate Change	4D Revised Country Parks Service	It is big minus	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I disagree that the animal attraction will not be missed and they are an import part of the park and attraction for visitors	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	It would be a shame and result in job losses.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Will this be more houses? Hence ruining the remoteness of Beecraigs and the enjoyment of walking.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	No, the land is protected as agricultural/open space in the Local Development Plan.
Environment, Climate Change	4D Revised Country Parks Service	This would be a great shame and will negatively impact the quality of experience enjoyed at Beecraigs. As a regular visitor to the park, I know that the animals provide a great attraction for children and adults alike. To be able to view deer and highland cows and sheep up close shouldn't be viewed as surplus to requirements. The nearest wildlife, or Safari Park is 40 miles away.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	If we could support this staying open - through donations to a charitable trust - then we would. The animals are a key part of Beecraigs. It would be sad and unhelpful to lose them	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Redic. Let's get rid of the animals, oh then lets build more homes. Stop building on funky Country areas, just stop building new homes when the council, health, roads and more can't cope with it!!!! It's not rocket science	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Parks and animal attractions are needed to aid in a childs natural learning.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is an attraction I will miss a lot!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Within Parks & Woodland there are services where frontline contact and communication is integral to the multiple services provided, ensuring clarity, understanding, welcome, quality customer service, etc. Clearly if the Council decide to remove some of the existing services, there would be a reduction in related demand.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	Again children who cannot afford to visit farms with entrance fees will miss out on significant life experiences. Where else can children learn about farming without having to pay for the experience.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This will again impact the experiences of children and increase the poverty gap. Families who cannot afford to pay entry fees to zoos and parks will no longer be able to have similar experiences.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	If the animal attraction closed, what would the Council do with the land and the units on site? I very much hope that the Council will retain budget to provide alternative provision for the public on this land e.g. extended woodland, paths. Unfortunately we had hoped this would have happened when the fish farm facility closed but the site has been left abandoned and unmanaged, questioning who will also take over that location in the future.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	All options relating to the future use of the land and how it is managed without grazing will be considered by the council.
Environment, Climate Change	4D Revised Country Parks Service	The Animal Attraction went through a "council review" previously whereby the number of red deer (when we only had red deer) was drastically reduced and it was then deemed to be able to operate sustainably. I am aware that the Attraction now has cattle, sheep and deer so the head of animals has increased but please provide greater detail on costs and losses of the animal attraction.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	The attraction operates at a net loss? You're not measuring the positive impact that it has on people.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is disappointing as my children enjoy going to see the animals as we walk around Beecraigs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Savings not good enough to make this worthwhile.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This would be a massive loss. Extremely disappointing. Not everyone can afford to go to safari parks & zoo's etc so parks like these are a must for the community. Children thrive seeing the animals on their doorstep. Surely some kind of d public donations or parking charge like muiravonside introduced could help save such important parks & animals stay at beecraigs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is a real shame. It's an opportunity for kids, older people, people with additional needs etc to see animals for free in a natural environment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	That is a massive shame... but understandable.; I cant say i am happy about it but reluctant to agree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I would not support this, the animal there bring happiness to lots of children without the worry parents about the additional expense. However in order to support this I would be willing to pay a yearly fee of around £10 to support beecraigs animals.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Such a shame to see this close. Please take care of the animals.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Doesn't seem like a big enough saving to justify taking this away.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Unacceptable!!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Disagree,	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Disagree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Not good	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	not happy with this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Disagree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is outrageous	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Dreadful proposal	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is just sad really	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	disagree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This would be terrible and great loss to West Lothian. There would be a mass exodus to Muiravonside Country Park. How about a box for donations from the public? I'm sure plenty of people will happily put some money in as they look at the animals IF you actually told people the financial situation.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	The majority of people who visit Beecraigs go to see the animals. I have no idea where you are getting your information from! Seems the tory side of the Lab/Con coalition is having a massive influence on West Lothian Councils policy makers.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Are you joking. I have grand children, great nieces and nephews who love this How will it not impact the park	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This would be a huge loss for the community and for those who cannot afford to pay to take their children to places such as Almond Valley.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	It's always nice to see the animals but this is a cost I would not mind saving. Albeit it is sad from a nostalgic point of our children not growing up with what we had available. Nostalgia doesn't help the purse strings.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Why not close down everything that doesn't make money. Social enrichment isn't important. You could turn off the street lights while we're at it. And people could take their own rubbish to the tip. What a disgrace!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I don't agree with this proposal. Find ways to generate income at the facility instead.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Benefitting all you have to agree; Ticking all the boxes for all to see; Mental health, walking, interacting with the animals, educational too; And in these hard and difficult times you have to agree; It is an escape from reality for you and me.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Please do not close the Animal Attraction; I implore you; It means so much to our visitor paying customers; Just think of the children too; You should see their little faces lighting up with glee, when they tell you all about the animals that they want to see. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Not a significant measure and the savings are negligible compared to the goodwill from service users sacrificed.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Keep it, good for family days out	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Beecraigs itself is an important resource and mus not be threatened.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	You should keep these services.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Absolutely gutting & completely short sighted. These are assets that set up apart and help educate children. Terrible & shameful to remove them.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	How do you know that this will have minimal impact on visitor numbers? And I don't just mean dog-walkers etc but real , a half-day-out visitor that will hopefully enjoy the cafe, the visitor centre and the walks. I think for most parents with young families, the animal attraction is priceless. Why else would you visit Beecraigs? The activity park and that's it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	This will be a sad day and it is one of the few attractions which it is possible to easily walk too from Linlithgow or for other venues in other towns.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This will be a loss	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	keep it	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This would have a negative impact on the residents of WL as we should be encouraging outdoor activities for health and wellbeing.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Concerns over taking facility away that encourages people to go outside, especially younger children. If no animals what would the land be used for and have the costs of the alternative use/maintenance of the land been taken into account of in the estimated saving	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Another blow to children. Why is this expected to have minimal impact on future visitors.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This would be a very sad and disappointing decision. Our children spend many weekends visiting Beecraigs, particularly the animal section and have been brought up visiting this attraction.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	The plan should be to provide more attractions here to increase visitors numbers. ; Animal experiences, making use of the pond and fishing space. ; Closing services is not the answer.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	People go beecraigs to see the animals with out them the footfall will drop drastically. Not everyone can Afford to take their kids to zoos etc due to the cost of living so taking away a free chance to see the animals is ridiculous	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	By passing to alternative animal attraction venue(s) out with council operations you are not employing a holistic approach and merely passing over to another agency. Not all attractions should make a profit and surely those attractions which do make a profit can be used to assist those which run at a "loss".	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is already an unpopular idea. I don't think we have had a good business strategy for the country parks for years. Generally speaking, better off people use country parks (check the cars in the car park) and would pay for extras if they were available.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	the animal attractions at Beecraigs are one of only a handful of places our children can go and enjoy the animals and learn about them.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	no - get rid of a few subsidized buses and keep it open. Get rid of subsidized rail fayre for well off pensioners going to the Xmas market and drinks in Edinburgh and keep the animal attraction open	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	that is a shame it is going to close my kids love seeing the animals. it is also a valuable learning tool for young people	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	No. More advertising that this park exists and what is there is needed. Keeping the park and its animals is needed.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Should stay open as it is a lovely attraction and the Animals home.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I think this is really sad for our local area, I know many families who enjoy walks around this attraction.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	No dont agree. For the amounts involved this should be kept as is.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Don't agree. Many people use this park and f for the cost represents very good value for money.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	That's a shame I enjoy the deer etc up at beecraigs	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Very sad. Places like muiravonside run an amazing site. How is that funded?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	Disappointing as this is used by many people living in the area and is great fir young children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Promote it more, not enough savings to justify,	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	mental health is improved with access to outdoor areas. Any changes will impact residents	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Poor	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Nooooooooo! Please don't get rid of the animals!!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is a backward step as Beecraigs is one of the most popular tourist attractions in the area. Can the business model be reconsidered instead of moving the animals? The attraction with be significantly weaker without them and in turn, likely lead to less income via tills in the cafe etc. Essential to avoid short-sighted cuts and this looks like one.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I disagree with this	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Sad to see them go	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	KEEP THIS OPEN!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Strongly disagree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Disagree there must be ways of raising funds car parking ? Entry costs ??	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This would be a shame	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I feel sad about this, especially as the saving - in the grand scheme of things - isn't that much.; The animal attraction is a free and fun thing to do especially for families who perhaps can't afford to go to paid attractions very often.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Another local resource taken away due to financial implication! Children and families enjoy this space. Being able to visit somewhere like this is amazing, which has the range of activities to choose from at a free cost!! ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Beacraigs is a great place for exercise and mental health. It's lose would be detrimental.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Deer oh Deer unbelievable	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I don't think this is the level of savings that we need to focus on.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Dont do it!! This is a draw for people to the park - minimal savings, maximum disappointment - A Country park with no animals???. Some families cant afford to go to bigger animal attractions. This is free.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is vital for kids' learning and general health and wellbeing of residents. Bad idea.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	NOT SURE HOW RUNS AT LOSS, GIVEN DOESNT CHARGE. ONLY ASSUME BREED TO CULL AND IF NOT WHY NOT?. NEVERTHELESS, THE AMOUNT IS NOT A HUGE FIGURE FOR THE PLEASURE THE SITE CREATES TO THE AMOUNT OF PEOPLE WHO VISIT IT EVERY DAY/WEEK. THIS SHOULD BE CONSIDERED ABOVE ALL BEFORE CUTTING FOR CUTS SAKE. TO MANY SERVICES WILL BE CUT AND THE LAST NEEDED IS THINGS THAT CREATE WELLBEING AND WELLNESS IN VISITORS	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This would be a sad loss to those of us who frequent the park. The saving seems small in comparison to the others discussed in this consultation and the value of getting up close to the animals at Beecraigs is great. This is one of the few, free opportunities for urban residents of West Lothian to see farm animals close up.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Wow more bad news, I feel sorry for my generation, nothing bad bad news, very bleak	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Sad to read that this is being closed as would love it to "still be there"....That's from a personal perspective of someone who loves that area and would like to see even more on offer.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I believe closing the animal attraction would have a negative impact on the community. The animal attractions provide educational and mental health benefits alongside physical health benefits. The animal attraction does as it says, it attracts people to beecraigs and from the animal area they can then enjoy the walks and other attractions there. For many young children this can be the stepping stone to a healthy lifestyle	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	; I am a personally appalled that this suggestion has been put forward with so little thought, understanding or consideration for any of the staff involved in managing this facility. Change has to come but you have to bring the staff with you not disregard them with no respect for the hard work and dedication that has been given over years. I doubt there are many other employees in the Council who work as hard. The way this was proposed has shown a complete lack of respect for all the staff and visitor.; There is so much more that could be said but whether any account will be taken or it is just an accounting exercise is to be seen.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	; To say that the AA runs at a loss does not put any value at all on all of the added value that this facility brings to Beecraigs and West Lothian. And to say that there will be no reduction in visitors is naive in the extreme. Huge numbers of those who visit ask specifically to be directed to the AA and about the animal themselves. The view from the visitor centre window if filled with them, our meadows are grazed by the animals, our urban meadows are cut by their machinery! This is a small operation that costs nothing in comparison to its value and compared to waste that can be seen elsewhere in the council in a daily basis it is unbelievable that this is even being considered.; ; What plans are there if this were to go ahead, this is an integral part of the country park where there are access routes, fences and pathways as well as informal access. Future management and maintenance would still be necessary but without the income currently through IACS and SFP. We already have more trees than we are able to manage with current resources in West Lothian. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Such a shame this is a fantastic facility and only needed some different advertising and promotions to make it a profitable business, new ideas couldve made this a great attraction to the local area. animals are fantastic therapy and this couldve been developed to help people with mental health problems. This didnt need to happen	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	It's not clear if this represent any loss of jobs? If the saving is only £95,000, I'd expect the council be confident this loss does not have a significant wider impact they have not quantified i.e. the loss of footfall that is attracted by the animal attraction may be contributing well beyond £95,000 to the wider park income generation and/or the wider local economy including retail and accommodation etc. There will be a tipping point whereby if you strip facilities from a large Country Park one at a time, it will cease to be a regional or national destination. The play area, footpath networks, and toilets, are already compromised by a lack of investment.; ; I would suggest £95,000 is not worth the risk of compromising the overall value of the Country Park, if the animal attraction is not profitable, consider investment to get it into profitability,	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I like it though so no, don't close it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	Beebraigs farm has been a pivotal place for me growing up. To take this away from other children growing up in West Lothian would be a disgrace. I have brought my family from around the UK and further afield who absolutely love the farm. The opportunity to see animals so close in the viewing shed is an amazing experience and makes this so accessible to people who don't have access to a farm. What is your plan with the animals? 100's of animals? The opportunity for re-homing is laughable. I think it is very naive to say that visitor numbers would not be affected by this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Absolutely terrible idea!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Very disappointing	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

Environment, Climate Change	4D Revised Country Parks Service	I disagree with animals getting taken from one habitat aka beebraigs to another	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I think West Lothian community should get a larger vote on this and in order to do so we'd need to know where the animals were ended up. They have a very rare breed of sheep, and last I'd heard they were possibly going to breed them to help save the breed itself. That seems like a big deal. And honestly the best thing about beebraigs is going in the spring to see the baby deer and how close the females come to the visitor centre. Everyone knows beebraigs = deer. I was born in the 90s and always went to see them. And my children have started growing up with the same things. Would be a shame to lose this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. It has still to be determined where the animals will be rehomed. The council will consider all available options for the rehoming and sale of all the animals.
Environment, Climate Change	4D Revised Country Parks Service	No, Beebraigs is magical place for families and seeing animals there its great adventure	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Environment, Climate Change	4D Revised Country Parks Service	The animal attractions at Beebraigs encourages people, including families, to access nature and encounter animals first hand, which is extremely valuable in a society that is increasingly detached from the natural world.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Bad management here I'm afraid - this sort of facility is hugely successful in other parts of the country?? Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

Environment, Climate Change	4D Revised Country Parks Service	Remove it, if you want to see animals visit a zoo. Or look at the wild life.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I think this would definitely impact visitor numbers. The animals at Beebraigs are an excellent resource as many families especially in the current climate can't afford visits to farms etc. We want to encourage care for the environment and time spent in nature and Beebraigs is important for this. There are no other opportunities for animal visits of this kind in West Lothian.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I am sad at this as my children love going here and seeing the animals	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is a bad idea families need to be in tune with nature so many green areas are being laden with houses!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Any move of animals will mean that many who cannot afford to pay to go to zoos etc will not have access to wildlife, however anything that currently runs at a loss needs to be considered.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	Don't agree this is a great place for the kids to walk around and see the animal without it costing parents who can't afford to go other venues. Also great educational experience can be met at Beecraigs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This would be a sad and disappointing loss to many people, especially young families. Quality of life is important and this would have a much greater impact on the west lothian community than the £94, 000 saving could justify.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Disagree with this. Very little green spaces and attractions around as houses are constantly being built here. I'm sure if a barrier were out I. Car parking and a small fee required, people would pay it to keep the animals at Beecraigs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Would be sad to see this go	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	It is a long time since I visited the animal attractions but did so when the family was young - and it was the reason we went. However, the welfare of the animals must be uppermost. Where however, could families freely visit animals if this were to be closed?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Very disappointing. Once again WLC happy to take our money but consolidate facilities closer to HQ. I'm sure axing an exec would more than cover this once you factor in salary and pension + benefits.....	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment.
Environment, Climate Change	4D Revised Country Parks Service	This provides young people with an opportunity to engage with nature and farming in a way that many in an increasingly urbanised area are not often able to.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I am concerned of the impact on families who cannot afford to pay to have these experiences at privately owned venues. Once again widening the gap between those who have the means and those who do not, having an impact on childhood attainment through lack of access to these opportunities and experiences .	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	In times of cutting costs, this is understandable but would be a real shame - being able to see and engage with Scotland's animals, particularly for farming, is a fantastic opportunity for young people to learn more about them and connect with where their food comes from.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	The animal attraction is one of the free attractions available to all children to enjoy regardless of their background and should not be closed. Alternative animal attractions are expensive and unaffordable to a vast amount of families. There is already a lack of free facilities in West Lothian for families.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is a major attraction of Beecraigs and has been for many years. For the relatively small saving this should be removed as a consideration. Numbers will definitely be impacted too. A net loss perhaps but this is something I don't mind my council tax going towards.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	What is the proposal to provide access to city farms for children in lieu of this closure?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	There is currently no proposal to consider City Farms. However, officers will consider this option going forward as an alternative solution to providing an animal attraction.
Environment, Climate Change	4D Revised Country Parks Service	What a huge loss for our country park. They bring a lot of pleasure to visitors.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Environment, Climate Change	4D Revised Country Parks Service	It will be sad to see this go.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Totally against this. We travel to Beecraigs at least once a month to see the animals. Would we bother if there were no animals? Probably not. Would be interested to know how you arrive at visitor numbers and how you would ever expect something like this to run at a profit?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	West lothians main country park and you want to close it. Absolutely no sense.; ; This is a park used widely by the locals and is the main one this should be saved and kept up.; ; Why don't you look at reducing cars for the council workers instead.	2. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Shame.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	Regularly visit Beecraigs and it would a shame not to be able to see the animals as it is very much part of our route and many others to see the sheep, deer etc. Always been a loss that feeding fish section was closed.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Not making much of saving	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Kids need more facilities to learn play and grow in ; Basketball parks ; Excercise parks ; Football parks	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment.
Environment, Climate Change	4D Revised Country Parks Service	I disagree, this area should be developed more and closer links made with schools and communities. Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This facility has provided endless enjoyment for our family and friends growing up. There are very few opportunities to get up close to farm animals and see them being worked if you are luck enough to be there on a day when the staff are moving them around. They are always most helpful and take the time to explain about what they are doing and why, to the point where they offered my daughter the opportunity to take up a work placement before going to vet school (essential experience to get in). I know that they have provided this for many vet students as well as offering hands on lambing experience for many more. Given the numbers who visit and the wide ranging benefits this facility provides to visitors and tourists a like this seems a very short sighted option to take when surely there are many other areas the council could be looking at that don't provide as many all round benefits as this?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Environment, Climate Change	4D Revised Country Parks Service	I am a senior citizen aged 73. Have read issue 100 Bulletin. All I wish to report is yes open spaces in Livingston are great but need to be save in deserted areas.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I don't see the benefit of this, the animal attraction at Beecraigs is integral to its offering. With better marketing through Visit West Lothian, this could become a real selling point - see the Cairngorm Reindeer Herd, or the Scottish Deer Centre as comparatives.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	removing the animal from their home –sad	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I didn't even know there was this attraction at Beecraigs	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	What is the animal attraction at Beecraigs? Is this not a farm? I visit Becraigs to walk my dog at least once a week and didn't know this was funded by the Council.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I'm not in a position to comment fully on this	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Firstly we are not a "Country Parks Service", we are "Parks & Woodland" covering way more service functions than just the 3 Country Parks.;	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment
Environment, Climate Change	4D Revised Country Parks Service	Has this closure been discussed with the Parks & Woodland Manager? Are you correct with your calculations to ensure that you can validate that the facility is, like the old fish farm facility (we had before), been operating at a loss?	3. The respondent advised that they had no comment to make or posed a question of the measure.	This proposal is being consulted with staff and the public simultaneously. All financial calculations have been validated prior to publication.
Environment, Climate Change	4D Revised Country Parks Service	I assume this will also be a reduction in staff. Staff should be relocated else where.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Yes, if the animal attraction closes, it would be the intention to redeploy staff elsewhere within the council.
Environment, Climate Change	4D Revised Country Parks Service	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Aw.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	no involvement	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	no comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	No views on this.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	NC	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Unable to comment again due to lack of available information.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I can't see any point in continuing this survey as it is a waste of all our time without the information, we need to give an informed opinion.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I am unable to provide further input as the level of detail within the estimated saving briefing doesn't allow me too.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This doesn't affect me so I can't comment on something I know nothing about.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	undecided	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I love Beecraigs country park and think it is a great space in West Lothian, I do not have any issues removing the animal attraction but please continue to provide a great park to walk/cycle/ run in.	4. The council is already doing this.	The council will continue to maintain all country parks, parks and open spaces in accordance with council service standards.
Environment, Climate Change	4D Revised Country Parks Service	Get public help and sponsors and do more to promote the place	4. The council is already doing this.	The council is actively looking at options for sponsorship and commercial opportunities within its three country parks. The country parks are regularly promoted on the council's website and via social media.
Environment, Climate Change	4D Revised Country Parks Service	balabnce saving against visitors cut if needed	4. The council is already doing this.	As the park is free for visitors to visit, any variation in visitor numbers will have no impact on the proposed saving.
Environment, Climate Change	4D Revised Country Parks Service	Where will the animals go? And presumably wherever they do go, there will be a cost attached to seeing them?	4. The council is already doing this.	The council consider all options for the rehoming of all the animals.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	Shame, for many young people it's a way for them to see farm animal up close without having to pay. Maybe if the council would sell venison, lamb, and beef like they used to in the visitor centre it would help mitigate these losses.	4. The council is already doing this.	The council did this in the past and stopped the service as it was non-profitable.
Environment, Climate Change	4D Revised Country Parks Service	I've been in beecraigs countless times and didn't even know there was an animal attraction there	4. The council is already doing this.	Beecraigs Country Park, including the animal attraction is advertised on the council's website and via social media.
Environment, Climate Change	4D Revised Country Parks Service	As long as the land is not developed for housing and it's zoned so it can never be touched	4. The council is already doing this.	The land is protected as agricultural land in the Local Development Plan.
Environment, Climate Change	4D Revised Country Parks Service	That is disappointing to hear, I love Beecraigs CP and would be sad to see it close. ; Could it be reduced in some way to negate costs? (ie selling off of fishery area / demolition? and same for similar areas of Beecraigs? ; ; May involve the sale of areas of the land / park, but what about holiday cabins in the park? If these were present then there would not only be increased tourism to Beecraigs itself, but also to the wider WLC area... Would then justify the keeping of the animal attractions and could perhaps revive the fishery area? (Consider impact of increased tourism to surrounding areas, in particular Linlithgow, which is bad enough with traffic normally...)	4. The council is already doing this.	The council is currently looking at all available commercial opportunities for the park and currently provides log cabins within the caravan park area. The proposal is not to close the park, only the animal attraction within the park.
Environment, Climate Change	4D Revised Country Parks Service	Will the park still be opened for visiting ?	4. The council is already doing this.	Yes, the park will still be open for visiting. The proposal only relates to the closure of the animal attraction and not the wider park.
Environment, Climate Change	4D Revised Country Parks Service	Provide a commercial franchise at the parks for coffee, hot chocolate ice cream.	4. The council is already doing this.	Thank you for your comment
Environment, Climate Change	4D Revised Country Parks Service	The savings made need to be put back into other elements of the Park service though and not sidelined off to cover other budget areas.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Potentially looking at peoples contracts who decide to sit in a WLC van for hours on end because it's 'raining' or they want an extended lunch break would be a better idea. People who are paid to work a certain amount of time should be doing that - not leaving work 1 hour early and if that was the case then do not get paid for it.	4. The council is already doing this.	Thank you for your comment
Environment, Climate Change	4D Revised Country Parks Service	Again, look at management savings first.	4. The council is already doing this.	Thank you for your comment
Environment, Climate Change	4D Revised Country Parks Service	Their is no investment at Beecraigs. I have seen a Hugh decline in visitors because their is no investment in visitor attractions.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Privatise beecraigs minimal support in transfer of ownership	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment
Environment, Climate Change	4D Revised Country Parks Service	All country parks should have a space for dogs only as there are two many dogs foiling parks in Westlothian and dog owners are not picking there dogs dirt up	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment
Environment, Climate Change	4D Revised Country Parks Service	Could you work with Falkirk Council to ensure that either Beecraigs or Muiravonside are kept. Losing both would be a bad step for local youngsters.	5d. It is proposed that this suggestion is not taken forward because it has been previously considered and will not be progressed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Services running at a loss are not cost effective however is there an option to merge the Beecraigs Country Park with another service to save closure?	5d. It is proposed that this suggestion is not taken forward because it has been previously considered and will not be progressed.	Thank you for your comment
Environment, Climate Change	4D Revised Country Parks Service	So you will get rid of the deer, cows and sheep? You should do what you used to do in the shop and sell the meat from these animals in the same way any commercial farm and teach children and adults where food comes from.	5d. It is proposed that this suggestion is not taken forward because it has been previously considered and will not be progressed.	Thank you for your comment
Environment, Climate Change	4D Revised Country Parks Service	Please please keep the deer and sell venison to subsidise them. The cows can go. ; Disagree that this will not impact on visitor numbers.	5d. It is proposed that this suggestion is not taken forward because it has been previously considered and will not be progressed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	There needs to be more information about this - what does the £95,000 equate to? Is it just the management of the animals? Or does this include staff resources? Does it include the cost of land management (as the land will still need to be managed), or does it assume the land is leased out or sold? ; ; The Animal Attraction model is actually currently being reviewed - it does provide an invaluable rural educational experience for schoolchildren right across West Lothian. However, the workings of the farm could be completely overhauled, with a complete refocus of aims and objectives to turn it into a rural land management exemplar. For example, it could be an exemplar of regenerative farming and crofting, with extensive diversification (such as rewilding some areas and utilising permaculture methods to make the cultivated areas as productive as possible) Work could be carried out in partnership with SRUC Oatridge, the Nature Friendly Farming Network, Locavore and/or Cyreneans to make this happen. The farm could then contribute to local, sustainable food networks, as well as WLC carbon sequestration and still act as an educational resource, as well as offering local employment. The Bathgate Hills are an exceedingly valuable agricultural resource and the land owned by WLC should be utilised to its fullest extent, to the council's best advantage.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Officers will consider all available options for the future management of the farm and/or the land. This will include exploring options for partnership working with other stakeholders and/or charity organisations.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	Can local farmers step up - could there be a partnership with charities or the RSZS?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Officers will consider all available options including options for partnership working with other stakeholders and/or charity organisations.
Environment, Climate Change	4D Revised Country Parks Service	Parks & Woodland currently staff and operate 2 frontline Visitor Centres; are either of these being considered for change in how and who run them? This survey has provided very little detail as to how this would be played out.; It has been considered in the past at Almondell Visitor Centre but nothing came of this. I feel it would be extremely short-sighted and naive if West Lothian Council did not continue to operate the Visitor Centre at Beecraigs which has been a flagship location/facility promoting West Lothian's outdoors for decades.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Environment, Climate Change	4D Revised Country Parks Service	The animal attraction at Beecraigs Country Park is without doubt one of the main attractions, after the play park. I believe this would definitely have an impact on visitor numbers and visitors would choose other country parks such as Muiravonside. At Muiravonside a £1 parking fee is charged. The council should introduce this at Beecraigs as it is a minimal cost but would bring in a profit.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Very disappointing. The animals at Beecraigs are much loved and encourage families to get outdoors - good for physical and mental health. Could an alternative be explored - e.g. a small fee for visitors to enable the attraction to break even?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I wouldn't go to beecraigs if animals weren't there.; Charging entry to the animals, take an example from 5 sisters zoo and charge for experiences to raise money.; There is so much more that could be done with bee Craig's to raise money	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This would be a shame. Can you not solicit donations or charge entry?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	More advertising, new management, use to help kids with social anxiety through alternative education, get volunteers to help.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Could this not be used as part of the agile learning approach? Where is the joint up thinking?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	this would be a shame for a relatively small saving - can there not be charity boxes instead to provide for this, .	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	It would be a real shame if Beecraigs was to lose the animal attractions , can it be done more efficiently rather than eliminated entirely. Could volunteers be enlisted to help ?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Could this be a fee paying option in the park to help cover cost and promoted as more of an attraction?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Again metrics in trial data must show this approach works first	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Suggestion is that the animals are given to the Five Sisters Zoo, as this is a great facility and their care of animals is outstanding	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. There are too many animals to rehome them all at Five Sisters Zoo. However, we will consider rehoming some of them at the zoo.
Environment, Climate Change	4D Revised Country Parks Service	Shame but I can see the point. Has anyone attempted a business plan to develop the Beecraigs animal attraction concept and to see if people are prepared to pay for it?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	The same could be applied to library provision but I would not wish them to close. Alternative ways should be sought to make the service commercially viable. If the private sector can do it, why can't the public sector as no profit is required.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	The MTB area at Beecraigs needs work, possibly working with experienced trail builders could help to get more out of the area.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment.
Environment, Climate Change	4D Revised Country Parks Service	Have all avenues been explored with volunteers, such as is the case with the animal attraction at Muiravonside?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This has been open for years and enjoyed by countless children. Can an alternate be looked for to reduce cost of running? Use of volunteers? Donations?? Sponsorships?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	It's a relatively small saving, perhaps the facility should be marketed better to increase footfall?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	The farmland that is currently there will that be returned to sound agricultural use?; Will that generate rent?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	Can't this be changed to a money making scheme rather than just closing? With minimal investment it could turn into a venue like Mill Farm.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Oh no I love them, it wouldn't run at a loss if you charged to see them, you can walk round any country park for free so of course it's making a loss, you just need to look at other options, sometimes it's the only way I can persuade my son to go to Beecraigs, we go see the animals and a quick play at the park, I'd pay to see them	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Would it not make more sense to have a low cost admission fee and or annual pass to beecraigs? It's it used by soo many people and would be missed by the community. This would make it at least break even	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I have never heard of this, do you charge the public, if not, why not?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Advertising of some council run areas, as above, could be better...in; order to attract families....	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	WLC has very few visitor attractions, other than Livingston for shopping & Linlithgow Palace. With Lowport having closed Beecraigs is now one of the few places to enjoy. maybe better to have a model similar to Muiravonside.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	If this is in relation to the owl Center the reason it is at a loss as it is completely overpriced and not justifiable for what it is. Cheaper excursions create more people wanting to go which overall actually creates more money.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The proposal relates to the closure of the animal attraction in Beecraigs Country Park. The Owl Centre is a private franchise located at Polkemmet Country Park and is not related to the savings proposal.
Environment, Climate Change	4D Revised Country Parks Service	This is sad news for our community.Perhaps greater awareness needed.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	The country parks are great, but linhouse circular has a gap of safe ways in. Particularly the murieston end, the way in is via zero pavements on a blind bend with oncoming traffic. This beeds improved for safety. Also it is not safe when cars park there, it makes it even harder to see. Its impossible to get there safely with a dog and pram. It needs a pavement to it at the very least. Some additional entrances, for instance from the miller/bellway development	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Introduce charging for the attraction and expand its service to make more attractive? Could a local farmer be involved so that people can still benefit from farming education by having animals on the land and information on farming and land management? Or yes close the attraction and relocate the animals. What would happen with the land, can it be leased to SRUC or farmer?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	As a resident of West Lothian I was not aware of this being council funded, however as a resident I would also be happy to donate to help this continue to run in its present location. Why is this not being looked at becoming a charity, social enterprise etc and being funded in this way, as I'm sure as I do, many other residents within West Lothian enjoy a walk around beecraigs and seeing the animals.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Charge visitors to see the animals then. A nice part of the country with no animals to view.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Can council apply for farming grants doesn't have to include animals	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Keep them open and expand them. You could make revenue by making them payable facilities as well as providing agile learning opportunities for young people. Joint up thinking is what you need here!	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	It would be worth looking at other opportunities for volunteers and 'Community Pay back' schemes that would still allow this service to remain in place. My family visit frequently and we value this service. The removal of this would be a negative reduction for the very small costs in comparison to the bigger budget.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This would be a huge loss. Beecraigs has always been busy and well visited any time i have been. Why not add a small charge for parking/the animal encounter? Even at £2 per head - people value something they have paid for/contributed to more!	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Think this is sad to close as a lot of people cant afford to go to zoos with families and the only service they can afford to go to see such animals. Maybe more of a donation type thing would be more beneficial or a small charge for seeing the animals type system would be better than scrapping it all together. or offer a day as a helper for children in the area/voluntary roles, save on wage costs if get voluntary help.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	On the Beecraigs website it advises that this attraction is free - would it not be possible to charge a small fee to go through the walk way to enable the animals to be kept? It may be difficult to implement this and to monitor this but it gives families a chance to see animals that they may otherwise not be able to view.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	Is this the cows and deer? Presume they can't be run as a going concern / farm?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Ofcourse it is operating at a loss given no charge to attend	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I'd love the odd trip to Beecraigs Country Park, but, like many of the beautiful walks and parks within West Lothian there's no public transport to take you there !	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Could there be the introduction of a small fee to the park? I don't use it so not sure if logistics but understand this is currently free to use?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	The focus should be on rewilding and wild animals, maybe with a shelter for looking out at the area instead? Or a create a focused animal attraction and charge for it.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	can't Falkirk and WL work together o keep Muiravonside or Beecraigs open? Bot are set to close. Can't we work in partnership to keep one open and share budgets?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	The farm is under utilised as a visitor attraction. With a little up skilling and a bit of imagination the place could be used more effectively e.g. there will be many kids in West Lothian who will never have experienced, at close hand, farm animals. This despite the region being fairly rural. I think it would help create a better understanding of the countryside, it's animals, the farm equipment and even it's people. ; Having worked in the park in the recent past I know how well liked this particular attraction is especially by the younger kids. I genuinely think that this area could be turned into a more educational facility with very little expense for the good of West Lothian people. Schools or kids groups could be offered an educational experience covering all things countryside.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is a disappointment, and perhaps more energy should be utilities to see how the park can make money and operate at a profit	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Could you not keep the animals and charge a nominal fee to enter into that area ? I would happily pay a few pound to walk around the deer enclosure etc. It could be on a donation basis so people who could pay would pop in some money ?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	As a regular user of Beecraigs Country Park I feel this would be the wrong course. The visitors to the park & visitors to the caravan & camping site visit the animal attraction, indeed for some it's the main reason for visiting. If the farm runs at a loss is there not an opportunity to reverse that situation. Meat sales used to be available. This is a good education facility as well.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Could car parking charges to introduced to generate income. Most other similar facilities have a charge. In fact I can't really think of many places outside West Lothian that don't have a parking charge. It's so easy now with the parking apps so reduced need to collect cash. ; Beecraigs has a fantastic view down the Forth. Is there not opportunity to maximise the revenue generating opportunities. The fields west of the visitor centre would make ideal glamping / pod site. Staycations will continue to do well & a decent facility with that view would be an excellent revenue generator.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Beecraigs is a great country park with the animals being a lovely part of a visit there. Could the council introduce charges which would allow the animals to remain there. for example charging for car parking?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Nope. Why not service the attraction better through campaign marketing get people out of their houses and turn it around to profit making. Also helps nhs by making people healthier	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	If the saving is only £95k, then keep it. How could it be made more commercially viable? Eg local sale of venison	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Could this not have had some fees asked to generate income rather than a loss??	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	We love visiting there. This would be a shame. What about a nominal charge like they do at Muiravonside?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Can this be run by a charity, or be united with the Muiravonside country park farm?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	That would be a shame, can buy your own feed be introduced as other parks do or something to generate some income?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Beebraigs is a natural reserve. Maybe you could look at introducing some paid for services, such as run free dog park which i believe many dog owners would use and be happy to pay for this service. Organise school visits to the park and perhaps request a donation from the parents for such outings. It is commonly used in other EU countries.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is a huge asset - reassess and see it as an income generator which it absolutely should be - this is surely a managerial issue.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is so sad this for some people is an absolute essential service maybe even making a small charge for use of this service might be a better option	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Would be sad to see this go ; Any options for community to get involved to keep it running.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	That's sad, just charge a small fee for this	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	That would be a shame. I m sure it could be marketed better.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	The Animal Attraction has proved to be a great attraction for visitors from near and far in the many years that I have lived locally. Could changes in practice not be considered prior to complete closure???	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I agree with this proposal as there is no point of running a loss making enterprise. Surely some other agency could take it on.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	It needs advertising and promoting not removing. We have lived here 4 years and never knew it was there despite being regular visitors to the muiravonside one.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Advertise this. I literally have never heard of animals at Beebraigs until now.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	surely the animals could 'pay' for themselves. Their grazing is a useful land management tool and so their loss could result in other issues/expense. We used to like buying Beebraigs venison but it's availability was rare and seemed so random - surely they could be 'farmed' and the produce sold to at least allow income to balance against costs? A better path link between the animals and the centre/cafe could also improve the numbers visiting the animals and some families would be happy to pay a small fee to join in some animal based activities eg feeding	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Oh please don't do this! This is such a draw to West Lothian and is a fantastic facility for those families who live here who perhaps cannot travel further afield. Why not look at alternatives? Sponsorship for example.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Why not do something pro-active like ask for sponsorship rather than automatically looking to cut a well-loved and cheap attraction. You could probably save this money by reducing senior management salaries.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Could the council charge people or ask for a donation in order to see the animals?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I think there is also scope to reduce the grass cutting budget for parks across West Lothian and improve biodiversity at the same time, by adopting 'No Mow May' and also designating some areas of the larger parks as wildflower meadows which would only require cutting once or twice a year.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Has there been any thought to requesting a small charge for this attraction? Seems a shame to go straight to closure without apparent consideration.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Manage the country parks as an in house asset not as a burden and encourage more use and improve facilities available	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is sad to hear. Hopefully crowd funding or community initiatives could cover this.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Do you advertise, do you support it, is it easily access I able. NO but let's just get rid of it instead of investing	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	Is there no option to make a minimal charge for the animal attraction? Or encourage a commercial operation to run it? It's really popular with families and will be missed and possibly reduce traffic to the park which would impact on the cafe facilities.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	I wasn't aware there was animal attractions here, sound like better advertising needs to be in place to inform people whats available	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Why not reduce this to weekends only and ask visitors to pay a small fee of £1-2 each. Under 5s free.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Animal attractions encourage people to visit the country parks and may be the only option to families for a day out as they are free. Perhaps fundraising events to help with costs is a better option.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is a great park and instead of closing it why can a private buyer or charity not be considered?; It's under-utilised and could be done with private investment otherwise the land will just go to waste and cost money to maintain safety anyway.; More could be done to generate money at parks, cafes, animal experiences, nature activities, camping charges.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment.
Environment, Climate Change	4D Revised Country Parks Service	Before making any radical change to the animal attraction or any other facility a proper evaluation should be done. This might apply to a number of facilities managed by N, L&C. Unfortunately, the way things are coded and accounted for does not properly attribute all costs and income. ; ; The animal attraction does appear to be an expensive way to run a farm / animal attraction - the size of the farm would normally be worked by a single family with some assistance by contractors - with not much in the way of engagement with or education of the public cf Sheffield City Council where during Covid and I think continuing there were daily on-line posts from their much smaller "farm". ; ; Having a livestock operation is likely to increase the WLC's CO2 emissions which will mean we have to save more elsewhere or off-set. Some farms such as Mossiel Organic Dairy Fram in Ayrshire is looking to be nett zero within next decade through changes in how they operate / what cattle eat etc ; ; There might be opportunities as follows:-; 1) Along with other aspects of work at Beecraigs, link with Youth Services / Oatridge / West Lothian College to provide month land-based taster courses and / or apprenticeships - there is a dire shortage of entrants to most of the land-based industries but folk need appropriate training and supervised experience.; ; 2) I understand that a management plan is being prepared for the animal attraction. It would be worth working with the likes of James Hutton Institute or SRUC Edinburgh, Edinburgh Uni (Centre for Carbon Management) to transform the farm area into an exemplar - possibly leased to such an organisation. Perhaps even RSPB as a demo farm - they used to have an agricultural advisor for private farms, have many areas of special importance for birds but not so many near large urban populations and are a very well-endowed charity.; ; 3) Opportunities for using WLC's own livestock for seasonally managing rough grassland / wood pasture eg Autumn grazing of Howden Park, management of SSSIs - there are new technologies to keep cattle where they are supposed to be! I think used in Epping Forest etc ; ; Beecraigs Caravan Site; This appears to be a very staff and Property Contractor intensive facility which if properly accounted for is unlikely to wash its face. Most caravan sites of this size are managed as a single-family basis. A great deal of Senior management time is required to keep this operating properly - partly due to	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. The council will consider the various points you have raised in your comment when assessing the option.
Environment, Climate Change	4D Revised Country Parks Service	A very sad fact of life We enjoy going and watching the deer Perhaps it needs to be come more commercial ie selling venison and more fish to the public	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	You must be the only people in Scotland that can't make money from cattle, sheep, deer and timber on a good land and with subsidy.; ; Sell it to a real farmer, they'll probably keep the visitor area going for free.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Alternatively just look to charge a few pounds per visit, or seek volunteers to reduce costs??	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This is a shame but so much more could be done with the park. ; Charge for parking to pay for the animals	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Whilst this is sad I wonder if a private firm could take them over	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Not is support. It is important for kids to be able to observe the animals in these environments. Perhaps savings could be made by having more volunteering groups help with the management of the animals	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4D Revised Country Parks Service	Volunteers would be able to support this in the same model as those run at Falkirk council to muravonside charging a minimal fee for parking which people are willing to pay for animal attractions. This is an excellent attraction which would be a shame to lose.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Rather than close them these are things social enterprise could take over and run better.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	This would be a sad loss as children learn so much from visits here. Could a small fee be introduced for visitors.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Animal farm in Beecraigs- could this attraction be made to bring in income? (Muiravonside is looking at animal sponsorship/ llama walks etc- could Beecraigs do something similar). Deer/ cattle sheep are a real asset to the park especially for the tourists. Even if the cattle and sheep are rehomed, would it be possible to find an independent business to run the deer farm for project: we use to be able to by venison in the hop- bring those days back.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Negotiate with Muiravonside CP to "save" beecraigs"	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	The land behind the partnership centre and opposite it in Hailstones Crescent banjo, has been left to run to weeds. They are also an eyesore, out of sight, out of council mind perhaps. If you are not going to utilise both sites at least keep them tidy.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	think country parks need to be more accessible especially in the summer as not everyone drives or can walk as far as some off them are, so are off limits to some	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	move animals from Beecraigs to a new location or educate people to help raise awareness and make a donation	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Five Sisters Zoo is a great local attraction	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Is this the Owl Centre? This should stay. Whitburn should be proud of having this attraction. Again who really knows it is there. We do NOTHING to sell ourself to the wider community,	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	The proposal relates to the closure of the animal attraction in Beecraigs Country Park. The Owl Centre is a private franchise located at Polkemmet Country Park and is not related to the savings proposal.
Environment, Climate Change	4D Revised Country Parks Service	Wow what a mess	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment
Environment, Climate Change	4D Revised Country Parks Service	No. Stop your council fat cats eating for free at the taxpayers expense, that'll sort it	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	The council regularly reviews the governance arrangements that are in place in order to ensure that there is good management, effective stewardship of public money, good levels of public engagement and that the desired outcomes for stakeholders are achieved.
Environment, Climate Change	4D Revised Country Parks Service	The format of this survey is poor and does not lend itself to true scrutiny of the proposals. The survey is badly designed and off putting to many given the large blurb of text under each heading - the language is in business speak which is essentially meaningless. There is a lack of clarity on the proposals and the reader is left to assume what the blurb is getting at. This survey should have been in plain English with examples of the proposals which would support greater engagement with the activity. There should be space for feedback on the methodology being used also - this has not been made available which adds to suspicion that the whole process is already decided, and course of action is already determined. The council and COSLA must do more to protect our communities and demand a fair settlement from the Scottish Government. This exercise highlights the political failure of the funding model and it will be the local community that suffers as a result. The end of the survey does not have a 'Finish' button, merely a 'Next'. Overall - very poor approach.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	Can the animals not just be set free.	9. The respondent made a comment on the survey question.	Thank you for your comment. The council cannot just set the animals free as the council has a legal responsibility for the animals welfare.
Environment, Climate Change	4D Revised Country Parks Service	As a resident I do not understand what this will mean to the services I receive due to the vague and broad terms used in this consultation document.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4D Revised Country Parks Service	NO COUNTRY PARK SERVICES!!	9. The respondent made a comment on the survey question.	Thank you for your comment.
Environment, Climate Change	4D Revised Country Parks Service	Presume will be donated to local butchers for onward sale?	9. The respondent made a comment on the survey question.	The animals will be sold at market or rehomed.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Non essential makes sense (festive lighting) - roads are an important part of a functioning economy in West Lothian, even though it is challenging for the council to see the benefits of wealth generation as this is either capped or goes to central government.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Think we need to accept that the council cannot provide services that are not cost effective. Would agree with this proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Supported	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Understandable in current climate that funding may cease for this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree with festive lighting not being funded by council	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No issues with this proposal.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Whilst festive lighting is attractive it is not necessary.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	This should maybe go to each community to purchase and decorate their own community	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	people would forego festive lighting for road repairs	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Another unfortunate but I think reasonable cut.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The Xmas lights were poor, half of them never worked anyway!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	ok but its sad we have got to this stage	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting is pointless due to vandalism	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Cancel the festive lighting, but our roads are in a poor state as it is	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	less repairs and gritting	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Supported	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Not needed lights are rubbish anyways	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No issues with this proposal.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	ok but its sad we have got to this stage	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Seems like a reasonable conclusion.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agreed. Greater clarification required on this measure and in particular what savings is being proposed by the removal of festive lighting and associated christmas free provision.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Makes sense especially with energy prices	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Reasonable but joyless.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Understandable but completely awful.... How will Christmas trees, and lights be done locally or is that it totally gone? Surely only you have the insurance to do it..	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	understand reasoning but does feel like there is a dampening on any "feel good" factors in the community	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	the boulevard xmas dec look like my aunties rejects.	1. The respondent advised that they agree with the proposal.	Not a suitable suggestion.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	So long as the roads are kept safe	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	savings need to go beyond whats proposed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I can see the benefit of community festive lighting, run by the community, but it is likely to exacerbate inequalities in quality of life, which is concerning particularly at this time of cost of living inequalities/crisis.	1. The respondent advised that they agree with the proposal.	Consideration is currently given on a case by case basis.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree. Festive lights should be removed to contribute towards climate change targets and mitigate increasing energy costs.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Not a huge loss. Many people now have their own festive lights.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Safety and quality of surface should be priorities ahead of decorative adornments.	1. The respondent advised that they agree with the proposal.	Road repairs: the council has a requirement to fill potholes within a prescribed period of time for the safety of road users. Therefore, it is necessary to undertake temporary repairs to ensure the road is safe before undertaking permanent repairs.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	That's good 👍	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Disappointing that festive lights have to go but they can still be there if the community wishes to support them. Agree it is a nice to have when budgets are tight	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Again it is a shame to loose this. But understand the need the saving	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Prefer to have local roads prepared for winter then festive lighting to be honest	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	It's not the councils job to put up Christmas lights, communities can fundraise if they want this.; The council should also not be putting up bunting for galas either, they raise enough money to pay for this service.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I agree better ways to use money .	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Sad but can be funded through charity etc	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Again a shame but the lesser of several evils.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	As long as road clearing in winter is done we could live without the festive lighting. Gritting of the roads and pavements in winter is poor as it is at the moment	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Christmas lights being fitted on a sunday with overtime payments for staff always seems daft. Good idea.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Good.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Makes sense	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	If it's this or schools, this is an easy choice	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Possible. This can be brought back once budget and economy is better.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Vood	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agreed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	In such times of austerity this is fair. Hopefully one day we can celebrate as a community again.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Safety must be a priority and winter maintenance cannot be compromised.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	This is sad, but understandable. ; ; Would be interesting to know how the communities can take this on, if possible.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	There is no community buzz now. Xmas lights are pointless, I hardly see them ; ; Screw the galaday too, waste of time for those who don't have kids. It's an excuse for older kids and adults for drunken parties and fairground	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	After reading the above, I will continue to trust your decisions in the areas I have no experience in , but thank you for the opportunity to co-operate !	1. The respondent advised that they agree with the proposal.	Thank you for your comment
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agreed. Festive lighting and gala week bunting provision should be included.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Whilst items such as festive lighting are nice, there are a luxury so prepared to lose them rather than see more potholes in the roads.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Not that important in the scheme of things	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Not a problem with this suggestion.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I don't mind not having festive lighting provided by the Council, as long as this applies throughout the whole Council area. I would be most unhappy to have no lights in my village, then travel to Livingston and see the place lit up. Local communities should be offered advice on alternatives for storage and erecting their lights if they wish to do so.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	this makes sense. If not removed, the provision of festive lighting should be scaled to an absolute minimum given the need for savings and the cost of utilities currently.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I understand that money needs to be saved across the board. As long as important services are not cancelled, I believe this is the way forward. Cancelling festive lighting is not an essential service that would negatively impact local communities.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I feel that festive lighting could potentially be funded by community councils instead so I agree that savings could be made in this area.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Good. Festive lighting has been a waste of money for some time now. However, there are no details of the other savings to make an informed comment.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Happy to ditch Christmas lights, but does this mean roads won't be gritted? unclear from this statement	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	rather have the potholes fixed, the sleeping policemen having then painted to identify them, roads cleared of snow and ice (all roads - we live at the top of a hill and they only grit the lower roads and never snow plow it - we have to dig our own roads)	1. The respondent advised that they agree with the proposal.	The council provides a Winter Maintenance Service for footpaths and this service is prioritised on a risk basis. Footpaths with higher footfall are prioritised before those with a lesser footfall.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Noted. Will this also include WLC stopping the erection of Christmas Trees within West Lothian?	1. The respondent advised that they agree with the proposal.	The installation of Christmas decorations within towns and villages is a discretionary service that the council provides where there are available resources. Other urgent or priority works may be prioritised when necessary.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Fair enough	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Winter maintenance will save lives. Festive lighting is not essential	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Priority needs to be safety, although really depressing to lose Christmas lights.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Safety is more important than aesthetics, however this could be disappointing to some.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting not important. People can decorate own homes if they want.; Gritting and snow ploughs have to be used so people can still work etc	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	As long as the roads are being gritted no one cares about Christmas lights	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting is pretty but not essential. Grit for the road is.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree, perhaps a role for community groups like for bonfire night etc	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Not bothered about Xmas lights.. rather the money was spent on gritting / road maintenance	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Scrooge.... but fair enough	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Yeah why would we do this when it brings only goodwill	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I agree with this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Very good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree with this measure	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree with this proposal.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Great idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No issues	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Fine by me	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Yes, this should be done	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Fair enough	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Very good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Fine	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Definitely not needed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	OK	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Fair enough	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I agree, we don't need festive lighting especially from a cost and environmental point of view.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree - festive lighting is non-statutory and should not be proved by the council.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I would just like to comment that I don't envy the Council having to make these cuts and they will not be popular. It would be worse if Scotland was Independent!!! I cannot believe the state of the country just now under Scottish Government. If they would concentrate on the day job!!! I am very depressed with this consultation. If cuts are needed then so be it. IO know WLC are looking aheads but what a mess!!!!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	the festive lighting is hideous. No one will miss it.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The removal or festive lights will not largely impact others. Go for it..	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Again, sad but hopefully we can step up in communities	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Shame as this I totally understand why and support the decision.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	In current times it is a tough but necessary choice.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	OK; I understood that this was already the case in Linlithgow	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Christmas decorations aren't great already.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Sounds like a reasonable approach.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Sad but sounds sensible	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	fine	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	It'll be a very drab winter, but with electricity costs rising this seems like a good idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Let the shopping centres etc fund this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Totally agree, festive lighting is a complete waste of money and is damaging the environment	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	agree re: festive lighting	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	As for Christmas decorations I personally won't miss them	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting gets put up the day after Halloween and then never removed until February.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree - as long as roads etc remain safe.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	As long as the pavements and roads are kept safe from frost, ice and snow, this is another cut that is an easy choice, albeit sad and full of gloom.	1. The respondent advised that they agree with the proposal.	The council provides a Winter Maintenance Service for footpaths and this service is prioritised on a risk basis. Footpaths with higher footfall are prioritised before those with a lesser footfall.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Time to call for an end of this type of activity when so much else is at stake of cost cutting.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting is a waste of money. As are firework displays etc.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Local communities will probably provide festive lighting but they won't be able to fill potholes. Good proposal.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festival lighting not necessary.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting is largely provided through the community councils and my assumption is that the cost saving refers to the erection and decommissioning cost at the commencement and completion of the season. If that is the case, cost savings suggest that the existing cost of provision is excessive.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting not a miss	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	welldone lab/con	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	agree- although festive lighting is beautiful. It is time consuming and will increase energy costs. This is not an essential service.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting is a luxury not a necessity which some services are.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	That's unfortunate but we are all struggling to pay our Bill's and if the lights have to go that's understandable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Long overdue. This is a nice to have so make as many savings in this area as possible,	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Disappointing but understandable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Disagree cutting will inhibit movement and local economy will suffer adversely	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Clearly, times are tough. Who needs Christmas lighting?! The roads are in an appalling state and poorly maintained already.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Think that's a saving that makes sense	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Sensible.; Do steet lights need to be on all night?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree with festive lighting, but the condition of our road network must be radically improved. Livingston currently looks like Chernobyl. Worn out road markings, potholes and overgrown verges.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I am happy to save money on these festive lights etc. Better the money be spent on safety on routes eg lighting, surface improvment, road gritting etc	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Sensible proposal about festive lighting though I would not be happy about reducing regular road maintenance to minimise pot holes. There are new products on the market to repair and prevent pot holes and I suggest that the Council adopt these.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Focus should be on safety and not festive lighting.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree - I imagine the cost of putting on the Christmas lights will have increased greatly so we need to get rid of this, unless community groups wish to fundraise to keep them running	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I don't feel that I would miss the festive lights and that this is a good place to save money. I would attend specific Christmas markets and venues.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	It's really sad that we have to forego Xmas lights. But I understand the council cannot pay for everything. So sadly I agree this is a sensible area to make savings.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	As above, I would rather I had council staff able to help me all year round that some lights at Christmas. It's a very sad thought at such a difficult time.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Dad to say but if it needs to be no Xmas lights on then ok but winter maintenance should never be cut we live in a area that need priority to keep us safe and moving roads	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The Christmas lights are always a highlight and builds a sense of community but when cuts are essential this is inevitable. Road safety is essential and I don't feel I have enough knowledge to comment on this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I think more people are concerned about core services than festive lighting.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting is not a priority, agreed. Not sure if this is council responsibility or not but getting rid of traffic lights at certain junctions and going back to the good old-fashioned roundabouts would save money and frustration to motorists.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	OK...festive lighting not a pity...road maintenance and gritting is.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Support, ridiculous that Council pays for Xmas lights but considering cuts to bus services and education. Xmas lights are not a core essential priority for Council spend, neither is flower planters I'm afraid, these are nice to have if lots of money	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Not sure what winter maintenance is currently carried out that is not statutory. Christmas lights are hardly essential.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	the money is desperately needed elsewhere for gritting and road maintenance, it will be a shame not to have xmas lights but gritted and safe roads are vital	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Pavements in communities need to be gritted. Festive lighting whilst appreciated could be removed reluctantly.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I'm not too concerned about festival lighting, although some might not agree with me. But I would be concerned if this also means reduced or no services during winter for maintenance.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	It is always nice to have festive illumination, but this is something that is a quick win in terms of energy, and reducing staffing costs. But all statutory items should remain.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting as nice as it is is not something that should be seen as a council priority and therefore stopped.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Winter maintenance is controversial however I understand the need to focus on legal requirements and not "extras".	1. The respondent advised that they agree with the proposal.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting should be removed. The council is already struggling with heating and lighting bills so the removal of Xmas lights should be a priority. It also helps us reduce our carbon footprint	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Makes sense	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	It would be sad to see festive lighting go, but it is not essential. It would be good if council buildings including schools reduced the amount of unnecessary lighting especially when buildings are not in use.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Winter maintenance and pavement clearing is far more important than sparkly lights	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree with festive lighting	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree the money can be better spent	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Fair enough.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I agree will also help with climate	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Fine	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Happy with this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Very happy with this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Happy with that. I'm sure there are local businesses and organisations which would be very happy to stand in to support the Christmas lighting	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	If needs be	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Another loss but acceptable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Customer's aren't happy with the winter maintenance service provided at the moment so this won't go down well! Agree that festive lighting should be scrapped.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree with this proposal - community groups often have more access to grant funding than WLC.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agreed. The council should be there to provide the basics, maintenance etc. Provision of festive lighting is a 'nice to have' which could be left to local community councils and businesses to arrange and fund.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Very poor in some areas where it isn't subsidised anyway. Makes no difference if there are none where there used to be about 6 street lights	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No reduction to festive lighting, very difficult times for people and there needs to be some festive spirit, possible contributions from businesses could be explored as brightens up area could be considered.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	This is a shame but a necessary measure if the choice is between vital services and things like festive lighting. Could the council work with local communities to find community led alternatives? Local residents may be willing to make their own arrangements but would benefit from help to navigate red tape and bureaucracy.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	WE can do without festive lighting	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	From an energy saving point of view I think reducing Christmas lights is a good idea so would be in favour of this particular idea. Some are old and tired anyway	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I think aslong as we still have Christmas trees in the communities then the festive lights attached to lampposts getting rid of them is a good way to save money	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	As long as it was explained to communities why it was happening, - that festive lighting was being cut in favour of supporting needy parts of the community - I think most people would understand and accept. I would be supportive. ; ;	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	In present circumstances I support no festive lighting being provided by the council. The thought of road maintenance services being any further reduced sounds very worrying and likely to be counter-productive.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The additional services on top of festive lighting need to be defined to make an informed decision. Certainly, in this day and age the council need not put-up lights. Commercial interests should be able to do that themselves.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Support. Festive lighting should not be a priority.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Happy to lose festive lighting - why should we pay for Christmas lighting when not everybody celebrates Christmas?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	As long as the main roads and paths are cleared and gritted when required and nobodies' safety is at risk then happy with a reduction in services.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree - festive lighting should not be provided by the council.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I do not believe that services such as festive lighting need to be provided by the council and would be in agreement with this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Definitely Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The lights displays have been horrible the last few years at least. Always take my kids to see the private ones at five sister zoo and the likes.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting should be discontinued not only because of cost but also for reducing unnecessary energy consumption.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	no issues with festive lighting etc. being removed. This may not sit well with a number of residents, however it is an obvious way to make a saving. ; ;	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	There could be a significant reduction in the amount of, frankly, tacky decorations in some areas, and of the length of time they are on. A few lights, around a community focus point, with its Christmas tree would be enough. ; ;	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Personally, in the past people would all clear their path outside their homes. If we ll went back to this the council would not be required to clear as many roads. I agree with this as long as main roads and paths to schools and gps are clear.	1. The respondent advised that they agree with the proposal.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festival lighting should be a service that is not continued at this time but mothballed and looked at again in the future.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No need for festive lighting in the current climate, so agree that this would be a sensible cut. Please do not cut any services which provide gritting or clearing of roads in winter. I work in a school at the bottom of a hill and the council don't grit the road because it's not classed as a main road, even though lots of staff, pupils and parents, as well as a school bus require to access it. The last few winters, some roads in west lothian have been dangerous to drive but we are still sent emails as employees telling us that we should make every attempt to attend our work.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Cut backs to festive lighting is better then to care of the roads	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Christmas light displays in West Lothian are poor anyway so don't see the point of them.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Most important pavements and roads are properly maintained, not fussy about festive lighting	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Aw this is very sad but sadly it's inevitable	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Fully support removing council subsidy for festive lighting. In many parts of Scotland this is paid for by businesses or the local community.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I agree....although I think this should be under two categories.....roads are essential to be maintained....festive lightsbunting etcis not	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Don't know why we bother with Christmas lighting/trees etc so I'd agreed with removal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Support for festive lighting etc. is not a council function.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Again, a real shame but understandable with the potential loss of festive lighting. This can have a really positive impact in the dark winter months and would be a loss, but would also contribute to less light pollution.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	As long as people are safe, I'd rather roads and footpaths were gritted than Christmas lights put up	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	If it is between a lit xmas tree or a free meal for a child - then I am all for it.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	maintenance of roads are more important than festive lights!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No need for Christmas lights in every village however a tree alone would still be nice. 🐱	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The existing festive lighting is pitiful - it would not be missed by me.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Road gritting seems a bit haphazard with roads often being gritted unnecessarily. The street where I live in East Calder is on a hill and is often impassable during the winter. It's never gritted.; Festive lighting is a waste of money and is often left running way after the festive period.	1. The respondent advised that they agree with the proposal.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting I assume you mean Christmas lights ? Cause if you mean anything other than that then you should be finding everything else but Christmas light I mean in the grand scheme of this entire surgery sure cut it but if you mean lights on longer cause winter and stuff then absolutely not	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Fair assessment for saving here	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Cutting festive lightening? You will only cut it from small towns yet Bathgate/amondvale at livingston will still get them i bet, watch this space, if you cut 1 town then cut them all, only fare that way.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I support this change. Christmas lights should be reserved for places where you can actually shop for Christmas ie livingston. All other areas hardly have any gift shops anymore and don't attract extra visitors.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Fine as long as workers are redeployed effectively. No more weekend triple time shifts across council services save a lot of money	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Sad but understandable	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	You hang the festive lights in pumpherstons upside down every year so i doubt anyone will miss this or the 6 festive lights you put up on glasgow road, blackburn every year that look like they were made in the 70s	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting will be no great loss.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Roads should take priority to Christmas lights our roads are in a terrible state would much prefer our roads were maintained	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Stealing another joy of Christmas! As a child seeing the Christmas lights go up was a highlight. It is sad to see that these aren't priorities anymore but the insurgence of 'American' approaches to house decorations in the festive period means it's less of an onus for councils to provide this same joy and I can understand the saving.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Great!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree regarding festive lighting, however winter maintenance reduction you do not specify exactly what this is.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Don't pay for Xmas lights (festive lights)	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	It seems sensible to reduce "addons" such as festive lighting. This is much preferable than reducing children's education	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	sad to see xmas lighting going but understandthe manpower can be better used elsewhere.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Neither agree or disagree with this but if it is this or cuts to education or youth services I would vote for this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Interesting, as long as the difference is indiscriminate then there is no problem.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Don't put up festive/ Christmas lights	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The roads are already covered in potholes or are surface damaged, Glasgow Road was closed for weeks near roundabout, and I walked past daily at different times and never seen anyone working on roads. If jobs were completed on time and efficiently, effectively throughout the years we wouldn't have to save monies by reducing services. Winter maintenance most drivers would want roads to be gritted and maintained as the current service only maintaining main roads stops most people from getting out of the schemes to get to work at the first showing of snow and ice. So, a reduction in services is not agreeable in my opinion.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Road repairs: Road Maintenance and Winter Maintenance is carried out annually within the available resources. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	This could be a loss for local communities	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Looks like just have to put your own festive lighting up if that's the case - then again the festive lighting isn't that great in a lot of the towns - but has been in full flow up at Livingston every year!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	This is very disappointing	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	ridiculous, festive lighting is lovely to see	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Not needed lights are rubbish anyways	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Poor proposal	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	There is very little detail contained within the narrative to make an informed comment. Suffice to say though that this should be a feature of a progressive and forward looking business and should not be the consequence of a need to save money.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	WOW!!!! Reduce this?? Seriously???? Our roads are an utter disgrace - even more so in the winter!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	This is very disappointing	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Poor proposal	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Do not do this. The impact of not doing it is greater than the small amount of money you will save. But I'm sure efficiencies in the service delivery could be made without reducing the service levels.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Additional clarification should be provided on this point. You mention Winter maintenance but then use (as an example) the provision of festive lighting. These two topics do not appear to be directly related. If, by Winter maintenance, you are referring to the gritting of roads and pavements, ensuring that streetlights are working so that women aren't forced to walk home in the dark without adequate lighting, I do not support this measure.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Very miserable	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	You can't take away Christmas lights from the town's, it brings a bit of cheer to people	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting has never been WLC strong point.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Speechless...almost. The service/ standards are not met in an effective and efficient way at the moment and now we will have no Christmas lights. They are for the most part left up all year round and then switched on at the festive period?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I disagree, council should provide lighting. Festive lighting idea...put on 3 hours per night Saturdays and Sundays only. Making a saving but keeping lights on.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Think outside the box.... place a bike near lights.and if folk wish to see Xmas lights then cycle to see. I disagree with lights being deducted altogether. We have lights but not good quality unlike other communities not been equal for many years from village to village which makes me angry. Sad times.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Not a suitable suggestion.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	A drop in the ocean for spending, bah humbug.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Seems like a very small saving for a potentially large issue for members of the public.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Cancelling festive lighting will create negative press for the council and create a bah humbug vibe in the community. Surely this should be a priority even if it's only switched on for an hour a night to save energy. Some more isolated members of the community get great joy from festive lighting so the council should continue to provide it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	West Lothian used to look good - not now; Yet you are proposing not to enhance areas - big loss of income as a result. Has to be a solution to this if everyone has the will	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Bah humbug to you too! Again, support has to be provided to local community groups and private enterprises to take this over. E.g no red tape! Also if you're going to reduce gritting then it's essential that grit bins are regularly checked and topped up for locals to keep themselves safe.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Grit bins are provided in line with the approved criteria for grit bin allocation.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	let the communities have festive lighting.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Bah humbug indeed. Cut some salaries of a couple of 'high heid yins' who have passed retirement age and Honestly, what next?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Not a suitable suggestion.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Wonderful...we can look forward to hellish road conditions, elderly slipping on untreated paths and no Christmas cheer. Come on guys...just cut your expenses?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Not a suitable suggestion.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Bah humbug! For such a paltry sum people get a small glimpse of Christmas spirit and festive cheer. This should be kept.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	There is very little by way if grit box and snow patrol as it is, so any cuts, no matter how little will impact communities	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council provides a Winter Maintenance Service for footpaths and this service is prioritised on a risk basis. Footpaths with higher footfall are prioritised before those with a lesser footfall.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Would be a shame to cut festive lighting. With the current low moral of people personally feel the brightening up of villages would be beneficial	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Statutory and what's needed for safe roads can be totally different. The council knows the local area best rather than use some blanket approach to gritting. Festive lighting as a issue seems rather mean spirited given the overall savings.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council provides a Winter Maintenance Service for footpaths and this service is prioritised on a risk basis. Footpaths with higher footfall are prioritised before those with a lesser footfall.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	This is already incredibly poor, and therefore makes no sense to cut it further! Cutting festive lights to make savings in a department which is not the best seems pointless.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Ahhhhh magic! That one wee bit of festive cheer, little bit of visual warmth and pleasure... Enjoyed by many people who are already destitute and living in poverty. Being able to say to kids, who are already living in conditions akin to the arctic due to spiralling fuel costs... Just being able to say, hey kids! Look at the lovely Christmas lights!..... Gone. Game, aet and match WLC. Thank you. So much.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	This seems a small saving for an area that brings the residents of the local areas a lot of joy especially during the cold and dark months. The festive season can be difficult for a lot of people and sometimes something as simple as seeing your hometown decorated and lit up can help low mood or mental health	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Sad times indeed	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No more festive lighting sounds mean especially as it seems to be such a small part of the budget	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Honestly I despair! No Christmas lighting being supplied....bah humbug indeed! You really are making WL the place to be for families by cutting education services/family attractions and now Xmas lights!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	And now you're cancelling Christmas!!! This list must be a joke. Is the grinch running west Lothian Council!?! You want to promote active travel yet don't want to fix the roads. You take away subsidies for public transport and push people onto cars, and then complain when the roads are in a terrible state.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Terrible idea and will affect the community spirit	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Sad to cancel Christmas.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Yip lets just cancel Christmas while we are at it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Who would provide these services if not the council? Again tax payers are funding alot of all these provisions we want from the council still need festive lights at Xmas.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Bah humbug community councils do that anyway if your community has a community council that is lacking you are screwed really.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Some roads are shocking. We need some festive cheer.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The labour-Tory council coalition has some serious questions to answer if this goes ahead.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Look at other countries and how they maintain roads etc. we are so far behind it's embarrassing	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Scrapping the provision of festive lighting during the Christmas season I think is a major step backwards in the celebration of our Christian heritage and will negatively affect the spiritual wellbeing of our communities in the darkness of winter - as well as reducing - perhaps - an impetus for commercial activity in our shopping centres. Instead of travelling to shopping centres or town centres which are decorated with festive lighting, we will just shop online - and let communities see more decline during the busiest shopping season of the year.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Honestly...bah humbug WLC. To be honest the Christmas lights at Livingston Centre, Almondvale Boulevard must be at least 10 years old, so it's not as if a great deal of money is actually spent in this area. If this proposal does go ahead, just ensure the Civic Centre doesn't get festive lighting either.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	A real pity re the festive lighting. It brings some cheer to people's lives especially in current times when there's sometimes not much to smile about for some poor souls.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No bad	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	This doesn't seem a high cost for festive lighting which provides so much joy to so many people. As we go through what looks like being a bleak period I think this could end up costing the Council more in service provision to support mental health issues.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I disagree with this statement. Residents of West Lothian still need something to look forward to and festive lighting is a bit part of this, especially given current cost of living crisis.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Hard to see where any significant cuts can be found.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Should be a re-think on reducing festive lighting as there is very little to brighten up the community's mood, due to the cost of living so put this one back a couple of years as you may have underestimated the joy this brings.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	That's like Christmas is cancelled OMG why not put up lights later and take down earlier) (12 days before and 12 days after just like your meant to do that will dramatically help. Stop renewing lighting in areas if ancient ones are good enough for villages then why not for others. We all pay Council Tax so why not! Or you could do solar lights	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	"This will mean some services, such as festive lighting, will no longer be provided by the council" That's totally a humbug moment	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The installation of Christmas decorations within towns and villages is a discretionary service that the council provides where there are available resources. Other urgent or priority works may be prioritised when necessary.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	again - a shame and will lead to 'haves' and 'have nots' across council area.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The installation of Christmas decorations within towns and villages is a discretionary service that the council provides where there are available resources. Other urgent or priority works may be prioritised when necessary.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	LEAVE FESTIVE LIGHTING...THINGS ARE DOOM ENOUGH	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No as community spirit and wellbeing is important for the mental health of the community. Removal of the festival lights would be very sad indeed.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	So the council are no longer taking anything to do with festive lightings the young generation likes this	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	This will make for a very bleak time for everyone putting up with the dire times ahead we are all facing. The lights lift community spirit, something that needs to be nurtured right now. Perhaps reducing some would be a better possibility?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	This would be very sad and not really save much - is it worth it?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No longer providing festive lights, that will cheer everyone up! Cut everything back and no one will want to live in West Lothian	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	For a saving of only £246,000, is it really necessary to stop providing Christmas lights? Surely it hasn't come to this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Dont agree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Bah humbug	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Unacceptable!!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Ba humbug!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I do not support this measure	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I do not agree.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Now, I'm the grinch, but no Christmas lights? Come on, that's not going to go down well with the masses!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Christmas is cancelled life is cancelled no lights no fun no life alrighty then	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Ba humbug. Talk about Scrooge!!!!; No Christmas lights you have taken this too far. This is shocking	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Ba humbug	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Ba humbug	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	disagree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	disagree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Roads at present are not gritted properly in the Winter so would be concerned in any further impact to the roads	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The festive lights make such a difference to the town centres in the dark evenings and the kids love seeing them up/around.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Have you seen the state of of roads and pavements?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	We are told bus routes will be gritted, however this is not done in all cases. Many newer partnership estates have a high proportion of elderly yet these are not gritted meaning the elderly like my father at 87 is trying to grit roads. I find this totally unacceptable,;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Hardly worth the cut back. Not saving much to put everyone out.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Here's a thought don't do it at all. That'll save you money and then you can have a look at the various streetlights that don't work.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Winter road maintenance and general road maintenance is already an issue- would this make it worse?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Takes the council 3 months to take them down anyway and go up late no point in them.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Any changes made to winter provision in terms of grit provision etc are a cause for concern as this is a safety issue for many residents in West Lothian. I would hope there would be a review with businesses in the area to see if funding from local establishments can be pooled to ensure festive lighting can still be provided	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I think the council should continue to fund Christmas lighting.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Our roads are not good - too many potholes etc. Any reduction in service would not be helpful to users.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Oh dear. The festive lighting is always a lovely to see. To stop it would be very Scrooge.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Roads in West Lothian are not in a good state of repair now. This needs to be addressed.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Road repairs: Road Maintenance is carried out annually within the available resources and improvements are carried out in partnership with Sustrans. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Paths and roads need to be cleared for older people. Need to keep doing Christmas lights	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Road repairs: Road Maintenance is carried out annually within the available resources and improvements are carried out in partnership with Sustrans. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Stopping working on roads in the winter would cause more accidents and the hospital would be full	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Road repairs: Road Maintenance is carried out annually within the available resources and improvements are carried out in partnership with Sustrans. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Roads aren't cleared properly in the winter anyway	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	You already fall short in providing this service through inefficient allocations	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The roads are a disgrace, the pot holes damaging our vehicles, but we pay more taxes? You should take a cut in your salaries	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I disagree with removal of festive lighting	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	In hard times, hard decisions have to be made and if this is necessary then it should happen before cuts to transport and schools	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The roads are in an appalling state and poorly maintained already.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	festive lighting brings joy to everyone. Don't be a scrooge!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Awful bah humbug proposal!!!! Christmas is a national celebration and I would bet money that the vast majority of people who pay council tax would not want this service removed.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	roads are (redacted) more investment	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lights provide a little extra cheer at a time when it's dark and cold etc. Don't underestimate it's impact upon people's mental wellbeing	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	It would be disappointing for West Lothian to be left dark during the Christmas period. In terms of winter maintenance it is important to not isolate vulnerable people in their homes. If you are only meeting basic requirements then I think many people will not leave their homes. This could add costs in other areas as people reach out for support in mental health services	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The road system needs to be maintained and there always seems to be potholes so no longer providing Christmas lighting and using money on maintenance I am happy with.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting should continue as this is not safe for commities to try and organise themselves, and is an uplifting thing for residents/visitors to see.; Cannot scrimp on winter maintenance, this will result in severe accidents or worst.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	More money needs spending on this not less.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Road maintenance in winter is essential, people cannot afford to lose money if they cannot get to work because of road issues. People will generally help grit their own areas of grit is available.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Dissappointing that festive lighting would be considered for cuts.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	West Lothian is already bleak, just turn off the lights and make it totally miserable - joke	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Sad, could reduce visitor number s	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	By not providing festive lighting to save a minimal figure is pretty low for any council.; This brings a sese of enjoyment to a christian celebration.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Vast amount of inprovmnt needed	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Lack of Christmas lights would be very disappointing . Council tax keeps rising and from reading this it seems we are paying more for a lesser service over time.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Winter road maintenance is important and is poor at the moment	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	It would be a pity to loose festive lighting, as it cheers people up and fosters community spirit.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	It would be a shame to lose the festive lighting and the bunting for the gala days. These help to bring the communities together	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Fix potholes but would be a shame to lose the Christmas lights.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	That's awful so many people look to the lights to brighten up the winter months. Can it not be sourced out to a private firm?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Bah humbug. At least put them up in major town hubs including Bathgate, Whitburn, Broxburn, Livingston, Armadale.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The installation of Christmas decorations within towns and villages is a discretionary service that the council provides where there are available resources. Other urgent or priority works may be prioritised when necessary.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Gosh winter maintenance of transport services is an absolute must	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	This is also a disgrace. Why are you targeting education so much. You are now proposing that children have to get themselves to school on a public bus. Have you any idea how difficult that is. You also propose to reduce the public bus timetable which is going to cause even more problems. Young first years trying to navigate public buses which don't always turn up and can take an hour or so because of the indirect routes. Children are going to be late, miss school and be put off completely from attending. You are putting more and more obstacles in the way.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Maintain festive lighting. It's good for local business and morale.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The installation of Christmas decorations within towns and villages is a discretionary service that the council provides where there are available resources. Other urgent or priority works may be prioritised when necessary.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	WLC festive lights are very limited already. Some larger villages having only 6 lampposts with lights. Comparing to other councils, WLC do not compare.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The installation of Christmas decorations within towns and villages is a discretionary service that the council provides where there are available resources. Other urgent or priority works may be prioritised when necessary.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Providing only what is legally required is pretty poor. Motorists pay a heavy premium to run cars and roads should be well maintained and safe. Winter maintenance has to be comprehensive or people could be seriously hurt.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No christmas lights in the streets? What is actually wrong with you people? Trying to remove every ounce of joy from society!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The installation of Christmas decorations within towns and villages is a discretionary service that the council provides where there are available resources. Other urgent or priority works may be prioritised when necessary.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Getting rid of festive lights will also make our community more depressing and lesser of a community, inevitably leading to an increase in NHS & mental wellbeing expenditure. Removing these will also remove a little piece of the encouragement people have to go outside and visit the shops and restaurants in our villages, resulting in an even more isolated community.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The installation of Christmas decorations within towns and villages is a discretionary service that the council provides where there are available resources. Other urgent or priority works may be prioritised when necessary.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	This is the last thing that needs cut. Our roads are terrible and this will only result in more invoices coming in for damaged cars and accidents. Possibly even fatalities, as I know some roads are so bad that drivers frequently drive on the oncoming lane to avoid the pot holes,;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	just thinking of staff hope they dont lose anything need to think on this first.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Disagree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Bah humbug! !!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Nope, Not worth the loss of festive feeling.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Bah Humbug it seems.. is it that much of an expense for a bit of lighting cheer at Xmas? The lights have already been bought and as LED not a high energy footprint. So is the expense on manpower to put them up?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Poor	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The example cited adds to the overall depressing tone of this survey. Cutting out festive lighting makes financial sense but directly affects the community who are secondary in this activity.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Bah Humbug !	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	That is a shame, especially Christmas lights	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Bah Humbug !!! Keep the Christmas Lights up all year round and just let them be switched on when Christmas Approaches. Saves putting them up and down all the time.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Scrooge!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Disagree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Disagree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	do not cut this, we need the roads gritted and we need to more of the paths gritted, especially for older people.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	; Winter maintenance is nearly non existent. this does need to stay though.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The roads are in quite a state. Savings should be made elsewhere to have the road fully repaired	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Road repairs: Road Maintenance is carried out annually within the available resources and improvements are carried out in partnership with Sustrans. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Not having festive lights really is a shame - it may even have an overall negative impact if people become less happy and need to use other services which will be at a cost	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Sad... no festive lights.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	But you will continue to have employees shovel some tar from the back of a pick up truck to repair our pot holes for several hours until they are again potholes again	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Road repairs: the council has a requirement to fill potholes within a prescribed period of time for the safety of road users. Therefore, it is necessary to undertake temporary repairs to ensure the road is safe before undertaking permanent repairs.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No.poor show , instead of paying over the odds on a Sunday for you workers to put them up, do it during the week , afternoon ,not much difference in traffic disruption and cost less in wage , can't put a price on having decorations up for Christmas	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Absolute killjoys	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Need to ensure basic road maintenance is still delivered	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	More money needs spent on roads pot holes are bad roads were far better a few years ago	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Road repairs: Road Maintenance is carried out annually within the available resources and improvements are carried out in partnership with Sustrans. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Against this. The council has a duty to attempt to provide a little bit of care and happiness to towns.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The installation of Christmas decorations within towns and villages is a discretionary service that the council provides where there are available resources. Other urgent or priority works may be prioritised when necessary.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	While I understand savings need to be made it is very sad to see the suggestion to take away the Christmas lights.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The installation of Christmas decorations within towns and villages is a discretionary service that the council provides where there are available resources. Other urgent or priority works may be prioritised when necessary.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Christmas lighting is something that brings communities together and brings some cheer in the long winter months. Depending on the amount of saving the lights brings I think that this is something that should be carefully thought out before any decision to remove it is made	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Winter maintenance is already topical with the residents of West Lothian as can be seen on the various social media platforms. ; ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lights are a lovely sight and bring customers/consumers to local towns - hopefully these consumers will continue to come	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	A sad day for society when we can't afford Christmas lights.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Winter Maintenance is a huge issue for the public.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Road safety and gritting in winter should be a priority and if accidents increase will cost us more	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Another ridiculous revision. West Lothian going to be the darkest place in the country and Christmas?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The roads need constantly fixed because they are not done correctly the first time. There is many countries over the world that have worse winters than our yet they still cope, why not research what they do and spend a bit of money doing things properly that will, in the future, save lots of money.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Road repairs: Road Maintenance is carried out annually within the available resources and improvements are carried out in partnership with Sustrans. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	More needs to be done to fix roads properly rather than just patching it up with tar as it just all breaks up through time with the volume of traffic that is on the roads now then you would save money for not having to keep fixing them	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Road repairs: the council has a requirement to fill potholes within a prescribed period of time for the safety of road users. Therefore, it is necessary to undertake temporary repairs to ensure the road is safe before undertaking permanent repairs.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting can help maintain good community spirit and keep shoppers in their town centres, Resulting in less travelling.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Been threatened many times. I assume the significant cost here is the weekend labour to install & remove the lights. They're attached to the street lights in most cases so shouldn't be a huge cost to run. Needs to be balanced with the lack of 'cheer' & ambience the festive lighting gives. We are a dark & dreich country at that time of year so the lift the lighting gives might have a significant detrimental impact to peoples mood	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Roads are awful and white lines such as keep clear at Adambrae are not visible on a now really busy roundabout because of the amount of houses you've allowed to be built in murieston	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council's website has the functionality to report concerns regarding the condition of roads and members of the public are encouraged to raise any concerns they have. Development is subject to the statutory local plan. In some instances, even if the council refuses planning permission, the Scottish Government can override it.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Disappointing	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	no cuts to roads	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	As long as there are still festive lights	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The installation of Christmas decorations within towns and villages is a discretionary service that the council provides where there are available resources. Other urgent or priority works may be prioritised when necessary.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	May cause issues with communities going for a DIY option.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Relatively trivial saving on festive lighting, something which brightens places up at a dark time of year.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Is it worth saving only 246k but not putting Christmas Lights up? Scrooge-tastic!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No, winter maintenance should be expanded beyond the statutory minimum or funds allocated to ensure it can be. We had diggers up our street in 2010/11 because the primary school wouldn't have been able to open which could have been prevented if the streets had been cleared when the snow started.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Terrible, lightning is already not great and makes me feel unsafe at night	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Sad no Xmas spirit but times are tough will there be much anyway.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Winter maintenance may be another issue however, reducing the level of maintenance from current levels may cause additional costs in other areas such as dealing with contact centre enquiries / insurance claims etc.?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The roads are in a hellish state, surely we can still have festive lights...that's a step too far	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Roads should be a priority during Winter, especially on major routes.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	This is essential, as the roads are currently dangerous in West Lothian. Not only are many of the surfaces unfit for use, but overhanging trees block road signs, junctions, and damage cars.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	We pay heavily for roads and don't get value for money, roads are a disgrace.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Regarding the festive lights - this is a shame. On dark winter nights, some festive lights can make a difference.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The current level of service is so poor anyway. Do you really wish to make it even worse?;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting can be so helpful for people who struggle with finances, mental health etc and provide joy. Surely the council can use some of their budget for this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting is what makes a young person's christmas, do not remove such delights especially in these hard times where this may be the only christmas tree light a young one shall see due to families worrying about the home electric bill.; The word Scrouge comes to mind here!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	That would be a real shame to take away the Christmas lighting etc in communities. Not many communities could afford to take this cost on. It lifts spirits, people are already struggling and may not be in a position to have their own for their children. Where is your Christmas community spirit?!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Would not support less gritting in Fauldhouse. This is a high altitude area and should be gritted in line with this fact. Other areas receive copious gritting when it is less necessary.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Some of the roads around west Lothian are terrible. The amount of pot holes are dangerous to drivers.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Roads in many parts of West Lothian are in constant need of repair due to weather and the nature of our rural roads. Taking time to repair them properly, and not just a patch up, should be a priority. The road between Dechmont and Linlithgow is a busy route and should be widened and straightened to cater for the traffic on it. I agree that reviewing the efficiency of road repairs should happen.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Road repairs: the council has a requirement to fill potholes within a prescribed period of time for the safety of road users. Therefore, it is necessary to undertake temporary repairs to ensure the road is safe before undertaking permanent repairs.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Winter road maintenance is poor already, unlikely to be legal, reducing it further will mean people cant go to work. Therefore this seems a backwards move. Taking away festive lighting again seems depressing. Reduced services like this makes paying council tax seem more annoying. Foe example, I get so little from Council services this will make living in WLC less attractive.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No, you don't provide enough service on this as it is	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	You could cut down on some but it does cheer people up, don't stop it altogether	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Roads are already bad. How can you revise the standard?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Gritting was an absolute joke last year. Council couldn't even keep to the P1 and P2 routes. All we saw was routes being over gritted and some P2 routes not being done at all.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Winter maintenance service is very poor , specially when there is snow . Need to give more attention for that period	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Please consider the costs and make efficiencies but little things go a long way in terms of community spirit.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I think the festive lighting is short sighted. If you want the footfall, community feel and people to spend cash in thriving towns then you need to help make them attractive. Else you will end up with ghost towns and lose their revenue	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Please don't make the rural roads dangerous. We all have the right to be able to move around in winter weather. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No festive lighting? Miserable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Winter road maintenance is very important. If there are more potholes, residents will end up paying more for any damage and of course there's the safety aspect. ; ; This whole consultation feels like you don't actually care about the people of West Lothian. I am so disappointed in WLC.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Ah, more potholes. I'll send you the bill. Feels pretty mean as well cutting down on festive lighting.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	How miserable!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Disagree in the current climate why do we pay our council tax ..Road tax ; Tax in general shocking !!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Bah humbug.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Winter road treatment is already at a poor level. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Literally taking the light out of life with this proposal. Detrimental to wellbeing in the depth of winter.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Keep what we have it works a short term cost saving will result in additional costs in future years due to cutting back on maintenance and road services	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I think people will understand reducing things like Christmas lighting. Not sure what the cuts to winter maintenance will look like as i don't feel it is sufficient enough at the moment !	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	So far I have only experienced that road maintenance takes way too long and is not delivered everywhere it is required	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I think it is important for roads to be safe and well kept but also council streets to be cleared of build up of leaves etc, this is dangerous over the winter and I have noticed this is much worse already over recent winters.; It would be a shame to lose the Christmas lights and gala day bunting.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	save festive lighting. Remove Inprint and use the resource for these proposed cuts	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Too many potholes as there is.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Road repairs: Road Maintenance is carried out annually within the available resources and improvements are carried out in partnership with Sustrans. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	fix the potholes .	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Road repairs: Road Maintenance is carried out annually within the available resources and improvements are carried out in partnership with Sustrans. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Winter services such as gritting and snow ploughing should not be reduced but instead increased. Main bus and emergency routes are prioritised and this makes perfect sense but if people can't get their cars out the street to the main routes then the complaints increase and the trust in the council will decrease.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Gritting is important.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Really worrying,	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Winter roads maintenance is import to keep if possible. Some of Murieston would be cut off if road clearance was not done.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree that certain services (winter gritting) are of more importance than perhaps festive lighting. I also think winter gritting needs to look at pavements and active travel links as well as well as making sure roads are gritted.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council provides a Winter Maintenance Service for footpaths and this service is prioritised on a risk basis. Footpaths with higher footfall are prioritised before those with a lesser footfall.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No winter maintenance should be reduced or lack of Xmas lights as Xmas is only once a year and most of us pay or council tax for all these provisions.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Roads in the area have increased potholes and danger zones.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Road repairs: Road Maintenance is carried out annually within the available resources and improvements are carried out in partnership with Sustrans. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Not very good...; The roads are a mess already	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Road repairs: Road Maintenance is carried out annually within the available resources and improvements are carried out in partnership with Sustrans. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	You need to look at the state of the roads in West Lothian they are terrible	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Road repairs: Road Maintenance is carried out annually within the available resources and improvements are carried out in partnership with Sustrans. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Removing festive lights at the darkest time of year will impact on people's mental health and severely dampen community spirit.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Shame but cutting costs like this are all relevant in the bigger scheme, better to remove this than money for education	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Safety must not be compromised for West Lothian residents in reducing or changing services such as winter maintenance. Streets need to be gritted to keep people in West Lothian able to go to work, shops, school etc safely. ; Does West Lothian ever look for cross council savings with Falkirk, North Lanarkshire & Midlothian/Edinburgh? There could be opportunities across services, and also deployment & utilisation of staff & contractors/contracted services.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	If council not providing festive lighting who will, can't have none as times are hard enough for everyone!!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Winter maintenance on the roads has been non-existent in many areas for years. The refusal to provide or fill up grit bins on non-main road and residential areas citing danger to health and safety of council workers is laughable. What about the health and safety of the residents who pay council tax? Each year a number of elderly residents are effectively trapped in their homes due to poor winter roads maintenance. Routes to schools and shops should be cleared.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	For safety reasons winter maintenance and gritting cannot be cut back. But you could enlist more community help to do it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Is it such a big deal for festive lights, they have already been bought so it is just LED energy costs but it would be dreich without them. The Council is best placed to do this so you don't get rogue lights being installed that are a safety risk.; You should investigate planting live trees that could be reused every year instead of chopping down and disposing of them afterwards.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	If the roads get much worse we won't be using our cars, buses or bikes. The potholes are sooooo bad in places ; It is interesting to see some people using the bike ways but some roads are unsafe for bikes ie A71. Would it be possible for them to use pavement. When on the road they are trying to avoid the potholes and swing out with no thought to the traffic at their back; Also bikes need to have some form of noise to alert pedestrians of their presence	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Bah humbug ! Can you support communities to do this themselves ?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Very sad	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Bah Humbug.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Safety should not be compromised	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	It is sad to see this cut and would surely have a negative impact on local economies, eg Christmas shopping events.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	What other services will be reduced/cut? This mentions festive lighting (which is disappointing) but only alludes to other services.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	More street lighting.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	If paying road tax I'd expect to drive all roads and not play dodge the pothole	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Road repairs: the council has a requirement to fill potholes within a prescribed period of time for the safety of road users. Therefore, it is necessary to undertake temporary repairs to ensure the road is safe before undertaking permanent repairs.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	make the patch up job much better to last	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Road repairs: the council has a requirement to fill potholes within a prescribed period of time for the safety of road users. Therefore, it is necessary to undertake temporary repairs to ensure the road is safe before undertaking permanent repairs.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	How much more can you cut this	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Does this mean the wee tractors won't clear the pavements anymore?	3. The respondent advised that they had no comment to make or posed a question of the measure.	No. The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	no details on what this entails therefore no comment (except festive lighting of course) - quite a lot of this though out the 'survey' not actually being asked any direct questions just comment on statements	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	What's the alternative for festive lighting?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No comments	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	no comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I'm not in a position to comment fully on this	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No view on this.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	-	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No Comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Not sure on the festive lighting scheme	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Unsure	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Unable to comment again due to lack of available information.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	no comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Very difficult to comment without more detail.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I can't see any point in continuing this survey as it is a waste of all our time without the information, we need to give an informed opinion.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I am unable to provide further input as the level of detail within the estimated saving briefing doesn't allow me too.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	This is dull	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Statutory requirements... I hope this actually means the roads of Fauldhouse are gritted.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	undecided	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Again a saving without the review taking place what are you thinking	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Winter maintenance is a variable. Some years, little maintenance is required. Some years (eg 2009 and 2010) saw real pressures on the service.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Does festive lighting cost £246000?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Reducing any sort of winter cheer would be wrong. Cancelling community events such as Christmas lights will have a negative effect on mental health as will the elderly and infirm being unable to get about due to icy conditions. False economy.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Provide more cycle lanes for people to cycle within West Lothian's Roads and encourage active travel more. Edinburgh do this so much better than West Lothian.	4. The council is already doing this.	Through Partnership with Sustrans.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Perhaps a fund for each town could be set up to pay for this?	4. The council is already doing this.	This is already in place through town centre funding.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Better maintenance of our roads would be beneficial to everyone. Have had damage to vehicles and when reported there was an initial response, but then nothing. This is poor customer service and needs to be taken seriously. Customers lose confidence when they are forgotten about.	4. The council is already doing this.	Road repairs: Road Maintenance is carried out annually within the available resources. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	hi material costs for road repairs etc must be having an impact but the public will slate the council if roads paths etc are hazardous	4. The council is already doing this.	Road repairs: Road Maintenance is carried out annually within the available resources. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I think that it is a small saving whereas the joy it brings to communities is priceless. keep the lights	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Who will provide festive lighting? This is a lovely thing to see at a bleak time of year. A lot of roads aren't treated already during the winter, so this would mean even fewer roads would be treated. Many roads already have pot holes and have had for a long time, with nothing done to repair them.	4. The council is already doing this.	Festive lighting is installed by the Streetlighting team in approved locations on an annual basis. The approved winter plan addresses winter maintenance and road maintenance is carried out within the available resources.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Winter service should focus on active travel and pedestrian access rather than roads. Festive lights need to stop - again, prioritise essential statutory services over 'nice to have' services. Introduce charges for EV charging and look at reducing street lighting energy costs with intelligent lighting control. Get rid of traffic lights at end of life, prioritise maintenance of roads for active travel and get better value from drain cleaning activity.	4. The council is already doing this.	Winter maintenance is prioritised in line with the approved winter maintenance plan. Festive lighting is installed by the Streetlighting team and there are no plans to cease this at this time. EV policy is being developed. Traffic signals and road maintenance are carried out within available resources.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Roads need to be prioritised as still in bad conditions from many years of no/little repairs, so due to covid restrictions. Roads need to be safe to use (cars & bikes, etc). Bad drainage, pot holes do not allow this.	4. The council is already doing this.	Road repairs: Road Maintenance is carried out annually within the available resources. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	good get another pointless expense tae fuck, we dont need festive lights or trees ever and BAN fireworks for sale or display (its remote littering), while you at it redesign any new grit bin for streets with a lid that keeps water out of the grit as the current ones are shockingly badly designed and made, and why were the new led street light heads not fitted with integrated solar and battery ? ; Q. why arent dog waste bags yellow/orange clinical waste colour as standard ?	4. The council is already doing this.	Grit bins and the new LED streetlighting are installed as standard.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	This is already a "sensitive " subject - the numbers of calls to CSC increase rapidly when there is "winter" weather and roads need gritting etc as everyone seems to think that their road is a priority. There would need to be a very big educational promotion to ensure that residents/ customers of the area know what level of service to expect and importantly what not to expect.	4. The council is already doing this.	The council provides a Winter Maintenance Service for footpaths and this service is prioritised on a risk basis. Footpaths with higher footfall are prioritised before those with a lesser footfall.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	More effort and resources need to be put in place to maintaining our roads and highways as their current condition is poor.	4. The council is already doing this.	Road repairs: Road Maintenance is carried out annually within the available resources. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The state of the roads definitely needs to be looked at, more proper relaying against temporary patching would to me be more cost effective over the long time.	4. The council is already doing this.	Road repairs: Road Maintenance is carried out annually within the available resources. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Not enough grit bins in areas. Pensioners and other people cannot get out their doors when it is a bad winter. Grit bin at top of jones green livingston but the people at the top of the scheme think it is for them and them only so people at bottom of scheme cant get any	4. The council is already doing this.	Grit bins are provided in line with the approved criteria for grit bin allocation.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Do a job right once (ie co-ordinate digging up a road and fit two services at once), not digging up twice.	4. The council is already doing this.	Road repairs: all road works are co-ordinated by the council to minimise disruption to road users and pedestrians as much as possible. However, it should be noted that some repair works by utilities companies are unplanned and may also be urgently required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Protect our young people on roads and stop making up excuses.	4. The council is already doing this.	Not a suitable suggestion.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Do a job right once (ie co-ordinate digging up a road and fit two services at once), not digging up twice. Make your staff talk to each other	4. The council is already doing this.	Road repairs: Road Maintenance is carried out annually within the available resources. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Protect our young people on roads and stop making up excuses.	4. The council is already doing this.	Not a suitable suggestion.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Also if you're going to reduce gritting then it's essential that grit bins are regularly checked and topped up for locals to keep themselves safe.	4. The council is already doing this.	Grit bins are provided in line with the approved criteria for grit bin allocation.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	What is covered under 'winter maintenance' and what changes are being considered?	4. The council is already doing this.	The council provides a Winter Maintenance Service for footpaths and this service is prioritised on a risk basis. Footpaths with higher footfall are prioritised before those with a lesser footfall.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Winter maintenance of active travel routes are essential, with the majority of people still working at home at some level, it is imperative for wellbeing to be able to use walking and cycling routes to be able to fit in some activity into daily life while sitting at home for long hours the rest of the time. I'd be really disappointed if this was impacted, as walking and cycling are some of the easiest, lowest cost and most practical ways of achieving improved wellbeing which will be essential for the winter months ahead. Please can you ensure this service is not impacted as many people may not have highlighted this, but it is crucial and a service that is taken for granted	4. The council is already doing this.	The council provides a Winter Maintenance Service for footpaths and this service is prioritised on a risk basis. Footpaths with higher footfall are prioritised before those with a lesser footfall.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Changing road signs from 30>20 and 60>40 mph and then back again after six months doesn't seem like a good use of funds either. Perhaps better consultation with local communities on schemes like this before the money is wasted would be prudent moving forward.	4. The council is already doing this.	Through approved consultation channels.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Stop doing building work on same road for the millionth time. Plan once, fix once, end of	4. The council is already doing this.	Road repairs: all road works are co-ordinated by the council to minimise disruption to road users and pedestrians as much as possible. However, it should be noted that some repair works by utilities companies are unplanned and may also be urgently required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The roads in West Lothian are a disgrace how much did you spend on changing all the speed limits to 20MPH and the spaces for people which have not been removed as promised.	4. The council is already doing this.	Road repairs: all road works are co-ordinated by the council to minimise disruption to road users and pedestrians as much as possible. However, it should be noted that some repair works by utilities companies are unplanned and may also be urgently required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	What are statutory legal requirements? How can we really answer this without knowing the full impact. Keeping areas safe and presentable is important to everyone.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	There is no service. Asked and was assured there will be some speed reducing measures in Kirknewton explored - this is the Edinburgh end of the village, cars speed there as it's the end of village but children frequent walk the very narrow path along the road out/in od village- not cleaned of leaves unless we press for action,	4. The council is already doing this.	The annual Accident Investigation and Prevention programme delivers casualty reduction and improves road safety.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Safety on the roads at winter needs to be the priority over everything else. I don't mind losing a few Christmas lights if roads are well gritted and cleared.	4. The council is already doing this.	The council provides a Winter Maintenance Service for footpaths and this service is prioritised on a risk basis. Footpaths with higher footfall are prioritised before those with a lesser footfall.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Environment, public health and safety are prime here. Ensuring childrens safety and crossing points and a maintaining speed limits is prime overall here.	4. The council is already doing this.	The annual Accident Investigation and Prevention programme delivers casualty reduction and improves road safety.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The council does their best to keep the roads clear in the winter	4. The council is already doing this.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Snow clearance needs to adapt to reflect any changes to achool transport arrangements.; it is essential thay Footways and Footpath clearance is not reduced.	4. The council is already doing this.	The council provides a Winter Maintenance Service for footpaths and this service is prioritised on a risk basis. Footpaths with higher footfall are prioritised before those with a lesser footfall.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Push active travel. Reduce car use on the roads. Save money... that simple.	4. The council is already doing this.	Road repairs: Road Maintenance is carried out annually within the available resources and improvements are carried out in partnership with Sustrans. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting is not a priority. Perhaps local businesses could get together to help provide this in their locales. Street lighting is the most important, and to be honest the council could cut back many of the trees and bushes to uncover many street lights that are shaded. Since most of the street lights are LEDs, I'm assuming these lights will already be a money saver, but not if they are covered by trees which plunges many footpaths in the county into darkness. There is no point spending a fortune on new LED streetlights, only to have them obscured by overhanging trees and bushes.	4. The council is already doing this.	Street lighting: appropriate lighting is required by law to enhance public safety. The council has an LED replacement programme as this is the most sustainable and energy efficient option that is currently available. Vegetation clearance is carried out within existing budget resources
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Fine by me - although concerned about winter maintenance - does this include grit bins and gritters? if so, very concerned as this would be a safety concern.	4. The council is already doing this.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Does this also mean that the public could be at further risk where road / winter maintenance is affected i.e. during periods of heavy snow/ice?	4. The council is already doing this.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Who is doing the festive lighting then? Who is updating lights etc and moving then to led to save energy?	4. The council is already doing this.	Street lighting: appropriate lighting is required by law to enhance public safety. The council has an LED replacement programme as this is the most sustainable and energy efficient option that is currently available.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Maintain salt bins for community use. Ensure potholes are filled.	4. The council is already doing this.	Road repairs: the council has a requirement to fill potholes within a prescribed period of time for the safety of road users. Therefore, it is necessary to undertake temporary repairs to ensure the road is safe before undertaking permanent repairs.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	SWITCH OF LAMPPOSTS DURING THE DAY,	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The Roads especially when heavy rain flood very easily, also in Autumn the leaves block the drains in certain car parks which also leads to flooding.	4. The council is already doing this.	Road repairs: drainage improvements are assessed and carried out by the council as necessary.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	When we start cancelling Christmas things are bad I am sure a modest review of snr staff salaries could cover this ..	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	If you collected all the road signs left behind you would have thousands £	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	We have a top heavy management team 54 men with nearly 20 manager's and charge hands We still have to provide a footpaths to be cleared this is vital for the elderly and primary schools and high school and the public in general	4. The council is already doing this.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	You know what you do, when you fix our roads and pavements do it right the 1st time and with the right materials, I'd never in my life seen plastic kerb stones until I saw them here in West Lothian, and guess what, they were broken ! waste of money !	4. The council is already doing this.	Road repairs: the council has a requirement to fill potholes within a prescribed period of time for the safety of road users. Therefore, it is necessary to undertake temporary repairs to ensure the road is safe before undertaking permanent repairs.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I just wouldn't want to see the maintenance of roads fall such that it was a false economy. In the past couple of years there's been quick response to damaged drains which were causing constant flooding eroding the surface of the road. Neglecting that kind of issue would have resulted in a much larger eventual repair bill than responding quickly.	4. The council is already doing this.	Road repairs: drainage improvements are assessed and carried out by the council as necessary.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Not enough information but until the Council are prepared to 'affect people wages' they will be unable to make sensible changes. Why we pay staff to be on standby without any reference to weather forecasts is a disgraceful use of public money. Also across the board (not just Roads) changes to contracts that affect peoples take home pay need to be made - better this that putting people out of jobs! Focusing on winter maintenance when it is actually needed and going beyond statutory minimum would be better received - pay people for work when it is needed not all winter.	4. The council is already doing this.	Thank you for your comment.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Do away with speed bumps and use tar to fill in pot holes	4. The council is already doing this.	Road repairs: drainage improvements are assessed and carried out by the council as necessary.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	It would be more efficient to coordinate road works etc so that there is not a continual string of work on the same stretch of road. ; ;	4. The council is already doing this.	Road repairs: all road works are co-ordinated by the council to minimise disruption to road users and pedestrians as much as possible. However, it should be noted that some repair works by utilities companies are unplanned and may also be urgently required.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Surely there should be an 'updated approach to asset management' whatever that means in all areas?	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	With many people paying council tax is it appropriate that all individual see where their money is being spent and benefit from it.	4. The council is already doing this.	The council publishes details of expenditure as part of the Council Tax information provided to households.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Like I said earlier feels like we need to reset on what the hell we are paying all out taxes on. Someone is spending this on stuff we don't see or feel.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Instead of ripping up the freshly surfaced roads for every single pipe, how about planning ahead and do it all at once? This strategy works in other countries. Instead of closing a road for major patchwork for several weeks, why not resurfacing and save money in the long run?	4. The council is already doing this.	Road repairs: all road works are co-ordinated by the council to minimise disruption to road users and pedestrians as much as possible. However, it should be noted that some repair works by utilities companies are unplanned and may also be urgently required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Winter maintenance should focus on transport and community requirements.;	4. The council is already doing this.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	As a resident, stop trying to upgrade signage, creating cycle paths that little to no one uses.	4. The council is already doing this.	Road repairs: Road Maintenance is carried out annually within the available resources and improvements are carried out in partnership with Sustrans. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	How about looking further into the structure of road management services. Council workers for road digs, traffic management, pot holes bad road resurfacing. It would seem there is an over staffed issue here. Many times I have seen and it is widely seen by others. 5 men on the job but only 2 working. This is actually a laughing point by many. West Lothian Council can't staff there schools but can pay street services to sit and watch the show.	4. The council is already doing this.	Road repairs: the council has a requirement to fill potholes within a prescribed period of time for the safety of road users. Therefore, it is necessary to undertake temporary repairs to ensure the road is safe before undertaking permanent repairs.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	How about looking further into the structure of road management services. Many times I have seen and it is widely seen by others. 5 men on the job but only 2 working. This is actually a laughing point by many. West Lothian Council can't staff there schools but can pay street services to sit and watch the show.	4. The council is already doing this.	Road repairs: the council has a requirement to fill potholes within a prescribed period of time for the safety of road users. Therefore, it is necessary to undertake temporary repairs to ensure the road is safe before undertaking permanent repairs.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	How about looking further into the structure of road management services. Council workers for road digs, traffic management, pot holes bad road resurfacing. It would seem there is an over staffed issue here. Many times I have seen and it is widely seen by others. 5 men on the job but only 2 working. This is actually a laughing point by many. West Lothian Council can't staff there schools but can pay street services to sit and watch the show.	4. The council is already doing this.	Road repairs: the council has a requirement to fill potholes within a prescribed period of time for the safety of road users. Therefore, it is necessary to undertake temporary repairs to ensure the road is safe before undertaking permanent repairs.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	1. Roads need to be esp with growing buildings around.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Try investing money in new better surfaces an remove speed bumps that casue damage to cars as there to steep or not full width of road an not 6 inch in height.	4. The council is already doing this.	Road repairs: Road Maintenance is carried out annually within the available resources and improvements are carried out in partnership with Sustrans. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	More roads workers actually working instead of sitting in cabs or resting on a shovel would ensure this service is more productive and cost efficient. Roads need to be salted during winter months otherwise how will your council workers get to work.	4. The council is already doing this.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Why aren't all streets where schools are sited no presently gritted as a matter of course.	4. The council is already doing this.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Use your common sense! You waste thousands on silly statues on roundabouts why not fix the pot holes! Make pathways safer with regards to lighting and cameras	4. The council is already doing this.	Road repairs: Road Maintenance is carried out annually within the available resources and improvements are carried out in partnership with Sustrans. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Some sort of scheme needs to be implemented to ensure older citizens can still get out of their homes during inclement weather safely even although this is not a statutory legal requirement	4. The council is already doing this.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Keep road maintenance	4. The council is already doing this.	Thank you for your response.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Increase cleaning /maintenance programme especially in the autumn (paths cleaning.)	4. The council is already doing this.	Thank you for your response.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Look at value for money	4. The council is already doing this.	The council continually reviews service provision using our Best Value Framework to ensure that we deliver value for the public and continue to achieve the expected levels of performance. There are rigorous internal scrutiny arrangements in place to assure the quality of our services and we are also subject to external audit and inspection.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Savings could be made by switching off every other streetlight. In my opinion, enough light can be provided by one in two lamps. this would also reduce light pollution.	4. The council is already doing this.	Street lighting: appropriate lighting is required by law to enhance public safety. The council has an LED replacement programme as this is the most sustainable and energy efficient option that is currently available.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Street lighttight is adequate - which it is not.	4. The council is already doing this.	Street lighting: appropriate lighting is required by law to enhance public safety. The council has an LED replacement programme as this is the most sustainable and energy efficient option that is currently available.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Make Sure the roads are open with no potholes.	4. The council is already doing this.	Road repairs: the council has a requirement to fill potholes within a prescribed period of time for the safety of road users. Therefore, it is necessary to undertake temporary repairs to ensure the road is safe before undertaking permanent repairs.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	gritting has to be done better. small streets are not serviced those people living there are paying the council tax too. not enough gritting salt available	4. The council is already doing this.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	grit bins are not accessible and not enough. streets need gritted	4. The council is already doing this.	The council has an approved annual Winter Maintenance Policy and plan, which prioritises roads and footpaths.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Time to stop making "improvements" along high streets and at roundabouts that no-one wants.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Think outside the box maybe have solar battery energy to make lights work.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Not a suitable suggestion.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	As long as not unsafe. If potholes are going to be an issue encouraging 4WD vehicles and general war time approach might be best. Or privatisation of roads with local tollbooths.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting wouldn't cost much if energy was stored and reused for lights in winter time. ; Idea only put Christmas lights on in the main streets sat and.sunday nights for 3 hours 7 till 10 ; Control the times. But do not take this away in totality.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Focus all Christmas lighting budget on the centre at Almondvale. Make it something people come to see and will spend money when there. No brainer.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Not a suitable suggestion.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Allow people to put up Neighbourhood Watch signs and stop saying no, because of too much signage.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Not permitted in line with policy.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Allow people to put up Neighbourhood Watch signs and stop saying no, because of too much signage.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Not permitted in line with policy.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	the boulevard xmas dec look like my aunties rejects.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Not permitted in line with policy.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Stop wasting money on speed bumps which are to High an cause damage to people vehicles, stop reducing speed limits unless through government they are passed, better led lighting for communities and provide solar panels for older housing stock.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	reduce the use of sub-contractors and allow trained staff to use the skills and do the work instead - instead of temp repairs that are not cost effective do it right first time?	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Road repairs: the council has a requirement to fill potholes within a prescribed period of time for the safety of road users. Therefore, it is necessary to undertake temporary repairs to ensure the road is safe before undertaking permanent repairs.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	As previously stated in Section 1A: ; ; There has already been a reduction in service delivery standards in some areas which is already very noticeable, so the council has to be careful. Gully cleaning for example - the cleaning cycle used to be once a year which very rarely happened, although according to certain people, this function was performing adequately. But now it's taking something like three years complete the cycle, that's if it ever gets completed. ; ; Many of the gullies look like window boxes during the summer months with weeds and shrubs growing out of them. Hence the reason for the floods, water running along the road at half the width of the carriageway and ponding water everywhere. The water just isn't getting to the road gullies. It's nothing to do with climate change. it's purely and simply a lack of drainage maintenance. A reactive approach to supply this service is totally inadequate. ; ; This service needs to be externalised in order to provide the residents of West Lothian the service it deserves. Keeping this function in-house is expensive and inefficient. Councillors need to accept this function has to be externalised for the benefit of everyone.; ; Another basic function which is lacking is road sweeping. This goes hand in hand with the drainage maintenance. The material that doesn't get cleaned from the road ends up in the drainage system causing blockages and this is then more expensive to rectify through excavation and replacement. The effects of water on the road also affects the durability and lessens the life of the road pavement.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Road repairs: drainage improvements are assessed and carried out by the council as necessary.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Transport is in desperate need serious investment , the pay scales being offered to attract qualified staff are grossly inadequate or is there a plan to dismantle our 'in house' service and seek external service providers???	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	As long as there is nothing to stop communities doing their own organisation of festive decor / events.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Consideration is currently given on a case by case basis.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I think a christmas tree in a village is all that is required and most Community Groups could make these arrangements	6. The respondent suggested an improvement. Officers will consider how this could be developed.	This could be considered in the future.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	If festive lighting is no longer provided by the council, would this mean that it would be self-funded by the community? It would be a very depressing time for those communities not able to fund the festive lighting. This may result in an increase in medical costs for those who need additional mental health support.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Consideration Is currently given on a case by case basis.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Additional clarification should be provided on this point. If it is merely about decorative issues, such as the lighting, then I have no objection, but individuals or groups should be permitted to provide this lighting if they are so inclined with minimal interference from the local council or prohibitive red tape.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Consideration Is currently given on a case by case basis.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Stop lighting up monuments.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Consider other attractions, Monuments and buildings where energy savings can be made	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Does this also mean that there will be no requirement to display costly festive display in the various council offices. If the council are stopping outside festive lighting the surely it makes sense to stop the internal festive lighting and decorations especially as the current cost of electricity is sky high	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Reduce festive lighting, not only will this save money, but reduce greenhouse gases. Would suggest perhaps not cut entirely but focused on the most popular main street areas only. Perhaps consider festive decoration that doesn't require power to function in some areas? (Glow in the dark or reflective - provided it doesn't cause a H&S risk - is there any that utilise solar power to use?)	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Gritting is important. Is it possible to have (local) companies sponsor a gritter to have their name on it (but in a now traditional gritter naming convention / play on words?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Yes should be cut back but should be provided	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Could the lights not be sponsored by local companies as an option? Maybe if half a dozen of them didn't stand around looking at the job things would be done quicker.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Lights do not need to be on all times of the day but open make things feel nicer	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Understandable but would be a real shame. Would support be given to local communities who wanted to fund the festive lighting themselves? (eg handing over the lights!)	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Consideration Is currently given on a case by case basis.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Or don't set up on Saturday/ Sunday overtime shifts!	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	This seems like an opportunity for partnership working and community councils/town development trusts	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Consideration Is currently given on a case by case basis.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting to include the boulevard and civic centre tree etc too? Cancelling Christmas or passing the job to communities to do themselves? Will you allow communities to do it themselves?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Consideration Is currently given on a case by case basis.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	It's pretty poor offering already. Perhaps a reduced approach to lights ?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Last 2 years some wasteful schemes were introduced such as the permanent cones to extend walking space during covid - no one needed them, they were introduced on pavements very wide already (but not on very narrow), this is an example of a complete waste of public money	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Scrooge! Hand the lights over to community groups to put up?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Consideration Is currently given on a case by case basis.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Again metrics in trial data must show this approach works first	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Again, does not seem unreasonable as a lower priority. The local community, especially businesses should pay to make our town as attractive to visitors as possible, so should provide festive lighting and the like.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	It saddens me that the one time of the year when residents should have something to look forward too and be reminded of the festive season, the council chooses to suggest switching the Christmas lights off. Why not seek funding within the private sector to sponsor the lights?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Perhaps community empowerment developments could look carefully at potential alternatives to some services.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	This is a saving but removing a visible celebration of a time of year that can lift spirits and bring community feeling. Maybe continue with focal xmas tree located in central areas within communities if removal of lighting	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Who will meet the cost of festive lighting or is Christmas now cancelled? Could it not just be reduced so that instead of starting in October it was just in December, that would save money but also leave communities some Christmas spirit in the council area	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I am sure communities can look after these as long as all communities are treated equally!	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Council can't afford Christmas lights now? Will this include decorations at the civic centre?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Can understand the removal of the festive lights provision which local communities may take on themselves. Unable to make provide a constructive comment on the rest as there is no detail as to what the changes proposed are and what affect they will have.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I think festival lights should be down to local community groups	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Could this just be cut back but Christmas trees still included in villages?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	A reduction in Christmas lighting is understandable, perhaps a Christmas tree in towns would be acceptable.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Then stop doing the silly schemes like the bus path you did last year, the talking bins, the ones was just as good. That's what you call a Waste of money	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Communities can find raise for their own lights. This should defiantly be cut before education.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Should community groups and businesses not get together to provide this?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	However, to deliver this and many other proposals I have seen this far will require a culture and relationship change between the council and its customers. There needs to be improved communication and engagement encouraging people to become active members of there community and then people can assist with winter maintenance themselves and put up their village xmas decorations or local businesses fund them etc. The council is seen to much as being the provider of everything which obviously can continue.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree this could be funded by the local communities, lighting at the centre could be provided by both the designer outlet and centre, if not an option then could there be the return of a Christmas light switch in to raise funds ? This was always something that attar ted a crowd when I was a child growing up in Livingston and is an experience I still remember with fond mementoes today	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Sad again. Is there discussions with communities on how they can use the current assets of the council such as the Christmas lights?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Winter maintenance is a high priority to council. Villages could raise own money to have festive lighting	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting etc should be local community and community council led.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Increase the use of solar power e.g. on all lampposts	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	If not provided by the council - would groups be supported to deliver festive lighting? Again, staff would be needed to support groups to take on projects like this.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The installation of Christmas decorations within towns and villages is a discretionary service that the council provides where there are available resources. Other urgent or priority works may be prioritised when necessary.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I think the council can save a lot of money by doing road maintenance more effectively. If there is a road with pot holes, only the holes are filled up, causing other holes within a couple of months to start forming at the boundaries. Often you see roads that look like a quilt, with more patches than original tarmac. Even though a single patch is relative cheap, in the end you pay way more than needed. If a road section needs maintenance because of potholes or so, resurface larger sections of the road and you don't need to worry about it for a longer time.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council agrees that planned investment is always better than reactive maintenance, however severely reduced capital funding limits the council's ability to do this. The council's property asset management strategy and capital programme seek to identify planned maintenance to assets, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain assets required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I think this should remain. maybe keep the lighting up all year round and only turn the lighting on every year.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	In order to keep festive lighting would it be possible to ask for a community contribution towards this and have the lights on later nearer Christmas and for a shorter period?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I agree winter maintenance should focus on statutory (legal) requirements. The festive lighting, I disagree but could local businesses not sponsor some of the festive lighting and do not put the light up till later in December and take down first week of the New Year.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I agree with this proposal.; Local organisations could be encouraged to take on this opportunity.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	There is absolutely no need to cut those services. I work for Roads and can tell you that there are too many managers hiding and presiding over the Roadworkers. From supervisor to Head of service there are 19 Managers overseeing those 50 workers. This is surely unsustainable. That is about 2.5 workers per manager. Really ??... What is going on?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Are all Service Standards currently available and easy to access. I have tried to find Service Standards for road cleansing and road gully cleaning with out much success.....I would like to think that this was not deliberatebut do you really want the public knowing what they should be expecting from their Council!!!	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Again disappointing re this however is there any consultation being sought with community groups to see if they could take this on	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Communities could be supported by officers to make funding applications to external bodies for these kinds of things.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	It is a shame to no longer provide festive lighting. Costs could be reduced by having festive lights up for a shorter time eg Dec - Jan. In previous years, they've still been up in April!	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Perhaps not wasting money on 20mph signs would mean that money could have filled the gap!	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Need more details on this agree with festive light savings that could be voluntary activity	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Yes, savings need made. Perhaps local shops or local organisations can pick up the cost of festive lighting. Winter gritting, a difficult one to manage when the rain keeps washing it away.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting should be delegated to community groups and fundraising should be encouraged for this. Lights could be switched on nearer Christmas to reduce costs.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Fine with this. If villages and towns so concerned then a community project to fundraise own decorations could be set up as long as there is no need to get Council permission to put them up of course - as this may be counter productive.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	festive lighting should be maintained but should be more enthaise on asking the local commercial companies to sponser some of it and details should be display that they have sponsered the items. winter toad maintenance should not be cut as it is a vital life line to many people	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting - is this not able to be sponsored by the large companies located in WL?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Get the shops and businesses involved - Christmas cheer encourages shoppers and revellers and is one of the things that would be missed - lasers instead?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	What a way to suck the last joy out of life. Perhaps approach a few local businesses and ask for sponsorship.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Were the changes in speed limits 20 to 30 withing narrow streets really necessary and did you have to remove freshly installed cycle paths? That is so wasteful.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Will you give the existing lighting to the communities?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Hopefully crowd funding in each town could cover some costs to festive lights as a compromise.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	If communities want festive lighting, they need to step up, take ownership, and contribute.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	need to consider links to community groups and to private businesses to support this function instead of the council delivering?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Would agree, each community or community council should take on responsibility for its own festive lighting or Galaday bunting etc.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting should be in the hands of the local communities themselves but the council should allow access to the lamp posts free of charge for the power of the services .	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	get sponsorship from local businesses	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	If you are cutting festive lighting, please give community councils enough warning to make alternative arrangements.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agree. Christmas lighting should be community funded if desired particularly in this environment if financial cuts to our council.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	If communities want festive lighting or galadays then they should be asked to fund it or go without.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Give communities enough notice to make alternative arrangements or to raise funds to pay for it	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Staff to be replaced by technology is absolutely ridiculous, unemployment is at an all time high and the council think this is appropriate. Also we have a perfectly good roads team within the council yet any big jobs are contracted out and the state of country park roads are atrocious with pot holes so you can try and save money but it will be spent fixing the publics tyres from pot holes.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	This ties with country parks too as it's their road I am talking about. I have put complaints in twice in the past year about polkemmet country park road and how bad it is - it is just as bad again so a further complaint will be submitted. If the road was to be fixed permanently ie dig up and re tar it, it would save money in the long run as there wouldn't be claims for tyres due to pot holes	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Road repairs: the council has a requirement to fill potholes within a prescribed period of time for the safety of road users. Therefore, it is necessary to undertake temporary repairs to ensure the road is safe before undertaking permanent repairs.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Don't patch roads continually.. major resurface on busy roads (not at peak time) take a leaf out of foreign countries... repair at night	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Road repairs: Road Maintenance is carried out annually within the available resources and improvements are carried out in partnership with Sustrans. Approved industry wide road materials and infrastructure are used on the public road network as required.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Why are Christmas lights on the trees in Bathgate town centre illuminated all year. It's very pretty but seems like a waste of electricity to do all year long. ; Have you asked local shops if they could help with the costs to help decorate town centres. It feels like Scrooge not to have a Christmas tree & lights at the very minimum in each town/village.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Could a community organisation unitise existing decorations and still provide this festive service?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	From previous council works carried out it is clear that no thought goes into what roadworks are carried out, often it seems that the same road is done several times for no apparent reason. Even once the roads are completed there doesnt seem to be any governance on the work carried out.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Road repairs: Road Maintenance is carried out annually within the available resources and improvements are carried out in partnership with Sustrans. Approved industry wide road materials and infrastructure are used on the public road network as required.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Good! There's no need for the council to be going around all the towns erecting lights and trees. If communities want this they can raise the money themselves. Not everyone celebrates this time and in order to be an inclusive community there needs to be a representation of all its residents.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Agreed, but look to have local action groups who with sponsors could take over a very small number of displays, ie; Xmas and Galas	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Yet you were happy to spend a ridiculous amount of money on the 20mph limit in our towns just to change it back. What a waste of funds!	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting could be reduced in certain areas so all areas can still have some.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	West Lothian Council does an excellent job. Please please would you now consider making a tarmacadam footpath linking Clarkson Road Broxburn through Greendykes road. The old path through the wood has been badly damaged by motorbikes and bicycles. The new Aldi store would be more accessible by those without cars.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council's asset management strategy and capital programme seek to identify planned maintenance to assets, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain assets required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Work force has been reduced by 40 percent yet management has remained the same a saving of 120000 pounds plus pool cars pension contributions could be saved if you offer inhasment packages to management. 50 men don't need five supervisors two managers. I am considered about the councils future this idear means nobody loses they job	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your response.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Can festive lighting be asked for by the community councils and other 3rd sector key groups and the community if they want them. Can we find out the cost? Surely the community could all chip in a pound or two for them. Balance thos out with the Livingston boulevard lights being upgraded (speak to the centre?) this would look a lot better for tourists visiting.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Festive lighting brings a community feel to certain areas, i think to restrict the length of time it is on would be something to consider - does it really need to be switched on from the start of November - could it instead start at beginning of December and run up to and include Christmas day then be switched off this would make some saving (potentially 50%)	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Will all council operational staff using vehicles be made aware that they should not be parking wholly or partially on the pavements outside premises that are working on. Pavements are for people not for council vehicles.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your response.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	not easy to report potholes	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your response.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	potholes need filled quicker	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Road repairs: the council has a requirement to fill potholes within a prescribed period of time for the safety of road users. Therefore, it is necessary to undertake temporary repairs to ensure the road is safe before undertaking permanent repairs.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Roads are a disgrace	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Given the level of mental health issues this is dissappointing.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Pretty sure you don't spend all of that on festive lighting. Nevertheless, it seems like roads and car transport are taking a very small hit compared to other services. Could this be because LaTory councillors want nice roads to drive their expensive cars on? As (redacted) once said to me, "Surely the old biddies can get the bus to bingo?" No shame.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Not a suitable suggestion.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Kids can watch online how it's done, for example, in China...	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I don't understand the rest of the proposal as it doesn't tell me what the impact will be on safe travel in the winter months.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Jeez , you really are skint , maybe ask Nicola to shut down the pretend embassies and put the referendum money back into the pot	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Turning West Lothian into a Russian style state	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	PMSL!!	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Let people sit there snack bar in big lay-by to trade to see if it busy and then let them know of the planning permission	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	2. Water logging arounds road and pathways.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Road repairs: drainage improvements are assessed and carried out by the council as necessary.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	5. Parking space	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	who cuts to roads dept either	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your response.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The cost of current power supply needs to be reduced by only providing essential lighting.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	In order to make safety a priority the council should encourage all businesses to implement a work from home plan wherever possible to reduce travel during severe winter weather. Many people were able to work from home during covid so it would definitely be possible for these people to work from home on 'snow days'. ;	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Does the speed camera work between Kirknewton and oak bank? So many accidents. It's would earn money abd save lives.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Need more detail to provide a considered comment	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	No details to measure saving against.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	I don't fully understand this part	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The format of this survey is poor and does not lend itself to true scrutiny of the proposals. The survey is badly designed and off putting to many given the large blurb of text under each heading - the language is in business speak which is essentially meaningless. There is a lack of clarity on the proposals and the reader is left to assume what the blurb is getting at. This survey should have been in plain English with examples of the proposals which would support greater engagement with the activity. ; ; There should be space for feedback on the methodology being used also - this has not been made available which adds to suspicion that the whole process is already decided, and course of action is already determined. The council and COSLA must do more to protect our communities and demand a fair settlement from the Scottish Government. This exercise highlights the political failure of the funding model and it will be the local community that suffers as a result. The end of the survey does not have a 'Finish' button, merely a 'Next'. Overall - very poor approach	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	The lack of real facts and figures about what is going to change makes it a challenge to comment effectively. More information is required before any meaningful consultation can take place. We should be provided with a statement for each section and the option to agree, disagree or have no opinion. I would strongly urge the council to re-present this consultation in a more user friendly format.	9. The respondent made a comment on the survey question.	Thank you for your comment about the survey, the council will carefully consider all feedback and use it to review and improve our consultation approach.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	'Focus on statutory requirements'. It is a little unclear what exactly this service covers.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	needs to be recitdced as per my last statement in transport	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	As a resident I do not understand what this will mean to the services I receive due to the vague and broad terms used in this consultation document.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	As a resident I do not understand what this will mean to the services I receive due to the vague and broad terms used in this consultation document.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Seems reasonable realignment but need more detail.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4E Revised Service Standards and Delivery Models – Roads and Transport	Not enough detail to assess impact of changes proposed. Festive lighting won't be missed - ho ho.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No objection, to the extent that the council is not seeking to dispose of properties (thus eroding its asset base and income generating opportunities) without a plan to replace that income generation as this would be a short sighted approach with long term consequences.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Assuming this relates to underused premises that potentially will be sold as is or as land plots, that makes sense.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Ridiculous that council properties are not utilised more fully.	1. The respondent advised that they agree with the proposal.	The review of council facilities will consider a number of factors but the demand and current use of the facility will be one of the main considerations.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Surely the money spent on new buildings for council workers throughout west lothian has now turned out to be a complete waste of money	1. The respondent advised that they agree with the proposal.	The council has delivered substantial savings through consolidating buildings. Council will continue to utilise the partnership centre model in which there will be shared services and facilities, including those delivered by partners.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Shut underutilised offices for good and sell the land.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	council should reduce the number of assets where possible and sell surplus properties	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Agree. The council needs to reduce the number of buildings it operates from. Hybrid working makes this entirely achievable.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Agree	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	👍	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Agree - the council has to use its assets efficiently otherwise it is a waste of money.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	There are many underused council properties that should be sold	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Makes sense if does what it says.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	With the increasing numbers of people working from home this would be a good way to save money - sell/rent council buildings.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	This seems reasonable	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Ok	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Good point.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Good.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Makes sense	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	ok	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Good idea	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Possible.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	You must be able to save more if u rationalise buildings	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	You must be able to save more if u rationalise buildings	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Invest on asset should be maintained.	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Not to much	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. Services are delivered locally where this is appropriate and delivers best value.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Pleased to see this and wish other Councils took a similar approach.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Keep the assets maintained as this is a good strategy and any reduction in maintenance will harm over the long term.	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Ok!	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	After reading the above, I will continue to trust your decisions in the areas I have no experience in , but thank you for the opportunity to co-operate !	1. The respondent advised that they agree with the proposal.	This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	I suspect in the short term this will increase costs to get some buildings up to an acceptable standard, but agree long term this may assist.	1. The respondent advised that they agree with the proposal.	The council's asset base currently performs well against national performance indicators.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	again, this is a bit vague, but sounds like something that should be considered before touching social care, education budgets etc	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	It is important that council properties are managed and used as efficiently as possible. Premises need to be fit for purpose and as long as they meet standards to provide an excellent service for customers then changes are very much welcome.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Worthy of ongoing reiew.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Reduce the number of WLC buildings now people can work from home. e.g amalgamate Jim Walker Partnership Centre and St David's house. This will reduce more that reactive maintenance.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Maintenance is important for long term care of assets.	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	these cost savings are minimal and can be easily impacted by budgeting	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	agree. Consider renting out the properties e.g. for fitness classes	1. The respondent advised that they agree with the proposal.	Community groups and individuals can rent council facilities, however opportunities to market this wider can be explored.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Any developers must pay a fair sum for property, no deals have to be made. And if a property is sold in an area e.g is sold in Linlithgow funding must be invested back in Linlithgow.	1. The respondent advised that they agree with the proposal.	The council has a corporate approach to asset management which means receipts received are reinvested in West Lothian overall. It becomes part of the funding of the council's total capital programme, from which every area of West Lothian benefits.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Ok bearing in mind the facilities management question	1. The respondent advised that they agree with the proposal.	All services will be reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned agreed priorities.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Regular planned maintenance to be completed in timescales and not left to become reactive repairs - selling off redundant properties and places that are not cost effective to repair.	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	If properties are maintained then this is a good thing	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Expect the council to be rationalising buildings with the new flexible working arrangements.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. This includes new opportunities arising from hybrid working.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Allowing staff to work from home would mean that certain council offices can be permanently closed, these premises could then be sold to housing developers.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. The council has a planned disposal programme for assets which are no longer required for service delivery and have been declared surplus to requirements.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	If this does not impact on asset life.	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Asset nos. could be reduced?	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. This includes new opportunities arising from hybrid working.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	shut the majority of buildings. You have empty buildings with home working. Close most of them and adapt a new way of working with staff sharing desks.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. This includes new opportunities arising from hybrid working.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	This is a sensible proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	I agree with this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Would agree with this saving	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Very good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Agree with this measure	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Agree with this proposal.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Suppose some saving has to be made	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Supported	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Sensible	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No issues as long as workplaces remain safe and comfortable for those using them.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	makes sense	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Excellent if it works properly	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Sounds like a good idea.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Sounds better.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	This sounds like a reasonable and good approach to me.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Sounds like a reasonable approach.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Sounds sensible	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	I think this is fair enough.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Fine	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Assets should be there to support service delivery and not there just to be a building filling a gap in a street or area of a town. It should have a clear function and be fully utilised. Therefore properties should be rationalised and maintenance undertaken based on priorities.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Reduce buildings and get better technology for council workers to; Work; From; Home	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. This includes new opportunities arising from hybrid working.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Seems a very low target.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Buildings would still need to be safe, therefore reactive work may need to be carried out - solar panels would support long term lightening issues within the communities	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	The Council has the best assets in WL. Stop spending funding on yourself and reduce the costs and increase savings	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Council needs to be more proactive in their maintenance to save money	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	I pay all of my own maintenance and expenses when I earn less than some of the people in the council funded homes. So I agree with reducing this budget but still making sure the service is there for those who actually need it. Perhaps some prioritizing would reshape this expenditure to something everyone can be happy with?	1. The respondent advised that they agree with the proposal.	The council will continue to maintain residential and non-residential properties within its portfolio. As a social landlord tenant rents, combined with grant funding, provide millions of pounds of investment each year in maintenance and capital programme upgrades.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Very good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Ok, I support this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Agreed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Seems sensible	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	I agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	I agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Fine	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Agreea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Makes sense to be proactive	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Take you word for it.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Very happy with this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Good - something that should happen anyway	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Happy with this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	What are the plans re home working and reducing the number of Council Buildings that will be required as a result of this.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. This includes new opportunities arising from hybrid working.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Looking at best utililusing maintenance.....quite often we see buildings closed or roadworks but no discernable wirk actually being done!	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	There seems to me to be a significant scope for the energy improvement of many council owned buildings	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council has an approved policy which deals with transfers of certain council assets to the Third Sector. The approved council policy contains a number of safeguards designed to ensure that any transfer is sustainable in terms of future use. This includes contracts outlining future obligations and liabilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	A small saving in the grand scheme of things	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Old and underused council buildings should be sold, let or demolished and ground sold to the highest bidder	1. The respondent advised that they agree with the proposal.	Alternative uses for buildings are considered, subject to an appropriate business case being established. The council has an approved policy which deals with transfers of certain council assets to the Third Sector. The approved council policy contains a number of safeguards designed to ensure that any transfer is sustainable in terms of future use. This includes contracts outlining future obligations and liabilities. The council has a planned disposal programme for assets which are no longer required for service delivery and have been declared surplus to requirements.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Completely undeliverable unless the number of properties is significantly reduced (and the saving is not taken elsewhere) this means reducing the number of properties including schools as the current budgets are not sufficient to maintain what we currently have. The lack of investment over the last 5 years has resulted in the condition of the properties deteriorating as the budgets are spread thinner and thinner. Any savings on reactive maintenance creates additional costs as Officers have to spend more time dealing with issues, complaints and consequential damage.	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Reduction in inappropriate and superfluous council meetings might offer a smaller need for use of WLC property with a subsequent reduction in the need for service delivery support.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. This includes new opportunities arising from hybrid working.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	There should be more savings from the buildings being sold agree	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Yes, and switch all the lights off in Livingston civic centre!	1. The respondent advised that they agree with the proposal.	The council already motion sensors in the Civic Centre with lights switching off when there is no movement in areas of the building.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Again seems sound; not a lot of detail.	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Cannot argue with this but it should be a CI model and not part of any one of review	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Don't see any impact here so assume there won't be any loss and so sounds like a good idea on that basis.	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	continue this but at a lower level	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	As long as standards to fall	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Yes you need to Maintain building for the future	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	If services are maintained on a more efficient way, then fine.	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Fully support all efforts to rationalise the number of buildings and to manage buildings as efficiently as possible.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Efficient use and maintenance of council assets should be followed to maximise return of investment.	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	More buildings should be closed - every member of staff who can work from home should work from home. Greater savings are possible.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. This includes new opportunities arising from hybrid working. Dependent on role undertaken not all staff will be able to work from home on a full time basis.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	See comment about community centres / school swimming pools, how we can rationalise the number of excess buildings in West Lothian and have multi-purpose, multi-functional buildings, including schools?	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. The council will continue to rationalise offices and utilise the partnership centre model across West Lothian. This includes identifying opportunities for closer working with partners.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Sadly it is a fact of budget cuts	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Also fair assessment for savings here	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Sell off redundant / costly to run promises	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	A good programme of repair is vital to maintain properties but this needs to be effective, not sending staff out to do the same job that has previously been completed.	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Meagre amount	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. Disposal of assets that are no longer required generate a one off receipt but they also create recurring revenue savings in running costs. The council has delivered substantial savings through consolidating buildings. New buildings are also more efficient, delivering savings in day to day costs, particularly energy.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Agreed, but close monitoring of and meeting of performance targets must be done.	1. The respondent advised that they agree with the proposal.	The council continually reviews service provision using our Best Value Framework to ensure that we deliver value for the public and continue to achieve the expected levels of performance. There are rigorous internal scrutiny arrangements in place to assure the quality of our services and we are also subject to external audit and inspection.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Seems fair as long as vulnerable clients are looked after.	1. The respondent advised that they agree with the proposal.	Services are delivered locally where this is appropriate and delivers best value. We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. The council is focused on protecting local services and outcomes. Although assets can help in the delivery of services, it is not the priority, outcomes for local communities is.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	I agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Yep, good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Okay	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	totally agree - personally I have a council laptop and can use it in any of the buildings I manage. I appreciate the little time I have to work from home.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. This includes new opportunities arising from hybrid working.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	This seems sensible, particularly where staff can be supported to work from home	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. This includes new opportunities arising from hybrid working.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	I think that the council manage their property portfolio well and would trust in the CMT to make the right decisions.	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Share buildings	1. The respondent advised that they agree with the proposal.	The council will continue to rationalise offices and utilise the partnership centre model across West Lothian. This includes identifying opportunities for closer working with partners.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	disagree that there is less of a need for reactive maintenance work, this is not the way to look at assets long-term, routine maintenance is essential, otherwise just kicking problem into the grass for it to be more severe later in time	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Looks like no repairs to buildings that have been lacking repair for eons. This will cost more in the long run.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	The labour-Tory council coalition has some serious questions to answer if this goes ahead.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. The budget gap faced by the council is a result of funding being insufficient to cover the increasing cost of delivering services due to factors such as population growth and indexation.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Building will fall into disrepair by doing this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	My concern that this might be false economy and making savings in the short term will ultimately lead to an increased cost in the future.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings. The financial position means the focus has to be on core facilities needed for statutory provision.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Reducing maintenance work on council property is a false economy, it will only postpone the costs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Many council buildings are in poor condition and requiring more expensive repairs due to long term lack of reactive maintenance. This is poorly thought out	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Seems negligible in the scheme of things.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Disposal of assets that are no longer required generate a one off receipt but they also create recurring revenue savings in running costs. The council has delivered substantial savings through consolidating buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Annual maintenance and general repairs are already difficult to carry out. In buildings where damage is caused through vandalism, this should be referred to parents to highlight issues/costs. It currently stands as things will get repaired and there are not always consequences for actions of younger children, therefore this is repeated.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Maintenance is threadbare already, this policy will cost money in the long term.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	My concern would be that any reactive work, apart from H&S or legal requirements, are not maintained / completed / considered.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Unacceptable!!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No cuts	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Not a clue	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	I don't agree with this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Reduction in reactive maintainance of properties is a false economy.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Bah humbug!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Not happy with that	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Most reactive maintenance is outsourced , more expensive a not enough tradesmen/women ,that is not an accurate number	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure. The council must consider both internal and external provision to ensure best value. In some circumstances it may be better value to deliver through external provision.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Proactive rather than reactive is more often than not better.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Not convinced that this is possible as there is never enough budget to carry out necessary repairs as it is.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Prevention is better, usually cheaper than repairs later. (cure)	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Agreed however financial restrictions makes this difficult to deliver. The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	If this preventative work means less money is required over a period of time then this should be continued.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings. The council believes in proactive maintenance however reduced resources make it difficult to deliver this, seeing an increase in reactive maintenance.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	The office space I work would appear to have already started to cut costs, the female toilets do not work properly, you flush 1 toilet and the debris doesn't flush away to sewage but into the next toilet. The floors under desks would not appear to be hoovered in the 3 years I have worked here, the Covid cleansing seems to have disappeared completely with no sprays next to printers, shredders etc so as I say how can the environments health and hygiene be reduced further when I would say it doesn't exist? This is a building where we are expected to carry out hygiene standards but we have no council standards, double standards. As an employee I must adhere to procedures to keep myself, clients and team safe but my office space doesn't make me feels safe with hygiene standards.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Any concerns regarding administrative buildings, including maintenance and cleaning, should be raised with Property Services. They can be emailed at: propertymanagement@westlothian.gov.uk .
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Reactive maintenance tends to be required when things break down or reach the end of life. Unless this approach is reduce the need for reactive by replacing with enhanced proactive maintenance then it will fail. Safety related maintenance reactive or other must be completed on assets.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings. The council believes in proactive maintenance however reduced resources make it difficult to deliver this, seeing an increase in reactive maintenance.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Maintenance should not be cut down as it is a false saving. If this means you are increasing proactive work this is welcome. It should be in house workers that have a good on going knowledge of the buildings.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings. Availability of internal staff may mean external contractors may have to be used subject to best value considerations.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Not addressing maintenance of buildings is a false economy.; The Lanthorn being a prime example.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	disagree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Invest a bit more for a better job that would be last better	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	as above	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your response. Your comment has been noted.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Not exactly sure what assets are being supported?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Assets essential to service delivery, which demonstrate best value, will continue to be supported.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	FM jobs being cut.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Staffing structures will be appropriate to reflect remaining facilities following any consolidation.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	What does this mean? How are people to comment on such vague descriptions?	3. The respondent advised that they had no comment to make or posed a question of the measure.	This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Very vague, how can we comment?	3. The respondent advised that they had no comment to make or posed a question of the measure.	This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	This doesn't say what approach will be used.... Probably more staff cuts!	3. The respondent advised that they had no comment to make or posed a question of the measure.	This measure identified that further savings options will have to be identified. Once officers have developed options, including consideration of feedback from this consultation, a further phase of consultation on additional potential savings options will be undertaken. This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Do not live in council property no comments	3. The respondent advised that they had no comment to make or posed a question of the measure.	This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	The information being given to be commented on is so vague it makes it impossible to answer and in some cases understand and therefore I have been unable to give Frank response	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Are all new council buildings, including new schools such as East Calder PS necessary?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Most new schools are fully funded by developer contributions to support local development. Other investment is only made where it is deemed essential due to the condition and health and safety aspects of the old building.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No comment.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No comments	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	no comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	???	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	no comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	N/a	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No comments	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	I'm not in a position to comment fully on this	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No comment.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	This is very depressing	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No comment.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No comments	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No comments	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Need to see the impact of reductions reactive maintenance, does this then increase planned maintenance costs? Is the aim to maintain properties at the same standard or leave to deteriorate to a specific level.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	no comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	N/A	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No Comments	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	no comments	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	no comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No comments	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No Comment.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No comment.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Unknown	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	NA	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	no views on this.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	NC	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Need more info	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Unsure	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	None	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No comment.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Unable to comment again due to lack of available information.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	no comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	n/a	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Very difficult to comment without more detail	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	I can't see any point in continuing this survey as it is a waste of all our time without the information, we need to give an informed opinion.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	There's no mention of what will be cut here?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	How? Not at all clear.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	no comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	I am unable to provide further input as the level of detail within the estimated saving briefing doesn't allow me too.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	See 4D above regarding facilities in country parks	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	I'm not sure what is meant by this? Stopping the 10yr programme? If so, that may be a false economy? The NHS adopted this approach years ago and while it may have worked short-term, it certainly did not in the long term in my experience.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	I don't have a view on this	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council continually reviews service provision using our Best Value Framework to ensure that we deliver value for the public and continue to achieve the expected levels of performance. There are rigorous internal scrutiny arrangements in place to assure the quality of our services and we are also subject to external audit and inspection.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Not sure how this works	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	There is nothing here that allows me to comment, it's just a statement and a number. Just make the saving, don't ask the public if you're not describing a change in public service or presenting any pros and cons.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	I do not have an adequate knowledge of these functional areas to comment on this.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Must increase working from home if possible. May also reduce the need for lower/ middle management as they won't have anything to do!	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council will continue to review processes, procedures and methods of service delivery to support improvement and efficiency in services whilst delivering on commitments.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	If it already has this, what's going to change to generate the saving?	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Again a few examples would be great.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings. This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	More details would be necessary to be able to give relevant comments.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	How does this save money if you are already doing it?	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council has delivered substantial savings through consolidating buildings. The scale of the financial challenge means that the council will have to save more as it does not have the capital and revenue resources to maintain the current number of buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	And a further vague proposal. I hope these mean something to someone.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	As a resident I do not understand what this will mean to the services I receive due to the vague and broad terms used in this consultation document.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	As a resident I do not understand what this will mean to the services I receive due to the vague and broad terms used in this consultation document.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	I have no idea what this ten-year programme is so unable to comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	As long as it reduces the need for reactive work. Will that be measured?	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings. Reduced funding will likely mean increased reactive work.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	This sounds like a problem about to take off; Surely you need to maintain your properties	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Undecided	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	undecided	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	More hybrid working is essential	4. The council is already doing this.	The council will continue to review processes, procedures and methods of service delivery to support improvement and efficiency in services whilst delivering on commitments.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Actually schedule a rolling programme of works that would be required for appropriate properties. From my experience, works are almost always reactive, becoming more so this year particularly. More careful consideration of any project from the beginning, consider longterm project including all aspects of the project to work in synergy- from compliance (all aspects electrical, gas, asbestos, energy efficiency, fire etc...) Even just compile a rolling programme of works for all aspects	4. The council is already doing this.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	The only council property which is maintained and managed is the Civic Centre.	4. The council is already doing this.	The council maintains all operational buildings within the parameters of constrained revenue and capital funding.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Better controls and understanding with staff and contracts to 3rd parties, that doesn't always provide value for money.	4. The council is already doing this.	The council's best value framework determines whether services should be delivered internally or outsourced. The majority of council services are delivered in-house.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Keep as much work inhouse as possible and eliminate/reduce works being put out to sub contractors.	4. The council is already doing this.	The council's best value framework determines whether services should be delivered internally or outsourced. The majority of council services are delivered in-house.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Encourage employment and purchase property	4. The council is already doing this.	The council supports employment in various areas (Economic Development, Anti-Poverty Service, Education, Social Policy etc).
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Being pro-active in maintenance works is a basic necessity when managing buildings, as any homeowner? Fix potential issued before they become real life issues.	4. The council is already doing this.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Repairing properties when they become old or damaged is essential.	4. The council is already doing this.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Assets, surely, need to be maintained to remain as assets and not become liabilities.	4. The council is already doing this.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Partnership buildings bringing services together seems good idea	4. The council is already doing this.	Council will continue to utilise the partnership centre model in which there will be shared services and facilities, including those delivered by partners.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	If something is important, it would need to be fixed as soon as possible	4. The council is already doing this.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Should still fix problems	4. The council is already doing this.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	If council buildings are not being used then sell them off and use monies elsewhere.	4. The council is already doing this.	The council has a planned disposal programme for assets which are no longer required for service delivery and have been declared surplus to requirements. Receipts from sale of land can only be invested in assets and cannot be used for revenue service delivery.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	You do not invest in Linlithgow.	4. The council is already doing this.	There is investment in every ward in the council's revenue and capital budgets. Specific funds or grant are subject to specific requirements. The council will explore ways of delivering services and community activities in local areas.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	The whole council service needs an independent review and overhaul	4. The council is already doing this.	As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities. The council continually reviews service provision using our Best Value Framework to ensure that we deliver value for the public and continue to achieve the expected levels of performance. There are rigorous internal scrutiny arrangements in place to assure the quality of our services and we are also subject to external audit and inspection.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Long term plans are fine as long as you stick to them but at the same time constant review is needed so you don't ignore glaring omissions from creation.	4. The council is already doing this.	The council's aim is, and always will be, to ensure that West Lothian continues to be a great place to live, work, visit and do business. To achieve this aim we will continue to prioritise the money that we spend on services to make sure that our investment has the biggest and most positive impact on the community. As validated by external auditors and other inspection bodies, West Lothian Council continues to perform well against key performance indicators and activities. This will continue to be monitored and reviewed.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Makes sense to keep buildings up to date. Solar panels, green roofs, recycled water for toilets etc should be taken into account for new properties which hasn't been happening. Would reduce costs for electric for the buildings as well as for the future of charging electric Council vehicles. Initial costs would be more but should give long term savings.	4. The council is already doing this.	The Sustainable Construction Policy helps to ensure new builds and refurbishments are as energy efficient as possible. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Council properties should be well insulated and have solar panels if possible as this would reduce utility bills	4. The council is already doing this.	This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses. The council has a programme of installing solar panels on council houses.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	We need to look at value for money within some services	4. The council is already doing this.	The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Not sure why the council does not put out to tender any works req hired rather than maintaining properties themselves.	4. The council is already doing this.	The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure. The council has external facilities management arrangements (where best value has been demonstrated) in a number of operational buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Modernisation of houses is desperately need	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Important that legislative changes are factored for e.g. energy upgrades.	4. The council is already doing this.	The Sustainable Construction Policy helps to ensure new builds and refurbishments are as energy efficient as possible.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Keeping up to date with maintenance to WLC properties is important as we are protecting our assets.	4. The council is already doing this.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings. The council is focused on protecting local services and outcomes. Although assets can help in the delivery of services, it is not the priority, outcomes for local communities is.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Is this programme accessible to the public. Is there a list of Council owned properties....are they available on line. It is difficult to make comments on proposals with the minuscule amount of information you provide in your statements. Again, another way of avoiding awkward questionsor am I being a little cynical 😊	4. The council is already doing this.	This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Keep on top of repairs when they occur so the cost doesn't multiply.; Reduce the number of 'janitors' or whatever they are called in one building, eg Strathbrock has 2 on at any one time, why?	4. The council is already doing this.	The council is already considering streamlining and efficiencies in building operations. The council believes in proactive maintenance however reduced resources make it difficult to deliver this, seeing an increase in reactive maintenance.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Schools should be prioritised. Falla Hill must be the oldest school building in West Lothian with a gym hall that is significantly smaller than all other schools, inadequate external disabled access and asbestos in the carpets and roof.	4. The council is already doing this.	The council prioritises its constrained revenue and capital budgets in schools. Overall West Lothian is rated as having one of the best school estates in Scotland. The council provides accessible schools, however the nature of some of the older schools means that costs are prohibitive. All new schools meet this requirement. There are accessible schools in every council ward.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	These properties need maintained to be fit for purpose	4. The council is already doing this.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Stop building things will flat roofs; Schools neglected for the past 10 years with hardly any maintenance upkept	4. The council is already doing this.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings. Overall West Lothian is rated as having one of the best school estates in Scotland.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Increase footfall.	4. The council is already doing this.	By reviewing and consolidating buildings, the council will be able to increase footfall in the remaining buildings. Previous efforts to increase footfall across the whole estate has not generated any noticeable increase. The council is focused on protecting local services and outcomes. Although assets can help in the delivery of services, it is not the priority, outcomes for local communities is.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	fix things right the first time .	4. The council is already doing this.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Cut the amount of time you give employees to maintain!!	4. The council is already doing this.	The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure. The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Have regular maintenance of facilities.	4. The council is already doing this.	The council is already doing this within the constraints of reduced capital and revenue funding. The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	need to maintain what we keep	4. The council is already doing this.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Honestly you all need to stop being reactive and be proactive it's why there is a school closed right now due to something that could have been changed.	4. The council is already doing this.	The council believes in proactive maintenance however reduced resources make it difficult to deliver this, seeing an increase in reactive maintenance. For high risk items, such as reinforced aerated concrete roofs, the council proactively manages areas of concern. The nature of some items, in particular RAAC roofs, means that deterioration can occur at short notice. This proves the importance of the council's monitoring and surveillance programmes in these areas.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	fixed right first time it could prevent future breaks	4. The council is already doing this.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	I'm sure if local communities could count the number of empty, or underutilised, properties owned by the Council the potential savings would be well in excess of those offered up by officers. In Linlithgow, the LowPort and the old WLL HQ in the High Street are long running sores, haemorrhaging cash, whilst some unsustainable community purchase model is pursued at a languid pace. I'm convinced more savings could be accumulated and more quickly across West Lothian than this.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The council is required to follow a process determined by the Scottish Government in relation to community asset transfer requests. The council has to follow this process by law however it does mean that sometimes it causes delay in relation to surplus properties.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Keep all provision of services in house and not dumped with the highest bidder to make a profit	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure. The council must consider both internal and external provision to ensure best value. In some circumstances it may be better value to deliver through external provision.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Sell council property and lease back where relevant. All historic buildings should be handed to HES or National Trust.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Experience in other authorities has shown that this costs more in revenue and increases the budget gap due to the need to rent facilities. Any income raised can only be invested in assets and cannot be used for revenue service delivery. This would result in a bigger revenue gap than outlined in the consultation.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Just knock down old buildings and start again	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	if we dumped the Civic Centre i suspect the maintenance bill would see the benefit.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	The creation of the Civic Centre generated substantial savings for the council through the consolidation of inefficient and older buildings into one location.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Need to sell older buildings and build newer ones	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	I feel by using your budgets for Council office refurbishments etc is not a viable option when our roads and public grounds areas are already still a bit of a mess.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	The council's property asset management strategy and capital programme seek to identify planned maintenance to assets, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain assets required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise assets.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Please replace the windows in St David House, Bathgate as they are causing the woodwork that surrounds them to fall apart as they are in that bad of a condition. Also by replacing the windows and upgrading the heating system you will make saving on the heating bill.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. This includes new opportunities arising from hybrid working.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	It would be helpful if all council assets were included in this programme and those that currently don't have a maintenance schedule are added.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	I think this area of work should continue.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	If you don't maintain them they will deteriorate. False saving.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Assets are everything!! These need to be kept a priority.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The council is focused on protecting local services and outcomes. Although assets can help in the delivery of services, it is not the priority, outcomes for local communities is.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Assets are everything, I know some councils have sold many of their assets which I believe to have been wrong. Investing in assets should continue, hopeful things will improve and we will remain in a good position.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The council is focused on protecting local services and outcomes. Although assets can help in the delivery of services, it is not the priority, outcomes for local communities is.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Assets are what the council is all about without assets they have nothing priority should be assets. Good housing, offices and Shops workshops for businesses to keep Our communities.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The council is focused on protecting local services and outcomes. Although assets can help in the delivery of services, it is not the priority, outcomes for local communities is.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	close the swimming pools in schools as these cant be cost effective or run the facilities as a proper business not with excite but with school staff who want the schools to succeed make money rather than keeping excite afloat	5d. It is proposed that this suggestion is not taken forward because it has been previously considered and will not be progressed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Could the use of more Day Release prisoners to do maintenance work be considered? Real community payback and helps build their CV up for rehabilitation into the community?	5d. It is proposed that this suggestion is not taken forward because it has been previously considered and will not be progressed.	This has previously been investigated, however it is not possible to use this approach. The work of the council is not assessed as appropriate for this type of work.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	You leave too many empty places and lose out on incone why not offer your services to the wider of ppl who can rely on a genuine tradesman at a cost to non council tenants especially for elderly and vunerable ppl	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council currently generates income from providing a range of services to partners and organisations. Further opportunities to expand this could be investigated.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	The Capital programme is a great model that other councils don't seem to have. However, the 10-year programme does also fix problems and pay for emergency works as there's so little revenue budget left. Reducing the Capital budget further will no doubt result in more infrastructure issues. However, more work could be done in the area between planning and implementing land management measures, in order to increase the effectiveness of WLC land management operations.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Prevention is always better than cure.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Again winchburgh older properties need maintained better.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Parks & Woodland facilities especially the public Visitor Centres and caravan & camping site buildings do not get the high standard of long-term maintenance they require. Despite requests for example, the Beecraigs Visitor Centre sits awaiting a repaint, repair to rotten window frames, etc. and other buildings sit abandoned with no plan to bring them back into use (eg fishing lodge and fish farm site).	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings. The financial position means the focus has to be on core facilities needed for statutory provision.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	There is a building which is part of Armadale primary which has lain empty for years. It is beginning to fall down and is a danger to anyone looking to get inside. Why not sell this. It could be redeveloped into houses whilst saving the appearance of the building.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. The council has a planned disposal programme for assets which are no longer required for service delivery and have been declared surplus to requirements.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Again metrics in trial data must show this approach works first	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	the council should consider closing its buildings over the festive period if it is to remain open and amalgamate all staff within one building as often these partnership buildings are open and empty.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	This is a good idea. Although some council facilities need to remain open for service delivery and cover, opportunities to consolidate cover into fewer buildings over the festive period will be considered.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Further embracing of home working (no minimum number of days in the office) to reduce number of properties further	6. The respondent suggested an improvement. Officers will consider how this could be developed.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. This includes new opportunities arising from hybrid working. Operational requirements determine the number of days required for office working.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	How about simply switching off all the lights at night...some buildings are lit up, year round, like christmas trees even when the buildings are closed and external gates are secured.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	The council cannot afford to keep all of the buildings it has. This has to happen (not just for savings) but also to stop out of control costs arising from inflation/energy crisis. Individuals and families have to make tough decisions, so does the council. We need to close some of our expensive swimming pools. The council has far too many and they are huge energy consumers.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Use the council buildings for other council activities to utilise the buildings, private events on weekends in communal area or parking. Sunday markets, community events for more fund raising.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Community groups and individuals can rent council facilities, however opportunities to market this wider can be explored.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	More savings could possibly be made by reducing the amount of lights and heating left on in schools and council buildings overnight and at weekends.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has energy audits across all buildings to identify energy saving opportunities in each building.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	More people are going to need council property with the current climate	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Ordinary tax payers can't invest in their assets for paying exorbitant tax rates	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	West Lothian Council's council tax is currently less than the Scottish average. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Noted. There are many repairs that should be re-charged to the tenant and they are not. WLC could perhaps take a more firm line to recover these malicious damages and further savings could be made. WLC tenants are also refusing Planned Maintenance work which seems to be accepted by WLC. Can WLC not insist the works are done in order to keep the property in line with Scottish Housing Quality Standard?	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	The council should be doing more for there tenents I can't remember the last time we had the kitchens done up by the council	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	You have got to be joking. Housing stock is in ruin in west lothian. Villages in fauldhouse for example...render hanging off. Poor windows and doors. Damp housing due to appalling gutters.; You cannot seriously consider cutting back here.from my experience of friends who live in council housing ,their homes need dragging into this century. Disgraceful	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Those who are capable should be met with options to do maintenance for themselves however those with extra support needs, at risk persons, those with children, extreme poverty, personal independence payment benefits, mental health or physical incapacity should have the most support in ensuring their property is maintained. They should also be held responsible for ensuring the upkeep so support in terms of an education provision to those most in need and incapable of looking after themselves or their homes should be priority in this instance.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Baffled to read this... I know of buildings that haven't been touched in decades; and when there is any 'sign of life' more harm than good occurs... you also have too many contacts using dodgy contractors charging for work and equipment hire that isn't done! - Backhanders, cronyism, WLC is 'shady as'!	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure. The council must consider both internal and external provision to ensure best value. In some circumstances it may be better value to deliver through external provision.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Most tenants will maintain their properties. I would move towards a reactive program, but ensure careless tenants pay a penalty.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Sounds good in theory. As a private home owner, I would not change my kitchen, bathroom, doors windows etc every 10 years???	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Not sure what is meant by this. Is it housing stock? If so, some council properties are not properly maintained anyway and those who can afford to are paying for their own upgrades. Work that is carried out is to such a poor standard by the "tradesmen" that the work needs rectified later so efficiencies should include either decent workmen or inspections being carried out	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Does this include the number of council housing lying empty for months on end whilst tenants are living in unsuitable properties or in hotels	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	the reactive support doesnt work for pepole in really old houses of disrepair. the housing application process , engagement and support for people who needs this is none existant.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Stop wasting money building factories never used.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	West Lothian Council has not build any new factories. New factories across the county are privately owned and constructed.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	no idea what this means/is referring to	9. The respondent made a comment on the survey question.	This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Again. I am unsure what this means. Finding a lot of the questions difficult to answer due to how they are worded and finding my ability to properly add my opinions to this questionnaire hampered as a result.	9. The respondent made a comment on the survey question.	This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	So; Maintenance is an inevitable consequence of Capital spending.	9. The respondent made a comment on the survey question.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Need more detail to provide a considered comment	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No idea what you mean here	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Too vague to comment on.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No details. Hard to judge.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	No comment as don't understand detail	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	I do not see where savings are coming from with this proposal.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	I don't know what this actually means in practice so I can't comment	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Gobbledegook! Word salad. What does any of that mean?	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Not enough detail	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	dont really know what this mean	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	The format of this survey is poor and does not lend itself to true scrutiny of the proposals. The survey is badly designed and off putting to many given the large blurb of text under each heading - the language is in business speak which is essentially meaningless. There is a lack of clarity on the proposals and the reader is left to assume what the blurb is getting at. This survey should have been in plain English with examples of the proposals which would support greater engagement with the activity. There should be space for feedback on the methodology being used also - this has not been made available which adds to suspicion that the whole process is already decided, and course of action is already determined. The council and COSLA must do more to protect our communities and demand a fair settlement from the Scottish Government. This exercise highlights the political failure of the funding model and it will be the local community that suffers as a result. The end of the survey does not have a 'Finish' button, merely a 'Next'. Overall - very poor approach.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	Not sure what this actually means!!!	9. The respondent made a comment on the survey question.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	The lack of real facts and figures about what is going to change makes it a challenge to comment effectively. More information is required before any meaningful consultation can take place. We should be provided with a statement for each section and the option to agree, disagree or have no opinion. I would strongly urge the council to re-present this consultation in a more user friendly format.	9. The respondent made a comment on the survey question.	Thank you for your comment about the survey, the council will carefully consider all feedback and use it to review and improve our consultation approach.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	What does this actually equate to? Very vague.	9. The respondent made a comment on the survey question.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	This proposal is opaque, Do you mean the plan is to actively not maintain assets?	9. The respondent made a comment on the survey question.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4F Efficiencies from improved use and management of council properties	It is unclear how this differs from the current arrangement	9. The respondent made a comment on the survey question.	Given the further pressures on revenue and capital budgets, the council will have to deliver further efficiencies in property assets as the council cannot afford to keep all the buildings it currently has.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Hard to comment on when there are no details on how energy consumption is being reduced. There are a lot of old buildings where lights are left on as they are not on timers or sockets plugged in that are not required. Some of these may be combated by re-educating and enforcing the message however as there are no automatic cut-offs it is difficult; ; Meetings between offices should now be electronic to save mileage, time and pollution. The pandemic meant that meetings were scheduled online and to go back to meetings face to face between different buildings would be a step back	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No details as to how, work from home can reduce building needs.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Good. But needs investment, not free.	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable. All approved projects have estimated payback periods substantially shorter than the lifetime of the equipment and produce revenue savings for the council.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Worth investing in solar for appropriate properties? Or installation of wind turbine(s) at property to increase energy efficiency / offset energy costs? Investment in lagging for boiler rooms / heating pipework or for the property as a whole (ie. insulation above suspended ceilings, cavity walls etc...?)	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable. All approved projects have estimated payback periods substantially shorter than the lifetime of the equipment and produce revenue savings for the council.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Sounds good but no detail so who knows.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	This is a good shout, surly staff working at home is helping you with this.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	saving on energy usage need to be planned over a long term basis and ensure no higher costs in earlier years that just compound the issues	1. The respondent advised that they agree with the proposal.	The council's Climate Change Strategy outlines actions in the council's journey to net zero. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Add solar power to the maximum possible in all council property.; Enforce strict limits on heating temperature.	1. The respondent advised that they agree with the proposal.	The council's Climate Change Strategy outlines actions in the council's journey to net zero. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	All new builds and council buildings should have solar panels and sustainable power.	1. The respondent advised that they agree with the proposal.	The council's Climate Change Strategy outlines actions in the council's journey to net zero. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Great job 👍	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	This should be a big focus, and enabling people to work from home will have a big impact.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	As to be expected during an energy crisis!!!; ; This isn't a succes, it's a bare minimum for all people on Scotland because of the lack of forward planning in renewables. This should have been done 20 years ago!!!	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Happy with renewable energy consumption	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Lights off in and around council buildings and schools when noone is using them.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council already has motion sensors in place in number of locations and will introduce on an ongoing basis where there is a business case to do so.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Good news	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Okay. No way to judge claim, though.	1. The respondent advised that they agree with the proposal.	The council's Climate Change Strategy outlines actions in the council's journey to net zero.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Yes - this sounds good!	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	We all need to reduce energy costs as long as service users suffer.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	This is imperative.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Good.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Good idea, and necessary for more than just financial reasons	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Possible.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Use more wind water solar in all council buuldings yes	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I would fully support this measure and encourage the council to go further with its energy efficiency ambitions.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	This is a good plan.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Need saving more	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Yes, please	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Not sure if this is the best section to say I have been in a number of council buildings where the heating can not be changed in summer months the heat from the heating system is so high . Staff saying they have to open windows as they can not turn heating down. Does not make any sense why should we be paying to have heating on in the summer ? Also many schools council buildings seem to have lights on in corridors when buildings are closed.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Insulation of buildings is generally poor in uk. Statistics show this as the best ecological investment	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy and insulation solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I approve of energy efficiency by getting blow poer units installed.	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	After reading the above, I will continue to trust your decisions in the areas I have no experience in , but thank you for the opportunity to co-operate !	1. The respondent advised that they agree with the proposal.	This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Surely in this time of energy price rises, a spend to save initiative to install solar panels on roofs on schools and other council buildings would be hugely successful and beneficial.	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Consideration of improved use of council buildings through continuation of homeworking and hybrid working models could add to energy savings by rationalising building use.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. This includes new opportunities arising from hybrid working.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Sounds excellent. I would suggest turning down the heating levels in schools to help as well.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Positive. No argument about the potential benefits arising from this proposal	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I feel extremely passionate about saving energy and we all have a responsibility to ensure that this happens. It will mean that we will save money in the long run and that measures to increase efficiency is the best way forward, for businesses and people's homes.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Yes - renewable energy projects are essential for jobs, sustainability and reducing energy crises like we're in now. Invest in this	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	would be good to consider incorporating solar energy panels or other renewable energy resources in all new (and exisiting) council building, particularly schools	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Sort out school heating, open windows and super hot classrooms need work	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Further savings could perhaps be made by reducing the excessive lighting at some buildings both inside and out during the night. Deans Community High School for example has lights blazing all night and many corridor lights stay on all day and night.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council already has motion sensors in place in number of locations and will introduce on an ongoing basis where there is a business case to do so.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	This sounds fantastic good but will it really be energy efficient! No real details as to what products will be used	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	If this constitutes genuine investment in energy efficiency and renewable energy, then I would support this proposal.	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Turning off heating in primary schools could help finances. Our heating is often on in summer. Waste of money.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I would have thought that significantly larger savings could be achieved here. Please revisit	1. The respondent advised that they agree with the proposal.	The council has an energy reduction work plan and is committed to exploring opportunities for reducing the energy bill through the use of renewable energy solutions, improved energy efficiency of buildings and equipment and changing the behaviour of users in council buildings. The council has already delivered considerable savings through energy efficiency.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	More can and should be done in this area,	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Reducing carbon emissions 100%	1. The respondent advised that they agree with the proposal.	The council's Climate Change Strategy outlines actions in the council's journey to net zero.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Easy choice again and makes sense	1. The respondent advised that they agree with the proposal.	The council's Climate Change Strategy outlines actions in the council's journey to net zero.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Good proposal.	1. The respondent advised that they agree with the proposal.	The council's Climate Change Strategy outlines actions in the council's journey to net zero.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Well, fine. But whats the point of doing that when your other proposed measures are increasing carbon emissions, such as removing support for public and school transport?	1. The respondent advised that they agree with the proposal.	Other proposed measures in relation to transport would have a positive impact on carbon emissions. Currently under utilised bus services see large emissions for small number of passengers.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	agree- should be priority in line with sustainability and climate change agendas.	1. The respondent advised that they agree with the proposal.	The council's Climate Change Strategy outlines actions in the council's journey to net zero.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Net zero should be the focus of us all where possible.	1. The respondent advised that they agree with the proposal.	The council's Climate Change Strategy outlines actions in the council's journey to net zero.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Essential.	1. The respondent advised that they agree with the proposal.	The council's Climate Change Strategy outlines actions in the council's journey to net zero.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Anything to reduce carbon is important.	1. The respondent advised that they agree with the proposal.	The council's Climate Change Strategy outlines actions in the council's journey to net zero.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	This is a good cost saving and green policy	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree with this but £245,000 does not sound like we are greatly reducing energy consumption if the council is meant to be working towards net zero carbon emissions.	1. The respondent advised that they agree with the proposal.	The council has an energy reduction work plan and is committed to exploring opportunities for reducing the energy bill through the use of renewable energy solutions, improved energy efficiency of buildings and equipment and changing the behaviour of users in council buildings. The council has already delivered considerable savings through energy efficiency.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Reducing carbon emissions will have a positive impact on our local environment.	1. The respondent advised that they agree with the proposal.	The council's Climate Change Strategy outlines actions in the council's journey to net zero.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	More electric charging sockets at council buildings and turn off lights at night in council buildings	1. The respondent advised that they agree with the proposal.	The council already has motion sensors in place in number of locations and will introduce on an ongoing basis where there is a business case to do so.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Everyone should be reducing their energy & this would fir with rationalising buildings.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. This includes new opportunities arising from hybrid working. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Again, allowing staff to work from home gives them a better carbon footprint, and will reduce the cost of energy to the council. I would like to see more focus or solar energy, not seeing enough buildings/homes with solar panels.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. This includes new opportunities arising from hybrid working. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Would be a good thing. People should have solar panels. Have wind turbines in gardens.	1. The respondent advised that they agree with the proposal.	The council will continue to reduce energy consumption and related costs through new energy efficiency and renewable energy projects.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Absolutely goes without saying!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	This is good for the environment and the saving is an added bonus	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I would just like to comment that I don't envy the Council having to make these cuts and they will not be popular. It would be worse if Scotland was Independent!!! I cannot believe the state of the country just now under Scottish Government. If they would concentrate on the day job!!! I am very depressed with this consultation. If cuts are needed then so be it. IO know WLC are looking aheads but what a mess!!!!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Makes sense	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Strongly support as also results in carbon reduction	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Would have thought this was a given.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	This makes sense.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Excellent	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Could be a good thing.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Great news.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	agreedc	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Sounds like a reasonable approach.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agreed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Good idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Should be doing this as part of business as usual. However, I think this should be more ambitious. Does this include energy generation on a large scale, including community generated/owned power etc?	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Go for it	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Why not we are all adopting this at home	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Investing in greener energy and introducing to automatically shut down lights, any electronic non emergency equipment etc tht sits on standby will save mney in the long run.	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable. The council already has motion sensors in place in number of locations and will introduce on an ongoing basis where there is a business case to do so.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Great and much more off this i.e. use solar and air source heating etc top get off the grid and save masses in utility bills	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Need to reduce more and make greater savings	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Great idea - get solar panels on every council building and council house. Get wind turbines on the Civic Centre and put some signs up in the lifts asking people to use calories not electricity to get to the next floor.	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable. We undertake extensive behaviour change programmes including focusing on the energy efficient operation of sites in our highest consuming buildings.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	As part of refurbishment, consider putting in place solar panels and local wind turbines as is seen in e.g. Germany. This will reduce running costs and can be phased in while meeting Climate targets.	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Very good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	ok, I support this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agreed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Sounds good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Good idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Makes sense	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Excellent	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I agree with your proposals.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Yes - more of this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Support this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	good.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	If it is essential	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agreed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Good Idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Great	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	OK	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Supportive of this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Very happy with this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Again should happen anyway/ go for it!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Excellent	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Excellent!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I am in agreement with this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Perfect	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Sounds made up but good.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Renewable energy projects should be developed.	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Seems like a positive way to reduce funds over time and is also better for the environment. Positive project, electric buses for school? How will this save money (short term). More efficient heating/lights/insulation	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I think this does need to be done, I also think you should adopt a method that would recycle food and garden waste into fertiliser and gases that could then be resold to farming/gardening and gases to be used as an renewable energy source (like biogen, Edinburgh)	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Have fewer council buildings but invest in energy efficient measures such as solar panels and better insulation to reduce building running costs.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Helping the environment is important and if we can do that and save money - that is great	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	solar panels	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Wind turbines,	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I fully support this but am not convinced that, done properly, it can save money in the short term - it needs investment to save.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Again should be being done regularly	1. The respondent advised that they agree with the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Hopefully be able to be rolled out across more properties and landholdings	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I would strongly suspect you can save a great deal more through a cohesive and vigorous approach to this. It is to be applauded.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable. The council has an energy reduction work plan and is committed to exploring opportunities for reducing the energy bill through the use of renewable energy solutions, improved energy efficiency of buildings and equipment and changing the behaviour of users in council buildings. The council has already delivered considerable savings through energy efficiency.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Wind turbines.	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	This should be an imperative due to the climate crisis	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Any successes should be shared	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable. The size of the anticipated budget gap, and with a large proportion of it relating to energy costs, means savings in this area help to offset increased energy costs.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Would be interesting to see what these are	1. The respondent advised that they agree with the proposal.	This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further. The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	It would be good to know what these are.	1. The respondent advised that they agree with the proposal.	This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further. The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	It's a big initial cost to move to more energy efficient methods but there isn't an option really & the savings will come	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	We seriously need to look at savings, I was in a Council building and the heat was outrageous! Come on	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree this is important for current costs but especially for the environment.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Great. Do more. Aim for net zero emissions by a target date. Soon.	1. The respondent advised that they agree with the proposal.	The council's Climate Change Strategy outlines actions in the council's journey to net zero.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Here too there is the want of detail. 'Energy efficiency and renewable energy projects'. I am reminded that trying to get the basics right must come first; if it can all be achieved to provide efficient clean energy all good and well.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	All initiatives for reducing energy consumption and use of renewable should be encouraged.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	More solar panels on south facing roofs, including for heating the swimming pools.	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Good for the environment and the budget.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	This should always be the case. We MUST reduce carbon emissions.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Renewable energy needs to be utilised more!	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	This sounds effective and appropriate with climate change action.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Considering the environment is vital and money should not be diverted from finding ways to become more energy efficient	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Sound good, but how?!	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	If services are maintained on a more efficient way, then fine.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree. Many council partnership buildings far too hot. Wasteful	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Makes sense. Minimizing energy consumption but also looking at both energy generation and energy storage. Looking at biomethane at water processing plants , wind&solar&battery storage on all public buildings. Mandate large open car parks should have % solar shelters. All of this micro generation capacity soon adds up if it's working together. Appreciate energy is a UK level policy but someone or a collective needs to have the governments right now that Scotland where we have significant renewable capacity is paying ridiculously high prices for energy when we only have 1 gas fired power station and 1 nuclear powerstations.	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable. The council previously considered solar shelters but income generation levels meant it was not a viable option given the investment level required to install them.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	The council has declared a climate change emergency and it is vital that this is backed by actual action, even where this may be challenging.	1. The respondent advised that they agree with the proposal.	The council's Climate Change Strategy outlines actions in the council's journey to net zero. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Strongly support measures that will reduce energy and fuel consumption. It would be great to see solar panels on community centres and offices.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Could be great. But at the same time you're proposing to cut school transport and revise public transport so surely that would mean more carbon emissions?	1. The respondent advised that they agree with the proposal.	The current operation of public transport results in high carbon costs per passenger with many buses running with very few passengers. It is hoped that changes in delivery of transport services will improve carbon emissions.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	We also need assistance to create local Net Zero plans for each locality to give us focus and steer, as well as hope and a template for a sustainable future for our children.	1. The respondent advised that they agree with the proposal.	The council's Climate Change Strategy outlines actions in the council's journey to net zero. There is an action plan to ensure the council makes progress in reducing carbon emissions and there has been good progress to date, with performance targets being exceeded.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	This should be a core consideration in building management and new build commissioning.	1. The respondent advised that they agree with the proposal.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Hopefully will help meet climate change targets and ensure sustainability for the future	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Reducing carbon emissions should continue	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	This should be a priority	1. The respondent advised that they agree with the proposal.	The council's Climate Change Strategy outlines actions in the council's journey to net zero.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	WLC signed the net zero pledge, I would expect it to be doing a lot more, including the provision of electric charging points.	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Turn the heating down in ALL the offices ALL times of year.... Employees wear jumpers if they're cold!!	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. We undertake extensive behaviour change programmes including focusing on the energy efficient operation of sites in our highest consuming buildings.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Installing renewable energy on existing buildings to reduce costs such as solar	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	agreed, private finance could be sued to fund Solar, ASP and EV charging points	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable. Private financing still results in a cost of borrowing for the council that must be funded unless external grant funding is secured.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Should be doing this. Saving though seems hypothetical.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Solar and wind turbine on estates. Shared local power generation.	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable. The council has a programme of installing solar panels on council houses.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Fully support	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	If the council invested the proposed saving in solar energy farms (or other renewable energy harvesting/production) on the roofs of schools and council buildings, in council parking, we would all see much more benefits both financial and in lower carbon emissions	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I mean with the costs how could you not but how do you plan on doing this	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Also fair assessment for savings here	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	2. More focus on green energy	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	These need to be affordable and sustainable or they will fail	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable. All approved projects have estimated payback periods substantially shorter than the lifetime of the equipment and produce revenue savings for the council.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	All new initiatives for improving energy consumption should be welcomed.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Cutting the office spaces, increasing technology and effective working will all cut the need to use energy.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. This includes new opportunities arising from hybrid working.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Welcome if insulation and other energy saving measures are deployed.	1. The respondent advised that they agree with the proposal.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	How much is it costing to achieve this? Curb emissions at the top then we can continue this process down the line	1. The respondent advised that they agree with the proposal.	The council's Climate Change Strategy outlines actions in the council's journey to net zero. The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Renewal energy is strongly recommended at cheaper rates	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Renewable is a great idea	1. The respondent advised that they agree with the proposal.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	This is down to individuals doing their bit.	1. The respondent advised that they agree with the proposal.	Everyone and every organisation has a contribution to make to reducing carbon emissions. The council's Climate Change Strategy outlines actions in the council's journey to net zero.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Do more of this!!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Definitely Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Good continue to reduce emissions.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	good idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Could office lights be reduced? In the civic can the motion lights be turned off and changed to pod or small sections on switch? I often find them to bright and often walk past an empty pod and they turn on unnecessarily.	1. The respondent advised that they agree with the proposal.	Individuals can request changes to lighting arrangements at their pods in the Civic Centre (e.g. removal of some strips). Please ask Property Services for assistance. The Civic Centre has light sensors which switch off after a short period of inactivity. It is not possible to relocate the sensors.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Does this make all council vehicles idle proof? Then staff would not be able to sit in them with the engines running, while staff use their mobile phones (whether work related or not) have a crafty fag with the vehicle's windows open, have the heaters on for the ir feet awhile ventilating the rest of the vehicles to let the stale smoke-filled air out the cabs.	1. The respondent advised that they agree with the proposal.	Smoking in council vans is prohibited. Where this is observed, please contact the council through the Contact Centre.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Street lighting more responsive to natural lighting - not needed - not on.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Areas of woodland and peatland that are already being used as carbon offsets should be robustly protected. Reducing carbon emissions needs to go hand in hand with enhancing biodiversity.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Biodiversity: the council is developing a Local Biodiversity Action Plan that is aimed at improving biodiversity and natural habitats and introducing long term and sustainable projects that will benefit from natural assets. It will also include options for engaging with schools.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Cancelling bus routes, forcing people (who have them) to use cars or multiple buses where one currently runs dies not uphold this	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Waste of money	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Unacceptable!!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Could do more	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I don't think we really have choice with this, we must continue to reduce emissions.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Strongly disagree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Climate and carbon footprint along with the green energy just money making schemes and lot of nonsense do away with it all	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	In what way will these be reduced, street lights are not great for the elderly if our when dark	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Climate change and emerging technology to help reduce emissions costs money. I struggle to see how any carbon reduction strategy will save money.	3. The respondent advised that they had no comment to make or posed a question of the measure.	All approved projects have estimated payback periods substantially shorter than the lifetime of the equipment and produce revenue savings for the council.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Having staff work from home should help support this.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council will continue to review processes, procedures and methods of service delivery to support improvement and efficiency in services whilst delivering on commitments.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Unclear what this involves	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	£245k does not seem like a great deal in this area. How much does the council pay for gas and electricity at present? What % of that is £245k	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council has an energy reduction work plan and is committed to exploring opportunities for reducing the energy bill through the use of renewable energy solutions, improved energy efficiency of buildings and equipment and changing the behaviour of users in council buildings. The council has already delivered considerable savings through energy efficiency.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Does this mean turning the heating down?	3. The respondent advised that they had no comment to make or posed a question of the measure.	It will include all measures to reduce energy consumption and carbon emissions. The council has energy audits across all buildings to identify energy saving opportunities in each building. In some circumstances it will be turning heating down where it is assessed to be excessive, in other circumstances it will be the introduction of renewable technology.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Buses ?? Read your previous sections	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	What projects?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No opinion	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	well enough said about that	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	no comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	See previous comments	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No comments	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I'm not in a position to comment fully on this	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No Comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Noted	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	A/A	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I don't know enough about this to comment.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No Comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Unsure	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No comments	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	NA	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I don't know enough to comment on this.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	??	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Need to know more to comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	As above	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No comment.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No comments	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No comment to add as I am not convinced that the investment in renewable energy projects are benefiting / we are seeing the savings based evidence for the investment yet.	3. The respondent advised that they had no comment to make or posed a question of the measure.	All approved projects have estimated payback periods substantially shorter than the lifetime of the equipment and produce revenue savings for the council.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	N/A	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No Comments	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	no comments	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	no comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No comments	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No comment.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Unknown	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	NA	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No comment.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I do not have an adequate knowledge of these functional areas to comment on this.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Don't worry about this.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	no views on this.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	NC	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	None	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Unable to comment again due to lack of available information.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	no comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	n/a	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Very difficult to comment without more detail	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I can't see any point in continuing this survey as it is a waste of all our time without the information, we need to give an informed opinion.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I am unable to provide further input as the level of detail within the estimated saving briefing doesn't allow me too.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	See above in relation to Council Properties.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Before you start to pat yourself on the back too much, how have you measured this and what are the new measures? I am aware that you had reduced your fleet of pool vehicles and the amount of miles that officers are allowed to do.... Maybe that's why it takes so long for pothole and flooding issues to be identified and dealt with....is it because they are not allowed out, which in turn saves on fuel costs. How many of the new school constructed over the passed 5 years have solar panels and of the ones currently under construction.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council continually reviews service provision using our Best Value Framework to ensure that we deliver value for the public and continue to achieve the expected levels of performance. There are rigorous internal scrutiny arrangements in place to assure the quality of our services and we are also subject to external audit and inspection.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	There is nothing here that allows me to comment, it's just a statement and a number. Just make the saving, don't ask the public if you're not describing a change in public service or presenting any pros and cons. This is simple a no brainer saving to make!	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	More working from home!	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council will continue to review processes, procedures and methods of service delivery to support improvement and efficiency in services whilst delivering on commitments.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Noted that this is an aim. How realistic is the achievement of the reduction?	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council has made good progress in this area and is currently performing ahead of targets in carbon emission reductions. Performance is measured against targets in the Climate Change Strategy.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Good luck trying to save money with energy prices increasing the way they are. Expect this won't happen.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council has energy audits across all buildings to identify energy saving opportunities in each building. Budget savings in this area are particularly important given the increase in energy bills.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Like what? Not enough information to comment on.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Not saving that much really. If the Chancellors Autumn Statement comes to fruition - all the electric vehicles you have invested in, will be taxed in the same way as non-electric vehicles. Is this false economy?	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council has an energy reduction work plan and is committed to exploring opportunities for reducing the energy bill through the use of renewable energy solutions, improved energy efficiency of buildings and equipment and changing the behaviour of users in council buildings. The council has already delivered considerable savings through energy efficiency and will continue to do this to offset the substantial cost increases in energy.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Is this a question? Not sure what you're looking for here.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	As a resident I do not understand what this will mean to the services I receive due to the vague and broad terms used in this consultation document.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	The most carbon emissions in West Lothian as a whole are currently produced by transport, therefore this does need to be the focus for reducing carbon emissions and improving efficiency, in order to substantially reduce carbon emissions. This requires investment in active travel infrastructure and education for journeys below 2 miles, together with strategic public transport routes for longer journeys and/or for those with reduced mobility.	4. The council is already doing this.	Transportation including active travel, infrastructure and public transport are themes included within the council's Climate Change Strategy.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Use of renewables and energy efficiency is a prudent investment that should return savings in the long term.	4. The council is already doing this.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	More access to pool cars would be helpful. Staff don't want to have to use their own cars but have too at present to do their job.	4. The council is already doing this.	Council constantly review fleet requirements
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	With the tree planting and wild grass meadows around these must be making a great impact on the carbon footprint.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	What will council do with old batteries?	4. The council is already doing this.	CRC sites have a box for batteries and these are disposed of via a contractor licenced to take them
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Again, any savings made here should be reinvested in the same area. This should not be an area we are looking to reduce costs.	4. The council is already doing this.	Energy costs have become so high that these savings are being used to partially offset a substantial and unprecedented increase in energy costs.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Bring into use electric pool cars and central booking system. Re-introduce training for staff with no previous use of electric vehicles. Training for new staff in terms of pool car usage should really be a mandatory element of an induction process joining the council, at present no training and no cars available.	4. The council is already doing this.	The council is investigating options to utilise pool cars better and prioritise use to support key service delivery. Full and effective use of the pool cars will be delivered to ensure value for money.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	There is a large amount of energy wasted in public buildings such as schools. The heating does not need to be on as much as it is. Also, lights should be on sensors so that they go off when a room is empty.	4. The council is already doing this.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council already has motion sensors in place in number of locations and will introduce on an ongoing basis where there is a business case to do so.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	What success of previous energy efficiency initiatives? We should be shouting about these!; Are you on track against your plan?	4. The council is already doing this.	A report is presented annually to the Council Executive on progress in delivering the Climate Change Strategy. Quarterly reports are presented to Environment PDSP on progress against individual performance indicators. The council is currently ahead of interim targets.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	why are schools outside areas lit up like Christmas trees every night. (wintertime)	4. The council is already doing this.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council already has motion sensors in place in number of locations and will introduce on an ongoing basis where there is a business case to do so.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	all lights in buildings should be on Sensores,;	4. The council is already doing this.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council already has motion sensors in place in number of locations and will introduce on an ongoing basis where there is a business case to do so.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Solar panels on buildings ,are there any,;	4. The council is already doing this.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I'm sure there's a lot of room for reduced waste in the council	4. The council is already doing this.	As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	This is an area where the council must move with the times and any savings could certainly be better used.	4. The council is already doing this.	Savings in this area will be used to offset the substantial increased cost of energy.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Can the council invest in renewable energy projects to earn income to help for future budgets?	4. The council is already doing this.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	As part of refurbishment, consider putting in place solar panels and local wind turbines as is seen in e.g. Germany. This will reduce running costs and can be phased in while meeting Climate targets.	4. The council is already doing this.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	More renewables are needed throughout West Lothian.	4. The council is already doing this.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Cut energy bills of council services,including street lighting etc and reduce the cost of non essential or nice to have services	4. The council is already doing this.	Street lighting: appropriate lighting is required by law to enhance public safety. The council has an LED replacement programme as this is the most sustainable and energy efficient option that is currently available.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Can they use more things like solar/wind?	4. The council is already doing this.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Plant more trees, don't see many electric vehicles either, just smelly old tractors & lorries especially at Beecraigs park.	4. The council is already doing this.	The council's Climate Change Strategy outlines actions in the council's journey to net zero.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Climate change, carbon emissions, sustainability - none of these are cheap and all of them come with more procedures and delivery requirements from Scottish Gov, which increase the workload. Ask Scottish Government to provide funding with any new process or delivery measure.	4. The council is already doing this.	The council regularly emphasises to the Scottish Government the need for a fair settlement for local government as well as working with COSLA (the body that collectively represents local government in Scotland) to emphasise this point.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Invest in detection lights in offices and schools. When no movement has been detected in the office and/or classroom, the lights will automatically turn off. Although initially costly, this saved Fife Council money when I lived there.	4. The council is already doing this.	The council already has motion sensors in place in number of locations and will introduce on an ongoing basis where there is a business case to do so.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	install more solar panels on council properties to help with this	4. The council is already doing this.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	as driver of an electric car .. the availability and number of charging points is still poor and not enough in place	4. The council is already doing this.	With the implementation of charging, this will stimulate the market with commercial operators installing more charging points without fear of being undercut by free public provision. Evidence shows that free public provision prevents wider investment to increase charging points.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Invest in good quality M&E services report including condition or detailed feasibility report how to save energy	4. The council is already doing this.	This information is used to inform energy audits to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Get Solar panels on council and school roofs!!	4. The council is already doing this.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	The lack of insulation in schools is, in 2022, a laughable disgrace. I remember first talking about this on school boards in 2009. You've wasted so much money by not doing simple and obvious work on insulation, doors and windows. Just get it done.	4. The council is already doing this.	The council has improved insulation in buildings, implementing energy efficiency measures and renewables where it is assessed as cost effective.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	The council is currently pursuing a programme to instal something in the region of 12 new pedestrian crossings, none of which meet the requirement criteria. This will use up new resources in providing new poles, lights, installation of new road markings, perhaps laying new surfacing materials, new traffic signs and of course, new electricity supplies. All of which needs to be maintained for ever and a day. So, this flies in the face of the council's statement of it's desire to reduce carbon emisions, as this kind of approach only increases them. The construction of any project which isn't necessary only adds to the carbon footprint. The construction of essential projects and the maintenance of our infrastructure is absolutely necessary, but these initiatives to boost spend and profile in the locality are not. The other downside to this is that officers time is taken up with unnecessary projects.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	How does the council intend to provide electric chargers for the use of the public when they can't get enough parking spaces needed for the parking of private owned cars	4. The council is already doing this.	Future electric vehicle policy to be developed and existing vehicle chargers are in place across West Lothian.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I also think the Council needs to look at any new builds coming in through planning be them private or commercial and make sure they are up to certain standards in terms of energy consumptions etc.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Good, but it can lead to dark times. Need time and research	4. The council is already doing this.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	We need to reduce, it is a government commitment	4. The council is already doing this.	The council's Climate Change Strategy outlines actions in the council's journey to net zero.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Carbon Emissions must be addressed and maintained for the future	4. The council is already doing this.	The council's Climate Change Strategy outlines actions in the council's journey to net zero.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I don't know how well the council does this. We need to support global warming.	4. The council is already doing this.	The council's Climate Change Strategy outlines actions in the council's journey to net zero. The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Again keep costs and all work in house not paying outside contractors fpr all works	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure. The council must consider both internal and external provision to ensure best value. In some circumstances it may be better value to deliver through external provision.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I think one wat to reduce energy costs would be to turn off traffic lights at night. Driving back from Glasgow the other night through Livingston we were stopped at the lights at the hospital, the main lights at the St Margaret's, livi village crossroads and then Lidl. There was no other traffic. Could these be turned off between say 12pm and 5am and just treated as normal un traffic light junctions?;	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The council must deliver safe roads therefore it is not possible to remove all traffic lights. Where it is assessed as safe, temporary lights are in place. Requirements are implemented on a risk based basis.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Switch of street lights at 12pm	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	West Lothian Council sold off large swathes of land currently being used for renewable energy. Most of Blacklaw could already be used by WLC to create its own energy. Instead it was sold off to mult national companies for no benefit to the community.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	The council does not have the skills or expertise to create its own energy. In addition, limited capital resources means the council would not have the resources available to create the infrastructure to support this. Given reduced resources in revenue and capital, the council has to focus on delivery of core activities that support agreed priorities. The sale of council land generates resources for the capital programme which is reinvested in the council's asset base.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Could yous invest in putting solar panels on all new homes built.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	The council has a programme of installing solar panels on council houses. The council does not have the resources or power to install solar panels on non-council houses.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree we need to reduce energy consumption but this requires investment (and realistic appraisal of benefits). Existing energy savings can be offset by additional maintenance and replacement costs making the investment worthless. Given our resources (waste) assets (large areas of land that are undeveloped) could we invest in generating energy rather than small measures?	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	The council does not have the skills or expertise to create its own energy. In addition, limited capital resources means the council would not have the resources available to create the infrastructure to support this. Given reduced resources in revenue and capital, the council has to focus on delivery of core activities that support agreed priorities. The council will review how undeveloped land could be sold to generate resources for capital investment.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	It is not gonna work, dark medieval time. Planet does not want to save herself	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	All approved projects have estimated payback periods substantially shorter than the lifetime of the equipment and produce revenue savings for the council. The council's Climate Change Strategy outlines actions in the council's journey to net zero.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Carbon emissions are by no means not important, but in times of such dire finances perhaps these could be put on a back burner and more money saved.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	All approved projects have estimated payback periods substantially shorter than the lifetime of the equipment and produce revenue savings for the council. The council's Climate Change Strategy outlines actions in the council's journey to net zero.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Might not give everyone electricity, keep things the way they are	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The council's Climate Change Strategy outlines actions in the council's journey to net zero. This includes action to reduce energy consumption.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	no use	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The council's Climate Change Strategy outlines actions in the council's journey to net zero.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Woke agenda increases budgets stip psndering and start prioritising properly	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The council's Climate Change Strategy outlines actions in the council's journey to net zero.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Why would you reduce carbon? Plants thrive on carbon, you will be choking the planet by reducing carbon	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The council's Climate Change Strategy outlines actions in the council's journey to net zero.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No. This always turns out to be a net cost. Green agenda should be when we can afford it	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The council's Climate Change Strategy outlines actions in the council's journey to net zero. Focus is on affordability however given energy price increases, it is important to implement savings in this area.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Not that bothered we've survived this long	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The council's Climate Change Strategy outlines actions in the council's journey to net zero. The council has an energy reduction work plan and is committed to exploring opportunities for reducing the energy bill through the use of renewable energy solutions, improved energy efficiency of buildings and equipment and changing the behaviour of users in council buildings. The council has already delivered considerable savings through energy efficiency and will continue to do this to offset the substantial cost increases in energy.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Cost of living crisis more important at present!	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The council's Climate Change Strategy outlines actions in the council's journey to net zero. The council has an energy reduction work plan and is committed to exploring opportunities for reducing the energy bill through the use of renewable energy solutions, improved energy efficiency of buildings and equipment and changing the behaviour of users in council buildings. The council has already delivered considerable savings through energy efficiency and will continue to do this to offset the substantial cost increases in energy.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No such thing as climate change, get grip	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The council's Climate Change Strategy outlines actions in the council's journey to net zero. One of the council's priorities is the environment.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Abandon any of these projects entirely if they cost money.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	All approved projects have estimated payback periods substantially shorter than the lifetime of the equipment and produce revenue savings for the council.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Ban WL council vehicles from sitting idle with engines running. Bad for environment and waste of money.	5d. It is proposed that this suggestion is not taken forward because it has been previously considered and will not be progressed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Review smart dress at work expectations to encourage the wearing of jumpers in winter, enabling people to work more comfortably in cooler office environments	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council is committed to working with employees and trade unions in managing changes to its organisational structures and staffing requirements. The council will seek to achieve agreement to change through constructive and open dialogue.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Put solar panels on the roofs of all the council buildings.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Right folks, it's time to turn that thermostat down another notch. Don't worry, we'll keep it above freezing. Just.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council's Climate Change Strategy outlines actions in the council's journey to net zero.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Stop heating and lighting empty offices after adjusting the length of working week.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I have an electric car for this reason. The number of rapid charging places is woefully inadequate	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council's Climate Change Strategy outlines actions in the council's journey to net zero.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	School buildings should be fitted with solar panels to provide electricity for the school.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Get all council staff to switch of lights and electrical devices at the end of working days. We are very lax in this.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	We undertake extensive behaviour change programmes including focusing on the energy efficient operation of sites in our highest consuming buildings.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Can you cut expenses through use of solar or wind energy on site? Can you make the next fleet of Council vehicles EV or Hydrogen powered?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	this is important. I think it needs to be taken into account when looking at public transport subsidy amounts also. If we had a good reliable public transport service, carbon emmissions could be very much reduced.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council's Climate Change Strategy outlines actions in the council's journey to net zero. This includes all aspects relating to carbon emissions including building and transport.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	As staff have been told to return to the office they are therefore producing carbon emissions having to travel, use the electricity and facilities in the buildings they are now back in. If you want to save money, embrace fully mobile working and leave it up to staff, wherever possible, to decide. We could save money on electricity alone by not mandating that staff attend offices. It may also go some way to making a positive difference in morale and help attract staff into vacant roles.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. This includes new opportunities arising from hybrid working.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	solar	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	BUILDINGS HEATING LIGHTING COSTS COULD BE EFFECTIVE	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I recently attended a meeting at Broxburn Academy. I was in the school for 40 mins and was half cooked by the time I left. The heat was ridiculous! How that can justified now I don't know. That building easily felt like 30 degrees. How wasteful is it to have a school heated so much that windows have to be opened to make it bearable.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	these cost savings are minimal and can be easily impacted by budgeting; - all lights/ equipment should have power saving modes enacted, or turned off completely.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I would encourage the use of renewable energy projects, especially hydro and wind.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	If heating in Council buildings was managed better this could be one of the best ways to save money. Heating is not turned off at a reasonable time of year. I understand the need for things to be controlled centrally, however, when staff ask for heating to be turned off it should be done.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	heating of building should be checked that its off in summertime.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Council buildings have had heating on throughout summer months - this could be looked at to reduce costs. Armadale Partnership building had heating on when not required	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	There has been a street light on all day and night for the last 4 years you could put the lights off that are always on	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for action.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Maybe we need to turn down lighting and heating in council properties? Do we really need street lights throughout all hours of darkness?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	make use of renewable technology to assist with energy cost reductions	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Micro generation at Beecraigs. Any plans?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Please consider staffing on shifts when reducing heating in their area. Shift workers matter too. Unless some can work at home.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has energy audits across all buildings to identify energy saving opportunities in each building. This will take into account shift patterns in individual properties.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	All Council buildings would benefit from solar panels and insulation, why can't this be done when places are first built?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Improved insulation, solar panels???	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	The council need to look at school heating particularly where it seems to be operated centrally. Schools that operate this way can have heating still on in the hot weather.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Solar panels should be installed at schools etc	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I would be very happy to see further green energy options being used throughout West Lothian to limit our requirement for fossil fueled energy. This could include wind, solar and water. Good quality initiatives for households to install battery storage especially if they already have solar panels	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Is that all? How? What about wind turbines on school fields or other large spaces you have? Maybe you could even make money from it? Hydro on almond river or wind at Beecraigs?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Perhaps heating in council buildings should be reviewed as partnership centre had heating on all Summer, despite reporting this!	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	A huge saving would be to review the heating in schools. I know in my school the heating was on in the summer, right through the heatwave, making the learning environment extremely uncomfortable for staff and learners. It is often excessively hot in school and I'm sure with the current rising costs of energy this could be much better managed. Lights left on in buildings after closing time could be re-thought too.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	We should absolutely be looking at energy efficiency as a priority. Our schools buildings are not energy efficient and this could be one means of savings.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Again metrics in trial data must show this approach works first	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Try turning heating off in council buildings during the summer when it is reported and savings would be made on this cost.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	The council needs to embrace energy efficiency. Too many underoccupied buildings with heating and lighting on each day	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has energy audits across all buildings to identify energy saving opportunities in each building. We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Why is it necessary to have so many street and path lights burning? I like countless others, have light shining through windows which can have real impact on sleeping. Also, I like countless other have a greenhouse in their garden. If you know anything about plant growth, you will know that they need natural light (LIGHT AND DARK). So why are we subjected to a garden that is alluminated all night by street lights? Turn off unrequired lamps and save who knows, how much money.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Street lighting: appropriate lighting is required by law to enhance public safety. The council has an LED replacement programme as this is the most sustainable and energy efficient option that is currently available.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Savings could be generated by ceasing the provision of free electricity to drivers of EVs. This has been a welcome initiative to encourage EV uptake but now charge points are routinely blocked for many hours by those who drop their Web off and then get a lift home in petrol cars. It prevents those who genuinely need a charge from using the infrastructure.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Investment may be needed before savings can be made due to the age of some of the buildings. Staff also have a part to play in this by switching off lights and not having equipment left on that is not required.; Meetings should be held virtually, where possible, to reduce costs. More are now being held in person since the pandemic restrictions have been lifted. I think that this is a step back after the work that was put in place during the pandemic.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council's property asset management strategy and capital programme seek to identify planned maintenance to building fabric, within the parameters of constrained financial resources, to minimise reactive maintenance going forward. Investment will be prioritised to maintain buildings required for service delivery in as good a condition as possible given the revenue and capital financial constraints facing the council. Due to the constraints, and to prioritise limited resources, there will be a need to rationalise buildings. We undertake extensive behaviour change programmes including focusing on the energy efficient operation of sites in our highest consuming buildings.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I work in Whitehall depot which has a exceptionally large roof, if the spine of the roof had wind turbines along it(there are many different types and sizes of turbines, even bladeless ones). The council would save a fortune in electricity bills.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I own a hybrid electric vehicle and am amazed that the council offers free electricity to charge my car in the council car parks. I have my own charger at home and the costs savings using electricity are 60% of running costs whilst compared with Diesel e.g it costs me 10p per mile on electric and 25p a mile on Diesel. I know it's a government incentive to get people to help get people onto electric. However I didn't know it was free to charge my car in the council car parks, so it certainly wasn't an influencing factor in my decision to buy a hybrid. The recent BBC Scotland disclosure programme estimates that the councils are failing to collect around £3m in revenue by not charging. This is also having a knock on effect in charge points not being maintained or replaced with more modern chargepoints as some of them have been installed for 10 years. Free electricity is also hampering expansion of the network because private companies cannot provide a service to compete with a free service because some people are bypassing the chargeable ev charge points to use the free ones. So if councils charged for use, used the revenue to maintain, improve and expand the network it would be a win for everyone.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Are there adequate investments made in wind and solar power and battery storage provision across the council's property portfolio?; Is there sufficient encouragement for the drivers of council vehicles to minimise journeys to those that are only absolutely necessary? Can the council vehicle fleet be rationalised to offer cost savings from the use of more electric vehicles?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable. The council will look to reduce vehicles in line with revised service requirements.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Disgraceful the number of electric cars being purchased and used by the council .. most people have access to their own or can get access to a car. Lots of more savings can be estimated here. Need more details on other projects	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has an energy reduction work plan and is committed to exploring opportunities for reducing the energy bill through the use of renewable energy solutions, improved energy efficiency of buildings and equipment and changing the behaviour of users in council buildings. The council has already delivered considerable savings through energy efficiency. This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	See previous comments about lights being left on constantly in council buildings	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council already has motion sensors in place in number of locations and will introduce on an ongoing basis where there is a business case to do so.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Floodlights in play areas - make an option to pay for use.; E.g. - for playing in a basketball play area you can pay by using an app for a 1h court illumination.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council regularly reviews its charging and concessions policy and this can be considered as part of the next review.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Better manage heating in schools! Often it's like an absolute sauna and we're having to open windows while unable to turn heating down! Get the heating managed in each school rather than centrally.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Can we ensure young people have the opportunity to actively participate in energy efficiency/renewable energy projects. ; ; They are inheriting so many climate related issues so we owe it to them that the issues, and the measures adults are making to tackle them, are visible and that their voices can be heard in the process.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Turning down the heating at schools and other council building should happen. The schools are kept at a level where the staff and children are walking around in thin clothing in the middle of winter. Obviously, care homes etc need to be kept warmer but the heating in schools just causes germs to breed and reducing the temperature across the region would produce a financial saving.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has energy audits across all buildings to identify energy saving opportunities in each building.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	i hope that this will include reviewing the heating in school classrooms. I couldn't believe the heat in some of the classrooms when we visited Linlithgow Academy recently and my children, and teachers, confirmed that they were like that during the school day and there was no way to reduce the temperature other than opening a window! My boys primary school was similar (including in the newly built section of the school)	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has energy audits across all buildings to identify energy saving opportunities in each building. We undertake extensive behaviour change programmes including focusing on the energy efficient operation of sites in our highest consuming buildings.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Along with 4D above a holistic and long-term plan needs to be made for WLC's land and water assets with a view to ensuring that opportunities for helping WLC's response to the Climate Change Crisis are considered. It is not clear that all opportunities are being taken to manage these in a truly sustainable manner ie the 3-legged stool of Financial - Social - Environmental sustainability. There appear to be a number of poorly considered and sometimes uncoordinated Nature Recovery and Climate Change projects being pursued to spend the funding in short timescales rather than well-informed, better considered, longer-term ones which can deliver on all of the above. Careful choice of species and multipurpose management of trees and woods required - leading to greater resilience, ability to adapt, better return on investment in terms of:- Financial return from timber and other forest products - timber prices are going up and likely to continue; Longer value as landscape features eg specimen trees planted and tended around 1800AD at Almondell have outlived the ; mansion house giving 200 years of benefit whereas many planted in parks and residential areas have been strimmed to death within a few years!; Multi-purpose management also takes into consideration biodiversity and flooding. New methods of quantifying and measuring all these aspects (including potential financial returns / savings) would assist decision making.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council's Climate Change Strategy outlines actions in the council's journey to net zero. There is an action plan to ensure the council makes progress in reducing carbon emissions and there has been good progress to date, with performance targets being exceeded.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Provide more charging points and solar. ; Some local authorities use their lamp posts with modified access panels to support EV charging while parked. This should be looked at as a priority to help boost the ev charging infrastructure in west Lothian	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Look at more working from home. More people in one building-	6. The respondent suggested an improvement. Officers will consider how this could be developed.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. This includes new opportunities arising from hybrid working.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Start to switch off lights at schools, that's one way to go ;). Each time I'm at school for kids, I see street lights on. For sure we can do something about it?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	See 4D above re Beecraigs Farm. Paper on WLC's Land and Water Assets and Climate Change sent to Climate Change Manager a year or two ago but heard nothing further. Suggested looking at small scale hydro (Archimedes Screw type facilities) be investigated along WLC owned section of River Almond - possibly could have been done along fish passes on weirs if holistic approach had been taken - sites may not be suitable - need to be reasonably close to existing electric cables. Also, on smaller more up-stream burns one I know near Loch Lomond put in by energy company provides net income of £24k / annum for at least 30years. Greater use of harvested trees for timber and panel board for construction which continues to store C as opposed to woodfuel. Housing and Property Services could use more timber in construction, as a much more energy efficient material than steel, concrete and brick - Highland Council put on a housing Expo a number of years ago. Lots of good information from Napier University and Wood for Good. UK currently imports 80% of its timber (2nd largest nett importer after China!) probably contributing to the decline in virgin forest cover in countries like Latvia ie just shifting the problem to others!	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council's Climate Change Strategy outlines actions in the council's journey to net zero. There is an action plan to ensure the council makes progress in reducing carbon emissions and there has been good progress to date, with performance targets being exceeded.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Cleaning staff leaving every light on even after they have cleaned and left the room should be instructed to switch lights when finished and save energy.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Start charging for the charging points as this is mainly those with higher disposable incomes like me that have electric cars. Bring in mo et through charging to charge your car and use it for other priorities.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	How much will it cost to purchase these renewable energy products to allow this efficiency given that my tenants homes windows are not wind and watertight.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Energy efficient products provide savings to offset their costs or are required to meet legislated compliance requirements.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	B	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	See previous request for solar panels on council buildings	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	This applies to everyone.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	How?	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I am fed up with SG, they pledge to do more but are more focussed on Indi	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Don't leave equipment on standby	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Smart street light camera with built-in 5g frequency to fry the brains	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Load of s£\$%^	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	A four day week for schools would reduce carbon emissions from cars and heating.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Currently authorities are required to provide 190 days of education. This may form part of the National Discussion on Education and its future delivery.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Renewable energies! Why are our costs going up if we are using so much renewable energy??	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Although the council has invested in renewable technology, the majority of energy still comes from traditional sources. The increase in energy costs has impacted the council in the same way as it has impacted households.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Give a grant on solar panels for all, or discount tax by installing them	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Discounts for tax would have to be decided and implemented by UK and Scottish Governments. Given the council's extremely challenging revenue and capital financial position, and the need to make substantial savings to balance the budget which we must do by law, there is not resources available to give everyone solar panels.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Every house built new should be greener, solar panels, energy efficient boilers or air source heat pumps, and what about mini wind turbines for each new estate to power street lights houses etc, not that I know much about it all	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Nobody will be able to afford to run their car or waste energy. They will struggle to get a bus with our diabolical service so what emissions would that be? Make the companies doing the ommitting pay the clean up	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Needs more clarity on what these new projects will be. There has been no affordable way for middle income families to have an electric car, grants should be made available for people who want to run a more energy efficient home.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Energy efficiency grants are determined and administered by the Scottish Government.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	All developments must have solar panels or be passive houses.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Planning legislation mandating renewable or other carbon reducing technology is determined by the Scottish Government. The Sustainable Construction Policy helps to ensure new builds and refurbishments are as energy efficient as possible.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Encourage the private sector to invest in renewable energy, especially community and district heating schemes. Also consider small scale hydro generation.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council has no authority to require the private sector to invest in renewable energy. The Sustainable Construction Policy (set by the Scottish Government) helps to ensure new builds and refurbishments are as energy efficient as possible.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I didn't know we did this... Perhaps a bit more of it could be included in the kinect magazine?	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The connect magazine is not a council publication. The council regularly publicises developments in this area in the council newspaper (Bulletin), online and in social media.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	The whole of the UK and world need to be careful	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Why was ms sturgeon at the last two overseas conferences ???? Why were anybody there Zoom is marvellous.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	looks like Mrs Sturgeon has been given the go ahead for her Fracking initiative	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Where relevant, we will forward these comments to the appropriate organisations.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Agree, The proposed new slip road for M9 north at Springfield end of Linlithgow is desperately needed.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The Scottish Government and developers will deliver a new junction.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	more details required on this, what exactly is planned? there are no targets, no commentary to existing activity, or any info on what's proposed to change	9. The respondent made a comment on the survey question.	The council's Climate Change Strategy outlines actions in the council's journey to net zero. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	The information being given to be commented on is so vague it makes it impossible to answer and in some cases understand and therefore I have been unable to give Frank response	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	There is very little detail contained within the narrative to make an informed comment.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	I would like to say Hooray! But what projects are you talking about!!!	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	how?	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Very vague - this would need additional clarification as well as details on how these proposals would impact local communities.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	More info please	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Not enough information	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	No detail provided.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Not enough information to comment.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	dont really know what this mean	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	The format of this survey is poor and does not lend itself to true scrutiny of the proposals. The survey is badly designed and off putting to many given the large blurb of text under each heading - the language is in business speak which is essentially meaningless. There is a lack of clarity on the proposals and the reader is left to assume what the blurb is getting at. This survey should have been in plain English with examples of the proposals which would support greater engagement with the activity.; ; There should be space for feedback on the methodology being used also - this has not been made available which adds to suspicion that the whole process is already decided, and course of action is already determined. The council and COSLA must do more to protect our communities and demand a fair settlement from the Scottish Government. This exercise highlights the political failure of the funding model and it will be the local community that suffers as a result. The end of the survey does not have a 'Finish' button, merely a 'Next'. Overall - very poor approach.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	Again not very specific.	9. The respondent made a comment on the survey question.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	The lack of real facts and figures about what is going to change makes it a challenge to comment effectively. More information is required before any meaningful consultation can take place. We should be provided with a statement for each section and the option to agree, disagree or have no opinion. I would strongly urge the council to re-present this consultation in a more user friendly format.	9. The respondent made a comment on the survey question.	Thank you for your comment about the survey, the council will carefully consider all feedback and use it to review and improve our consultation approach.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	How do you save ? I d like to know more in depth details.	9. The respondent made a comment on the survey question.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable. This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	This question fails to explain how energy consumption & carbon emissions will be reduced. Closing needed public services, community centres or hubs, school assets, nursery schools, reducing the operating times of schools, reducing bus services & then claiming success in meeting green targets is a failure. It's robbing Peter to pay Paul.	9. The respondent made a comment on the survey question.	Unfortunately part of the solution to reducing carbon assumption is reduction of public buildings. Given the climate and funding emergency facing councils, it is essential that the number of public buildings across Scotland reduces.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Environment, Climate Change	4G Reducing carbon emissions and improving efficiency	How ? This is so unbelievably vague	9. The respondent made a comment on the survey question.	The council's Climate Change Strategy outlines actions in the council's journey to net zero. The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I would be ok with this if some of the other services were not cut within the community.	1. The respondent advised that they agree with the proposal.	The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs or increase funding.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	A £5 pm waste collection charge would be affordable for most. Those who can afford to pay a small fee, should.	1. The respondent advised that they agree with the proposal.	Thank you for your response. Your comment has been noted.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree commercial property lease review for for-profit companies.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The council could definitely take a more commercial approach to leasing its buildings and facilities. This will mean cleaning and maintaining them properly though. We hired a community hall for our daughters birthday and couldn't believe it only cost £5	1. The respondent advised that they agree with the proposal.	The council continually invests in community facilities and has recently built a number of partnership centres with improved facilities for communities. The Council will offer communities the opportunity to access community facilities in partnership with other organisations. Community groups will have the opportunity to request ownership of properties through the provisions of the Community Empowerment (Scotland) Act 2015,
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I'd be willing to pay a nominal fee for garden waste collection if it avoided more important cuts	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Would be prepared to pay in the region of £25 annually for garden waste collection.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree re garden waste charge;	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	A minimal charge for garden waste removal would be acceptable. However, dont forget the quality of the overall environment of the county is hugely down to individual gardeners providing natural beauty in their gardens to be admired and enjoyed by others. It has an effect on everyones mental health.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree. Garden waste charges should be introduced in line with a lot of other councils in Scotland. It should be tied into a strategy of encouraging composting and carbon reduction which would show that the council is taking a greener approach to service delivery.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Point 1 would encourage more fly tipping.; Point -I agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Builders yes charge them more.	1. The respondent advised that they agree with the proposal.	Maximise income with minimum detriment to domestic applicants. Developer contributions to be reviewed in line with guidance when applicable.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Look at developers they are the businesses making the money! It's just the will make a little less or add it on somewhere else.	1. The respondent advised that they agree with the proposal.	Maximise income with minimum detriment to domestic applicants. Developer contributions to be reviewed in line with guidance when applicable.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	This sounds a good idea - but you don't want to put start-up businesses off. Is there any way allowance can be made for them, given that they might then bring jobs and wealth into the area?	1. The respondent advised that they agree with the proposal.	Business Gateway supports all businesses.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	developer contributions should be maximised, commercial rates for companies making large profits need to increase significantly.	1. The respondent advised that they agree with the proposal.	Maximise income with minimum detriment to domestic applicants. Developer contributions to be reviewed in line with guidance when applicable.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	GREAT job 👍	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Increasing charges is difficult but people need to realise that without increased fees, there would have to be more cuts. Agree the council needs to do more in this area - the council is not maximising opportunities	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	That's nice	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Seems reasonable	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Positive	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	All apart from the first one.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Leasing facilities to commercial groups is a good way to use up facilities, keep the community involved and earn more money.	1. The respondent advised that they agree with the proposal.	Community groups and individuals can rent council facilities, however opportunities to market this wider can be explored. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	4 bullets asked for - response is No, yes yes yes I'm that order.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	All makes sense.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Yes, these are all sensible options	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	This seems sensible, though if you need funding why not put up council tax for the top bands?	1. The respondent advised that they agree with the proposal.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Possible.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	In line with other offerings at other councils	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agreed.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Why is this not already in place? Rents should be reviewed on a reoccurring basis to align with inflation	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Lease facilities... absolutely. Make the council building make money. Review rents and fee's... I do not know enough to comment.	1. The respondent advised that they agree with the proposal.	Community groups and individuals can rent council facilities, however opportunities to market this wider can be explored. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Fine	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Okay	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	There is a need to make money	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	After reading the above, I will continue to trust your decisions in the areas I have no experience in , but thank you for the opportunity to co-operate !	1. The respondent advised that they agree with the proposal.	This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree the areas of additional income with exception of household garden waste as this is now where food waste is disposed. We are being encouraged to recycle and this may be a deterrent. Would not want an additional bin to be provided for food waste as there are now already four bins in use.; ; Consider charging for public car parking areas.	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions. The council previously ruled out a decriminalised parking enforcement scheme. Without such a scheme the council could not introduce parking charges and fines.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste charges may result in more fly tipping so not convinced this is economical. Even if collections went to once per month and food waste had to go on grey bin.; I thought planning fees were set by Scottish Government?; Other proposals sound reasonable.	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions. Although planning fees are set nationally, the increase in fees will result in additional income for the council.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Absolutely review fees to maximise developer contributions!! New builds in this area should NOT be approved without an agreement for both school provision AND medical provision ie GP practice. ;	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions. Developer contributions are subject to legal agreement and are for specific items such as infrastructure. The council has no legal authority to apply developer contributions for health provision.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Social enterprise leases are a good idea. Commercial operators should be charged much more.	1. The respondent advised that they agree with the proposal.	The council currently generates income from providing a range of services to partners and organisations. Further opportunities to expand this could be investigated.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Many other authorities have already done this. Seems reasonable.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charges for household garden waste collections, ok. I don't have a garden, pity those who do.;	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	All of the above areas should be ones where the council is looking to raise revenue.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree will all with the exception of a fee for garden waste. This may see people dumping garden waste in public places costing more to put right.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I would support additional charges and income in principal if the services provided by the additional charges are better than the current services provided, I would not support for example garden waste if the waste was not then collected when i expected or in a timely mannor	1. The respondent advised that they agree with the proposal.	The council's aim is, and always will be, to ensure that West Lothian continues to be a great place to live, work, visit and do business. To achieve this aim we will continue to prioritise the money that we spend on services to make sure that our investment has the biggest and most positive impact on the community. As validated by external auditors and other inspection bodies, West Lothian Council continues to perform well against key performance indicators and activities. This will continue to be monitored and reviewed.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I appreciate all the support thank you so much	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If we are to pay for our brown bins to be uplifted-a way for you to compost the food waste and garden waste which helps reduce reuse recycle surely????	1. The respondent advised that they agree with the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I'm not sure why charges for garden waste haven't come in yet - they keep being proposed. Would it lead to more fly tipping though?	1. The respondent advised that they agree with the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I don't think paying for garden waste is ideal but it all seems somewhat reasonable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Yes to charges for garden waste ;	1. The respondent advised that they agree with the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Review of fees for planning advisory services and to maximise developer contributions - large developers like cala should be paying already as they build for profit. Why aren't they?	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Maximise from developers.. absolutely. They charge a fortune for property anyway.	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Revising planning fees and rents seems fair given your costs will be going up.	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Yes to above apart from household garden waste.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The charges for the household garden waste collections has already been started in Edinburgh and Midlothian so it is inevitable that it will be started in West Lothian.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I believe the Council needs to be much more ambitious in this area and a target of £10 million over 3 years should be set	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	agree re rent for council properties, if they are not community services, or charities	1. The respondent advised that they agree with the proposal.	Any proposed increase in rents would be for the commercial property portfolio. Opportunities for community benefit leases are available for community groups and considered on a case by case basis.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	leasing to commercial operators could be increased;	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The other charges sound reasonable to me,	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for household waste will result in fly tipping and countryside damage which will cost the council money rather than save money. Agree to all other measures but brown bins could be collected less frequent but do not charge for them as it will cause more harm than good. People will not pay and they will dump. And food will end up back in landfill.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I would strongly resist introduction of charges for household garden waste (especially as these bins are now also used for food waste); Where services are provided as a discretionary (such as planning advisory, commercial rents etc) then these should be provided at market rates (i.e. in line with other council areas)	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I would not mind a small payment for Garden Waste services as this seems to be what is done in other councils, if the waste ended up flytipped it should not pose to much of an environmental risk like we are seeing with other waste. I am sure people would pay for uplifts if needed on big items, but the payment structure has to match the waste. £25 for a couch to be tipped is not value for money. Maybe some consultation with residents about what they feel is fair?	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Fully agree that there is an opportunity to maximise developer contributions - could really do with a Developer Obligations Officer - there a five tests that need to be met, so it is not a simple task. If not done correctly and challenged, it can and has resulted in costs been awarded to developers.	1. The respondent advised that they agree with the proposal.	The council maximises contributions from developers in line with legal agreements.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Good, as long as garden waste is not fly tipped as a result.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	agree - get on with it	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Worth exploration.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	my concern would be 'flytipping' how would the council deal with this? is it a problem now and how big would the problem likely be if bullet point 1 is carried out. the others I agree with	1. The respondent advised that they agree with the proposal.	Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I think it is not unreasonable to charge for some services or use of premises	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Empty council buildings should be utilised by commercial operators at a charge which will bring in more revenue	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. The council has a planned disposal programme for assets which are no longer required for service delivery and have been declared surplus to requirements. This provides an opportunity for commercial operators to purchase surplus council sites and buildings for future development.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If garden waste charges are to be considered then please think of the risk of increased fly tipping instances and the fact people will put it in the other collection bins they already have. If we have to go to the recycling centre then take back the brown bins. Planning fees should be increased accordingly. Leasing facilities are also a good idea.	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The Council has a duty to maximise income from all areas. Charging for Garden waste collections is something that should have been done long ago. Start charging proper fines for late library books, etc. Increase all commercial rents. Increase all fees for all public facing service, and particularly increase fees associated with planning. The Council must be more commercially focused to reduce the burden on the council taxpayer while ensuring core service provision for the most vulnerable.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Fee for household and garden waste seems fair as not every house has a garden.;	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	It sounds like you need to be more ambitious here. With your new improved IT systems, this should be straight forward enough.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Definitely charging for planning advice is a good plan	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree. Grass cuttings could be left on lawns rather than collected	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Edinburgh already charge for brown bin collection. This way those that use it pay and those who don't do not.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Most would welcome additional services at a cost. Other proposals sound OK.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree. All of the areas listed seem like sensible ideas to generate income. Could the council not look at car parking charging to increase income, in our local town centre council car parks or in our country parks?	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate. The council previously ruled out a decriminalised parking enforcement scheme. Without such a scheme the council could not introduce parking charges and fines.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Makes sense to look at all areas where income could be increased and come into line with how a private company would operate.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I think there is ways for the council to generate money as there is dead space within the council buildings that can be used to generate money and looking at the facilities they have the now and see what rental areas they have the now that are not being charged for	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	As I have said a number of times I don't believe third parties working on behalf of the council are always best value. With commercial properties, I think businesses expect rent reviews on leased commercial properties.	1. The respondent advised that they agree with the proposal.	The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure. The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Rents and fees for commercial properties should be inline with private landlords fees rather than discounted.; Developers should pay higher charges for planning services.;	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I would be careful that business' don't go elsewhere but mostly agree.	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introducing charges will ensure continuation of service delivery and help safeguard employment for staff.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I agree with some of this but only if wages are going to increase so people can afford these charges	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate. Given the budget gap, the council has to look at all options to increase income or reduce costs to ensure the statutory obligation to balance the budget is met. Although the pay award has yet to be agreed for 2023/24, it is envisaged that public sector wages will increase next year.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I think the council should definitely increase income - cutting services continually should not be the only option	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I agree with reviewing rents/fees for commercial properties, as long as they are not being prices out of the market for small businesses.	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Fee reviews no objections. Lease facilities no objections, why doesn't WLC consider approaches for new facilities like a new catering pitch at a country park site. Rent reviews no objections although I think you'll struggle in the current climate.	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	As long as it improves core services.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I would be prepared to pay a reasonable fee for household garden collections.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The council should be seeking to increase the income it generates to help offset government funds being reduced so am supportive of this and consider the council should be more innovative in this area.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Increased fees for planning and leases seem logical.	1. The respondent advised that they agree with the proposal.	Although planning fees are set nationally, the increase in fees will result in additional income for the council. The council has no ability to raise fees.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	These are fair proposals	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Would agree with all these proposals	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	increase income save some services is the way forward	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Leasing facilities seems like a good idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	No issues	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Sounds like a reasonable approach.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I would support a SMALL charge for collecting garden waste, no more than £50 per annum. But you've made this difficult to do in practice given we also use garden bins for food waste. ; The other proposals sound inevitable	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I realise that money will have to be generated. A charge for household garden waste is already in place in other council areas.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Review rent fees.	1. The respondent advised that they agree with the proposal.	The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure. The council must consider both internal and external provision to ensure best value. In some circumstances it may be better value to deliver through external provision.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Also consider charging for brown bin up lift but do not introduce private sector collections.	1. The respondent advised that they agree with the proposal.	The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure. The council must consider both internal and external provision to ensure best value. In some circumstances it may be better value to deliver through external provision.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	sounds fine.	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Increase rents and rates to the large warehouses in West Lothian.	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree with review of fees, leasing and fees	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If the lets are affordable they are more likely to be used. Advertising what is available will bring in more revenue.	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords. Community groups and individuals can rent council facilities, however opportunities to market this wider can be explored.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Reviewing contributions from commercial operators and developers should be a focus of increasing income before further strain is placed on the household incomes of local people.	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree with all EXCEPT household garden waste collection.	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Seems sensible	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Good ideas	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree with trying to reclaim mor ein fees from developers etc however	1. The respondent advised that they agree with the proposal.	The council collects developer contributions for legally agreed investment required as a result of development. Developer contributions are subject to legal agreement and are for specific items such as infrastructure.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	ok with this - please ensure rail concessionary travel goes. waste of money	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree with fees for letting of facilities for commercial operators to be looked	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The council currently generates income from providing a range of services to partners and organisations. Further opportunities to expand this could be investigated.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The others I agree with this is not a charity	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Increase charges for uplifts planning applications	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions. Although planning fees are set nationally, the increase in fees will result in additional income for the council. The council has no ability to raise fees.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Increase charges for uplifts, business recycling	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Increase charges for uplifts,	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Do not agree fees on household collections. ; Increase charges for uplifts, business recycling, planning applications, private house builders fees.	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Leasing facilities and reviewing rent is a good idea.	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords. Community groups and individuals can rent council facilities, however opportunities to market this wider can be explored.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste charging is a good idea - Edinburgh council and others do it so why shouldn't we. Leasing facilities to social enterprises would be a good way to supporting business growth	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Edinburgh charges for garden recycling suppose it's inevitable	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Not sure. Would charging for garden waste be expensive to administer? If not, okay.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Planning fees could have a minimum number trigger?	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Increase charges for uplifts planning applications	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Increase charges for private house builders fees	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree with fees for planning to be looked at	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Very good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	i support the remaining 2 points.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Not good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Happy with this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	please stop paying for rail concessionary travel	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree with the above changes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Well overdue	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree with all of the above, however, does this means there will be yet another bin having to be introduced for food waste.;	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introduce a cost for organisations are hosting organised events; Increase rents and fees ; Review staffing - invest in the youth as part of the work force - less wages	1. The respondent advised that they agree with the proposal.	Community groups and individuals can rent council facilities, however opportunities to market this wider can be explored. The council currently generates income from providing a range of services to partners and organisations. Further opportunities to expand this could be investigated.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Commercial property rents should be set by the market and not internally! Agree with introduction of garden waste collection charges and parking charges - in the appropriate locations.	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I would be prepared to make a nominal payment towards the collection of household garden waste collections. I am unsure, however how this money would be collected.	1. The respondent advised that they agree with the proposal.	This document is part of the early stages of public consultation on budget saving and income measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If garden waste collections were chargeable it would need to be in line with what other councils charge, £30 pa I believe. However I don't know how u stop people who don't pay putting their bin out or using someone else's	1. The respondent advised that they agree with the proposal.	This document is part of the early stages of public consultation on budget saving and income measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Sounds sensible to review these. Paying for garden waste is common elsewhere but doing so would possibly reduce overall recycling particularly given that food waste now goes into the garden waste	1. The respondent advised that they agree with the proposal.	This document is part of the early stages of public consultation on budget saving and income measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	No issues with paying for garden waste to be collected but what would happen to food waste? Really don't want a 5th bin...	1. The respondent advised that they agree with the proposal.	This document is part of the early stages of public consultation on budget saving and income measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	First two - fine! Would leasing be cheaper in the long run? Some rents could be increased but tenants need to see a standard of property for this - thinking of older stock houses and upgrades needed	1. The respondent advised that they agree with the proposal.	This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses. The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I agree with this source.;	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Lease facilities to a commercial operator, social enterprise or franchise: - Agree with this proposal as this good to fund better education for the schools. Review of rents and fees for the council's commercial properties.;	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Review of rents and fees for the council's commercial properties: - Increases within reason not to lose teh fees and rent.	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	We're financially comfortable and would be fine with paying for garden waste collection. But I don't understand how that would work when the food waste is collected in the same bin, and food waste not going into landfill is something we want to encourage.	1. The respondent advised that they agree with the proposal.	This document is part of the early stages of public consultation on budget saving and income measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	In line with other local authorities - garden waste could be charged for - although people are already paying council tax.	1. The respondent advised that they agree with the proposal.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging separately for household garden waste collection is not likely to raise money as people will simply not get it collected and/or will dispose of it in other ways (good and bad); The other suggestions are sensible	1. The respondent advised that they agree with the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Rent out all council buildings that are sitting derelict	1. The respondent advised that they agree with the proposal.	Alternative uses for buildings are considered, subject to an appropriate business case being established. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Reviewing (by which you mean increasing) planning advisory fees - yes.	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Absolutely review of fees for planning advisory services in relation to maximising developer contributions,	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Review of fees for planning advisory services and to maximise developer contributions:	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	WLC should be ensuring a significant fee from developers to offset for Servies to local communities that cannot engage within their market.	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Absolutely maximise developer contributions...particularly where planning is won on appeal to the reporter!	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Support a charge for garden waste - but what about food waste for those who don't have gardens? If people elect to not have a brown bin for garden waste, what happens with food waste ?	1. The respondent advised that they agree with the proposal.	This document is part of the early stages of public consultation on budget saving and income measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Definitely maximise developer contributions! So much development has already happened, have we missed out?	1. The respondent advised that they agree with the proposal.	This document is part of the early stages of public consultation on budget saving and income measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further. The council collects developer contributions for legally agreed investment required as a result of development. Developer contributions are subject to legal agreement and are for specific items such as infrastructure.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	No views on this. Charging for waste is normal in other Local Authority areas and would personally have no issue with this. If WLC are looking to consolodate the number of council owned buildings / properties, surely there is an opportunity to have private organisations lease / buy these types of buildings.	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Yes the council needs to review opportunities for income	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	All the others sound okay.	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	All other suggestions sound like a good idea.	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I think the garden waste collection charge is worth introducing. It will increase fly tipping in some areas though. It will mean some users with multiple brown bins will pay significantly more than a single bin user, which is fair.	1. The respondent advised that they agree with the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree need to bring income in where can get this. Other councils do this. ;	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I would be happy to pay an annual fee for garden waste, however I do think food waste should be picked up weekly! Increased rents etc would only be feasible if the leaseholder could afford them!	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions. The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Planning advisory service fee review sounds sensible, this is often an optional thing people do and charges should be scaled to the cost of the time taken for the advising.;	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	All of tye above methods of increasing income should be considered	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	3. if not removing a council service then this seems reasonable;	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Leasing of properties is a good idea for generating income.;	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charges to any waste shall encourage fly tipping.; Fees should be reviewed annually.	1. The respondent advised that they agree with the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Do not agree with charging to remove any waste. Many People will not do it and some areas will be a mess. Agree with others.	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Midlothian are already charging for garden waste,	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I would support investigation for these additional sources of income but once again, would urge caution on impacting those who need the most help in society. Increasing leases for social enterprises will have a huge impact on that social enterprise and those they work with.	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	This seems sensible but our food waste goes in the garden waste which the Council needs us to recycle to reduce waste so it isnt clear how this will overall result in not increase waste. We have a huge problem with illegal dumping where we live and this will be exacerbated further with additional costs to the Council.	1. The respondent advised that they agree with the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Yes charge for the uplift of garden waste.	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I know other councils charge for garden waste. So west lothian can start.	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I agree with all points except point one re garden waste. ;	1. The respondent advised that they agree with the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Would support looking at options for increasing income, though noting this is challenging.	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Increase the fees and charges in line with other Scottish councils.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Fine but please don't drive businesses and clubs out of our towns; ; Community is so important and these are a key part of it. ; ; They make people want to live here	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Review the rent etc but garden waste this will result in fly tipping or worse...why do we pay council tax again !!!!	1. The respondent advised that they agree with the proposal.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Leasing properties I think would be good source of income for council if they have suitable properties for this.	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	For the other commercial adjustments it will be up to those businesses if the pay or have to close.	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charges should be in line with similar councils, if they are lower they should be raised to fair level	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Sell buildings not in use and stop wasting huge amounts money on fixing work that was already done to below par standard.	1. The respondent advised that they agree with the proposal.	We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. The review of council facilities will consider a number of factors but the demand and current use of the facility will be one of the main considerations.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charge more to all businesses!	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Franchises and developer fees are a good option. Commercial rents should only be increased by 1 or 2 percent to keep employers in the area. Consider parking charges in the most built up areas to maximise revenue and reduce unsafe parking, minimal parking charges e.g 50p per 30 mins etc or something similar	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords. The council previously ruled out a decriminalised parking enforcement scheme. Without such a scheme the council could not introduce parking charges and fines.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	This all seems like a very good idea - and impacts those that can best afford it, I would strongly support the council improving its business approach	1. The respondent advised that they agree with the proposal.	The council currently generates income from providing a range of services to partners and organisations. Further opportunities to expand this could be investigated.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree with this. At some point rents and fees for commercial properties would have to increase just the same as Council Tax had to rise after being frozen for many years.	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Rent on your properties are too cheap. Increase these rents	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	2 & 3 probably OK; ; Rent for council commercial property - ok if not out of kilter with the market rate;	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	There should be a commercial rate charged for companies using Council properties. Social enterprises should not be dealt with in the same way and evaluated as a service to the community.	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords. Opportunities for community benefit leases are available for community groups and considered on a case by case basis.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Renting council properties out for weekends will help generate more income.	1. The respondent advised that they agree with the proposal.	Community groups and individuals can rent council facilities, however opportunities to market this wider can be explored.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Don't agree about garden waste, it will end up in another bin or be dumped somewhere. The rest is OK.	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I would support all of the above except the charges for garden waste collections - this will result in illegal dumping of waste throughout the county.	1. The respondent advised that they agree with the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	All services for commercial businesses should be on a full cost recovery basis, unless there is a clear social benefit to the community and the applicant is non-profit.	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords. Opportunities for community benefit leases are available for community groups and considered on a case by case basis.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If facilities are not being used then they should be rented out providing it doesn't impact on any housing areas.; Rent and fees should be reasonable to attract clients.	1. The respondent advised that they agree with the proposal.	The council currently generates income from providing a range of services to partners and organisations. Further opportunities to expand this could be investigated.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree to these except garden waste charges as this would be likely to result in increase in fly tipping.	1. The respondent advised that they agree with the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I'm in favour of raising all of these provided no cuts to pupil transport or the school day proceed.	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Rent reviews should surely be part of normal business.	1. The respondent advised that they agree with the proposal.	the Council is currently consulting on the rent strategy for the next 5 year period, with tenants being asked to comment on proposed rent increase of 3.5% and 4%. Council rents support delivery of a reactive housing management service for tenants, a property maintenance service and delivery of new build council houses.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Rent increases for the properties the council rent would be a given. As long as it was within reason.	1. The respondent advised that they agree with the proposal.	the Council is currently consulting on the rent strategy for the next 5 year period, with tenants being asked to comment on proposed rent increase of 3.5% and 4%. Council rents support delivery of a reactive housing management service for tenants, a property maintenance service and delivery of new build council houses.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Revoiew of rents and fees should be annual like any social housing rented property with the council.	1. The respondent advised that they agree with the proposal.	the Council is currently consulting on the rent strategy for the next 5 year period, with tenants being asked to comment on proposed rent increase of 3.5% and 4%. Council rents support delivery of a reactive housing management service for tenants, a property maintenance service and delivery of new build council houses.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	bulky uplift should be charged; brown bins are £35 a year in Edinibrgh	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	As long as it's an agreed payment for charges for household garden waste and not imposed because you can have your brown bin back. We pay council tax for among other things waste disposal, but did not ask for all these bins. I will deal with it myself if necessary.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	garden waste should be charged	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Cleanliness in Livingston is very important, and waste collection is an important service which should be kept free if at all possible. It contributes to the priority for quality access to public open spaces.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden Waste; I live in Clacks where garden Waste collection is charged - I compost all of my garden waste in a compost bin and "hot bin". At the same time as introducing charges would it be possible to offer reduced price bins. The "hot bin" cost >£100 but is very efficient and can take food waste as well.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Waste kerb side collection should be chargeable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Yes to getting more money from developers!; Sliding scale for commercial operators perhaps?;	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I think the developers are the people to look at. They seem to dodge as many things as they can.	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	2. developers should contribute more to the community.;	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Develop contributions should benefit the area where the development is located.	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Develop contributions should be maximised!	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Development charges should be increased, WL is more and more like lego.land, the infrastructure can't cope, roads are being closed, train station car parks are flooded and over subscribed	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Maximising developer contributions makes sense and should be done as a matter of course.	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Massively charge more to developers!	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	planning fees should go up	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Review of fees for planning advisory services - yes	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Developers need to be encouraged to contribute more to where they plan to build, not just line their own pockets	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	However a review of fees for development contributions must happen.	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Yes to charging developers more and make sure they do contribute and not use the loophole of building one less house so they don't hit the threshold. Retrospective charges should be increased, imposed and enforced.;	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Fees especially developer ones should be linked to the potential profits obtained	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Developers should contribute.	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Developers should pay more.	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Unavoidable. Housebuilding companies such as cala should be putting much more into the community to offset the damage caused by building homes purely for high income families	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Maximise on developer contributions and ensure those ready agreed are used.	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Maximise developer contributions is essential and should also look at how they contribute to the local area - planting trees, shrubs, roads and drainage local to where they are building	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Increasing fees on planning services seems reasonable and fair.	1. The respondent advised that they agree with the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I agree with increasing developer contributions - this could be a good source of income for the council considering how many new developments are being given the go ahead to be built.	1. The respondent advised that they agree with the proposal.	The council collects developer contributions for legally agreed investment required as a result of development. Developer contributions are subject to legal agreement and are for specific items such as infrastructure.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I would be happy tp pay for garden waste collection, however I would fear people would dump? Fly tip due to low morals poor attitude etc.	1. The respondent advised that they agree with the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree with proposal- benchmark with other local authorities.	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Review of rents and fees for councils commercial properties should be looked at, as costs increase every year and maintenance costs increase Reviewing of rents - Commercial property rents are undertaken in line with market evidence and under the terms specified in the lease this will not provide an uplift of x% per annum across the portfolio. reviews are usually 5 yearly; Reviewing of fees to be done in line with other council and consideration should also be given to the level of fees charged by private practice.	1. The respondent advised that they agree with the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Household Garden Waste - noted and this should be in line with other council but at the same time not making it so costly that people start to fly tipping.	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree, the Council should do all it can to generate income, rather than reduce services	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree with this proposal but not for those on low incomes also think that more opportunities should be considered for the delivery of services by social businesses and so is enterprise to provide employment opportunities for young people and adults with ASN's	1. The respondent advised that they agree with the proposal.	The administration of such a system would be cost prohibitive. The council currently has an extensive concession scheme to help those on lower incomes.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Absolutely, we are asking for people to flytip though	1. The respondent advised that they agree with the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Explore funding from other areas to continue any service which benefits the poor or less affluent.	1. The respondent advised that they agree with the proposal.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	as long as it doesn't impact disabled or elderly	1. The respondent advised that they agree with the proposal.	The council currently has an extensive concession scheme to help those on lower incomes.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	As long as it does not impact on the disabled and elderly	1. The respondent advised that they agree with the proposal.	The council currently has an extensive concession scheme to help those on lower incomes.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The garden waste charge is a good idea but now includes food waste that you wanted to be separate from landfill. Could you have a glass recycling option?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste collection charge proposals are ridiculous idea for income. Introducing these will lead to fly tipping or inclusion of garden waste in landfill or increased deposits at recycling centres leading to increased workloads there. ; If you introduce this and people don't take it up what happens to food waste? This returns to landfill undermining the green policies	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs or increase funding.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Suggest not including charges for garden waste collections as it will lead to fly tipping.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs or increase funding.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If you are going to introduce fees for taking away the brown bins, then people with just empty their bins in burns or parks.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	i would object to paying for garden waste as all i do is brush up the leaves from the councils trees,so how would that work !	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for household garden waste is hilarious as we have a maximum of 12 collections when there are no strikes. Look at how badly this has worked out for Edinburgh where they are charged for collections which repeatedly do not happen. Many people who have garden waste will simply put it in their grey bin or fly tip. Aside from this, how would you go about collecting food waste which is currently collected with garden waste? This is also going to be unfair on people who have to take care of a garden whether they want to or not eg rental properties/social housing who are on restricted incomes whilst benefitting those on higher incomes who own period property flats with no garden.,	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If you charge for garden waste you need to reintroduce food waste collections. This is a mistake and we will find garden waste dumped in our open spaces. You cannot expect to increase the Council Charge and drop key services that are part of the main services that many people get from the Council, don't do this!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	householders already pay for bin collections, you going to charge twice?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I can foresee a bit of pushback on the introduction of charges for garden waste collections tbh.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Point 4. It may be counter productive and price businesses out of WL or indeed business.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Increases to rents would be in line with existing market conditions to ensure the council's commercial property portfolio remains flexible and competitive.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Am I wrong but aren't the council taxes meant to cover most of the above. The people who need all these services can't afford to lay out any more money unless salaries all over start to rise.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	it seems we have to pay more for less	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	We already pay a lot in council tax for not a great return. To ask for further money is crass.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Is this a joke? Charging for collection of brown bin waste!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charges for garden waste collection will only add to the current problem of gardens with long grass and untended. The introduction of charges for bulkies has caused the problem of household items dumped anywhere and everywhere	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Do not start charging for brown bin garden waste collection. You should be providing this as part of our council tax services for which we already pay.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Any additional income here should come purely from the commercial sector. Hard pressed households should not be charged for basic waste removal under any circumstances.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Given that food waste is now included in the garden waste collection bins, this should be provided as part of the council tax already paid. While I understand that the council is facing difficulties and needs to reduce its costs, this shouldn't be done by reducing the services that the taxpayer is already paying for. In no business, other than government, can a company get away with providing less while still demanding the same level of pay without repercussions. The other options are reasonable, subject to a robust review and consultation process with affected parties.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Given that council tax is rising and services are being cut I'm not sure how appropriate it is to start charging for any kind of refuse collection. I also feel this will lead to more people just dumping organic waste which is a health hazard.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	although feel that charging for household garden waste would be counter intuitive and result in net add costs to Council	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Point 1. Will result in this going into black bins or dumped	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Do not charge for waste, this will be a disaster.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Household charges for waste is terrible. £25 for 5 items and it can't be wet. You can't change the Scottish weather and if an item is wet then there is no pick up. It's a joke.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Not particularly happy about charges for garden waste..Will it be individually or across council tax? But rest seems understandable. Could see if households happy to pay extra £3 year for Christmas decorations if going to charge for garden waste...	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Again, a false economy. People are going to be pushed to pay their heating and put food in their mouths and now we have to pay to have the garden waste collected? Both my partner and I work full time and will struggle so how are others going to manage this on top of everything else?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If you don't collect garden waste people.will dump.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Start charging for garden waste watch illegal dumping increase. Charge can strapped families more money.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The garden collection fee would just see more gardens becoming eyesores! During the current struggles, who in their right mind would pay to get some garden cuttings lifted when they are struggling to either heat their homes or feed their families? Have a word!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	These things will just increase fly tipping and have already been tried elsewhere and failed, when will the council look at other councils and take notice at what has failed. North west England tried charging for garden waste and scrapped this after the first year as it created fly tipping and had very low uptake.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for garden waste collection will surely be counteracted by people mixing it with the food waste as currently done via collection so how could council sensibly think it will reduce cost unless you are proposing to reduce these collections which will cost more in pest control in the long run!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Do you mean charging for uplifting your brown bin dont think that will go down well with the public its always the public that suffer	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charges for garden waste collection will see further illegal dumping (which is evident all over west lothian since council removed there 2 free uplift per year) which will then cost more to clear up than any savings proposed	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I do not agree with charges for garden waste collect stuff, especially as these are combined with food waste. It will only lead to more of this waste going to landfill.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Consider carefully when charging for waste. This will lead to an increase in fly tipping and move the burden to another council department when they need to go pick it up.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Gardens provide mental health wellbeing, improve the environment so charging people is counter productive as it may force people not to care for their sphere of responsibility, as well as fly tipping Additionally does this now mean you are going to charge for food waste pick up as it is in the same bin. This is not acceptable to charge the customer.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste should stay as it is	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging to recycle - food and garden waste isn't useful. You used to provide compost bags from this waste - charge to get them.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introducing charges for household garden waste will not work as people will refuse to use those bins.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Does the exorbitant council tax not cover garden waste removal????	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Why start charging for garden waste uplift? This is very shortsighted as irresponsible people will start dumping garden waste rather than pay for it! I also object to paying for garden waste uplift, this should remain part of the council's basic waste collection programme.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	You barely collect the household garden waste, charging for it would mean you would actually need to come for it	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Household waste charge is punishing people who recycle food waste and keep their gardens tidy.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste and food waste are currently disposed of in the same bin, this could result in fly tipping of food waste which would attract vermin. Strongly disagree on charging for garden waste. Possibly reduce frequency of uplift especially in winter months	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	People are being hit hard enough, charges for the waste, let's be honest more dumping!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The only comment I would make here is that IF you start to charge for Garden waste collections (which I know some councils do already) then there could be a problem with the food waste which also currently is put into our Brown bins. I can see many people NOT paying for the Garden Waste collection, particularly given the current financial climate and the food waste being dumped, once again in our Grey Bins	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Respondent neither agreed nor disagreed, but has raised concerns that would be considered
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Reducing waste collection may be counterproductive if alternative methods of disposal prove more expensive to deal with. Carbon footprint will rise from more bonfires. Otherwise agree.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I don't agree with additional charges for household (including garden) waste - this will result in more fly-tipping	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Collection charges for garden waste conflicts with the collection of food waste.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	A permit system would identify brown bins who have paid for garden collections
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The introduction of household garden waste is ridiculous. I can't stop my grass growing. I didn't plant it. It's already a service that my neighbours struggle to keep up the maintenance of our gardens with in the summer.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The garden waste will just get dumped 100% if it's a paid service	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for garden waste will just see it dumped all around West Lothian!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	We as a household already make several trips to the recycling centre. Garden waste is not so easy to transport.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charges for garden waste is ridiculous. The people that actually care for their garden being penalised, but the ones not giving a toot will no doubt be offered it to be maintained due to complaints from neighbours. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Please will just end up putting their food and garden waste in the grey bin and this will not help the enviroment. PLEASE DO NOT CHARGE	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	DEFINATELY DO NOT CHARGE FOR GARDEN WASTE. We live next to a bit of land that is privately owned and has not been maintained for years. We are looking after it. We have 2 bins we fill each month. (I have tried many times to find the owner but have had no luck. I have paid twice to Land Registry and been given incorrect information. They told me that there is no legal requirement to register as an owner when you buy a piece of land. When I asked for a refund they say no.); ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Rent is already high enough and if people are going to be able to look after their garden collection of garden waste needs to remain as it is right now	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Why introduce fees for garden waste uplift. This should be part of our council tax. Try cutting top management wages instead. Less chance of unkempt gardens or fly tipping which results in greater costs as council workers are then sent to uplift.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charges for garden waste would lead to fly tipping	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The introduction of charges for household garden waste would be very unpopular and ultimately counterproductive. What would be the purpose except to make a very small amount of revenue? How would that fit in with current brown bin/ recycling procedures?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The introduction of charges for household garden waste collections should not be introduced unless absolutely necessary. One reason for this view is that it does not work well in other council areas. Furthermore, would this not undermine the current arrangement of collecting compostable household waste along with garden waste. Moreover, would not charging for the collection of garden waste introduce a new administrative burden on the council.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Certainly in my council tax band I would resent any further charges on top for garden waste collection especially since the vast majority is from leaves from oak trees not in my garden which the council barely maintain. Yet the council won't entertain them being removed either.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	We are already paying for bulky uplifts which has led to an increase in fly tipping, charging for garden waste is going to result in even more.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Point 2. Economically it will slow down self investment in own property, but the housing market fragility may see a decrease in requests. For sure the big developers should pay.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Maximise income with minimum detriment to domestic applicants. Developer contributions to be reviewed in line with guidance when applicable.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Stop approving planning applications that are too large for the areas - the facilities can just manage now. Less planning means you don't have to provide more services at a greater cost. Developers don't provide money to cover it and they make huge profits.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Maximise income with minimum detriment to domestic applicants. Developer contributions to be reviewed in line with guidance when applicable.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Services have already been reduced and additional costs have been passed on to people that can not afford to pay for these services. This could lead to for example households disposing of their own garden waste in inappropriate ways.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	By putting up commercial rents you may be cutting off your nose. Many small businesses will be struggling with fuel bills and an increase in rent costs will cause them to close and so cause losses in income as well as putting people out of work.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	People are struggling with basic costs. Increasing anything at this time will have a major impact on how people survive.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council currently has an extensive concession scheme to help those on lower incomes. At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Do not agree with the introduction of costs for garden waste collections, people are already struggling, they won't pay and waste will be left or dumped in/around the community	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Unsure where residents would find the money to pay for this as households income are already stretched.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council currently has an extensive concession scheme to help those on lower incomes. At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Brown bin collections should not be charged for. The Council enforced the various bins on everyone to encourage recycling. Households had no option to keep their larger black bin for general waste.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Any charge for rubbish should not be implemented the place is messy enough and overgrown enough	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I totally disagree with being charged for garden waste collections. I use very few Council services and pay full Council Tax (less single person discount), so I'm paying rather a lot of money and getting very little back. The Council turns garden waste into compost, so there is some benefit to the Council in providing this service, and as it is now also collecting food waste in the same bin, how would we recycle our compostable food waste? Charging for the service will increase fly-tipping and is a bad decision environmentally and financially.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Do not support charges for household garden waste.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The garden waste collections - i thought this is what we pay council tax for? Or people can take it themselves to a refuse site, or pay for an uplift when needed? Too many changes are made to the refuse system. Too much money wasted on different bins which we use then dont use anymore. Needs a more coherent long term plan.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	It is the case that the Council needs to find ways to save money but still to benefit people who are accessing their services. Of course, therefore keeping the most important services free is, I believe is what the council should be aiming for. There are so many vulnerable people on fixed incomes in West Lothian, so I don't feel that charging these people for collecting garden waste is the right way to go. I believe that this is an essential service as people have no choice but to pay when they cannot afford it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council currently has an extensive concession scheme to help those on lower incomes. At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste collections is that not included in your Council Tax! Don't think this is right to charge extra for this when already paying for it when you may not necessarily use it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Ridiculous to charge fir garden waste collection after laying council tax- as per above before you introduced new bins (23?3' more then before) why it wasn't costed and planned how the garden waste collection would look like? Do now there are more bins we will start keying to get them collected? What a joke.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	if you start to charge for garden waste i think you will spend even more on fly tipping. People should pay to leese a property	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introduction of charges for household garden waste collections - No. This was proposed before and then dumped after public outcry.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	We should not have to pay for garden waste to be collected. You should encourage gardening for the benefits it gives people. You should look into using the garden waste to create compost.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste collections should not be charged for.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introduction of charges for household garden waste collections will result in more fly tipping or more people leaving waste in their garden/not maintaining their garden and an increase of pests e.g. rats.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste collections should not be charged for, this is why I pay my council tax... It is a necessary job and is the only way that estates will remain in a reasonable condition.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste will mount up as people will not be able to afford to pay for the collections	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for garden waste feels punitive to me bearing in mind it is the only service I use regularly, maybe move green and blue bins to less regular collection. After all cost are going up and maybe people will buy and therefore discard less.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	AGAINST CHARGING FOR GARDEN WASTE ,	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	As an employee who monitors garden maintenance, I have enough trouble getting gardens maintained. If we start charging for brown bin emptying this may lead to more neglect.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for household garden waste is a bad idea that'll end up in flytipping.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Increased fly; Tipping if waste collection reduced	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The proposed introduction of a charge would not impact on collections. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for removal of garden waste and reviewing rents/fees is interesting...where are people supposed to be getting this money from because they already can't keep their homes warm.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Many struggle already with the cost of waste collections.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council currently has an extensive concession scheme to help those on lower incomes.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charges for garden household waste should not go ahead. It will not raise any significant amount on income. And the drawbacks are costly: households will dispose of their waste in an unmanaged and probably unlawful way, and it will change the people's perception of West Lothian as a green, environmentally aware council	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charge the public to recycle but help the council meet their target, sorry no! Increase fee and rents but no at the moment due to the current climate. The people who rent from the council are some of the poorest paid so no to any increases	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	This proposal is focused on non residential buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Changing for garden waste i dont u derstand. It will encourage scruffy gardens and some are scruffy enough.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for garden waste services in the current climate would be yet another blow to people who are already being financially stretched to the max.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charges for household garden waste wouldn't be good, you'll wind up with far more fly tipping, or people paving the gardens and Astro turf which would be further disaster for the plant.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Again, if the Council is serious about the environment/climate, it should not introduce charges for household garden waste collections. This could also lead to an increase in fly-tipping, which would have a net negative impact on West Lothian as a place to live. There could also be a risk to wildlife and public safety if people turn to bonfires to dispose of household garden waste.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Don't charge households more when we're already stretched.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Totally against a charge for garden waste, Edinburgh is awful as a result, keep West Lothian looking great. Instead how about reduced collections and opportunities to take extra to recycling centres. Also our food waste goes in the same bin after much investment so would that be reversed?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I do not think the introduction of charges for garden waste is a good idea	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I'm paying community charge.. I'm not paying for garden waste to be uplifted? Used to get 3 uplifts a year.. now none..	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	introduction of charges for household garden waste will lead to an increase in fly tipping and people burning their own garden waste. The latter is really not desirable as this will contribute to huge CO2 emission.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	People will just fly-tip garden waste or put this in their general waste bin rather than pay. Food waste will still need to be collected, so the saving isn't really worth it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If you remove the free garden waste collection most people will simply put it in their landfill bin	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	When you withdraw garden refuse services you are once more inviting people to dump their garden rubbish in and around WL. More rubbish to join the already increasing littering and fly tipping	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introduction of charges for household garden waste collections - this will just lead to people burning their waste and increase the amount of pollution.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Disagree with garden waste	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	All the measure sound good apart from the garden waste charges not least because composting is rolled into brown bin collection. If you want people to recycle and reuse a charge for uplift is not brilliant and will act as a disincentive, especially penalising poorer householders.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for garden waste is another unfair cost on anyone who has a garden.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for household garden waste will lead to greater volumes of waste in grey bins or fly tipping. It is an essential part of our recycling programme. Garden and food waste together was a wise move for the brown bin and should not be changed.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Tax payers already pay to have their garden waste uplifted so why be charged an additional fee? As no doubt council tax rates will keep increasing so that should cover garden waste. Putting rent fees up for commercial business is going to end up resulting in businesses closing down costs are going up to high everywhere.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introducing fees at a time when families are struggling with high food and heating bills seems unfair	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If you charge for garden waste collection I imagine people would just dump it. I certainly wouldn't pay for it	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	West Lothian doesn't offer very much it sold everything and expects everything to be run privately. Our garden waste goes with our food so don't bother and our rents have been shooting up while you sell all our green space.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging a fee to collect certain waste will make people plan and utilise the system better. Not sure how that would work however now that the green food bin goes into the brown bin and if you charge people for that they will simply start dumping food waste in other bins and contaminate the recycling or fly tipping will increase.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charge for garden waste..ridiculous idea!!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Currently brown bins are being used for garden waste and food waste, would this mean another bin for garden waste? Or would the rules change again where good waste goes in the black bin? If proposing a charge for the garden waste collection, and not emptied, this could cause an increase of fly tipping, rodent/pest problems and also disgusting smells (especially during hot weather)	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Bins containing food only would continue to be collected
Reviewing income, concession	5 Reviewing income, concessions and other contributions	That will make people to put artificial grass or stones in their garden. Not a great idea	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Care needs to be taken with garden refuse etc as council tax payments are thought to cover this and we need to keep community spirit intact.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	We need ti encourage recycling, not put up barriers	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	So more fly tipping!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	These services need to be delivered efficiently before you can start changing people for them. I'd be more than happy to pay for excess household garden waste collections if the primary service was provided to a reasonable standard.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The proposal would be a charge for garden waste, not just excess
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Paying for garden waste? We should be able to have garden waste uplifted when we are paying council tax!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introduction of charges will lead to people setting fire to garden rubbish, leaving grass cuttings in the street, dumping things in nearby ground. It will cost the council more in the long run. It is unfair when people pay council tax to say if you look after that property like cutting grass and cleaning up leaves you will need to pay for it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	No to charging for household waste. Interesting you've said garden waste - would this mean separating out our food waste again???? Anything that reduces the likelihood of people doing effective recycling is a bad idea. If you want to charge why not charge for people to use recycling centres to try and change the throwaway culture.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The brown bins would still be used for food waste only. A coloured permit would identify properties who had paid for the garden element of the collection
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Already paid in the aforementioned exorbitant tax rates and business rates , they're eye watering	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	People will not pay to have their garden waste removed. Instead, how about charging a fee for the compost made with the garden refuse?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Garden waste composting is carried out by the contractor who determines end markets for the composted material
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introducing charge for garden waste will just lead to more fly tipping. It's combined with food waste anyway so totally unnecessary.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Absolute no to charges for household garden waste. This bin is also used for food waste currently, if a payment is required low income families would be penalised and we would have huge issues with vermin.; All other ideas listed appear feasible.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I do not agree with charging residents for household garden waste collections as this will lead to either fly tipping or people giving up on keeping their gardens tidy. Surely our current council tax covers this service.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for garden waste will likely be counterproductive as people will put food and green waste into landfill. Which will cost you more in the longer term. One solution could be to partner with a composting provider who can help people home compost or community compost. The big problem is pests (flies or vermin).	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	You already charge for bulky uplift.... If you charge for garden uplift, you will see people with over grown messy gardens, will devalue property values. What are WLC thinking of!!!! Shocking	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	There should be no additional fees for individual developers for improving a home.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I wouldn't support charging for the uplift household garden waste.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste/food collection should not be paid for.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Don't agree with charging for household garden waste. We have been asked to put food waste in this bin for recycling. If there was a charge the amount of recycling would be greatly reduced. Garden and food wanted would be added to the grey bin as general waste and W/L council would go down ratings for recycling.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Don't really agree with charging to remove garden waste. This should be included in our council tax. By charging for this, you run an increased risk of garden waste being dumped in inappropriate places. This may result in costing more than providing the current service.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Strongly against any charge for garden waste collection. This would lead to many people stopping looking after gardens and West Lothian becoming an eyesore. It would lead to arguments with neighbors who make an effort and pay fees having people next door letting their garden over grow.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charges for garden waste would unfortunately result in people dumping it. Same mentality as people doing whatever they could to get rid of rubbish during the e bin strike. Recycling goes out of the window for many as soon as convenience is affected or if it involves paying more.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	garden waste should NEVER be a chargeable service for residents, this is counterintuitive to tackling climate change, and goes against your other policies. This should never have made into this section. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charges for the garden waste collection, what are people supposed to do with the garden waste.....fly tip it??	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	All of the above is just privatisation through the back door. I would be against all you have stated here.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I say no to introducing fees to empty garden waste as this would mean households being charged for waste food collection as they are both in the same bin !!; The rest of your ideas are likely to leave town centres empty causing more traffic on road to out of town shopping centres and the elderly having to make more journeys by bus as unable to buy locally or carry more than 1-2 days worth of food at a time !!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The introduction of charges for household garden waste collections should be avoided, this has led to an increasing incident of tipping in Edinburgh.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Any charges should be free for benefit recipients.; Please make it easy to do the right thing ie don't charge for waste collection.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. The council currently has an extensive concession scheme to help those on lower incomes.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Waste collection is the bare minimum that the council should be providing, and core elements of services should not be subject to additional charges. ; ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If you introduce a fee for any waste collection people will just dump it. I cannot believe that you want to charge more for the council services while getting rid of half of them.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I don't think charging for garden waste is a good idea . People will end up putting garden waste in other bins as this is what happens in Midlothian Council.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for collections when we already pay council tax is ridiculous	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate. Given the budget gap, the council has to look at all options to increase income or reduce costs to ensure the statutory obligation to balance the budget is met.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I do not agree with charging for house hold garden waste collection. This should be covered through council tax charges.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	You cannot charge more for collection of ANY household waste, especially when you use that waste to turn into compost and sell it at a profit. Council Tax is already high enough. Please remember a lot of the people you will charge are already experiencing financial hardship, especially those ex Council employees who were paid off to reduce costs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate. Given the budget gap, the council has to look at all options to increase income or reduce costs to ensure the statutory obligation to balance the budget is met.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I think all bin collections should be funded by the council and this should not be a charge,	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.

This is a big no no for me.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Leave things as they are! - Crippling small businesses or increasing the amount of material that WILL be fly-tipped is NO answer! _ As for this rubbish about effectively 'privatising' public assets; - Whose 'pals' will be getting their nose in the trough???	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate. Given the budget gap, the council has to look at all options to increase income or reduce costs to ensure the statutory obligation to balance the budget is met. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The only comment here would be Gardens will end up untidy and unkempt as people will not be willing to pay for this service if anything like the uplift charges have shown	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	When I pay such a high cost for council tax and the only thing I feel the benefit of each week is waste collection, I cannot support charges for household waste collection. I live in a rural area, where fly-tipping has increased significantly in the last two years. This creates a stronger argument against additional charges. When ordinary people are pressed to eat or eat, they will just dump their rubbish rather than pay for it to be collected. The level of rubbish in our country is already at a shameful level compared to other European nations, why are we even considering options that will make littering even worse.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate. Given the budget gap, the council has to look at all options to increase income or reduce costs to ensure the statutory obligation to balance the budget is met. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	As food waste goes in the brown bin the first brown bin has to be free (or food waste will just go to landfill, which is unacceptable). But it would be fair to charge for every bin over and above the first. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If there is a plan to increase council tax then I dont agree to additional charges for the above services	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	No charges for household waste (charges could encourage fly-tipping and be a danger to public health).	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If you decide to charge for garden collection you have to provide for households to dispose of their waste at recycling centres and that will need increased opening hours and decent lifting and handling kit for households to transport the waste through their own transport (thereby increasing emissions) . The alternative is that households will also start to incinerate more garden waste, further increasing emissions. One thing for sure, the Council's existing investment in collection bins will be wasted. ; Otherwise no comment on the property income generation proposals but there will be a commercial ceiling on tariffs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Household garden waste should be collected for free	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	No need to charge for garden waste collection. This should be covered through council tax and waste collection services. This will only result in more fly tipping. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste collection charges will result in such waste being put into other bins and fly tipping.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate. Given the budget gap, the council has to look at all options to increase income or reduce costs to ensure the statutory obligation to balance the budget is met.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for garden waste will result in more fly tipping. People can't afford to eat so why would they prioritise paying for garden waste to be collected.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate. Given the budget gap, the council has to look at all options to increase income or reduce costs to ensure the statutory obligation to balance the budget is met.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Review of rents and fees for the council's commercial properties - More fleecing the people and business's (which will put up prices and/or the business's will leave as a result, therefore causing unemployment)	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Lease facilities to a commercial operator, social enterprise or franchise - Privatise our services?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Review of fees for planning advisory services and to maximise developer contributions - Ahh, more of fleecing the people?;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I disagree with charges for household garden waste collection. Especially while it is integrated with food waste collection and at a time when families are already struggling financially. This will increase fly tipping and disproportionately affect the poorer.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Entirely against charging for garden waste collection. The fly tipping and litter problem in West Lothian is terrible as is.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I don't see how you can bring in charges for household garden waste when it is also the food waste collection? I think that is unfair, and not distinguishable from Garden waste easily. All properties need food waste whether they have a garden or not, I don't think going back to small food caddies that blow away every week is the answer. I think it's a good idea to charge groups and social enterprises a nominal amount for use of space.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for recycling, ie brown bins is,for want of a better word, dumb. It sends out the wrong message about recycling and will increase fly tipping causing additional costs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Not happy about charging for garden waste as this would lead to MORE untidy properties throughout county but happy with other proposals	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If the council introduces a fee for garden waste collection I am sure that this will lead to further fly tipping - not a good idea.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Costs for waste collections should be included in council tax and not in addition to.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	School lets would become unattainable for already social enterprises and groups which would erode community links and I do not agree with this proposal - this would result in less funded clubs being forced to close and LIKELY to be in more deprived areas.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Any proposed increase in rents would be for the commercial property portfolio. Opportunities for community benefit leases are available for community groups and considered on a case by case basis.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	We pay rates for these things why should we pay twice	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Planning advisory services are already expensive.; Don't agree with charging people to uplift garden waste; The others are fine	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Not keen on being charged more- could the council. To increase not cover the bins. Worries that people will just but rubbish in the grey bin!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate. Given the budget gap, the council has to look at all options to increase income or reduce costs to ensure the statutory obligation to balance the budget is met.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	We already pay council tax so we should not have to pay for collections.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I do not support fee for garden waste	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I do not agree with the charges for household garden waste collection.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Dont charge council users for garden waste (that's silly) the council should rent business space to more companies (make more affordable, attractive business spaces)	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Disagree with increasing fees for planning services. These shouldn't be charged for at all, Council/SG set standards and hold the resident to ransom to do changes to their properties. For large developments then yes I agree, but not for the general WL resident no.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	None of these are acceptable	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Unacceptable!!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I do not agree with this people like me who live on our own with no partner and only one wage coming in each month can't afford this	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Nope	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Disagree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I disagree with all these proposals.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Not happy with this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	disagree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Disagree strongly to a charge for garden waste, other proposals seem sensible	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introduction of charges for household garden waste collections - this will lead to fly tipping;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introduction of charges for household garden waste collections - this will lead to fly tipping;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	As mentioned on a previous comment, any charges on bins regardless of what waste it is - will result in more fly tipping, which costs you more in other areas, that makes no sense from a business viewpoint!!; The rest is fine	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Please do not charge for garden waste collections. This will have even more of an impact on the environment as more people will slab their gardens and this will have a negative effect on birds and wildlife. It will also encourage more people to install horrible artificial grass, which is not recyclable in anyway, does not encourage bees or insects and has a terrible impact on the environment when people wish to get rid of it, as it is not compostable and cannot be recycled in any capacity.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging to take away my garden waste - bad!; I live in a street with many pensioners. They love their gardens. Keep them beautiful. Can't see them hauling the autumn leaves and summer grass cuttings on the recently-cancelled bus to the 'restructured' recycling centre without a few of them coming to a mischief. Never mind.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste will be dumped on waste land thus requiring councils to send vehicles to 'clean up; which will cost more in the long run	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I think the people of West Lothian have lost a lot of services recently and I don't think a charge for the garden waste would be welcomed. I think this would cause more poorly kept gardens in the area, more fly tipping.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I do not agree with charging for garden waste, this should be covered through Council tax payments.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I do not agree with proposed charges for collection on household garden waste.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for garden waste collection will lead to garden waste being put into landfill.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	An introduction of a charge for any garden or household waste collection will be devastating for the area as people will just fly tip. People will not pay for this service so will dump their rubbish.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I fear charging for uplift of garden waste would encourage fly tipping	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for disposal of household garden waste will result in an increase in fly-tipping. With the increasing cost of vehicle fuel I think twice now before driving to the other end of the town to dispose of waste since our local depot was closed down.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Does this also mean a charge for food waste collections as this is put in the same bin as garden waste? If so I hope you are increasing the pest control budget as this will just attract even more vermin than it already does. Also, people will then just add this waste to other bins resulting in the recycling being contaminated. If you will not be collecting my garden waste then I will expect a reduction in my council tax bill.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Food waste would still be collected free of charge
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging people for household waste could potentially cause more fly tipping. A nominal fee would perhaps be acceptable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	In relation to charges for garden waste...this will only encourage more fly tipping. I am co founder of Winchburgh wombles litter picking and the amount of garden waste fly tipping is bad enough as the moment. ; Fees are quite expensive already...May encourage families to live in homes that are not fit for their purpose..cant afford to move or expand	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	You will find if you start charging for brown bins many people will just use grey bin for food waste. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Will the introduction of fees for garden waste not also include food waste as this is currently combined?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Disagree with charging for garden waste. Would this result in a further receptacle? as our food waste goes in the same bin I think there will be meltdown in WL with the need for yet another bin for food waste. As the majority of WL residents appear to think that bin collections are the only thing they actually get from the council for their council tax payments (I know this is not the case)	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introducing garden waste charges would result in people using their black bins, I disagree with this.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introducing a charge for collection of garden waste could lead to people not maintaining their gardens, dumping elsewhere or putting in their normal waste, I don't think it is a good idea, not to mention the admin involved and collectors knowing which property has paid and which hasn't.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If you want West Lothian to become a jungle go ahead and charge fees for garden uplifts.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Brown bins should not be charged for. This could be recycled and sold. If a charge is made food waste will go back in the black bin and garden spoil will be dumped.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste collection charges will result in further issues within communities where tenants/owners choose not to maintain their gardens. Also could result in fly tipping which would have an adverse effect on budgets!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I don't think that it is fair to charge for garden waste collections as this is now with the organic collection which already gives some problems. This is already included in the council tax.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	People will generally not pay for garden waste collection and dump it somewhere unsuitable they already do	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	We cannot possibly charge for garden waste collections when you already charged it so food waste was placed in the same bin. I suggest it may take more investment to introduce a new garden waste only bin.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Unfair to charge for garden waste uplifts. People will either neglect their gardens or put the waste in the general bins.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Whilst I appreciate we need to introduce charges I suspect that charging for the uplift of garden service will increase fly tipping within the County	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I completely disagree with the introduction of waste charges for garden waste, the people of West Lothian already have a large number of bins that they have to manage, separating waste and putting out differing bins each week. If we start to charge for garden waste we may put off people growing their own veg etc. which is counterproductive to carbon reduction, I strongly believe this one item will also lead to an increase in fly tipping.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	No - you are a publicly funded body to provide services. The problem I have with this is paying taxes already. Council track record to administer extra revenue should not be core and, let face it, the council's ability and track record to cost effectively administer the same is appalling. What %age of extra monies raised will go towards extra administration? I think we all want to see more transparency of tax and certainly not give more tax raising powers to local government which revenues will sink into a black hole	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. The budget gap faced by the council is a result of funding being insufficient to cover the increasing cost of delivering services due to factors such as population growth and indexation. The council is subject to rigorous external audit and both Audit Scotland and EY have confirmed, over a number of years, that the council has robust financial management.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I think rents for commercial properties should not increase. Many are small businesses with slim margins. It could lead to empty units.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I object in the strongest terms to charging for brown bin collection. This is what we pay our council tax bill for in the first place. Charging will result in even more fly tipping.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	No to fees for brown bin collection but could be paid for uplifts	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Stop giving so much to those who aren't paying for it and look at the neglected interests of those who are paying. All four of those ideas are just taking more from people and companies who are paying so we can give more to those who aren't. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introduction of charges for household garden waste collections will be another opportunity to create a greater divide between those who have and those who have not. I thought WLC promote equality and equity.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	NO;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Cost of living is bad and now you are wanting to charge residents more for services that are essential?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for brown bin collections would lead go an increase in dumped rubbish and burning of garden waste. People not using brown bins also does not build the habit of recycling and would lead to people using their other recycling bins less.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste collection should be free	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I would be very against charging for household waste.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introducing charges for household garden waste collections will have an effect on recycling centre for those who do not wish to use the service.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Waste collections are already included in council tax	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste is waste, unfair charging for that.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Don't introduce garden waste fees, it seems to be cost ineffective and will only lead to people using others bins.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for household garden waste collections will only encourage people to dump their waste, this is the most difficult waste to transport to a recycling centre!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	There should be no charges for collection of garden waste, given this was introduced as a recycling measure by the council itself many years ago. This would only be back tracking on a previous agenda, with residents already paying enough council tax with the right to get this collected.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introducing charges for household garden waste collections would probably result in even more fly tipping.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If you are going to charge to remove my garden waste then surely my council tax will be reduced.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charge for garden waste will lead to more folk disposing of this in grey bin and fly tipping	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Again this will just encourage people to dump their waste rather than pay to have it collected.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	EXCEPT household garden waste collection. This will result in flytipping and the food waste is collected in this bin which will encourage vermin.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging fir garden waste collection will end up with more fly tipping and more bills in the ling run.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Don't agree households should be hit with another charge. That's what the community tax is for. This will only encourage people to dump their garden waste on any open area they find.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	With regards to the suggestion above about garden waste charges, I'm unclear if there would be any short and medium term benefit to WLC but rather cost (new contracts, collections, bins, advertising & behavioural change education). I'd also question if it would lead to folk getting rid of greenery, with a cumulative negative impact on biodiversity, surface flooding and wellbeing?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The costs of implementing the service would be borne by the charge related to the service

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden Waste Collection should not be charged for as we already pay for it through our council tax.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Are you mental charging for household waste is absolutely diabolical. Adding charges for bulk uplift has already increased fly tipping!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for garden waste l'll lead to WLC streets looking untidy/messy with some people dumping this on the streets or in public Arras.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Against the introduction of fees for garden waste collection as it creates division between neighbours. It may encourage some people to bypass charges by depositing waste in someone else's bin or by just dumping waste along country roads.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Per my previous comment, charging for waste collections is likely to result in increased fly tipping and risks to public health.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste collections are not a target for revenue, we pay a large sum in council tax and any attempt to charge us for a basic service will result in fly tipping and unhappy electors.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If so food waste is likely to be placed in general waste bin which will increase landfill charges for the council. In addition, charges will likely mean an increase in flytipping.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Any charge for emptying bins will only encourage/increase fly tipping and inappropriate use of other bins leading to spoiled lorry loads of recyclable waste. Look at what happened when you decided to charge at recycling centres a few years ago ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste collection charges will lead to even more fly tipping.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Will garden waste charges result in increased fly tipping?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for household garden waste, which now includes food waste, would surely mean that people would put garden and food waste in their household bin therefore going to landfill if they felt they couldn't afford to pay for garden waste uplift	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introduction of charges for household garden waste collections will be another opportunity to create a greater divide between those who have and those who have not. I thought WLC promote equality and equity.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Not in agreement with garden waste charges	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	People should be encouraged to recycle so dont agree with charges for garden waste	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	An introduction of charges to remove waste will see more fly tipping and fires being set - not everyone can afford to pay this!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Do not agree with charges for garden household waste collection.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	STRONGLY DISAGREE WITH CHARGING FOR BROWN BIN REFUSE CHARGES. THIS IS A PUBLIC HEALTH AND SAFETY ISSUE AS THE BROWN BIN IS OUR ONLY MEANS OF DISPOSING OF FOOD WASTE. ALSO REFUSE REMOVAL IS ALREADY INCLUDED WITHIN THE COUNCIL TAX	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	No to anything that results in fly tipping.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	This would lead to more fly tipping.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Not happy to pay extra for garden waste collection.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Against charging for waste collections	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Disagree with charging for brown bin uplift.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Disagree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	No changes recommended in this field. Do not put extra burden on people	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Should not bring in fees for getting rid of rubbish - not a good idea at all again this will encourage fly tipping.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Seriously? Reducing services, removing concessions, reducing public transport and now garden refuse?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	i do not support the introduction of charges for household garden waste. the council has already stopped the collection of the food caddies. this is with garden waste now. changes to the bin (Green/Blue) whilst save the council money and maximize the value in waste/scrap the effect is felt by the customer. if more changes come to waste collection i would request this aspect is taken off my council bill and i will take my waste to the CRC. ; ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If you charge for garden wast collection I will just put this in the black bin so it will cost you money. Might even hid it In The bottom of the blue one. So if you want to have fun. ; ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introducing a fee for garden waste would encourage residents to neglect their gardens and would have an overall effect on neighbourhoods, there will be grass strewn everywhere and bags dumped throughout west lothian. What will happen to food waste if that is normally put in the same bin as garden waste - would there then be funds spent on reintroducing food caddys again?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I don't think garden waste should be charged for as food waste also goes in the brown bin. If you charge for garden waste collection then people would not recycle	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Why do I pay council tax if my brown bin will then be charged? That's insane. As usual, people will just dump what you don't collect or contaminate bins. This is a mental idea	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for waste collection will result in it all going to landfill. Not very green/environmental.Charging companies for council services seems good, as they sem to make alot of profit from their work. Putting up rents/fees in the current commercial environment may not be good, as it make be the final straw that put some under.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden household ,never , take all and composting ,Falkirk and yourselves already do , charge ,cheeper , high fees for developers as this is not a city but an area of adventure , less fees mean more business ,means more income not rocket science , and well if you want a lot more money in business is key and so is fees.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Not a good idea. You could introduce a restriction to the amount of visits to the tip with the opportunity to by extra visits. But also in this case that may notbe the best idea ever.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Fees on any kind of waste are a bad idea. This will cause increased illegal tipping and tension between neighbours and council.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Dealing with many customers who are also struggling to make ends meet I doubt this will bring in much income and lead to more shops closing, waste in streets and services going unused.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charges may lead to more fly tipping in the county that the council will ultimately have to clear up at an extra cost	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I m strongly opposed to making charges for household garden waste. I only put my green and blue bins out occasionally but I do rely on having my garden waste removed. ; if you add a charge it means I will be subsidising the removal of waste from households with large families and then paying for my garden waste to be removed.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introduction of charges for household garden waste collections: - No the reason what would then happen to the recycling of food waste.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I don't think you should start charging for lifting brown bins (garden waste) as this is also food waste and this service has already been cut. I personally only get my brown bin emptied once per year as I put my food waste in the grey bin and only have a small garden so I would be getting charged for a service I don't always use. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	No charges to household waste should be added. Increase charges for commercial housing developers to pay into community.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	garden waste charges will add to illegal dumping. increase fees when the country is in a in the state it is will reduce planning services reduce leases and commercial properties will remain empty.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping. The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charges for household garden waste might encourage fly tipping which was a great problem during lockdown.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Cannot start charging for garden waste collections as we got rid of the food caddys and legally food cannot be sent to landfill. If you look to restart the food collection service then really how much savings are being made by charging for garden collection.;;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The charging for ny regular uplift of refuse I not acceptable to LLBCC. Anything that affects the advice available around planning is also unacceptable to LLBCC. We have an ongoing battle with developers who need no weakening off the barriers to their rapacious approach to our community.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. The council will continue to deliver statutory planning functions that meet the requirements of planning legislation. The council collects developer contributions for legally agreed investment required as a result of development. Developer contributions are subject to legal agreement and are for specific items such as infrastructure.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	LLBCC would have a substantial concern over the WLC approach to maximising fees from developers. That process is one that LLBCC already has substantial issues with around the allocation of the income. The approach of WLC that the monies are used for the benefit of the local community, that being the whole of WWLC area is not one LLBCC accepts as reasonable. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. The council will continue to deliver statutory planning functions that meet the requirements of planning legislation. The council collects developer contributions for legally agreed investment required as a result of development. Developer contributions are subject to legal agreement and are for specific items such as infrastructure. Use of contributions is determined by legal agreement.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I don't agree that payment is asked for for basic garden waste collection although extra perhaps could be charged for	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Increased rents and fees for commercial property also seems to be penalising the people trying to make the area better. Small business already pays an extraordinary amount for business rates this will only push businesses to close, leaving the council with less income.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords. Non domestic rates are determined by the Scottish Government.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I've always felt it's just a matter of time before you's charge for collection of house hold garden waste. Personally I wouldn't pay for this service to me this is already covered under the council tax it's like another stealth tax.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	do not introduce charges for household garden waste collections. Being charged for gardening is ludicrous	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for garden waste collection is only going to increase the fly tipping in the area that the council can already not control.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charges for garden waste collection might lead to increased fly tipping	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	WLC has one of the best authority refuse collection - wouldn't like to see it cut	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Again, disappointing that council tax is paid but extra charges will be made for garden waste, with the reduction in Recycling facilities this will leave dumping grounds a potential	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I already pay council tax for bin collections - surely the garden waste collection is included in that ? Are you going to penalise for people who take pride in their garden ? bonkers !	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	There should not be any charge on people for their garden waste as their payment to council tax should be covering it	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	We hear alot about how the public sector should look at business for inspiration, but charging to use garden waste bins is hardly inspiring.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If a charge for uplift of garden waste will force people to flytip	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	garden waste charging - will people pay & if not, what do they do with their brown bin waste? Does it not get put in general waste & thus cause problems? Light not generate much income but cause a big cost. What has councils that have adopted, such as Edinburgh, seen happen. Will it result in flytipping?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	How can you charge for garden waste when it is mixed with food waste. It will just mean food waste put in grey bucket landfill. Don't do a knee jerk policy without looking at the implications of that policy.; If leasing means not available for communities unless they pay no.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	This document is part of the early stages of public consultation on budget saving and income measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Bad idea all around. What will the place look like with dumped garden waste everywhere because that's what will happen.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste? Such as grass? Honestly if you charge for this people will not pay/use the system and youll find things being dumped	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charges for garden waste is a ridiculous idea and will not be supported	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Waste charges will encourage dumping.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	There's already a problem with people fly tipping garden waste in woodland areas, changing the ecosystem and making it look a mess. This will likely increase if a charge is brought in. If I'm charged for garden waste collections, I'll just dump it in with the general waste.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If you do that it will lead to more folly tipping like it did when you increased charges for bulk uplifts	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introducing fees for household garden collections could lead to other costly problems to resolve, e.g. an increase in fly tipping or cross -contamination of household waste.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Absolutely not for the brown bin.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Absolutely ridiculous to charge for garden waste removal. I already have to cart glass recycling to the centres because this isn't provided but now I'll end up having to cart garden waate with me too	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Totally against the proposal for collection of garden waste. This should be one of your main priorities for free.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Disagree to waste charged bins should be emptied for all or why do we have council tax ; ; Agree with others ; ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charges for brown bin to be emptied will lead to more households putting garden waste into existing bins instead to avoid the charge.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I feel the charging for garden waste is unfair, My garden has artificial grass and very little plants.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Do not introduce fees for garden waste, there will be more dumping as a result, this reverses green promises and will result in environmental harm people are tasked with cleaning up leaves from council trees and properties and this is the least they could do.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Don't think you should introduce charges for garden waste as people will just put the rubbish in black bins. Also, government policy to minimise waste going to landfill. Wouldn't have thought it would generate much. Yes, developers should be paying more given the profit they make on houses, should be linked to the level of profit and might also keep prices down (or lower them).	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	We pay a lot in council tax already for ever reduced services.; No way can u charge for garden waste, what an absolute disgrace, especially in these times where everyone is struggling to pay for basic bills.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introduction of charges for household garden waste collections - I feel very strongly that this should not be introduced in West Lothian. While I recognise that it has already been introduced in other LA areas such as Edinburgh, to introduce it in a more rural/more green area such as ours would not be fair. Myself and many others routinely fill our brown bins not with our own waste, but with leaves that have fallen into our gardens from *council-owned* trees. The people of Edinburgh, for the most part, do not face this issue. If people don't have the choice of removing these trees (which I'm absolutely not saying they should) then they should not be charged for the means to dispose of the fallen leaves and branches which fall on their private property. On top of this I also have serious concerns in terms of what this would mean for food waste collection - would we be reverting back to kerbside collections for this, or will people just start putting it in their grey bins again? There's no way that a household would opt to pay a brown bin fee for food waste alone and it just seems so misguided and backwards to be removing recycling options in the face of current climate change issues. Please re-think this measure.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I can't agree with an introduction of fees to uplift residential waste, staying in a flatted property the council refuse point blank to supply me with anything other than a tiny black bin that they then uplift every week. My plea for blue/green bins fell on deaf ears despite the fact I am a ground floor property & keep the bins in my garden. Any changes to household waste/uplifts has already resulted in an increase in fly tipping.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	no , the garden waste collection is already part of our current council tax , changing that again people are goign to have a issues with misappropriation and arbitrary cost changes to council tax especially after a long time not picking up the rubbish.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping. Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	You should always maximise income but not against services that are paid for already. Waste services should not attract extra. Rethink	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping. Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Raising rents...no! ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charges for uplifting garden waste is likely to result in more fly tipping so I don't think this is a good idea. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for garden waste discriminates against those in financial difficulty or without a car. Ultimately, some people will end up putting garden waste in the main bin.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	It would be unfair to charge for garden waste as most of our garden waste comes from leaves in adjacent public spaces. We do have a garden but no grass.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste would be provided as part of our council tax. £230 a month is sent to the council and a basic requirement is for bins to be emptied.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping. Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	A fee for household garden waste collections will result in increased fly tipping and overgrowth. There are residents who cut grass on council land for child safety who have to dispose of this grass in their own household bins because the council do not cut the grass and when they do, they leave the cuttings to blow all over the road instead of collecting and disposing of it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	House hold garden waste should not be chargeable. My garden accumulates several bin fulls of leaves every year blown into my garden from surrounding woodlands which are not on my property and belong to the council or other developments. I don't see why I should be penalised for the clearance of these when being done in an environmentally friendly way	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Do not charge to empty bins. This will do nothing but encourage fly tipping. What a ridiculous idea. This is what we pay council tax for.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping. Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Any change to refuse collection just results in more fly typing, please do not charge for garden waste. Instead make compost and sell it?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	1. Fly tipping will increase - the council will then need to spend money clearing up the mess - a lose/lose situation I would think	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	introducing extra for waste collection i would disagree with. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introduction of fees to cover household garden waste will result in increased fly tipping and littering. Currently the council os struggling to keep up with this, relying on community volunteers. In this financial year we have already had an increase in council tax, further increases are unsustainable for households in the current cost of living crisis.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping. The council is not relying on volunteers but people wish to improve their local environment by volunteering.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Why not charge us for breathing in the community, or is that next , we pay already for services such as emptying bins and half of the time they are not being emptied.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	This sound like just passing the cost on to the service users who can't afford it. Charging for refuse uplift will only lead to an increase in fly tipping for sure	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Please do not introduce charges for garden waste. It will lead to more fly tipping. Look at the council tax charges for residential properties-they are outdated in relation to what the property is worth.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping. Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Don't agree with charging extra for collection of garden waste. ; Are commercial let's I line with other averages?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Commercial rents are typically lower than those from private landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	No charge for garden waste uplift	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Rent to commercial property and garden waste should NOT be considered	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Commercial rents are typically lower than those from private landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	As I maintain the grassy areas around my house, I use several brown bins. We don't have a company that still maintains these public areas. I would certainly not be willing to pay for brown bin emptying. Tha public areas can become an eyesore in this case.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Commercial rents are typically lower than those from private landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Don't agree with charges for garden waste it would stop people recycling	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Commercial rents are typically lower than those from private landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste charges should be included with council tax. Start charging extra + proposed cuts to waste recycling centres will see vast increase in fly tipping costing WLC far mor than any savings and possible revenue	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for garden waster pick up will likely result in dumping	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Of the above proposals, charging for household garden waste collection is the least attractive. Not only will this hit households, particularly vulnerable ones, already impacted by cost of living increases across the board, it is also likely to lead to fly tipping and people exploring alternative means to dispose of waste. As household garden waste collections also include food waste, this will result in a greater proportion of food waste going to landfill rather than being made good use of.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for household garden waste collections means charging for food waste collections too. We have enough fly-tipped waste. The introduction of a fee for disposal of garden waste will result in more garden fires and an increase in air pollution.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If you introduce charges for garden waste you can deduct this from the council tax we pay and remove the travel restriction on the forms of transport we can use to take waste to the recycling centers. You cant eat your cake and keep it. I every autumn I have 6 weeks worth of tree foliage (not even my trees) which accumulates, council doesnt sweep the cul de sac so I do it. Cleaning the drain grills in the process to avoid flooding. Perhaps council needs to be more transparent on where all the money gets spent on such things because it sure as hell isn't in our area.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	To be honest getting our waste collected is the one thing where I believe the council should cover this, ri charge for this is a joke	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Should not be introduce any charge for garden waste collection separately . It should cover from council tax . ; Should increase rent and some well earning people also taking lower rent benefit . Should be reviewed on regular basis e.g every year . Should provide a income threshold to get lower rent benefit . Higher income people should pay based on market rent basis .e.g three bedroom property's rental value should be average 800pcm . Pensioner and low earning people should get priorities ; ; Good idea to increase other fees and should be reviewed on regular basis and fess adjust with inflation rate	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If WLC are trying to encourage improved biodiverse environments in West Lothian then adding a charge for garden waste removal may push people to pave over gardens and cut down hedges, trees and bushes to cut their costs. ; This would reduce the number of green spaces with plants, shrubs and trees, and impact on the ability to create biodiverse environments for birds, pollinators, small mammals and reptiles. If WLC are also trying to reduce car use then forcing people to transport their own garden waste to a council recycling centre would also increase carbon emissions. It also disadvantages those with no transport who wish to have a garden. Waste from larger trees and bushes cannot be put into personal composting bins and needs to be broken down/chipped by commercial machines. ; In our current climate crisis removing a service which supports people maintaining garden/green spaces which includes trees, shrubs and flowering plants would go against the ethos behind some of the COP26 agreements made in Glasgow last year. I strongly believe this should not be a paid service.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	We should not be charged for garden waste collection	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	People will simple cease using the brown bin and dump garden waste wherever. Are you planning to provide larger black bins again or are we all going to suffer from rat infestations? ; As for planning: The service is atrocious. No pre-planning services, dubious and inconsistent decisions and councillors and committees with personal interests and agendas. I would suggest firing and replacing the lot.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I do not agree with introducing charges for household garden waste collection.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	please dont charge for household garden waste collections. Recycling rates will reduce with stuff being put in black bins or dumped. Can the council not sell the resultant compost made from garden waste?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for garden waste collection would encourage people to not tend their gardens or dump the waste elsewhere.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I'd feel extremely aggrieved at having to pay for the uplift of my garden waste when the vast majority of the contents of my garden bin is leaves from trees that don't even belong to my garden.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introducing a charge for garden waste collection will increase flytipping. This will also impact on food waste recycling, leading to an increased carbon footprint for many.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Do not increase charges to subsidise outsourcing of services. If a charge was for garden waste this again would encourage fly tipping and cost mote in the longer term	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The introduction of charges for household garden waste would surely just result in residents dumping garden waste in surrounding areas. To me this would raise concerns about pest control and what effect the waste would have on the surrounding areas.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	oppose the idea of charges for garden waste particularly as its integrated with waste food ; ; look for opportunities to increase income by selling services to individuals or organisations or other councils	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Reducing waste collection will increase fly tipping - refuse collection is a core Council service,; ; Otherwise, agree.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping. Garden waste collection is one of the areas where it is determined that councils can charge as it is an additional waste collection service.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Rents and council tax are dear enough both of us work don't drink smoke or so drugs and struggle ; Why should there be an introduction for waste and garden collection	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	don't lease as the service will worsen. review rents but don't put people off buildings	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	People needing advice should be a free service.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	This proposal relates to planning applications. The council continues to provide the free Advice Shop through the Anti-Poverty Service.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	In current climate it would be difficult to pay more as my budget like councils is stretched to it limit	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Wr pay council tax.. why do we need to pay for a service already up and running...	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	People don't have the money to pay anymore	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	No increase on rent or house tax as we pay to much for far to little as it is.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Fees and rates of council commercial properties are killing the high street, small family run businesses cannot afford increases on top of energy price increases and reduction in service. Evident in every area of West Lothian you visit - the highstreet is dead and full of shuttered buildings. Takeaways and beauty salons are over running the area and generally lasting 2-3 years before being replaced by the next takeaway venture.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords. Council owned shops have high occupancy. Empty units tend to belong to private landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I don't know	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for household garden waste collections sounds silly as we all just got new bins to put our food waste in with it. If people are to be encouraged to recycle food and garden waste it should be free	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If we charge for garden waste what happens with food waste	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If you start charging for garden waste people will just start launching it in their black bins.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The commitment to COP26 and COP27 by the Scottish government should mean that recycling remains a priority for the council any attempt to charge for that service would see a decrease in recycling in many areas of West Lothian due to cost impact and therefore an increase in landfill costs due to more general waste	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introducing charges for household garden waste collections (assuming that this includes food waste, as per the current brown bins) would be negative - having these provided for no charge would hopefully mean that these are used and can help cut food waste, costs and associated negative impacts for the planet. Introducing a charge would mean more food waste, less sustainability and less people able to do so due to costs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I think I'd be wary of introducing charges for garden waste. people will just end up putting it in their grey bin, or fly tipping. Garden waste is something every household produces, so there needs to be a route for disposal of this material.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for garden waste, more money spent on food bins?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I don't think it is fair to add extra cost for garden waste when everyone is using this, and we already pay a lot for council tax which is consistently increased every year.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	household garden waste collections should be part of our council tax, this should not incur a discretionary charge.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charges for garden waste collection will no doubt lead to problems, and greater costs, elsewhere.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I already live next to a dumping ground (so no change for me);	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I personally wouldn't mind paying for household garden waste collections however it is an essential service for many who might not be able to afford it and might just dump there garden waste. ; ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I work in retail and know for a fact that your employees are well paid ; Stop the stupidity and wasting money on bins expecting everyone to have plenty room for them ; Stop wasting money on things that don't work eg 20mph zones that weren't law enforcement as well as lots of other stuff that you do ; Taking away big grey bins and making them small ones ; just leave the big ones and save money ; ; The rubbish will lie about the streets ; You should be encouraging people to maintain their property and charging ppl certainly doesn't ; Xmas lights at the centre half are broken just leave them down they make it look tacky not festive	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If households are to pay for garden waste collections - this may encourage fly tipping as households may be reluctant to pay and dump waste elsewhere.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	It needs to remain affordable for residents. Charge for household waste might mean more fly tipping.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Please don't remove the household garden waste collections - it will end up with people fly tipping everywhere.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Cannot charge for garden waste as it contains food waste as directed by council	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Stop the charging for household waste- that's what the council tax is for!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for the collection of garden waste collections would doubtless lead to increased fly tipping. This would cause unnecessary expense for landowners in the area. I do not agree with this proposal.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I would not agree to charging for collection of garden waste. I live in a rural area of Bathgate and already have issues with fly tipping - I believe any charging of collection of bins would increase people dumping their waste in the countryside.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	In regard to charges for garden waste, I and my family already compost at home and fill up the relevant bin, charging us would be foolish as you gain from saving money for your own use rather than purchasing compost for open areas. I would not mind purchasing already made compost below shop prices as I need quite a bit for gardening.; ; I do understand cost is incurred from use of facilities, staff working and maintenance of machinery however charging people would put us off recycling the relevant materials - having the array of bins is already an eye sore without us paying for them to be emptied.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	However additional charges to households in the current climate should not be an option.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	What would happen to the food waste? Have to pay for that to be removed as well? This would only instigate fly tipping and rodent issues.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charges for household garden waste collections - While I agree with the concept, I would recommend that this is only implemented out with summer months when everyone is needing to maintain their gardens. We have also had a change to household waste collections where we now include this in our garden waste, how will this be separated again without causing confusion or adding another bin to houses?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Not sure why the council would think introducing a charge for picking up household garden waste collection, is a good idea considering the removal of the 'free uplifts' on other waste failed, and has probably cost the council more money in the long term dealing with fly-tipping	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I wouldn't agree the introduction of charge for household garden waste collection (but there is no fee amount given) as think this would inevitably encourage and increase fly tipping or garden waste going in grey bin, adding to waste going to landfill. This would undo the good work already being done by the Council	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Need to allow garden bonfires in that case. If garden pickups aren't already included in the council tax. Or accept garden waste will end up in the gutters and on the pavements or over the fence. Resulting in costs simply moving elsewhere.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The introduction of charges for garden waste removal will just cause people to dump it or put it in the black bins rather than pay to have it removed. This would set the region back in terms of reducing waste sent to landfill.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste bin charges will just increase dumping as we don't all have cars	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Disagree with charging for garden waste as this can be recycled and used by the council on its parks/gardens.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introduction of brown bin charges - No. It's likely to increase fly tipping which simply increases costs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If you start to charge for garden waster collection, I'd (a want a reduction in my Council Tax as I understand that to be a service I'm already paying for and (b you can have your brown bin back as my garden is full of bins now after the introduction of the green one. ; I might take my garden rubbish to the local recycling centre and if you close them, I'll just burn stuff in my garden. ; But I won't be paying twice for a service.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	In my view charging for household garden waste collections will just result in roadside dumping and burning of waste in back gardens. It will generate next to no income. The brown bin collection will run at lower capacity and reducing the frequency of brown bin collection will result in public health issues.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charges for garden waste collections not acceptable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If you begin charging for garden waste to be collected you may find people will dump their garden waste as due to the cost of living rise many families can't afford it	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Given that in WL the brown bins are also used for food waste I don't see how you can justify charging for these to be collected. The food waste will end up going into landfill - causing emissions from landfill increasing	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Isn't our household waste collection already paid through our council tax?; ; This is crazy	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Why the hell do we lay council tax if you are just going to charge us for the services we pay for	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for waste collection and reducing services as recycling centres leads to more fly tipping and is counter productive	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	There should not be an extra charge for garden waste this is covered by council tax fees you may end up with people dumping there waste elsewhere with cost of living crisis people cannot pay extra money on top of council tax also which pays for this service.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Folk will just dump garden waste anywhere, thought you wanted garden waste to make compost etc so helps the environment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charge for waste collection is a joke, as currently bins won't be collected if the lid is even open a little bit.; plus, the bin men tend to leave behind any scattered rubbish. Increase the recycling centres.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If councils are to introduce charging for garden waste, will they reduce council tax fees to recognise this	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	No to the introduction of fees for garden waste waste. People won't be able to afford and waste will just get left lying about and drop the standards of housing. This should just be covered in the brown bin collection.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	We already pay a fortune in council tax to get our bins empty and now you want to charge again for garden waste. What about all the leaves that end up in the gardens from council trees? I won't be paying for uplifts of these so you will need to tell us where you would want these put.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for garden waste uplift will just mean more fly tipping in the street. Another tax on those that work but get no financial help.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Do not dare charge for household garden waste collections or you may find it dumped outside your offices. We pay an exorbitant council tax rate already. ; How on earth would local residents remove garden/brown bin waste? The Brown waste bin in West Lothian now includes waste food mixed with garden waste safely from their own property. This waste would end up squeezed in Black general waste recycling or dumped at roadsides. Your levels of recycling would go down as more people will put this waste into the black bag stream so you will increase cost to the council.; The level of rats & vermin would increase making West Lothian an unsafe, unsightly place to live. ; ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Pay for brown bin collections? People will just put it in the grey bin!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charges for waste will increase fly tipping as it always has. It will cost more to clean up than collection. ; Council tax should incorporate charges for all refuse collection.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Concern might be that people source other ways of avoiding these charges that, in the longer term, could be more damaging and expensive for the council?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Household and garden waste collection are already at a minimum. Charges for a monthly collection if that is outrageous. Council tax is too high already	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Huge rises may result in loss of income	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Why should we pay for our waste to be picked up when we have to pay council tax? Think that's terrible and robbing	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Additional charges for house hold garden waste may backfire,don't want fly tipping instead.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introduction of charges for household garden waste collections will definitely increase incidences of flytipping	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	NO to introducing charges for household garden waste collection - the poorest would suffer most & be seriously discouraged from maintaining their gardens and the pride in community that can engender.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	There should be no charge for the collection of garden waste when this is being combined with food waste and could be an income generator for the council if put through an ADR/windrow/biomass or similar. We are already charged for bulky uplifts and the operational times of the recycling centres make it hard for any full time employed person to attend to dispose of waste themselves.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	CRCs: the existing provision of five community recycling sites is a higher level of provision than in most other areas and ensures good access for residents. The council does not charge for household use of community recycling centres and aims to match opening hours with customer demand to ensure optimal efficiency.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charge for garden waste?...its biodegradable, people will just make a pile in a corner or compost. What a waste of money for trhe brown bins! ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Having food waste put in the brown bin has already been imposed without consultation so now mixed. If garden waste is to be charged for, people will just put food waste in the grey bin for landfill. How would this improve recycling? This has not been thought through at all. ; Xmas trees should be mulched not just going to landfill.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If you are going to charge for garden waste again we hope it doesn't become a problem as people use other items ie a neighbours bin or landfill or any other bin Or fly tipping	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste charges could lead again to fly-tipping and properties gardens not being maintained properly. Are you remembering that members of the public are in the middle of a cost of living crisis too ?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging to any waste collection will lead to illegal dumping as it is prominent in other council areas.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	As I'm required to pay Council Tax and this Wii be an ever increasing burden on all domestic occupiers, I don't see why I should pay more to have my bins emptied. Why not empty two bins one wee and two a fortnight later thus all bins are emptied in two weeks instead of the present four.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Don't agree about garden waste, it will end up in another bin or be dumped somewhere. The rest is OK.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I do not understand fee for garden waste collection - is it not part of the service paid by our council tax?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden Waste, The Brown bins also take FOOD waste, the contents of these bins are Compostable = Valuable £££ Make compost Make money and/or use for Power generation, the gas produced IS re-usable and controllable unlike landfill. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I would support all of the above except the charges for garden waste collections - this will result in illegal dumping of waste throughout the county.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Many not in a position to afford additional costs can barely afford essential so fly tipping could become a problem	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	This will lead to garden waste being dumped illegally.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charge for garden waste so my food would all be going in the grey bin ☹️ ; ; Council tax here is more expensive than Edinburgh I mean who needs 4 bins and no glass bin crazy!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Would worry introduction of fees for waste would lead to fly tipping or people replacing green spaces around there homes with hard landscaping	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree to these except garden waste charges as this would be likely to result in increase in fly tipping.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Fly tipping: is illegal and perpetrators may be charged and/or fined if caught. The introduction of charging for bulky uplifts was in line with the approach taken by most local authorities in Scotland and charging for a service is not an excuse for fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	It should be remembered that you currently promote commingled treatment of garden and food waste. The last thing we need is another coloured bin to allow for garden waste collection to become a separately chargeable service.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Disagree regarding waste service. This is probably the only really service the majority of people receive from the council.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Planning - care has to be taken not to stifle future development or improvements to the existing property due to over charging ; Leasing to commercial operators can only be done in line with market evidence	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	An introduction to household garden waste collections ? You do realise that this will only lead to an increase in fly tipping which is already an increasing issue in rural areas in turn an funds raised will just be robbed from Peter to give to Paul as the funds will be required to combat the increased fly tipping from those who cannot afford to pay further additional costs	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste collection should continue to be free. Explore other areas.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Do not agree with charges for brown bins as you have already included compostable waste in these bins and how are people meant to dispose of this waste themselves if they cannot afford the charge. ; This will lead to fly tipping and create more problems.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I think to implement charges for garden waste would increase fly tipping, this is a service that should be covered by the council tax revenue -the uplift is not weekly and is done on a rota so should not bring in additional cost. It could be taken to a location that could then be used to make compost (if suitable) and the compost could be sold to the public; ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Bad, bad...people don't have many. They will stop care about waste and will dump around where they live. Actually is already happening	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	i do not support you charging for garden waste collection, what extra plans /costs for waste food then?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If you change for bin collections flytipping will increase.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste Again as pensioner over eighty it is a needed service which I pay for in Band E council tax.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	There should be no charges for garden waste collections - this could be counterproductive with such waste being dumped. any leasing of facilities to a commercial operation would have to be carefully monitored.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Higher rents and more charges in this climate is a worry for most people.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Scrap plans for charges for household garden waste. Food waste is collected via this collection. This will reduce the cost-effectiveness of the service as the vehicles will still do the same routes but with less collections (thus no reduction in overhead) as many households will not pay the charge. Households will simply dispose of food waste by other means. The public did not choose to separate waste. This was instigated by the council therefore the council should continue to support this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	already over charged for everything	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	How would an introduction of charges for households garden waste work? If you make a charge for a brown bin, folk might well decide not to have a brown bin. What would happen to food waste that currently goes into the brown bin? would a food bin have to be reintroduced? What would that cost? If folk decide not to have a brown bin, how would that be policed, to ensure that the grey bin did not have garden waste in it? Trying to reduce landfill would be in jeopardy if folk were to put garden waste in the grey bins. It is clear that the council do not police or maintain the bottle banks properly. The bottle banks and surround in Drove Road and North Armadale is a disgrace. There is so much broken glass, especially in Drovers Road and the occasional "cleaning" around the area is farcical. North Street banks are by a concreted area and the broken glass should be easily cleaned up by cleaning operatives each day and the cardboard stuffed between the banks should be removed every day. Is there a private company who could provide a Household collection for glass so that the bottle banks could be done away with?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The council decision to not collect business waste has led to a reduction in the appearance and tidiness of our locality. Shops and businesses who do not have space behind their premises (and some that do) have large bins parked outside their chop frontages on pavements and outside (redacted) in Whitburn Road in Bathgate, pavement, (redacted) in North Street Armadale and outside the partnership centre also in store in the main street are an eyesore, (redacted) has cages and bread trays as well as bins outside his shop. Tollgate home bins by the side of the buildings. A few years ago, there were grants to smarten up shop fronts and now they are adorned with grotty large bins and the shops look tacky and unkempt. I've no doubt that this is replicated in other areas of West Lothian. Thought it was obvious not given to the environmental impact the decisions would have. What happens next? In april there was talk of a legal requirement to have traffic wardens. Whaen wl they materiallse? With the amount of pavement parking in the aras the wages of the trffic wardnes would very soon be covered by teh fines.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Commercial: the council no longer provides a Commercial Waste Collection Service to businesses and there are no plans to re-introduce this service as the cost of reinstatement would outweigh the benefit. There are a number of commercial waste collection companies operating in the area and businesses have a responsibility to dispose of commercial waste through appropriate and legal channels.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	How will you charge for garden waste when currently it's combined with food waste.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Options for implementation will be fully investigated as part of the development for any proposal to introduce additional fees and charges.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	How would food waste be collected from households which didn't pay for garden waste collection? would this have to go into the black bins and so to landfill?	3. The respondent advised that they had no comment to make or posed a question of the measure.	No there would be a permit system to identify bins that have paid for Garden Waste collections
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Not sure what you'd be leasing, to whom and for what benefit. Are you suggesting sub-letting aspects of your assets?	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I appreciate the council need to generate funds, but why should it be for these particular services. The public are already struggling with the cost of living crisis. This may lead to people not being able to afford essential work that will negatively impact the local area.	3. The respondent advised that they had no comment to make or posed a question of the measure.	This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further. The council currently has an extensive concession scheme to help those on lower incomes.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Not sure about garden waste - this could add to flytipping and discourage people from maintaining gardens.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Rents etc cant comment on as i dont know what the charges aree already or proposing to be	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Don't know why you would charge for household garden waste when we have the appropriate bins to put these in??	3. The respondent advised that they had no comment to make or posed a question of the measure.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate. Given the budget gap, the council has to look at all options to increase income or reduce costs to ensure the statutory obligation to balance the budget is met.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	So if you have a bigger house, and you pay more council taxes you also have to pay for the garden waste collection.	3. The respondent advised that they had no comment to make or posed a question of the measure.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Given the budget gap, the council has to look at all options to increase income or reduce costs to ensure the statutory obligation to balance the budget is met.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If we have to pay for the removal of garden rubbish what happens to the waste food collection which is put in the same bin. Folk would not be prepared to pay to get this picked up. It would I fear lead to fly tipping of garden and waste food.	3. The respondent advised that they had no comment to make or posed a question of the measure.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	no comment on this	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Unable to comment again due to lack of available information.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I can't see any point in continuing this survey as it is a waste of all our time without the information, we need to give an informed opinion.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I am unable to provide further input as the level of detail within the estimated saving briefing doesn't allow me too.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Is it financially feasible to collect the charge? how many people will this apply to and what will the cost benefit be? Can people afford it? What is a reasonable charge? What will the consequence be if charges cannot be paid? are there alternative approaches?	3. The respondent advised that they had no comment to make or posed a question of the measure.	This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste fees.....what about people on low incomes who delight in their gardens?	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council currently has an extensive concession scheme to help those on lower incomes.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I don't have a view on the other points as I have no connection or knowledge of these sectors	3. The respondent advised that they had no comment to make or posed a question of the measure.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Sorry again we have do not have much say as we are not in control of funding, the whole world is in a bit of a state due to Covid and mismanagement at local UK and Scottish Governments. Although we realise that cuts will be made, it is a very depressing read with cost of living, Covid Recovery and world events, Leaving EU etc. My answers will be mostly similar throughout this consultation as I would not like to make decisions as when it comes down to it, people will lose jobs. I believe that we have to support Economic Development and Employability, we need to try and invest!	3. The respondent advised that they had no comment to make or posed a question of the measure.	As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The introduction of a charge on household garden waste!!!! Garden waste was only recently amalgamated with food waste, so does that imply that yet another bin will be delivered to every household if this goes ahead to allow the two to be separated.	3. The respondent advised that they had no comment to make or posed a question of the measure.	This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	How would it work now garden waste and food waste are combined? I believe most people would start putting food waste back in the black bins and fly tip the gardening waste back in the woods. Poor idea.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If charges for garden waste collection are introduced then how does this impact collection of food waste which was merged into the same bin around 12 months ago? Would food waste be separated again into the food caddy's? At what cost would it be to replace all the food caddy's that have been discarded just months before?	3. The respondent advised that they had no comment to make or posed a question of the measure.	This document is part of the early stages of public consultation on budget saving and income measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If you start charging for garden waste collections, you will have more fly tipping. Isn't this already covered in council taxes?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping. Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Yes, it's my choice to have a garden, but it's green and good for the environment. Would the cost of administering the payment scheme, plus the additional dumping removal actually make a gain?	3. The respondent advised that they had no comment to make or posed a question of the measure.	This document is part of the early stages of public consultation on budget saving and income measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further. The council collects developer contributions for legally agreed investment required as a result of development. Developer contributions are subject to legal agreement and are for specific items such as infrastructure.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Why discriminate against people with gardens? My council tax is already very high compared with some and we receive the same services. Council tax is an unfair system and charging more for garden waste would just make it even more unfair.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities. Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If charges are made for garden waste collection, there will be more fly tipping. How will this be matched with the food waste collection in the brown bin??	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Would the introduction of garden waste charges mean food waste would return to a separate collection?	3. The respondent advised that they had no comment to make or posed a question of the measure.	This document is part of the early stages of public consultation on budget saving and income measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	charges for household garden waste collections - This will increase littering and fly-tipping. Also, currently, the brown bins take also house food remains, etc. Will you charge for this as well?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	4. i have no idea what the rent across the council is like and whether it is good value for money.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste, meaning the brown bin? It'll lead to fly tipping.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If I am going to be charged for garden waste collection then what am I actually paying council tax for? I don't have children, I live in a new build estate which isn't covered by the council and i rarely use council services so I'm effectively paying a lot of money to get my other bins emptied once a fortnight. 🗑️🗑️🗑️	3. The respondent advised that they had no comment to make or posed a question of the measure.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	It was my understanding that garden waste went to composting. Is our council not wanting to promote a sustainable future?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. The council's Climate Change Strategy outlines actions in the council's journey to net zero.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Does this mean the end to waste food collection and yet another huge investment in new bins wasted? Changing for garden waste will also lead to yet more dumping.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	need to understand what fees are being proposed for the examples provided before I would be able to properly comment.;	3. The respondent advised that they had no comment to make or posed a question of the measure.	This document is part of the early stages of public consultation on budget saving and income measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	What are the level of charges you are proposing and when? I need this info before I can make a response.	3. The respondent advised that they had no comment to make or posed a question of the measure.	This document is part of the early stages of public consultation on budget saving and income measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	An introduction of fees for household garden waste collection would seem hard to enforce and adds to bureaucracy. For example, how does the council know who is making use of the service on a month-by-month basis? If the idea is to apply a flat charge other than 'by individual use profile', why not just increase the council tax? Also, it could encourage anti-social behaviours such as dumping or fly-tipping of waste. Increasing lease fees from commercial operators seems fair, but not so for social enterprises which we want to encourage.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping. Any proposed increase in rents would be for the commercial property portfolio. Opportunities for community benefit leases are available for community groups and considered on a case by case basis.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Social enterprises link this in with youth services	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	To my knowledge council's were public services not to make profits to survive.; I thought council tax was to pay for services.; But who ever decided to freeze council tax over the years well on their head be it not aure they should be sleeping easy!; That's why we are in a mess.	4. The council is already doing this.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. For many years the council tax freeze was a requirement of funding from the Scottish Government.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Also, in a similar vein, could you have sponsored roundabouts?	4. The council is already doing this.	The council currently generates income from the sponsorship of roundabouts by local businesses.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	When putting up buildings for young people, don't just pay the usual developers, think bigger, get value and more bang for your buck - get modular buildings like forward thinking countries do.	4. The council is already doing this.	All options are considered for new buildings with a full appraisal of options undertaken to ensure buildings meet best value considerations as well as service requirements.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Do not have properties vacant and make it a lot easier for people to find commercial etc property for use on fleoxle contracts.	4. The council is already doing this.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Definitely make better use of your estate to multiply rents.	4. The council is already doing this.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	No commercial organisation should benefit from a cheap lease. if rates are paid on vacant properties could these properties be sold.	4. The council is already doing this.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Lease facilities to a commercial operator, social enterprise or franchise - so tax payers can pay more fur the use of libraries, council gyms, etc? ; ; Review of rents and fees for the council's commercial properties - surely you do this already? This is basic commercial planning.	4. The council is already doing this.	Community groups and individuals can rent council facilities, however opportunities to market this wider can be explored. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The rents and fees for council properties review okay as long as commercial users - charities & community groups should be accorded preferential access.	4. The council is already doing this.	Any proposed increase in rents would be for the commercial property portfolio. Opportunities for community benefit leases are available for community groups and considered on a case by case basis.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Look at different contracts the council has and see where money could be saved. E.g. School meals are ridiculously overpriced for the quality and could be made more cheaply by other service providers. Same could be said for many other contractors, I imagine.	4. The council is already doing this.	The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure. The council must consider both internal and external provision to ensure best value. In some circumstances it may be better value to deliver through external provision.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for garden waste may discourage people to grow their own produce, plant wildflower beds, have bee friendly plants, which will have an impact on pollination and goes against council and government 'green' targets. Perhaps setting up of local composting sites would be a way of processing garden waste and also generating a useful output	4. The council is already doing this.	Council Open Space and Biodiversity Officers engage with local communities around food growing initiatives etc
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charge vans and trade (maybe already doing this) more fines for fly tipping and dog fouling.	4. The council is already doing this.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Given the volume of development ongoing, developer contributions should absolutely be under review for aggressive maximisation.	4. The council is already doing this.	The council maximises contributions from developers in line with legal agreements.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Sale of council land assets could also be investigated - Linhouse has potential for development given its proximity to train station etc. What is the development value of this land? This could potentially offset a substantial sum of the funding the council needs to make, if not all of it. It is recognised that the site as it currently stands has environmental benefits, however a higher standard of nature-based solutions, biodiversity net gain and net zero solutions has the potential to create an exemplary community, that West Lothian can be proud of and make money out of at the same time.	4. The council is already doing this.	The council has a planned disposal programme for assets which are no longer required for service delivery and have been declared surplus to requirements. Currently Linhouse is marked for employment land in the local plan and is not currently being considered.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Lease facilities to a commercial operator, social enterprise or franchise - why are we not already doing this? Review of rents and fees for the council's commercial properties why are we not already doing this?	4. The council is already doing this.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Lease facilities to a commercial operator, social enterprise or franchise - why are we not already doing this? Review of rents and fees for the council's commercial properties why are we not already doing this?	4. The council is already doing this.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging developers more - good! (If that's what you actually mean, nothing is clear in this document)	4. The council is already doing this.	The council collects developer contributions for legally agreed investment required as a result of development. Developer contributions are subject to legal agreement and are for specific items such as infrastructure.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I like the idea of Social Enterprise	4. The council is already doing this.	The council currently works in partnership with WLSEN in relation to social enterprise.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Look at the rent for shops and if they had more shops, they would have more money.	4. The council is already doing this.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste is collected with food waste. Huge bins for food waste only so cost to supply smaller bins would need to be taken into account.	4. The council is already doing this.	This would be a future consideration dependant on the take up of the garden waste service
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Maintain council services as council services.	4. The council is already doing this.	The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure. The council must consider both internal and external provision to ensure best value. In some circumstances it may be better value to deliver through external provision.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Leasing premises to commercial operators - leasing a room / office space	4. The council is already doing this.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The council currently generates income from providing a range of services to partners and organisations. Further opportunities to expand this could be investigated.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Generate income from Marketing at roundabouts and elsewhere.	4. The council is already doing this.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I'd like to see a review of the rents and fees for the council's residential properties. Don't take more from developers because the nice ones will just go elsewhere.	4. The council is already doing this.	This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Encourage more investment in our communities from private companies. And put pressure on them to invest in our infrastructure (like roads and things to do). That will increase the value of our homes and communities and encourage more wealth to come to West Lothian.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	invest in youth	4. The council is already doing this.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	invest in youth	4. The council is already doing this.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	any proposals should consider the economic context of West Lothian population - with large proportions on low income and high levels economically inactive. Just because other areas charge does not mean that approach should be adopted. Any approach WL takes should be based on a WL context.;	4. The council is already doing this.	The council will continue to have a fair pricing strategy and concession scheme to ensure that charges generate income to support council services, in a way that is consistent with the council's Anti Poverty Strategy.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Other suggestions for revenue:- Re-charging for repairs where damage is deliberately caused by tenants, lost keys and also where there is no access - this isn't happening in most cases	4. The council is already doing this.	This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	increase the amount of facilities to lease invest in people with good ideas	4. The council is already doing this.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. Community groups and individuals can rent council facilities, however opportunities to market this wider can be explored. The council currently generates income from providing a range of services to partners and organisations. Further opportunities to expand this could be investigated.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	We trust the council work and view, plan to develop our area, and investments	4. The council is already doing this.	The council's aim is, and always will be, to ensure that West Lothian continues to be a great place to live, work, visit and do business. To achieve this aim we will continue to prioritise the money that we spend on services to make sure that our investment has the biggest and most positive impact on the community. As validated by external auditors and other inspection bodies, West Lothian Council continues to perform well against key performance indicators and activities. This will continue to be monitored and reviewed.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Good, but needs to be supported by enforcement and active debt recovery.	4. The council is already doing this.	The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	what happens with people who don't pay their rent - or their council tax. Is this chased ?	4. The council is already doing this.	The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Have people in the empty council houses lying around West Lothian and will cover a lot more rent.	4. The council is already doing this.	The council operates its housing stock with a daily occupancy of around 98.6%. The council ensures properties that have been returned by tenants are checked, any necessary improvements or upgrades are completed and allocated as soon as possible.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Green waste recycling is an essential climate chaos reducing operation that all residents should pay for - raise the community charge/business rates so that everyone pays for this to be continued.; Planning advisory services should be reviewed and considered whether they have been adequate or eve appropriate up to now.	4. The council is already doing this.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree with the other proposals, although lease of properties to social enterprises or charities would need to be for a very small or nil cost or else they will not be sustainable.	4. The council is already doing this.	Any proposed increase in rents would be for the commercial property portfolio. Opportunities for community benefit leases are available for community groups and considered on a case by case basis.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Additionally, you removed the food waste collection to save funds and combined this with garden waste...	4. The council is already doing this.	The council is transparent regarding all budget savings with budget savings having to be approved at full Council. Officers cannot implement savings in advance without approval by elected members with all reports available publicly.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Maybe look at notorious debtors and create alternative paths for them and get social work involved to make sure it does not happen on regular bases.	4. The council is already doing this.	The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity. This includes support from the Anti-Poverty Service.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Instead of trying to raise charges the council could look at getting debt collected in a more efficient way. Not letting people going into extreme debt and owing £ 4 - 5 k for CTR or rent and then just going bankrupt and writing it off. ;	4. The council is already doing this.	The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	As a small business owner, I am only just managing to keep my head above water - in large part thanks to the rental of a small council commercial property. The rental hike proposed by my previous landlord would have closed by 29 year old business. Perhaps rent reviews in such council buildings could be linked to the number of people employed by the business. A business that is able to employ 10+ employees has a greater possibility of raising the additional revenue for a rental increase - as opposed to a business with perhaps only 2 or 3 employees. Rental increases may actually result in the small businesses reverting to working from home and actually result in a reduction of rental monies to the council. This needs careful consideration.	4. The council is already doing this.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords. Affordability is considered.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Stop cutting tenants grass etc for free.	4. The council is already doing this.	In most circumstances where the council has to arrange grass cuts for tenants, tenants are invoiced for the cost. This is not funded from council tax but tenants rent.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	You should have kept car parks and used them to get funds. By privatisation you lose more income.; Planning is a joke anyway- if you decline planning it just goes to the Scottish gov and they say yes to everything.	4. The council is already doing this.	The council has not privatised any car parks. Income collection is undertaken for some car parks where there is charging but the net income received is greater than what it would cost the council to collect the income. Planning regulations are determined by the Scottish Government.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Not enough help from the council on the many bill. Been to the advice shop who were some help.	4. The council is already doing this.	At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community. The council seeks to agree realistic payment plans with individuals who have outstanding debt.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	These services need to be investigated before decisions are made	4. The council is already doing this.	This document is part of the early stages of public consultation on budget saving and income measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The council should fund the 3rd sector	4. The council is already doing this.	The council invests substantially in the third sector, working in partnership to deliver services and outcomes.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Fees and rents for commercial properties would need to depend on the nature of the renter. Safeguards for social enterprises and similar should be maintained.	4. The council is already doing this.	Any proposed increase in rents would be for the commercial property portfolio. Opportunities for community benefit leases are available for community groups and considered on a case by case basis.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Sell the football stadium to Livingston FC to generate a one time income fee to help plug the budget of ~£250,000-£300,000	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Receipts from sale of land can only be invested in assets and cannot be used for revenue service delivery. Any receipt from the sale of Livingston FC could not be used to address the revenue budget gap.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Should charge for using a library, I don't use the library, pity those who do.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The council has to provide access to library services. It is not one of the areas where the council can apply discretionary charges.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Is there anything else the council can charge for - £1 per car into the dump? Might increase fly tipping though.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Allow opportunity for those that can afford it to pay a little more to raise income in to the council. For example, we are charged milk money in school for our child to receive milk, charged at pounds and pence. If there was opportunity to 'round up' as banks offer to people, I would be happy to round up these payments if the additional funding from doing so was put directly back in to the school or given to children who receive free school meals. May not make a huge difference, but I'm sure there are ways such as this that small amounts can be invested back in by middle and higher income families to support others.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The council has the ability to introduce charges for specific discretionary items, however these charges have to be clear and agreed in advance. This would not permit the ability to round up payments. The regulations relating to discretionary charging are tightly applied to the council.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Any agreements for developer contributions should be made to the council before any work starts on the development.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Payment schedules for developer contributions are set out in legal agreements, which once signed, the council must honour. The council works with developers to ensure timely payment, with some large contributions (e.g. for new primary schools) being received in advance.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Fine as long as council tax not increased	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities. This includes both increases to council tax and discretionary charges. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	people can pay to sell their products at events organised by the council	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	This would be out with the purpose and remit of the council. There are limited circumstances where the council can apply discretionary charges.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	pay for events and not have them for free ; ;	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	This would be out with the purpose and remit of the council. There are limited circumstances where the council can apply discretionary charges. The council has very few events where charges could be applied.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	IF TO CONSIDER GARDEN DISPOSAL SEPARATE FROM BIN COLLECTION ON COUNCIL TAX, SHOULD IT NOT BE CONSIDERED TO CHARGE FOR ACTUAL BIN COLLECTION USED ON WEEKLY MONTHLY BASIS, BY THE CONSUMER. EFFECTIVELY CREATING A PAY AS YOU GO SYSTEM. THIS IS MORE FAIR AND YOU PAY FOR WHAT YOU USE.;	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The council has to deliver a general waste collection service as a statutory requirement therefore a pay as you go system could not be introduced. Charges can only be applied to a limited number of discretionary services, which includes garden waste. Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I think it would be more appropriate to try and increase income from palling and developer contributions rather than individual households who already pay Council Tax for waste removal	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The council collects developer contributions for legally agreed investment required as a result of development. Developer contributions are subject to legal agreement and are for specific items such as infrastructure. Developer contributions cannot be used to balance the council's revenue budget.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Bring back the food waste bins	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Offer compost bins & many would be fine to skip brown bins.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Try to make money from businesses where possible rather than individuals.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Too many people get free or reduced cost services without any kind of means testing	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	The council currently has an extensive concession scheme to help those on lower incomes. Means testing would involve considerable resources and is not legally allowed for many services. Concessions will be reviewed to ensure they are appropriate and that their use is maximised.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	leave the travel consesion on the trains as oaps depend on this	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Pensioners and young people under 22 have access to free travel on buses throughout Scotland.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	REVIEW OF RENT FOR COMMERCIAL PROPERTIES, COULD IT NOT BE TO OFFER NO RENT TO GET EMPTY PROPERTIES FILLED AND COUNCIL COULD CHARGE FOR COUNCIL TAX AND BINS FOR COMMERCIAL PROPETIES TO TRY GET HOLES IN THE HIGH STREET FILLED.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	The council has high occupancy with very little empty commercial properties. Commercial properties pay non domestic rates, not council tax, which is collected centrally by the Scottish Government for future allocation to all councils.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Introduction of charges should be means tested or there is the risk of additional administration costs trying to recover charges.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Means testing would involve considerable resources and is not legally allowed for many services. Concessions will be reviewed to ensure they are appropriate and that their use is maximised. The council currently has an extensive concession scheme to help those on lower incomes.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Buy West Lothian leisure - a source of income	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If charges are introduced for garden waste, other arrangements need to be made for food waste. Otherwise this will fill grey bins or be dumped.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Cost of living is already a problem and now people will be expected to pay for waste? Ridiculous considering council tax is so high. If waste was to be charged for then council tax should reduce significantly	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Reducing council tax would result in additional cuts to services as the council has to have a balanced budget by law. Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Leasing or renting of council buildings, spaces or land to other people must be signed off by the local people who live in the town or village. If they do not agree, then it does not get approved.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	It would be impossible to implement a governance structure that would facilitate this and would result in inflexible and inefficient use of scarce council resources. The council has community choices, a platform for participatory budgeting with local communities making decisions regarding spend and investment.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Try things such as permits for on street company car parking -easy to identify through fuel card / tax relief.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	West Lothian Council agreed in February 2019 that the workplace parking levy would not be introduced in West Lothian.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Most new builds should now be only council properties to allow most people to have access to a forever home. Also a continued and increased focus on the council buying back ex council properties should be a priorty, especially given the fact that due to cost of living, some of these properties could come onto the auction market and be bought back and under council control.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste will start getting fly-tipped and the expense of cleaning that up will be more than the current expense of collecting green waste bins. Also, privatize this service. Private third party companies prove they can do it more efficiently and cheaper while our bin men were on strike. So just give the contract to them.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure. The council must consider both internal and external provision to ensure best value. In some circumstances it may be better value to deliver through external provision.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	A good place to get some cash would be to start fining the cars double parked all day long in the surrounding streets close to st Johns hospital. You would make a fortune fining the folk on the double yellows all day beside the royal mail sorting office also. Rather that then charge the hard working council tax payers yet more money.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The council previously ruled out a decriminalised parking enforcement scheme. Without such a scheme the council could not introduce parking charges and fines.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	You barely empty my bins as it is, and I pay £215 a month council tax, if you charge me to empty my garden waste it will be getting fly tipped. A good place to get some cash would be to start fining the cars double parked all day long in the surrounding streets close to st Johns hospital. You would make a fortune fining the folk on the double yellows all day beside the royal mail sorting office also. Rather that then charge the hard working council tax payers yet more money.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping. The council previously ruled out a decriminalised parking enforcement scheme. Without such a scheme the council could not introduce parking charges and fines.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Lease facilities to social enterprises but definitely not to commercial as costs go through the roof.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The council has a duty to support economic development within West Lothian for both social enterprises and local businesses. The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. Any proposed increase in rents would be for the commercial property portfolio. Opportunities for community benefit leases are available for community groups and considered on a case by case basis.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Could parking attendants not be brought to bring income as well and improve parking across the towns / villages	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The council previously ruled out a decriminalised parking enforcement scheme. Without such a scheme the council could not introduce parking charges and fines.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Remove free charging points for EVa with immediate effect.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Thank you for your response. Your response will be forwarded to the relevant officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Has the council considered charging for parking and dining those who breach the rules? Given the selfish, lazy and obstructive parking I see a Ross the county there's a fortune to be made	5d. It is proposed that this suggestion is not taken forward because it has been previously considered and will not be progressed.	The council previously ruled out a decriminalised parking enforcement scheme. Without such a scheme the council could not introduce parking charges and fines.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Pay and display parking across the area	5d. It is proposed that this suggestion is not taken forward because it has been previously considered and will not be progressed.	The council previously ruled out a decriminalised parking enforcement scheme. Without such a scheme the council could not introduce parking charges and fines.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree, you may also want to consider charging for parking at the weekends in the council car park at the civic centre.	5d. It is proposed that this suggestion is not taken forward because it has been previously considered and will not be progressed.	The council previously ruled out a decriminalised parking enforcement scheme. Without such a scheme the council could not introduce parking charges and fines.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	we already pay through our council tax for garden waste so I don't agree with a charge for it although I think there should be a charge if you have more than one bin	6. The respondent suggested an improvement. Officers will consider how this could be developed.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Open up services too the wider community	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council currently generates income from providing a range of services to partners and organisations. Further opportunities to expand this could be investigated.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Planning, rental and leasing fees should totally be reviewed and increased if necessary.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council is committed to reviewing discretionary fees and charges. Planning fees are determined nationally by the Scottish Government therefore the council has no ability to increase these fees.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Wouldn't it be possible to raise revenue from the use/sale of composted waste?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	This is a process undertaken by the end processor
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Investigate selling the compost you make instead.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Contractor would undertake the use of material from the recycling stream
Reviewing income, concession	5 Reviewing income, concessions and other contributions	If we are to put our food waste in the garden bins, how are we expected to get rid of our food if we choose not to pay for the garden collection?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	There would be a permit scheme to identify residents who have paid for garden waste. Food would still be collected from those who hadn't paid.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	colossal amount of money to be saved, how will you help staff to feel part of the change, or included going forwards, are you concerned about staff retention?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council is committed to working with employees and trade unions in managing changes to its organisational structures and staffing requirements. The council will seek to achieve agreement to change through constructive and open dialogue.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Social franchises/enterprises may be possible with evidence that the operations are suitably skilled to undertake obligations of a lease.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has an approved policy which deals with transfers of certain council assets to the Third Sector. The approved council policy contains a number of safeguards designed to ensure that any transfer is sustainable in terms of future use. This includes contracts outlining future obligations and liabilities.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	A review of rents for commercial properties is already undertaken with obligation of the council to ensure best value so it would be interesting to see what impact any other 'review' may have and how this would affect the market opinion for example if this differs it would either price the council out of leases or would be cheaper whereby it would not meet statutory obligations to achieve best value. Fees can be reviewed in line with other authorities.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Previously the Council has rejected making charges for parking in Country Parks' car parks. Do you intend on reconsidering this now for all 3 Country Parks?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council previously ruled out a decriminalised parking enforcement scheme. Without such a scheme the council could not introduce parking charges and fines.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Problem with charges for garden waste is that the fees raised are eaten up by cost of implementing and running the scheme. If set too high, it could lead to increase of fly tipping or increase to use of community recycling. Thus, just transferring the budgetary burden	6. The respondent suggested an improvement. Officers will consider how this could be developed.	It is anticipated that even with implementation costs, introduction of charges for this area would generate substantial income the benefit of all services. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Need to pitch fees correctly - more people letting facilities at a lower fee better than 1 or 2 lets at a high fee and units setting empty. Prioritise town centre properties to keep town centres vibrant.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Community groups and individuals can rent council facilities, however opportunities to market this wider can be explored.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	3: charges for self employed to dispose of waste.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council currently generates income from providing a range of services to partners and organisations. Further opportunities to expand this could be investigated.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	As stated previously, I am not in favour of reducing waste services as it encourages fly tipping. I also do not believe in commissioning services with the private sector as their primary objective is to make profits. I would encourage the review of fees for developers at a time when their profits are at their highest levels in recent years.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure. The council must consider both internal and external provision to ensure best value. In some circumstances it may be better value to deliver through external provision. Planning fees are determined by the Scottish Government.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Possible charge could be introduced for waste sites. As it is for companies. Charge per skip run.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council currently generates income from providing a range of services to partners and organisations. Further opportunities to expand this could be investigated.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Again metrics in trial data must show this approach works first	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charge a bit more for bulky uplifts.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Try introducing fines for people not using their current bins correctly	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Increase charges for uplifts, business recycling	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Bulky Uplift increase: Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration. Commercial: the council no longer provides a Commercial Waste Collection Service to businesses and there are no plans to re-introduce this service as the cost of reinstatement would outweigh the benefit. There are a number of commercial waste collection companies operating in the area and businesses have a responsibility to dispose of commercial waste through appropriate and legal channels.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Increase charges for uplifts, business recycling	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Bulky Uplift increase: Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration. Commercial: the council no longer provides a Commercial Waste Collection Service to businesses and there are no plans to re-introduce this service as the cost of reinstatement would outweigh the benefit. There are a number of commercial waste collection companies operating in the area and businesses have a responsibility to dispose of commercial waste through appropriate and legal channels.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Generate income from Marketing at roundabouts and elsewhere.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The rest should be looked at how to commercialise services to earn money from businesses	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Lost/damaged cards - concessionary travel cards, Young Scot Cards, Blue Badges etc; Housing rent arrears - if tenant's aren't up to date with rent then routine repairs should be refused	6. The respondent suggested an improvement. Officers will consider how this could be developed.	This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Chargin for garden waste. Makes sense but now we put food in it why would we do this? They should split the food out again. Food is the biggest issue for carbon omissions so this should be recycled. If u charge for it, people won't pay it and it'll go into general waste	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Agree with above, but need to look for further opportunities. Consideration should be given to asking for donations for parking in Country Parks (or memberships to avoid daily charges) and any other popular car parks as an example.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The council should set up go fund me initiatives to pay for services that the community want that cannot be delivered in the future such as Christmas lights, painting schools etc.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council couldn't establish go fund me initiatives for core service delivery but could investigate opportunities to support community groups and others to raise funding through this mechanism.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Investigate other revenue streams like hosting profitable events within WLC facilities?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council will investigate all opportunities to generate income
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Not sure what commercial properties the council owns so don't know who would be impacted. The Council has to prioritise the services for people who live here.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charger for repairs in council properties, reduce community care grant support	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Officers will consider how these proposals can be developed. Council properties relates to non residential properties only (council houses are funded by rents and are not subject to the reductions in this consultation).

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Lease facilities need to be comensurate with the type and commercial advantage outside operations might have. The higher the profit/commercial gain then the higher the lease cost	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. Rents are dependent on market conditions and rates and the type of unit being leased.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charges for garden waste could only be implemented on the proviso of refunds when the service is undoubtedly cancelled during periods of inclement weather/staff shortages/vehicle breakdowns which often causes brown bin collections to be cancelled.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	This document is part of the early stages of public consultation on budget saving and income measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I have a proposal I'd be interested in sharing with the authority that would utilise public buildings, provide hundreds of thousands (potentially millions) in revenue and be transformational in developing our young children both educationally and socially...	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Please provide details to allow further consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	You need to advertise the use of council facilities better. Many people are unaware that you can hire or lease council buildings.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Community groups and individuals can rent council facilities, however opportunities to market this wider can be explored.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Social enterprises should be exempt from these price increases.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Any proposed increase in rents would be for the commercial property portfolio. Opportunities for community benefit leases are available for community groups and considered on a case by case basis.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	As per above - charge a reasonable amount for car parking at Beecraigs and possibly other CPs and areas where there are costly facilities.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council regularly reviews its charging and concessions policy and this can be considered as part of the next review.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Lease / Rents / Fees Must be sensible to encourage growth and stability in local businesses.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste should be able to be used by many at home but advice / direction on how to do this would be helpful for many.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	This document is part of the early stages of public consultation on budget saving and income measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Make all council meetings online to save travelling expenses.; ; Stop councillor expenses	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Hybrid working and improved use of technology has greatly increased the use of online meetings. Councillor expenses are determined nationally and out with the council's control.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Don't pay their pals money for the job.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Council housing rent charges should be revised and increased, still cheaper than private accommodation.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Would these charges be for brown bin collections ? or for additional garden waste ? I thought brown bins already came under the funding of Council Taxes.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	The charge would be for residents wishing to put garden waste in the brown bin. If the resident did not, the brown bin would still be used for food
Reviewing income, concession	5 Reviewing income, concessions and other contributions	increase housing rent accordingly, less subsidy.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Review of fees for planning advisory services and to maximise developer contributions - eh?;	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Review of fees for planning advisory services and to maximise developer contributions - eh?;	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The problem with putting an additional cost to a current service supplied is that when the service is not delivered by WLC, then customers would be looking for a refund or an alternative supplier.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	What a state of affairs	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Dakujem	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Put up your rent for council properties. These are dirt cheap compared to private let's. People don't appreciate how lucky they are. And then some don't pay. Kick them out.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Maybe look at residential property rents... much cheaper than those paying mortgages and they don't even have to fix there own properties. Admit maybe should be cheaper, but surely not by that much!	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Rents and fees increase will just result in evictions then we put people in hotels for being homeless (which costs more money)	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	The review of fees in this proposal is for commercial properties, not homes.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Definitely review planning permissions as lots of structures are being erected by home owners without proper inspection, fees or permissions.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	not got anything for the elderly and disabled	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	This document is part of the early stages of public consultation on budget saving and income measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Absolutely increase planning fees and maximise developer contributions. If people can afford to build extensions etc....they can afford more for planning. The council is currently very poor at maximising developer contributions and appears to let developers get away with the bare minimum, leaving large impact on the local communities, with little in the way of remediation of mitigating the impact of new development on current residents. Re-directing the planning department to work for the benefit of local communities would be a good first step.; ; Agree with points 3 and 4.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Planning fees are set nationally by the Scottish Government therefore the council has no control over the level fees are set at. Developer contributions are set out in legal agreements based on the requirements of individual developments. The council works with developers to ensure timely payment of contributions set out in legal agreements.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Cut councillors wages.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	This proposal is out with the control of West Lothian Council.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Reduction in the top council salaries perhaps? The salaries and benefits of the Chief Executive and Depute Chief Executives could certainly be reduce or frozen given the circumstances.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council recognises the importance of managing pay fairly and in a way that motivates staff to make a positive contribution and support the delivery of the Council's objectives. In order to comply with equal pay legislation, the Council is required to develop pay and grading arrangements underpinned by job evaluation. Annual pay awards are determined through national bargaining arrangements which help ensure that certain minimum standards are maintained in relation to pay levels.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Stop wasting money building factories never used.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	West Lothian Council has not build any new factories. New factories across the county are privately owned and constructed.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	You are determined to chase businesses out of WL. If you have lower rates, you will have more income due to increased businesses. In addition), this would increase employment levels and tax revenue.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Non domestic rates are determined by the Scottish Government.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Developers will charge more for housing and it will be unaffordable, although I think the greener they make there house build they should be charged less to encourage all to build better.; I think many people complain about the cost of their leases as it is and if they can't afford it then less economy	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Planning legislation is determined nationally by the Scottish Government. Other than developer contributions, for which legal agreements exist, the council has no bearing on developers' financial positions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	2:traffic wardens	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council previously ruled out a decriminalised parking enforcement scheme. Without such a scheme the council could not introduce parking charges and fines.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	ask for a percentage of the turnover instead of profit from developers that make a fortune out of new houses in West Lothian	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	planning fees are at an acceptable level, but could be increased in line with inflation;	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Although planning fees are set nationally, the increase in fees will result in additional income for the council. The council has no ability to raise fees.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Please put up costs for those developing properties - generally these people are either (a) saving money by extending, so can afford higher fees, or are (b) developers who should be made to pay more.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Although planning fees are set nationally, the increase in fees will result in additional income for the council. The council has no ability to raise fees.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging big developers more for planning may be fair but fees should reflect costs.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Although planning fees are set nationally, the increase in fees will result in additional income for the council. The council has no ability to raise fees.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Planning advisory services are under used because of a. Fee b. Slow response. In particular procedures for confirmation proposal does not require consent should be speeded up as in practice there is often no advantage in using this procedure.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Although planning fees are set nationally, the increase in fees will result in additional income for the council. The council has no ability to raise fees.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I blame ***** (redacted)	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	So the council will review rents and fees for the councils commercial properties but landlords cannot review rents for tenants	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The position in relation to house rents was determined by the Scottish Government and applies to 1 April 2023. This proposal is focused on operational buildings from 2023/24 only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Planning fees could have a minimum number trigger?;	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Although planning fees are set nationally, the increase in fees will result in additional income for the council. The council has no ability to raise fees.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Increase charges for private house builders fees	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Although planning fees are set nationally, the increase in fees will result in additional income for the council. The council has no ability to raise fees.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	STOP PAYING OUT BENIFITS TO PEPOLE WHO ARE ABLE TO WORK AND CHOOSE NOT TO. LEAVE THE BROWN BINS ALONE.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Benefits are determined by Scottish and UK Governments.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Why not make facilities like Xcite easier to use? Like being able to walk up to the driving range at polkemmet in the evening and buy a token, rather than navigating the app or phoning ahead?	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	the review of fees for planning advisory, this makes sense as the council seem to have a tendency to want to charge for everything anyhow. even if it is for private property. council wants its say at the cost of the customer on property that is privately owned.; ;	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Planning fees and planning regulations are determined by the Scottish Government. The council has no control over these elements.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Sick fed up of the people who HAVENOT being subsidised by those who HAVE.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Benefits are determined by Scottish and UK Governments. All services will be reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned agreed priorities.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	There should be more ideas here for increasing savings what about final salary pension scheme?	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The local government pension scheme is delivered by the Lothian Pension Fund and not the council. The scheme has been subject to review and changes have been made to make it more affordable.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Not much to add but in conservation areas where houses cannot be seen at all from the main road then projects such as window replacements should not need council permission.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Planning legislation is determined by national government.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Encourage more people to actively seek out employment rather than pay benefits to those who are "working the system". To introduce fees for garden waste will only encourage more fly tipping.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Benefits are determined by Scottish and UK Governments.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Putting commercial property rent fees up will likely end up with more businesses going bust.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Reintroduce parking wardens. Excellent income stream for WLC and also improve the quality of life of local residents. Inconsiderate parking is an issue in every ward in the area and leading to greater risk of traffic accidents and pedestrian injury. This would be a sensible move financially and socially.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Many items seem to require unnecessary planning consent as it is.;	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Developer Contributions; Better allocation of these contributions ie some / more to be allocated to projects to give country parks, greenways, streetscapes and other informal areas a face lift as these often are used by far more people than the more formal pitches / play areas / formal parks.; ; Lease of facilities; To be appropriate to the location in question; ;	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is committed to maximising income with minimum detriment to domestic applicants. The council will review developer contributions in line with guidance when appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I also own an independent business and business rates are a crippling feature for me- especially as we see very few services which assist us- bin collection, street cleaning etc.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Non domestic rates are determined by the Scottish Government.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Less people able to afforded to lease property	9. The respondent made a comment on the survey question.	This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	West Lothian is a place where people want to move into, because of some of the reasons you suggest.	9. The respondent made a comment on the survey question.	The council's aim is, and always will be, to ensure that West Lothian continues to be a great place to live, work, visit and do business. To achieve this aim we will continue to prioritise the money that we spend on services to make sure that our investment has the biggest and most positive impact on the community. As validated by external auditors and other inspection bodies, West Lothian Council continues to perform well against key performance indicators and activities. This will continue to be monitored and reviewed.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Rubbish collections aren't great already	9. The respondent made a comment on the survey question.	The council continually reviews service provision using our Best Value Framework to ensure that we deliver value for the public and continue to achieve the expected levels of performance. There are rigorous internal scrutiny arrangements in place to assure the quality of our services and we are also subject to external audit and inspection.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I am concerned this will lead to an increase of waste being burnt, which could have the undesired effect of pollution and uncontrollable fire, especially in the summer.	9. The respondent made a comment on the survey question.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate. Given the budget gap, the council has to look at all options to increase income or reduce costs to ensure the statutory obligation to balance the budget is met.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Pay my council tax to have bins emptied. When they do get emptied	9. The respondent made a comment on the survey question.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate. Given the budget gap, the council has to look at all options to increase income or reduce costs to ensure the statutory obligation to balance the budget is met.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Garden waste bins have been provided, this would then become a s wasted resource.	9. The respondent made a comment on the survey question.	Even if a charge is introduced garden waste bins would remain fit for purpose and therefore not a wasted resource.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Funny how it's no cuts here	9. The respondent made a comment on the survey question.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate. Given the budget gap, the council has to look at all options to increase income or reduce costs to ensure the statutory obligation to balance the budget is met.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	We pay more than £3,000 a year in council tax. I would fully expect the bare minimum to be included in that huge fee e.g. garden waste collected. How much was wasted on the introduction of a 4th plastic bin - which incidentally is a complete pain as hardly any paper/card waste is collected, it's all plastic which means the plastic bin is full within a week and the paper bin is practically empty.	9. The respondent made a comment on the survey question.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate. Given the budget gap, the council has to look at all options to increase income or reduce costs to ensure the statutory obligation to balance the budget is met.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Previously almost every home put out a weekly food waste bin.; Now it goes in with garden waste and most homes do not put out a brown bin.; Charging for garden waste collection is likely to result in fewer bins being used and most food waste going to landfill. What a huge regressive move (for the environment)	9. The respondent made a comment on the survey question.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate. Given the budget gap, the council has to look at all options to increase income or reduce costs to ensure the statutory obligation to balance the budget is met.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I think charging for household garden waste would be unfair. You have just changed the bin process and as part of that food waste goes in the brown bin. I honestly think the council have a duty to remove this as part of the process it follows just now. It's waste and should be guaranteed to be removed. I dread to think of what would happen to that waste of people we're expected to pay more for the Brown bin to be emptied. Not a good idea at all. The other options mentioned should be considered though	9. The respondent made a comment on the survey question.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate. Given the budget gap, the council has to look at all options to increase income or reduce costs to ensure the statutory obligation to balance the budget is met.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Increasing rents will have a devastating effect on businesses, especially when they are already struggling with energy bills.	9. The respondent made a comment on the survey question.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Aye put the price up for everyone but not the wages ehh but the council will be OK and folk who work their at the top	9. The respondent made a comment on the survey question.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate. Given the budget gap, the council has to look at all options to increase income or reduce costs to ensure the statutory obligation to balance the budget is met. Although the pay award has yet to be agreed for 2023/24, it is envisaged that public sector wages will increase next year. The council has one of the leanest management structures in Scotland, demonstrating value for money.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Again this sounds like people are paying more in council tax every month for a lesser service and having to pay even more on top of this.	9. The respondent made a comment on the survey question.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate. Given the budget gap, the council has to look at all options to increase income or reduce costs to ensure the statutory obligation to balance the budget is met.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	This seems it could push small business to closures. There are very few services from the council we use. A bin collection is one i do use.	9. The respondent made a comment on the survey question.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	No charges for anything for residents, they already pay for this via council tax, and in practice there are always exemptions for those on low incomes (normally already exempt from council tax) so all that happens is those who pay have to pay more to get basic services. Any charges should relate to Commercial/business users as they have the opportunity to amend their business models to account for this	9. The respondent made a comment on the survey question.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate. Given the budget gap, the council has to look at all options to increase income or reduce costs to ensure the statutory obligation to balance the budget is met.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	At a time when household budgets are very tightly squeezed and working people are relying on food banks, charging for waste collection concerns me as it could lead to other H&S issues. Garden waste is mixed with food waste. Leaving this could lead to an infestation of maggots / flies or simply stop people from separating waste.	9. The respondent made a comment on the survey question.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate. Given the budget gap, the council has to look at all options to increase income or reduce costs to ensure the statutory obligation to balance the budget is met. The council currently has an extensive concession scheme to help those on lower incomes.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	More detail required on fundraising opportunities and impact on households	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	It would not be right to offer feedback without a sound understanding of the services this relates to.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Be careful not to raise rents to levels that users cannot afford	9. The respondent made a comment on the survey question.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The format of this survey is poor and does not lend itself to true scrutiny of the proposals. The survey is badly designed and off putting to many given the large blurb of text under each heading - the language is in business speak which is essentially meaningless. There is a lack of clarity on the proposals and the reader is left to assume what the blurb is getting at. This survey should have been in plain English with examples of the proposals which would support greater engagement with the activity. There should be space for feedback on the methodology being used also - this has not been made available which adds to suspicion that the whole process is already decided, and course of action is already determined. The council and COSLA must do more to protect our communities and demand a fair settlement from the Scottish Government. This exercise highlights the political failure of the funding model and it will be the local community that suffers as a result. The end of the survey does not have a 'Finish' button, merely a 'Next'. Overall - very poor approach.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charging for household garden waste collections would likely exacerbate fly-tipping.	9. The respondent made a comment on the survey question.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	You are already charging for bulk uplifts if you start charging for the brown bins that collect garden refuse and food waste their is a potential for more fly tipping in local parks. And Because food waste will be mixed in with this the possibility for an increased rodent population. This will also be the 3rd time in the last few years that money would have been wasted on bins that you then make obsolete.	9. The respondent made a comment on the survey question.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Council tax is going up and taking away one of the services by putting on a cost implication for families and people to pay already in the cost of living crisis	9. The respondent made a comment on the survey question.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Rent up in the middle of the worst austerity in living memory well done	9. The respondent made a comment on the survey question.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords. This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	So it pays for people to live in a flat as they will incur no garden bin collection charges, utter discrimination	9. The respondent made a comment on the survey question.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	People with get in a fight when tree leaves are blown into the garden of the neighbours, for example. This also happens with council gardeners who vlow leaves in my garden that I have to clean and put in my bin to keep my garden tidy.	9. The respondent made a comment on the survey question.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	The garden waste would just go in the grey bins to avoid the charge (for some people)	9. The respondent made a comment on the survey question.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Increase costs to provide services to external private organisations but again open tips most people will use them. Charging for waste disposal is unfair on people	9. The respondent made a comment on the survey question.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate, including garden waste.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Wow another impact on the younger generation	9. The respondent made a comment on the survey question.	Changes to fees and charges is applied to all users with those in low incomes being afforded concessions where appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Charges for garden waste collections could result in more dumping over fences, etc.	9. The respondent made a comment on the survey question.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	We seen a rise in fly tipping when charges were introduced	9. The respondent made a comment on the survey question.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	You needed to define what specific measures you've identified that make up £1.1 million. You've chickened out by suggesting you'll do some investigations and listed some possible options, but you must know what makes up the £1.1 million.	9. The respondent made a comment on the survey question.	This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	My understanding of consultation is that the audience needs to understand what is being proposed but this looks like a tick box exercise with the level of detail being provided,	9. The respondent made a comment on the survey question.	Thank you for your comment about the survey, the council will carefully consider all feedback and use it to review and improve our consultation approach.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Which facilities would be leased out?;	9. The respondent made a comment on the survey question.	The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. Community groups and individuals can rent council facilities, however opportunities to market this wider can be explored.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Speaking personally I think we'd just stop using council garden waste collection and put food waste in our own composter. Not because of the cost, but mainly the hassle of arranging for payments.	9. The respondent made a comment on the survey question.	The council welcomes anyone undertaking activities to minimise waste and reduce carbon emissions.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Income must be sustained of course. I am sceptical that charging for garden waste collection is going to be at all effective.	9. The respondent made a comment on the survey question.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	I would be concerned that people will just start burning their garden waste	9. The respondent made a comment on the survey question.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	brown bin charges don't make sense. I'll put my grass into the grey bin instead	9. The respondent made a comment on the survey question.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	why do we pay COUNCIL TAX FOR	9. The respondent made a comment on the survey question.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	More info required	9. The respondent made a comment on the survey question.	This document is part of the early stages of public consultation on budget saving and income measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	We already pay council tax.	9. The respondent made a comment on the survey question.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Where will peor get the additional income to pay for the above, wages are not increasing and the cost is living is.; ;	9. The respondent made a comment on the survey question.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Really just making everything cost more for everyone so it makes it harder for everyone to live affordable.	9. The respondent made a comment on the survey question.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Again, charging will likely lead to fly-tipping so you need to be cautious on this one.	9. The respondent made a comment on the survey question.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income. Experiences in other authorities has not necessarily seen a longer term increase in fly tipping.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Other things seem like normal council operations.	9. The respondent made a comment on the survey question.	West Lothian Council currently has one of the lowest levels of charging within Scotland. Audit Scotland and the Scottish Government continue to state that councils should consider charging as part of their overall financial management. Therefore councils should understand the contribution that charges make to their overall financial position, and the extent to which individual charges are subsidised. All local authorities can introduce discretionary charges where assessed as appropriate.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	Does this mean brown bin collections will be charged?	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Reviewing income, concession	5 Reviewing income, concessions and other contributions	simply says you choose without input must publish detail plans before implementing	9. The respondent made a comment on the survey question.	This document is part of the early stages of public consultation on budget saving and income measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Have your say on council tax	6 Your say on Council Tax	Again, I would support it if there was evidence that this money was spent on other service such as schools, social care and leisure facilities/Health and wellbeing. But would definitely be looking for answers to questions on how this is being spent and how worthwhile this spending is and a social return on investment.	1. The respondent advised that they agree with the proposal.	The council continually reviews service provision using our Best Value Framework to ensure that we deliver value for the public and continue to achieve the expected levels of performance. There are rigorous internal scrutiny arrangements in place to assure the quality of our services and we are also subject to external audit and inspection.
Have your say on council tax	6 Your say on Council Tax	If the money was guaranteed to be spent on schools and social care, I would welcome this rise	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support raising the additional council tax if there was clear information on how the additional funds would be spent. This should be laid out alongside the proposed increases.	1. The respondent advised that they agree with the proposal.	Thank you for your response. Your comment has been noted.
Have your say on council tax	6 Your say on Council Tax	An increase in council tax is inevitable. Not sure all households could afford it, in the current financial crisis climate. If the benefits of the increases are made clear with deadlines and targets, then maybe the sacrifice will be better received. In saying that, some households' priority is ensuring there is food on the table and they have a bit of heating in the colder months, so a 3.5% increase would be a stretch too far.	1. The respondent advised that they agree with the proposal.	The Anti-Poverty Service provides advice and support to help people alleviate poverty. It is available to all residents to help them get additional support to help with the cost of living.
Have your say on council tax	6 Your say on Council Tax	I believe that Council Tax needs to be increased to cover priority services. There will always be residents that disagree but that is human nature.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	I would support an increase in line with the mandated amount of 3.5% because I do understand that the council is in a difficult position.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Would support an increase of 5% per year. Would prefer my child (and others) to be in contact with a qualified teacher at all times in school.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Whilst against rising charges, acknowledgeable the necessity to increase CT by 3.5% to help generate funds to provide local services.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I don't think it should be increased more than 3.5% and I think people would struggle even at that level	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	No would not support an increase of more than 3.5%	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	Yes I would support a rise; Council tax should be in line across authorities and not a postcode lottery	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	This is very tricky! Some families in WL are struggling, I am happy to pay 3.5% more as long as there is no significant reduction in the service provision. ; I don't want to pay more than 3.5% more	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	I would be prepared to pay up to a 5% increase each year.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Yes to 3.5%, possibly to 5%. However, I cannot support an inflation size rise as at least 80% of people within West Lothian will not have an income rise to that amount. I know this means you are operating at a deficit but again Scottish Government should at least try managing their books let alone balancing them!	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Schools and social care, yes, they must be maintained. Council Education department, no.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Potentially supportive but with inflation at 10% and pay rising much less than this, this is a much higher impact than 3.5% of spending power for a family.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	All of the issues currently experienced within WLC could have been avoided if the council tax was raised at a reasonable rate every year instead of having been frozen. it was all very good at the time for many, but they will be the first to complain when all basic amenities are even further reduced. I certainly would prefer to pay an increase in council tax and see all of our essential services invested in rather than stripped. £46 a year well invested.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. For many years the council tax freeze was a requirement of funding from the Scottish Government.
Have your say on council tax	6 Your say on Council Tax	Perhaps if guaranteed improvement in level of services.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Yes would support reasonable increase	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	It's acceptable maintain services and where you can absolutely ensure that it's spent wisely it's worth more..	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I wouldn't object IF the money gets spent on key areas and NOT on management positions being kept or "massaging" certain egos	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	With cost of living on the rise, tax payers don't have money to waste on projects or programmes that are not delivering any outcomes directly linked to the Councils 8 priorities. Your council papers need to make sure they are so that only relevant projects and programmes are funded to help keep council tax reductions to a minimum.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. All services will be reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned agreed priorities.
Have your say on council tax	6 Your say on Council Tax	I would support a council tax raise provided the facilities that I need are unaffected, for the 3.5 % proposed increase. ; ; As I do not benefit (or indirectly benefit) from a further increase of over 3.5% I feel I have no real say in the matter, however, if I did would prefer schools cared more about resource or H&S, rather than aesthetics or a pretty sign, etc...	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Yes, in principle we would agree but have witnessed WLC's lack of transparency and accountability in administering ourvtax money fairly. Therefore, we do not trust you to spend additional money fairly.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Don't really have a choice do I?	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	My only worry however is how we would be assured the additional money raised was indeed spent on these priority areas.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The annual budget report has information on each service budget, along with detailed information in service activity budgets.
Have your say on council tax	6 Your say on Council Tax	I would support an increase of 3.5% for Bands A to D. For higher bands, I would support a greater increase of perhaps 4% or 4.5% provided this additional money is spent on schools and social care.	1. The respondent advised that they agree with the proposal.	The current council tax legislation means that any proposed percentage increase needs to be applied across all bands. Council tax reform, including how increases to council tax are applied, can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	Council tax increases are the only fair way to ensure those who can afford to pay are paying more. Support a rise in council tax.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would not support more than 3.5%. My salary certainly isn't going up by that much	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Councils are the most important bodies for the management of local services. I cannot see why the Scottish Government does not manage the budget better. I would support an increase of more than 3.5% BUT ONLY IF THERE IS TOTAL CLARITY about where & how the funding is to be spent.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The annual budget report has information on each service budget, along with detailed information in service activity budgets.
Have your say on council tax	6 Your say on Council Tax	Personally I would support an increase of up to 8% or even 10% if it helped with Social Care. My Mother was 93 when she died in the summer and I have had lots of dealings with Social services over the previous 3 years. I know how difficult it was to get her the care at home she needed in 2020 (Covid absolutely didn't help) and in fact she only got it because she broke her hip when she was 91 and couldn't go home without some help to wash and dress etc. so they needed the bed basically. She was able to stay at home before she died, with the help of the carers twice a day, a privately employed cleaner cum home help and help from myself and my husband for everything else - otherwise she would have needed to go into a home for at least 18 months before she died which would have cost the Council a lot more money than having carers come into her own home	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	It needs to be 3.5% at the minimum to help the various services which are obviously needing to be cut somewhere already.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would NOT support a rise of only 1%. I would be annoyed if you did that to be honest in spite of the extra cost to us personally It absolutely should be much more than that; ;	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I am happy to pay more council tax, but then, I can afford it. for other people it would be the final straw, coming on top of inflation and mortgage rates and everything else. I would support an increase if there was a way for those who are really struggling to avoid it.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The current council tax legislation means that any proposed percentage increase needs to be applied across all bands however there is support through the council tax reduction scheme. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.
Have your say on council tax	6 Your say on Council Tax	yes so long as council services don't shrink to an unmanageable level	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	cap at 3.5%	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would suport an increase as long as the executive at WLC agree to NOT taking further increases in their own earnings !	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Yes, I would support a rise above the 3.5% if it was applied to all all bands, not just the higher bands.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The current council tax legislation means that any proposed percentage increase needs to be applied across all bands
Have your say on council tax	6 Your say on Council Tax	Put the tax up. I don't want to live in a filthy, lifeless. Also the people who lose their job at the council will stop contributing to the economy and its a feedback loop.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I don't have enough information to determine whether that 3.5% increase is justified, but obviously, it is the largest regular bill for me outside of mortgage, and so I support affordability measures for me and other people who may be more in need than myself. Honestly, these savings to be made are so colossal and it doesn't feel right for citizens to be asked "what can you do without and pay more for", it feels better to just explain citizens have needs and that comes at a cost, that they pay.	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. Affordability is a key consideration when setting council tax levels.
Have your say on council tax	6 Your say on Council Tax	I think we need to support an increase in Council Tax of at least 3.5% per annum as the alternatives will be to slash essential services. The only other alternative is to increase other income such as cemetery fees by higher than what you are planning.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	People unfortunately don't have the continual extra money for constant increases. Small increases yes but with all the other financial burdens this has to be kept to a minimum. Too often cuts/increases are at the wrong end of the scale, eg lower paid workers reduced/affected by rises in taxes etc they cant afford	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Point 2 - I agree but must be clearly identified. Schools most important -next generations.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Personally, I don't know how you can raise the money to keep current services with out raising the rate, that is why you have the people on the big salaries, making good the decisions, while we pay our council tax	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Any increase in council tax must result in clearly seen improvements/ retention of key service delivery. People want their council tax spent on key services and not on vanity projects.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	This is a very difficult question to answer because the funding for the Council comes from a combination of the Scottish Government Grant (which is also likely to be under pressure to be kept to a minimum in the near future) and the Council Tax. The other difficulty, particularly in a time of high inflation, is that the proposal assumes an increase of "... at least 3.5%" - this not the same as a flat rate 3.5% increase each year. If all things remain equal (no sudden drop in Scottish Government Funding) then a flat rate increase over the period 2023/24 to 2027/8 would seem to be reasonable and give some certainty for people.; ; For properties in tax bands A to D inclusive, any increase in 2023/4 would have to be clearly explained as the Westminster Government's £150 cost of living discount will no longer apply. In other words, the apparent increase will be much more than 3.5%.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would be happy to pay an increased council tax rate if it would mean schools don't have to suffer from lack of funding more than they are already. My children with additional support needs are already part time at school and not receiving the support they need. Their education doesn't need to suffer anymore, they are already not living up to their potential and this is all due to lack of funding and staff resources.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support a higher rate of increase for higher band properties to support education - a tiered approach would support those with lower incomes whilst supporting local services	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	I'd rather pay a little more than see the kids school hours reduced, but I am in a much more fortunate situation than most.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Need to be affordable rise. At the moment this would push more into poverty and increase debt collection costs	1. The respondent advised that they agree with the proposal.	Individuals on low incomes are able to apply for a number of council tax discounts and reductions.
Have your say on council tax	6 Your say on Council Tax	I have no issue in increasing my CT however we still seem to pay more and be given less and less. If the money raised was actually VISIBLY used to improve schools and other areas such as refuse and local attractions. But I will not pay more money to fund the ridiculous wages of the Executives running WLC. I'm quite sure their jobs will continue to be safe whilst WL residents continue to be treated as if they do not matter except as a cash cow	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	Yes in theory but the government need to give more money to LA.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Personally can afford to pay the increase but with inflation at 20% and heating costs many can't so needs to be as low as possible while keeping services necessary.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. Individuals on low incomes are able to apply for a number of council tax discounts and reductions.
Have your say on council tax	6 Your say on Council Tax	Yes should be less for few years cut it down	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Raise it by 3.5.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	For key priorities - yes.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would definitely NOT support an increase of more than 3.5% under any circumstances. Using schools and social care as spending priorities is like blackmail. These services should already be a priority for West Lothian Council to provide the best quality education for our children and care of our venerable and elderly people in West Lothian.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	Happily pay a bit more council tax if leads to a decent education and care provision	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Happy for Council Tax rise	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	An increase greater than 3.5% will be too much for most people the Scottish government should be providing more money to councils as they do have enough but say they don't but as usual the tax payers feel the brunt and have to pay more but still see cuts in the council provisions, there are not many easy solutions to all this unfortunately.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	I think 3.5% seems reasonable and increasing further would put undue stress on already tight household; Budgets	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	I would support an increase in council tax that was going directly to education, healthcare and social care. Not for more bureaucracy and managers who achieve very little.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support the increase in council tax if all the funding raised is spent on key areas.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would definitely agree to raising the council tax with no impact on essential services	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Would support if spent on schools and social care	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	I would support the raise if it was reflected in the school priorities.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Up to 5% if monies funded schools, social work and elderly care.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	In theory I would support a rise but again we would need to be very sure that those just know the cusp of levels are not chronically effected.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. Individuals on low incomes are able to apply for a number of council tax discounts and reductions.
Have your say on council tax	6 Your say on Council Tax	To ensure other areas didn't not suffer a small increase would be reasonable	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I don't know, perhaps 2% would be better?	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. When setting council tax consideration is given to overall affordability.
Have your say on council tax	6 Your say on Council Tax	IF the council tax increase was being put into education then yes, I would support it. If it was to put into paying for people who can work but aren't willing to then no o wouldn't be. It seems unfair that the proposed increase would only affect 25% of households but the increase would see a substantial increase in the council tax for those bands. Effectively that 25% would be shoring up the ones in the lower bands. Most people would like to see something for their money and it going to education would be a start.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	5% seems fair given that inflation is at 10% - if the council costs go up at 10% then surely income has to go up soon	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I would pay more for Council Tax if it was required.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Would be happy to pay more council tax if going to schools and essential services.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would be happy with the 3.5% as appreciate the revenue is needed, however would struggle with more than that regardless of what the money is spent on	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	I would support an increase of 3.5% each year - or slightly higher - up to 5% ? If services would improve, I wouldn't mind the increase.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support a larger increase of 3.5 if schools were given the funding needed.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Tax should go up, but in a progressive way, with the burden sitting as much as possible on the highest tax bands	1. The respondent advised that they agree with the proposal.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	I would support increase in council tax provided that schools and social care budget are protected.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I do not support a raise in council tax of more than 3.5%	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	Yes, I would support an increase of more than 3.5%.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Raise it	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Would rather not, however, if it meant schools and social care would benefit then yes	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Yes I would be happy to pay more council tax	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Increase	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your Say on Council Tax	Again as previous comments, focus on fraudsters and benefit riders. I have a family member who needs to prove her medical diagnosis and such by travelling into Edinburgh, yet my other family play the game... my family member will never get better but will get worse, you can't cure autism, adhd,add..... But you can cure lazy people who live well off benefits.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Would support an increase as long as the additional funds were spent on identified key priorities	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I do not support more than a 3.5 % each year that is more than enough for people to pay	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	Council tax is a necessary payment but must be kept in line with rising overall cost of living. An increase at this time would have a serious impact overall.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. When setting council tax consideration is given to overall affordability.
Have your say on council tax	6 Your say on Council Tax	Would support a 3.5% increase per annum 23/24 - 27/28. Would only be in support of a rise above this if the funding was split across all areas rather than a targeted use.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	No increase more than 4% for the next 5 years. If council tax was increased it must be clearly spent on a visible improvement and this publicised. E.g. better roads (no potholes, sunken drains), maintain paths not overgrown, drains and kerbs cleared of leaves & weeds, cycle paths regularly swept of stones/gravel, school facilities improved etc.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	If we want the services we have to pay for them. I would be happy to pay a 5% increase and retain some of the services	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	I think everyone will struggle with over 3.5%	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	I think that council tax should be raised. Perhaps bring it in line with the average across Scotland across all house bandings. The majority of residents can afford to pay more per week for the services that they receive and should do so.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I would support an increase, but only if the funding was targeted at front-line services. I feel that key services are those that benefit most people, and those are sometimes not schools and social care, but everyday things like emptying bins, gritting and repairing roads, and dealing with anti-social behaviour.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	i understand that the council in West Lothian needs to reduce spending whilst providing the many services that its residents require. Whether you are elderly or a family with a disabled child they all deserve support to get the benefits that they need. If you are disabled and require care it needs to be available and at a cost-effective price. Charging people for their care, as a disabled person myself is simply not right. I had to go through losing my support as I couldn't afford to pay for it.; It is essential that our schools are properly funded. It gives our children the best start in life. of course, support is available for our children if they have problems such as mental health issues or are ensuring that they don't fall behind with their learning. Adequate funding is therefore vital therefore I feel that I would be happy to pay more in council tax to ensure crucial services remain in place.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	As this has already been done in other authorities it seems logical.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I am happy to increase council tax to an extent but believe the government should increase the budget given to local councils.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Happy to pay more tax for more investment in resources.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	In the current economic environment, a proposed 3.5% increase seems entirely reasonable. Any increase above this would but unreasonable burden on hard pressed families	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	I would support an increase in tax on the proviso that educational based provision is protected and those in the social care system are maintained also.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	>3.5% is quite an increase, especially year over year, and it feels like once again the buck is passed onto the end user, rather than government or business picking up the bill. ; Plus it always feels like we pay more and get less - increase tax, cuts to services... ; It's disappointing that this will happen, but if the increases had a positive impact on our community and lives, I would tolerate it.	1. The respondent advised that they agree with the proposal.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	I'm content with the 3.5% but cannot afford anymore.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	I would not support an increase of more than 3.5%. I do not earn a large salary. Any saving for me would be helpful.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	An increase of 3.5% each year for four years seems like a really large increase at a time when the cost of living is so high and many wages have been frozen. However an increase is inevitable if council services are not to suffer and there really is no other way of the council raising the funds, unless the Government are able to provide some additional resources.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. The council regularly emphasises to the Scottish Government the need for a fair settlement for local government as well as working with COSLA (the body that collectively represents local government in Scotland) to emphasise this point.
Have your say on council tax	6 Your say on Council Tax	I agree to the rise in Council Tax. I am not sure I would go above 3.5% without seeing more detail about what you are proposing.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	If an increase of more than 3.5% this must benefit everyone, not just people with children and social care. E.g. community facilities, condition of roads (not just A roads), cycle paths etc.	1. The respondent advised that they agree with the proposal.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	I would not support an increase of more than 3.5%, an increase of 3.5% annually would also put a lot of finical straint on families who are currently already struggling, many individuals are not seeing wage increases that match this. Reductions in amount bins are emptied in a callender month could aid with saving money. Additonally, reductions in council fundings towards Gala days would aid with brdging the budget gap.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	I would support an increase of up to 5% if the spend was ringfenced for schools and care.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would no support an increase of more than 3.5%. This is due to me working and living within the council and seeing the lack of services the council provides that it should - emptying bins - never on time and sometimes just missed; working for the council - severe lack of school funding that they keep promising will improve - scottish government's plan was to reduce the attainment gap but the best idea the council can come up with to reduce costs is to reduce the funding in education?	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%. The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	I would support an increase in council tax if public sector and other wages are also going up - if not then people will struggle to be able to pay as they are stretched already. That increase could be the difference between eating or not for some people and people may fall into rent/council tax arrears or lose their homes. More savings need to be made from the upper levels at the council.	1. The respondent advised that they agree with the proposal.	Although the pay award has yet to be agreed for 2023/24, it is envisaged that public sector wages will increase next year. The council has one of the leanest management structures in Scotland, demonstrating value for money.
Have your say on council tax	6 Your say on Council Tax	Council Tax should increase by 3.5%. If not, more services will be cut which will have an impact on all WLC residents.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Given the pressure on household incomes it is hard to endorse a raise in council tax but if it is necessary to maintain social care I would agree.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Not by much, please don't squeeze your residents too much.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. When setting council tax consideration is given to overall affordability.
Have your say on council tax	6 Your say on Council Tax	3.5% max at this stage as we are going through a cost of living crisis, hopefully things will improve over the next couple of years and future increases can be proposed	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	Residents must pay for services it's not free.;;	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	It's just like the errors made in school transport. Years people behave been allegedly getting free transport and they were not entitled.	1. The respondent advised that they agree with the proposal.	All services will be reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned agreed priorities. Where instances of fraud are identified these should be referred to the council's Counter Fraud Team. Contact the team on 01506 282002 or send an email to whistleblowing@westlothian.gov.uk . Alternatively you can complete the Whistleblowing online form available on the intranet. All referrals will be treated confidentially.
Have your say on council tax	6 Your say on Council Tax	Would support 3.5%, perhaps a higher rate for higher banded houses?	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%. The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	Council tax should increase/decrease according to the cost of living increases but within West Lothian council, otherwise it would be unfair for residents; The extra funding should then be used to find other viable means of income for the council and in turn to be given back to the community through better education and services	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	With support like concessions and reductions in place, increases in council tax are positive. Especially if it's shown the money goes into jobs that help residents, services that improve quality of life and environment	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	The council should look at additional income measures rather than increase the council tax in itself.;;	1. The respondent advised that they agree with the proposal.	West Lothian Council currently has one of the lowest levels of charging within Scotland. All local authorities can introduce discretionary charges where assessed as appropriate. Given the scale of the financial challenge the council will have to consider both taxation and local charging.
Have your say on council tax	6 Your say on Council Tax	I would support a one off increase of 3.5% this year followed by 1% for the following years	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I support an increase in council tax. I would much rather pay more council tax and see council services maintained, than face further draconian cuts, as outlined in the council's proposals.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	ONLY if it was going to social care and schools - not to line council fat cat pockets!	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Would support if increases were spent on social care.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I think 3.5% is the maximum most people could afford in this economic climate.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	I feel all households should pay council tax. Even the most vulnerable or low income have rubbish that needs to be collected so I feel they should pay at least some portion.	1. The respondent advised that they agree with the proposal.	The current council tax legislation means that any proposed percentage increase needs to be applied across all bands. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.
Have your say on council tax	6 Your say on Council Tax	3.5% is all that people can afford, so the Council will need to find further savings to fund the deficit	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	I agree with a small annual increase to council tax so long as it's needed, efficiency managed and not wasted on nonsense like the so called traffic calming, 20 mph limits and signs or cycle paths that cost a fortune and are rarely used.	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs. Spaces for People (20mph) and Cycling, Walking and Safer Routes (cycle paths) are fully funded from the Scottish Government who are investing in these areas.
Have your say on council tax	6 Your say on Council Tax	Yes to second bullet point.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	3.5% increase is acceptable, but I don't agree with making it more than that. You seem to have identifies plenty of savings that can be made.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	I support a council tax increase of up to 10% (I am band E). I expect services to be of a very high quality if that is enacted, however. Parks should be clean, streets should be clean and free from litter, waste should be uplifted in accordance with diarised times (no additional charges for garden waste, EVER), school services should be available such as breakfast club, free meals for all kids (studies in the health service have shown that means testing for free meals in counterintuitive). ;	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	For all i care, sell all your buildings and have your staff work from home, and reduce your management numbers significantly.	1. The respondent advised that they agree with the proposal.	The council has introduced a hybrid working pilot however the majority of council staff, due to the nature of their jobs, cannot work from home. We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities.
Have your say on council tax	6 Your say on Council Tax	Yes, agree an increase may be necessary to protect key services	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Any increase should be limited to 3-3.5%, there should be more action taken on no payers.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%. The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity.
Have your say on council tax	6 Your say on Council Tax	I support a higher level of taxation, for spend on climate change indicatives, and on social care.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Yes. Council taxes should be increased to the level required to provide adequate social services. Against an inflationary cost background of c.10+% raising council tax by just 3.5% is clearly insufficient, and trying to find "savings" to make up the shortfall will only lead to our services being gutted, which in turn will lead to an additional cost burden in the future given the impact this will have on our inhabitants. ; ;	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I definitely do not support an increase in more than 3.5% council tax- paying more for less services? In the time we have lived in Livingston the place is certainly not looked after the way it was in the early 80s - also a time of austerity and financial crisis- there were beautiful plants and well kept verges - a place to be proud of. There have been questionable waste of money -eg 20mph signs in villages.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%. The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	The increase seems fair. Its a small amount to help ensure continuity of service.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Would you support an increase of more than 3.5% if all funding raised above this was spent on key identified priorities, such as schools and social care? Yes.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Would not support a rise above 3.5% especially is some of these ridiculous plans come into force	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	As long as inflation is high then i see no problem with a 3.5% increase in Council Tax.; ; communities will react better to increases if they can see what money is spent on. If 3.5% is applied and we see less staff more technology what is the money being spent on, if in turn there is more "management" people will see this as a bad spend.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I would agree to the 3.5% rise if the money raised was used to fund education and children's services.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support an increase of 3.5% or more if it meant there were less cuts elsewhere and support was provided for lower income families. There are many families that can absorb an increase such as this to limit the impact on our social care and schools due to budget cuts, but not to the detriment of the families that already require financial support	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.
Have your say on council tax	6 Your say on Council Tax	Yes, pensions are going up with inflation (circa 10%), people expect to pay more.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I would support this proposal.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	I would support an increase if it meant my children received a better education.	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	happy for an increase if services are improved	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	Yes I would support an increase subject to improved governance and clarity being provided of where money has been spent and the impact (positive or negative) it has had. I would want to see improved communication from the you clearly showing a breakdown of how much money has been spent and where.	1. The respondent advised that they agree with the proposal.	Full details of how the council allocates its resources to individual services is provided in the annual activity budget which is available on the council's website. A summary of key areas of spend are included in the council tax leaflet which is provided along with bills. The council's aim is, and always will be, to ensure that West Lothian continues to be a great place to live, work, visit and do business. To achieve this aim we will continue to prioritise the money that we spend on services to make sure that our investment has the biggest and most positive impact on the community. As validated by external auditors and other inspection bodies, West Lothian Council continues to perform well against key performance indicators and activities. This will continue to be monitored and reviewed.
Have your say on council tax	6 Your say on Council Tax	I would support it if it went to key areas such as healthcare social care and education. A 4% rise would be the max though as it is hard enough making ends meet with the cost of everything rising except our incomes	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Paying a bit more should not be an issue to most people when it is clear that the money is well spent and going to services that improve the lives experience of everyone in West Lothian, whether they use those services directly or not, e.g. I've never visited the Deer Farm at Beecraigs but it improves the area and offers opportunities that are invaluable and hard to measure just by money.	1. The respondent advised that they agree with the proposal.	As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	I'd support an increase but not if school transport services are cut!!!!	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	Only to be expected in this present climate.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I would support an increase but not to 3.5%	1. The respondent advised that they agree with the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I would support an annual increase of 3.5% as there are no other reasonable options.; I would not support an increase above this just to spend on identified priorities as they priorities always relate to schools and children - something that, for me, already receives sufficient funding.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I support higher Council Tax. I can afford to pay more, and more importantly tax has not kept pace with inflation for 15 years because of misguided Scottish Government policy. If staff are to get high pay awards then we need to pay for that. I would support more than 3.5%.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Yes, if spent on key identified priorities schools and social care. etc.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	If the Scottish Government hadn't frozen council tax rates for 10 years and more we wouldn't be in this position now!! Small increases each year would have helped now the public is being asked to pay much more. I would support an increase as long as extra funds raised were properly utilised.	1. The respondent advised that they agree with the proposal.	For many years the council tax freeze was a requirement of funding from the Scottish Government. The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	Council tax needs to be increased as the policy to freeze council tax has proved to be a disaster.	1. The respondent advised that they agree with the proposal.	For many years the council tax freeze was a requirement of funding from the Scottish Government.
Have your say on council tax	6 Your say on Council Tax	Would support an increase of nothing more than 4%	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	If it's used for the right things	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support a higher increase.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Yes I would support a raise in council tax, keep the funding for leisure facilities. This is a place of social interaction for older people	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	i think council tax should be raised as long as services are not cut to levels where council tax is not justifiable as in not worth it	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	Council tax should be increased but not higher than 3% a year, the council do increase the amount they pay out in contracts by more than 3% a year so should not increase money due to them at a higher rate.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	An increase of 4.0% would be acceptable but not more than that.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	3.5% increase would help keep the council services going and we would rather see our local community centre stay open than have nothing at all. Nursery facilities are well provided for as things stand as are schools in west lothian compared to other areas.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	An increase beyond 3.5% should be considered. Increase should reflect increased cost in providing these core services as a result of the cost of living increase. An increase in line with current rate of inflation would be appropriate.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	If it prioritised schools. Yes.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	But, apart from all staff who will lose their jobs based on your wider proposals, I can't see you having salary costs increasing for those that remain by less than 5% (based on current union strikes & prevailing salary increases). So if your your main cost is going up by this much then surely Council tax needs to match this?; If you can achieve this then maybe Schooling doesn't need to play such a big part in your reduction proposals?;	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	I think council tax will need to increase .; An increase of 3 5% every year is a trifle worrying ...but I have no ideas.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I think 3.5% is fair	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support an increase but I would expect results to be readily noticeable.	1. The respondent advised that they agree with the proposal.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	3.5 is fine	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	yes it needs to increase	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	As long as the increase is kept low it is to be expected.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Yes but it would need to be reasonable, EG not doubled	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I recognise there needs to be increase but not happy that it has to happen.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Yes.; I would support 2% where I was absolutely assured that the money was ring fenced for named purposes. I will not buy into use of discretion through words like "identified priorities".	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support an increase of 5% to council tax	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support an increase if services were made more efficient. I dont support an increase if massive cuts in services will still go ahead despite this.	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	Sadly, I don't think there is any alternative to not increasing council tax by at least 3.5%. If it means retaining a decent standard of school, social care, roads and waste services then I would support a slightly higher increase.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support an annual increase, as long as average wages across the council were also raising by at least the same percentage.	1. The respondent advised that they agree with the proposal.	Although the pay award has yet to be agreed for 2023/24, it is envisaged that public sector wages will increase next year.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	I would support the 3.5% rise but no more than that. We need to pay for services but we need to recognise that most tax payers are struggling. There won't be extra money if people default on payments.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	It would be difficult but I would pay increased Council Tax (which has been kept artificially low for years) if it meant the money would be spent on helping poorer people, BUT, there must be information provided to the public, as to where this extra Council Tax money would be going. I would want to know exactly where all this extra revenue would be spent. People need to know they have a say in this. Especially when we are expected to foot the bill.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. The annual budget report has information on each service budget, along with detailed information in service activity budgets.
Have your say on council tax	6 Your say on Council Tax	You're supposed to be the grown ups here. You can't ask how to bridge a budget gap without investigation of the budget. Where did the apparently arbitrary figure of 3.5% come from to set the increase in the budget? Is that historical? Inflation based? Copying another council who are more efficient? Why 3.5%? My dad always said he loved paying more income tax- because it meant he was earning more. He was happy to give back more. I'm not being sarcastic, he meant it. He was a social worker, good man. I've never thought of tax as a bad thing. I'm happy to pay my fair share to make sure we're working as a society. But times change. Politics is so very different. I'm very jaded as to the cost effectiveness of our country and council leaders. They lie to us. I want to pay more tax money to good people who will do good things with it. I don't want to pay more tax money to bad actors who cream off from every transaction they set up. The will is here but the trust is gone. I'd pay an extra 5% increase if I thought it would be honestly distributed. Maybe 10%. I think my council tax is £135 per month. I'd gladly pay another £14 to the council in an alternate universe where I trust the leaders.	1. The respondent advised that they agree with the proposal.	Thank you for your response. Your comment has been noted. The budget gap faced by the council is a result of funding being insufficient to cover the increasing cost of delivering services due to factors such as population growth and indexation. The council is subject to rigorous external audit and both Audit Scotland and EY have confirmed, over a number of years, that the council has robust financial management. All council tax raised is used to deliver local services and affordability is a consideration when setting tax levels.
Have your say on council tax	6 Your say on Council Tax	As much as I don't want to pay more council tax, I would rather pay the small increase than suffer the significant cuts needed if the extra income isn't raised.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support increased Council Tax to support schools and social care. ; I also think the Council could do more in their consultation to highlight the greater significance of the Scottish Government grant offered to the Council each year and whether or not that is set to increase as well . In addition , the Scottish Government should also be consulting residents to explain their grants and ask for opinions, given their contribution currently amounts to 81% of the money available for service provision.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. Initial information from the Scottish Government is that funding for local government is set to be frozen in coming years despite substantial increases in costs.
Have your say on council tax	6 Your say on Council Tax	I would support increasing council tax as long as help was available for households in financial difficulty and as long as the money generated is spent wisely.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold. At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.
Have your say on council tax	6 Your say on Council Tax	I would support a modest rise of above 3.5% as long as the money was spent on schools and social care.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would not be opposed to an increase in council tax as long as the money saved went to preserve the valuable jobs within primary schools. ; Livingston for example in terms of its environmental situation is in a terrible mess - dual carriageway untidy and unkept as is many areas (long grass/untidy)	1. The respondent advised that they agree with the proposal.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	Yes I would support this as long as the funding raised was indeed spent on key identified priorities such as schools and social care.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	If it was spent on key priorities I would 100% back this, but households are not earning enough at present to cope with this increase.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I think the biggest issue with council tax, and council funding is the impression of the available funding being wasted. I have no real objection to a 3.5% council tax increase, with the cost of living and pay rises for key workers needing to increase, they ultimately so with council tax. However, my children play tennis in Kirkton Park, Bathgate. I noticed a few weeks/months ago that there were new bins in the park. The bins were not basic bin, but bins that talk to you for putting rubbish in. I would assume that there is significant surcharge on "talking bins" and would far rather we had less of these to spend more money on education, social care, christmas lights.	1. The respondent advised that they agree with the proposal.	The new bins compact waste allowing savings to be delivered in employee time emptying bins less often. This has delivered a saving for the council, demonstrating efficiencies in service delivery.
Have your say on council tax	6 Your say on Council Tax	I think the biggest issue with council tax, and council funding is the impression of the available funding being wasted. I have no real objection to a 3.5% council tax increase, with the cost of living and pay rises for key workers needing to increase, they ultimately so with council tax. However, my children play tennis in Kirkton Park, Bathgate. I noticed a few weeks/months ago that there were new bins in the park. The bins were not basic bin, but bins that talk to you for putting rubbish in. I would assume that there is significant surcharge on "talking bins" and would far rather we had less of these to spend more money on education, social care, christmas lights.	1. The respondent advised that they agree with the proposal.	The new bins compact waste allowing savings to be delivered in employee time emptying bins less often. This has delivered a saving for the council, demonstrating efficiencies in service delivery.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Yes, I would support an increase of more than 3.5% if all funding raised above this was spent on key identified priorities such as schools & social care.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Inflation is 10% so anything less than this is a real time cut. Harsh as it is West Lothian is becoming more affluent and a suburb or Edinburgh. Why not raise council tax a bit more? Not necessarily 10% but 3.5% is very low.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support a raise of more than 3.5% to deliver key priorities.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Increase by 4.5% each year for the top bands to generate further income and reduce the number of cuts	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I support an increase - it's unsustainable to expect fees to remain the same	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Increase tax as much as possible to maintain the current education budget. Education is already on a tipping point and I fear that the severity of your cuts would push it over the edge.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	First point is that I am not interested in a comparison with England (or any other part of the UK) only Scotland. I do support an annual increase in council tax. However it has to be fair, what the council and SG need to consider as that peoples circumstances change. I.e. just because a person/family could afford a property, banded E or above 20+ years ago, does not necessarily mean that they can afford the council tax charge that that property now has. Circumstances could have changed and they could have struggled to keep hold of that property. Most likely that they've had family that have now grown and moved out. and there's maybe only one or 2 people now left in that house. Why should they have to pay the same amount of money for services that they don't use? They effectively could be paying the same as a family of 5/6 with more than one adult working. Just because someone stays in a property doesn't mean rising costs are easy for them. Namley in relation the recent changes by the SG and the more recent £150 everyone in band A-D got this year... No help for those above a band D. Also would like it noted that folks in a band A-D that may have extended their property, which would now fall into a higher CT band but hasn't because it hasn't changed hands and been affected by a band change. These things are never taken into account and people who could well do with a little miss out as they don't tick all the boxes and others who benefit that really shouldn't! There's no need to raise it higher than 3.5%, because you plan to reduce costs in the services you mention above, earlier in the consultation...	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%. Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	Yes increase it.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	As long as it improves core services.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	I think 3.5% is fine but only if pay increases to match or exceed this.	1. The respondent advised that they agree with the proposal.	The pay award for 2022/23 was agreed at a level higher than the increase in council tax. Although the pay award has yet to be agreed for 2023/24, it is envisaged that public sector wages will increase next year. A percentage increase in council tax, in monetary terms for most people, is considerably less than a percentage increase in salaries.
Have your say on council tax	6 Your say on Council Tax	An increase in fees is necessary but over a 5 year period any increase over 3.5%pa is a burden. What reserve funds do you have and have you any plans to utilise them.	1. The respondent advised that they agree with the proposal.	The council has the lowest unallocated general fund balance of any authority in Scotland. By law the council must have a balanced budget. The council is required to identify recurring budget savings or increased income and can only use one off resources (or reserve) funds for a temporary period to provide time for recurring items to be delivered.
Have your say on council tax	6 Your say on Council Tax	Yes - if investment was transparent and good services delivered. However, given current cost of living crisis, which is likely to continue, what is the financial impact of an increase in those failing to pay?	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support an increase in council tax.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Strongly support a rise in Council Tax, particularly for more expensive properties	1. The respondent advised that they agree with the proposal.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	Would not support an increase of more than 3.5 % as at the moment don't see value for money with council services. Find different service providers by different procurement.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	I support a 3.5% increase but worry that above this is not affordable given the rising cost of living and not same increase in wages (I work for the nhs). Groceries cost more and utilities a huge amount more than ever before.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.
Have your say on council tax	6 Your say on Council Tax	If funding was spent on things like supporting the children with ASN who are increasingly being allocated to mainstream settings rather than receiving specialist support I would be in support of a Council Tax increase.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support an increase if the money was not wasted. People are going to go through a tough time over the next few years, many families will be alarmed by a 3.5 % increase in council tax.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.
Have your say on council tax	6 Your say on Council Tax	In the current financial climate I would not support more than a 3.5% rise. Given the amount of new build going on in West Lothian, I would have thought this would have significantly increased council income.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	Yes I would support a council tax increase.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Would be supportive of increases in excess of 3.5% if it meant protecting services such as Education and social care.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	While no one wants to have to pay more, the council's proposed 3.5% increase would be significantly less than inflation so would support this.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Council Tax increase is inevitable.; I would expect 3.5% is too low and the Council will be expected to help out people on the bread line; Nevertheless the Council should clearly identify where Council Tax is spent.; This includes current Tax revenue	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.
Have your say on council tax	6 Your say on Council Tax	Agree to Council tax increases above 3.5% especially to higher priced properties.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	I feel our council tax charges are in line with other similar area charges	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	Would support the increase if it was spent on schools, emergency services, mental health, the elderly, all people who need help and need the money.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Increasing the Council tax is OK, but as per your last question about charging for garden waste uplift it seems we are being hit from both ends. I am a single person and only one pension and while i get the single persons allowance these days any increase would be hard. How would I fill the gap? As I said before we need to bring revenue into the area. West Lothian needs to be modernised and made more appealing to the wider community.	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	I support the proposed 3.5% increase in council tax. Due to the other increases in the cost of living I would not want to commit to supporting an increase above 3.5% at this time.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	yes.... i support an increase	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes - with transparent reporting on expenditure and investment.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Think 3.5% is okay.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	I would agree if spent on social care	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Happy to pay more.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No issues	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Do not support an increase over 3.5%	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes totally	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Yes I would support a bigger increase of it was used for things such as schools and social care	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	we would just have to pay up ,what new	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Harsh, but understandable but don't do this and charge extra for garden waste	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes I would support an increase if it is spent on key identified priorities	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Agree to the 3.5% per year increase	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes I would support a rise if it was for a targeted area.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Well done WLC.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Agree, it will be difficult for some but in reality increases in council tax are very minimal (probably less each month than most people pay for coffee each day).	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes, I would support a higher increase, although I'd rather see reform to the council tax system but that's not in WLC's gift I imagine.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes, I am fine with it	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Maximise the rise	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	I support an annual increase of 3.5%	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	I would support an increase of 3.5% but no higher.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No support for an increase above 3.5%	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	I agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	I would not support increases beyond 3.5%	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Possibly	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Needs must	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Very nice and good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	has to be done	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

Have your say on council tax	6 Your say on Council Tax	Schools yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes I would support a small increase of more than 3.5%	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	If need be to safe somewhere ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	I would just like to comment that I don't envy the Council having to make these cuts and they will not be popular. It would be worse if Scotland was Independent!!! I cannot believe the state of the country just now under Scottish Government. If they would concentrate on the day job!!! I am very depressed with this consultation. If cuts are needed then so be it. IO know WLC are looking aheads but what a mess!!!!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	If it has to go up then it should do.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Sounds like a reasonable approach.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes agree with 3.5% is mitigations for those on lower incomes are appropriately promoted and supported.; If there was an increase about 3.5% I would hope that this funding is directed to Education in the first instance to reduce the savings required in education for example reducing the requirement for reduction in teacher contact time etc. However, this would need to be appropriately monitored and reported so that the public know exactly what that additional council tax has funded and its outcome (for example devolved school management budget and then delivered *(redacted) attainment).	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.
Have your say on council tax	6 Your say on Council Tax	3.5% is enough not a penny more	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	I dont see they are many alternatives other than to increase council tax by 3.5% or more if necessary. Otherwise we lose more staff, workload increase and morale plummets...and the result is poorer services to the public.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I support the annual increase reluctantly.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	increases are acceptable	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Would not support more than 3.5% council tax rise.; Hard to ensure increase goes directly to priority services	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	I don't agree a higher increase should be spent on schools and social care. A 3.5% increase per year will be fine and makes sense. If the council tax is in the lower quartile, then a gradual increase of 3.5%, 3.75%, 4% and 4.25% spent in the manner it is now would make more sense. This should then be dropped down to a more regular rise as required.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%. All services will be reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned agreed priorities.
Have your say on council tax	6 Your say on Council Tax	; 2. Yes.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	1. I support the annual increase as the need for service is also increasing.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I would support an increase but feel 3.5% is quite high considering the effect of the current cost of living crisis on individual households.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	Yes within reason	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I Wouks pay more to council tax if it went to key areas- health and education, but it would also depend on what happens with government tax. You either need to increase council tax or look to raise rents on council properties, but fell you can't do both as to much for some people.	1. The respondent advised that they agree with the proposal.	Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Have your say on council tax	6 Your say on Council Tax	Yes I would support an increase in council tax to safeguard schools. If the Scottish Government had not foolishly frozen it for so many years we wouldn't be in such a predicament. As long as people are able to afford such increases.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Agree with 3.5%; Possibly could support a small amount over 3.5% if it was invested in key identified priorities	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Agree to increase.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I think the 3.5% increase is essential as further cuts other than reducing unnecessary staff would be detrimental.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I support higher increases in order to prevent the removal of service provision in some areas.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Yes, if used on schools and care	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support an increase of more than 3.5% if it was determined that it would support services such as education.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Dont support above 3.5% rises without council looking inwards first	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	If it has to go up then it should do.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Increases of more than 3.5% would only be acceptable if it was clear what the funds were raised for and that there was no prospect of funding being available from elsewhere (i.e. government).	1. The respondent advised that they agree with the proposal.	Full details of how the council allocates its resources to individual services is provided in the annual activity budget which is available on the council's website. A summary of key areas of spend are included in the council tax leaflet which is provided along with bills. The council regularly emphasises to the Scottish Government the need for a fair settlement for local government as well as working with COSLA (the body that collectively represents local government in Scotland) to emphasise this point.
Have your say on council tax	6 Your say on Council Tax	3.5% increase per year would best at this time, with the cost of living crisis.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	Would only support an increase of more than 3.5% if all the funding was spent on agreed priorities that must stay the same over a specified period eg not changed after a year	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support a 4% increase is it means better funding for social care and schools	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support allocating to education and social care.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I do agree but, given current situation re inflation and general rise in prices, which will impact the Council, the increase should be higher?	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Putting everyone's council tax up spreads the cost. It is better to spread these costs than for some people to lose their jobs.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I CERTAINLY DO NOT support a rise of more than 3.5 pc for all the reasons listed plus it wouldn't get spent on schools that's just a ploy to get people (who all care about education) to agree to pay more. ;	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	Should set a range of 3.5% -5%	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Painful as it is, the money has to be found somewhere and we all have to contribute to society to get the benefits. We're pretty lucky compared to many countries as it is.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I'm happy to pay more council tax if it is spent on benefiting everyone and not just those who create a fuss or a social nuisance.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Council tax should increase in line with inflation. Why wouldn't it?	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I do support an increase however, the key identified priorities would need to be increased to increase leisure services and community inclusion organisation funding.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. All services will be reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned agreed priorities.
Have your say on council tax	6 Your say on Council Tax	i AM ON BOARD WITH THAT INCREASE.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Appreciate that the council is also having to deal with rising costs and the proposed increase of 3.5% is less than the current inflation rate. If the 3.5% rate is agreed council should consider the option to review, and possibly reducing the rate of increase, in future years if the financial position allows.	1. The respondent advised that they agree with the proposal.	Council tax increases are agreed annually by law. Consideration is given to affordability and budget requirements when setting levels each year.
Have your say on council tax	6 Your say on Council Tax	I would not support an increase of more than 3.5%	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	Good idea - but if you do, you cant then expect residents to pay for things like green waste collection that helps with climate action which you are wanting to imporve.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Very good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	NO issue with this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Yes: - I support a 3.5% increase to vital services that we require.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes I support an increase in council tax to pay for essential services. Unsure if I support increase of over 3.5%.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes, increases are fine, but likely to lead to an increase in non payment. Effective and consistent pursuit of recovery is required.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	yes support increase - there should be no impact to key areas such as schools and social care	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	I would support an increase.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	I don't mind if CT increases.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	ok - support	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Agree - people are inherently selfish and dont want to pay more but if we want decent public services everyone needs to contribute	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	YES	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yip	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes support small increase	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	3.5% sounds reasonable	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes definitely. Increase the Council Tax and generate some much needed income !	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	3.5 % seems fair	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes, I would support this rise.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Fine	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	i would support the increase	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes. If the money is going to social care and schools I would back this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Very happy with this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	I support the council's budgeted increase so long as it is not over the country's inflation rate.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	I would support this proposal.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Tax more....we need to contribute to make it work	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No I would not support an increase of more than 3.5% as there is no guarantee the council would actually spend the extra money wisely.; Presently I believe the building known as the Civic Centre has become since COVID an empty shell with people still working from home. What does the council propose to do with this?	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%. We will review our property assets and rationalise usage where possible taking into account the review and redesign of services delivered in the community and investigating opportunities for coordinating availability of facilities. This includes new opportunities arising from hybrid working.
Have your say on council tax	6 Your say on Council Tax	Yes I agree with an increase to support key identified priorities not to fund the Provost or other Elected Member offices or for the renaming of libraries etc.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	An increase of *slightly* more than 3.5% would be acceptable. But proceed with great caution - the cost of living crisis is already hurting a lot of folk and it's going to get worse before it gets better.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.
Have your say on council tax	6 Your say on Council Tax	Support increase - but no more than 3.5% due to ongoing cost of living crisis.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	I would support an increase of more than 3.5%, but I also think you might struggle to get support for much more than 5%.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	The issue is that wages are not increasing for most people by 3.5%. This increase would add to the cost of living crisis for families. I support the council focussing on key areas such as education and identifying more areas that can be transferred, or stopped, before I support an increase in council tax. For example the animals at Beacraigs, stopping brown bin collections if the recycling centre is kept open as an alternative. Furthermore the population of the area is rapidly growing in part due to new build houses - these developments should only be supported if the increased demand in services can be afforded. People making money from the area should pay more to support services.	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs. A percentage increase in council tax, in monetary terms for most people, is considerably less than a percentage increase in salaries.
Have your say on council tax	6 Your say on Council Tax	3.5% increase is a fair amount to raise future Council Tax charges I feel a greater increase would penalise those whose income is currently just above the level that they would be entitled to means tested benefits.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Ok - agree that an increase in rates is needed, but it won't be popular, particularly during this time where there are rising costs for people everywhere	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.
Have your say on council tax	6 Your say on Council Tax	Would support additional tax if the money was used locally	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. All money raised through council tax is used to deliver services in West Lothian.
Have your say on council tax	6 Your say on Council Tax	Increase the council tax (or bring in a charge for rubbish lifts based on amounts being taken)	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	The council tax should have went up year on year instead of a vote collector	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. For many years the council tax freeze was a requirement of funding from the Scottish Government.
Have your say on council tax	6 Your say on Council Tax	Raise it for God sake and stop cutting vital services	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	3.5% year over year adds up pretty quick, but in the current economic situation this is not unreasonable.;	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Only if it was spent on schools and social care	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support but during a cost of living crisis how are those who are just about managing (e.g. outside the benefit system) expected to contribute more of their already dwindling income?	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.
Have your say on council tax	6 Your say on Council Tax	Yes but that depends on any increase on people's wages	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.
Have your say on council tax	6 Your say on Council Tax	Definitely disagree with additional over and above 3.5% people cannot afford and are making choices to eat or heat, not just low income but into middle classes also.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	I would support a council tax increase of more than 3.5% if this allows the council to continue to deliver vital services and invest in new technologies needed to deliver outputs with reduced staffing resource	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Yes - if targeted directly to these services and not derailed into other projects	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	If we had never had the Council Tax freeze then a smaller annual increase would have meant that many if these choices would not now have to be made. I agree with an increase in Council Tax	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Happy to support an increase provided the additional funding is used for protecting key priorities.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support a 3.5% increase on Council tax provided the money was directed to those priority areas and not just keeping us in the same position as we currently are.	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	Saying that I would be happy for the increase as long as schools were a priority	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support an increase but for 2 years. I would want the money spent on schools and less on social care.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support an increase of more than 3.5% if any excess was spent on education and social care.; My preference however, would be a revaluation of property in Scotland to reflect the actual valuable of the average property impacting on its Council Tax banding.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	PLEASE INCREASE COUNCIL TAX BY MORE THAN 3.5%. We need to pay for vital services.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support a council tax rise of more than 3.5% if it was spent on schools or social care.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Increase council tax but do NOT cut school transport services to legal minimums or reduce the school teaching day!	1. The respondent advised that they agree with the proposal.	The council uses a priority based approach to budgeting in the identification of potential budget saving options. Many councils do not provide school transport in excess of statutory minimums, especially as all children can now travel for free on all bus networks in Scotland. In addition, the pressures facing local government means many councils in Scotland are reviewing the composition of the school day.
Have your say on council tax	6 Your say on Council Tax	Realistically Council Tax needs to be increased which I accept. In order to provide services, which will increase in costs each year, funds must be collected. If there is not an increase then the budget savings amount would increase and it is already proving difficult trying to establish where budget savings can be recouped.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity.
Have your say on council tax	6 Your say on Council Tax	I think an increase in council tax - would be the answer and I would support an increase of 3.5%	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	fine with increases but not if it is paying for keeping 5 CRCs open or paying for Rail concession	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. There are savings proposals identified for community recycling sites and rail concessions.
Have your say on council tax	6 Your say on Council Tax	I would personally support a 3.5% rise if additional funding was spent on key areas, especially schools and social care. I do appreciate the general pushback that would arise from this though.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support a rise IF I could see, and was clear about, the exact benefits.	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	There has been a ridiculous emphasis on not increasing council tax, which has been part of the reason for services not improving/deteriorating. If people value council services and believe that they themselves should get a pay rise then I think they should support increasing council taxes. I support the above proposal. An increase of more than 3.5% would maybe be pushing things too far but I would support it for those in higher bands (for the same level of service as others)	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	Raise the council tax - it was frozen for too long so it's obvious we need to catch up now.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	LLBCC would support an increase of 3.5% subject to the conditions above.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I support an increase in Council Tax of more than 3.5% if this would mean children were able to maintain current teacher contact time and vulnerable people have social work support.; ; of concern is that you highlight that 81% of spending comes from Scottish Govt Grant. Is this going to up or down? Why are we not being consulted on this?	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. Based on current information from the Scottish Government funding for local government is set to be frozen during a time when unprecedented inflation means that costs are increasing. The effect of this is a real terms reduction in funding for councils. The Scottish Government is accountable for funding they allocate to councils therefore the council cannot consult on their intentions regarding public sector funding.
Have your say on council tax	6 Your say on Council Tax	I would only support CT rise if it was spent primarily on Schools and Social care. I do not expect to see thousands spent on renaming buildings etc.;	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Steady yearly increases are much better than a freeze and then a hike later.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	I personally support an increase in council tax but not if its there to pay inflated top cat wages. What provisions have you got in place to say where the money will be allocated too. You have to understand when the Public are seeing the troubles in WM and how they mismanage funding and its benefits for those at the top. Can we be reassured that this isnt being replicated in Council services.	1. The respondent advised that they agree with the proposal.	Salaries are determined at a national level. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities. The budget gap faced by the council is a result of funding being insufficient to cover the increasing cost of delivering services due to factors such as population growth and indexation. The council is subject to rigorous external audit and both Audit Scotland and EY have confirmed, over a number of years, that the council has robust financial management.
Have your say on council tax	6 Your say on Council Tax	Increase tax for those who can afford it. If tax is used for schools and social care and not being spent on roads where nothing even changes.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	If council tax was increased i would like to see the roads maintained, the bins and Recycling maintained and staffing reductions within the council kept to a minimum	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	Yes would support.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Support 3.5%.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Yes to the 3.5% increase however I am not a WLC resident.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	The SNP should never have frozen the council tax in the first place. Council services have suffered over the past decade and a bit. Raise the tax.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I would be in favour of increasing council tax if there was a specific benefit in doing so. For example the council has approx 90 schools. Assuming that a school lasts 90 years, then one each year should be replaced (most recent new schools have been additional schools with the exception of Cedarbank and Beatlie). A school is more likely to last 50 years so we should be replacing two every year and making any potential savings through co-location and revised catchment areas.	1. The respondent advised that they agree with the proposal.	In principal the council agrees with this, subject to available resources to deliver new schools. New schools built in recent years have been fully funded by developers. There is likely to be more opportunities for consolidation as the school estate matures.
Have your say on council tax	6 Your say on Council Tax	Yes but what is the value of arrears & how are you driving to ensure compliance. It's not fair to keep penalising the compliant the the breachers continue to get away with it. Before there was any increase I'd like to see more effort in achieving compliance	1. The respondent advised that they agree with the proposal.	The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity.
Have your say on council tax	6 Your say on Council Tax	I would absolutely support an increase in council tax in order to maintain key services such as education and social care.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Yes and yes. Children and those most vulnerable are worth paying for. But not if the Social Care funding is going to profits for a 3rd party provider.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	If a small increase is needed to maintain services and council workers salaries then I would agree with that.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Increase all bands everyone is struggling with cost of living.	1. The respondent advised that they agree with the proposal.	The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	Raising council tax by 3.5% per annum will be insufficient given predicted inflation rates. The rate should be infation indexed.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	In the current cost of living crisis, I would not support and increase of more than 3.5%. It may only be 88p a week increase on average, but add that to £100+ increase per month in mortgage payments, and huge increases in gas/electricity, it's extra money that a lot of people just cannot afford. Council tax is hugely expensive, and we don't get value for money as it is.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%. Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	I recognise that an annual increase of 3.5% is required to council tax. I wouldn't support an increase above this level at this time as households would really struggle to pay it. ; ; The comparison made of WLC council tax rates versus other all of the UK does not compare like with like. For instance, many other areas have 5 full school days per week rather than 4.5 days in WLC. This means that families in other areas can work full time, increasing their job opportunities and income.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. West Lothian Council has the same number of school hours as other councils, and in many cases more than the average. The council phases those hours over four and a half days but children are in school the same number of hours with schools starting earlier in West Lothian than other council areas.
Have your say on council tax	6 Your say on Council Tax	Yes to second bullet.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Go ahead with increases but bear in mind that some council-tax payer's income is not increasing. ; ;	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	If necessary. Perhaps looking further into the waste I see on daily basis by council workers and such as the stupid 20 mph change for it only to revert back.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. The implementation of 20 mph was funded and determined by the Scottish Government as part of the Spaces for People Initiative arising during the pandemic.
Have your say on council tax	6 Your say on Council Tax	An increase above 3.5 would impact hard on the large part of West Lothian with its low income population. If the cost gets too high non payment will increase	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	I suppose the gist of council tax is that everyone should meet their responsibilities and take part; and is no doubt preferable to more job losses affecting services, where stagnant pay or reduction meets with consternation. I think at the very least council tax should keep up with inflation. Of course too high an increase will likely affect the cost of living squeeze.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support an increase however it would need to be spend on key identified priorities. If you want people to support this you can't then cut services.	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	3.5% seems fair - a higher increase than this would seem difficult to justify in the face of all of the cuts which will still be required.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	I would not support an increase of more than 3.5%, I'm not entirely sure what my council tax currently covers	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%. Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	Agree. This will be income based so higher incomes will pay more.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. Council tax is based on house bands not individuals' income.
Have your say on council tax	6 Your say on Council Tax	Finally, some specific questions! Excellent.; ; 3.5% increase, yes I support.; ; More for social care and schools, yes in principle. There is the question of the distribution is managed.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I would support the 3.5% increase on that basis but council tax is still an unfair tax.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax. Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	I would support an increase to council tax, however this will not be the case for everyone in the authority area. If there was a clear plan or spend summary that would show exactly how these increases will be spent, that may help to promote any increase in fees.	1. The respondent advised that they agree with the proposal.	Full details of how the council allocates its resources to individual services is provided in the annual activity budget which is available on the council's website. A summary of key areas of spend are included in the council tax leaflet which is provided along with bills.
Have your say on council tax	6 Your say on Council Tax	I would accept this 3.5%	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Given the current inflation rate of 10%+, a 3.5% rise is not going to cut it. However in times of budget tightness for everyone, raising the council tax across the board by more than 3.5% is going to severely impact the least we'll off most, and they often struggle to access services.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.
Have your say on council tax	6 Your say on Council Tax	Yes it needs to be to achieve what suggested . It's hard but needed.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I wouldn't support a rise of greater than 3.5% in the current cost of living crisis.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	Yes, I think these services should be prioritised.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support an increase as sit is fair to everyone and it supports our community provision, especially for children and older adults.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I support an increase of 3.5% and would consider a slightly higher rise if the money was directly targeted such as those suggested.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would not support an increase of more than 3.5% as like many other people, I am struggling to make ends meet.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	Would support it being raised but would also expect the support for low income households to be very strong and widely available	1. The respondent advised that they agree with the proposal.	The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold. At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	should be done but more help should be given to people who are going to struggle to pay it and not just send it to the sheriff officers and then wipe your hands of it as they have a terrible attitude towards these tenants who have fallen into arrears often putting them in a worse condition than they were in the first place	1. The respondent advised that they agree with the proposal.	The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold. At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.
Have your say on council tax	6 Your say on Council Tax	Council Tax is something one would expect to be raised in line with other local councils. ; ; Only in agreement if school hours were not reduced and care in the community was prioritised.	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	Agree to increase if we saw the money going put back into schooling and or surrounding areas being kept well	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	I would not support an increase of more than 3.5	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	Yes, I would support an increase in tax to meet the council's needs to support our community.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support this increase if it 100% went into the education system/schools. This is not sn are which should be comprised	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	3.5% and no more- people cannot afford it.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	The increase should remain at 3.5. People are struggling with high energy and food costs so this amount can't go higher!	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	Yes as long as the money is going to the right areas	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Any increase in council tax should be spent on key identified priorities such as schools and social/health care. This is a very tough economic situation we are in but education and health/social care needs to be protected. ; ; I would support an increase in council tax of 3.5% and a review on an annual basis. If education/health/social care was at risk I would support an increase of more than 3.5%, reviewed on an annual basis with full transparency on how the increase in income was spent.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Some increase is to be expected if at a reasonable rate	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I am happy to pay increased council tax, it is lower than other Councils. An additional increase above 3.5% up to 5% would be fine if the money was ringfenced for education - i would happily support this. This is because your cuts are predominantly affecting child education and experience. Social care hasnt been targeted so the arguement to ring fence additional costs has not be made for this.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. Social care measures for adults are subject to a separate consultation from the Integration Joint Board.
Have your say on council tax	6 Your say on Council Tax	Put council tax up - sliding scale depending on area etc - have a fair system for those who can not pay it but bear in mind that many can and want to.	1. The respondent advised that they agree with the proposal.	The current council tax legislation means that any proposed percentage increase needs to be applied across all bands, no adjustments can be made for geographical location. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.
Have your say on council tax	6 Your say on Council Tax	Raise 3.5 %	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I wouldn't support more than 3.5% increase, people are being faced with increases on utilities, food, fuel with no payrise to counter increase in inflation. A larger increase would further push people into poverty.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	Raising council tax by 3.5% is reasonable especially if people want their services to stay the same.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	Increase has to be more than 3.5% given current inflation levels but should not be more than average salary increases	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	3.5 acceptable. Any more would need guarantee/ring fencing to ensure spent on social card etc. also need to be monitored	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Asking people, most of whom don't work with income generation, certainly not to the tune of £17.9 million, how they would raise that amount of money is unfair to say the least! ; I would support an increase if it means that key services, including west lothian leisure funding, were not cut.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Recover monies from people who do not pay their council tax. It's not fair that the hardworking people who pay the council tax have to pay more each year. If it must rise then yes funding should be spent on schools roads social care. Not taking bins or more path signs which are not essential	1. The respondent advised that they agree with the proposal.	The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity. The new bins compact waste allowing savings to be delivered in employee time emptying bins less often. This has delivered a saving for the council, demonstrating efficiencies in service delivery.
Have your say on council tax	6 Your say on Council Tax	We have been told by the Chancellor that there will be no change to the level of income tax relief during the time frame you have mentioned. This means that people will actually have less money in their own pocket but continue to face increased costs just to maintain their current quality of life. I don't think you can seek approval of more than 3.5% per annum on council tax - it is not realistic. Remember that the majority of the people working in the private sector do not have the same salary as those in council employ. Times have changed.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%. Income tax announcements by the Chancellor relate to England only. Evidence shows that public sector pay is less than private sector employment for comparable work. A percentage increase in council tax, in monetary terms for most people, is considerably less than a percentage increase in salaries.
Have your say on council tax	6 Your say on Council Tax	I would support the council being completely transparent with the cashflow in excel format. I would support increase in taxes right across the bands not just on arbitrary made up bands. If the sum total of outgoings is greater than income its pretty good dam simple. You don't need an MBA to workout what good looks like. Noone has an infinite cash pot but at the same time noone wants to live in a soulless, dirty town/city where there is nothing for different age groups. Where there is not social aspect to the community. ; ; Like I said earlier central government force councils to hold back for far too long by at least 3 years. They have got a lot to answer for but similarly you allowed that to happen. Central is also accountable for many things including the redistribution of wealth to local authorities but there needs to be far more engagement.	1. The respondent advised that they agree with the proposal.	The current council tax legislation means that any The council regularly emphasises to the Scottish Government the need for a fair settlement for local government as well as working with COSLA (the body that collectively represents local government in Scotland) to emphasise this point. proposed percentage increase needs to be applied across all bands. The council already provides detailed information on income and expenditure and the budget gap in the annual budget report considered by Council each February.
Have your say on council tax	6 Your say on Council Tax	It seems unfortunate but necessary. Education and social care have to be prioritised. The lack of support workers in the current care crisis cannot go on	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Annual increase is fine however I know I can not afford a large increase. And I will not be the only one. Everything is going up and it's a scary place to be just now.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I would support an increase of 5% if it meant schools getting more staff in the school itself.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Yes I would support this rise but would hope to see obvious improvements in social care and schools.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	It is essential that the council looks to maximise income from council tax and I would support increases of 5% per annum for the five years. Councils in England are looking at 5% increases and a rise of 5% would reduce the savings required from services.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I think that even in the current economic climate an increase in council tax is essential to ensure the continued provision of essential services. ; Having previously worked in the NHS I know that you cannot keep making cuts without affecting services and customer/client satisfaction. ; Rather than becoming WLC becoming an organisation that merely reacts to complaints to deal with issues, it would be wise to be upfront and clear about costs. We are not stupid and if for example you make it clear that with a 3.5% increase A,B & C can happen but if we make it 2.5% we lose B, or at 4% we gain D, then this helps us as consumers so agree or disagree with a suggestion within the consultation. Too vague and people won't know what they are being asked to comment on and what they might gain or lose.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Put up council tax, that's what it's for. The UK are a wealthy nation and should be willing to pay to have these services. I say that as someone who lives on a modest income. If we want the services free at the point of access we need to pay for them through tax.The most vulnerable will be protected from a council tax rise through access to council tax benefit.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I agree to this proposal and if it were to be ring fenced with transparent reporting on where it was spent I would agree with more than 3.5 %	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. Full details of how the council allocates its resources to individual services is provided in the annual activity budget which is available on the council's website. A summary of key areas of spend are included in the council tax leaflet which is provided along with bills.
Have your say on council tax	6 Your say on Council Tax	I agree...if it is ringfenced with transparent reporting	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. Full details of how the council allocates its resources to individual services is provided in the annual activity budget which is available on the council's website. A summary of key areas of spend are included in the council tax leaflet which is provided along with bills.
Have your say on council tax	6 Your say on Council Tax	Yes - we have to protect school funding. If we let our children down - what future does any of us have? Similarly we need to protect our vulnerable and I support the need to fund social care. ; ;	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	I have no issue paying more council tax if it supports service delivery especially around schools and social care.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	No major issue with paying more tax if it means services are maintained	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would not support an increase of more than 3.5%.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	Yes, we should raise council tax in line with inflation which is currently 6-10%	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I don't mind paying tax if I feel my taxes are being used well, wisely and I can feel the benefit. It's not my job to suggest how council budgets are allocated, so please don't ask me. ; However, schools and social care are priorities I can agree with.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I support an increase in CT levels. Press for a revaluation as banding levels are massively outdated.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	I support a small increase in Council Tax to support the delivery of vital services.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support a slightly raised council tax to improve services such as schools and social care.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support higher Council tax levels but the council needs to ensure that money is being used effectively and focus on key activities	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	Council tax increases should broadly reflect general annual increases in wages, pensions, benefits etc.; 3.5% is appears reasonable for 2023/24, possibly higher if the increase in average incomes exceed 3.5%; An extra 0.5% might be justifiable if the amount raised is ring-fenced for key identified priorities.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I support a council tax increase of up to 10% you can spend the extra revenue it as you see fit	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Tax more....we need to contribute to make it work	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Yes. Seems fair to put up the council tax.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I have no issues with paying more council tax, particularly as the past few years of underfunding have had very negative consequences which will cost us far more in the future than if these services were adequately funded and provided.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I think 3.5% is a reasonable change. Council tax is a massive cost for every household already.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	3.5% is a fair rise as long as services are protected as much as possible.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	yes I support increase in council tax	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support a 3.5% increase, not sure about much more as people are already struggling but hopefully by time this would be in energy bills will be reducing again for spring and summer use.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	Agree 3.5% increases pa.; ; Any increase greater than 3.5% would be justified if linked to meaningful and evidence-based outcomes. Particularly, where spend is applied medium-longer term to address the root causes of our key problems - child poverty, low-income households, food/fuel insecurity.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Yes, I'd pay more council tax and support those who could afford it to do so.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Supportive of the 3.5% increase. Increases of more than 3.5% should only be made on higher bands if at all.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%. The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	Yes, I would support an increase of Council Tax by 3.5% or more. It is vital that services such as schools and social care are supported with adequate funding.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	If there was a plan in place to provide further funding to schools and social care I would agree to an increase in council tax.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	3.5% increase acceptable , however there should be more stringent checks on the households receiving discounts.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support it if the money was spent on essential services and not on poorly identified areas where money is wasted because of better perceived money saving ideas.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Council tax should be increased but the current banding model is not appropriate and should be based on individual circumstances	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	we need to increase council tax, 3.5% is fair	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support an increase of 3.5% or more as I know where the money goes to and crucially, I would be able to afford it. However, for the public it may be beneficial to do regular updates on improvements made using this increase and highlight how it has helped their community more. At the moment, and I believe this is the case for most local authorities, many members of the public will see a large increase in council tax as just going to staff who "sit around all day". Highlighting benefits, showing the public major project milestones as they occur and improving services would help with this perception	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support an increase, even over 3.5%, with the provision stated.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	A slight increase could be ok	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support an increase IF the money raised was spent on key issues and IF everyone was paying their council tax.	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs. The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity. The council must provide council tax reduction and discounts in line with national legislation.
Have your say on council tax	6 Your say on Council Tax	would raise 3.5% not everyone uses schools or social care that pays tax	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	Increase of 3.5% would be expected, higher increase would be unmanageable.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	No, I would not be supportive of an increase of more than 3.5%	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	This is reasonable.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	If service quality is there yes I'm willing to pay. But there needs to be greater transparency and accountability.	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs. Full details of how the council allocates its resources to individual services is provided in the annual activity budget which is available on the council's website. A summary of key areas of spend are included in the council tax leaflet which is provided along with bills.
Have your say on council tax	6 Your say on Council Tax	An increase is fair as everyone will pay a little more into the pot for services.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Yes raise council tax - it is a fair tax	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Only if services improve	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	I think the 3.5% increase in council tax is reasonable. Would an increase relative to tax band be applied to bring in more income? I.e. band A houses 2%increase, higher bands higher increase. ; Wonder if a nominal , very low, charge could be applied for big houses with empty rooms (i.e. 10 pounds a year extra in council tax if you have more bed rooms than people living in a house). Might be a way to encourage people to rent a room out, host vulnerable people temporarily etc	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	I wouldn't like to see it go above 3.5%.; Would support it going up 3.5%	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Support of 3.5% but not additional. Must remember that some hardest hit just now are in high paying council tax houses and really cannot afford more. Scottish government must raise more funding through taxes etc which do not disproportionately penalise people for their home.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	Yes I support an annual increase in Council Tax	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I support an increase in Council Tax of more than 3.5%	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Yes, would be ok with a greater than 3% increase.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I'd agree to 3.5% rise in council tax, but would any of this go towards making West Lothian look more appealing, as in helping the weeds disappear from roundabouts etc. Bucket load of money spent on "spaces for people", but pathways so over grown with weeds and bushes they are almost disappearing, making communities look untidy and unwelcoming. Maybe more money can be raised also my raising the age of the free bus pass. Retirement age has risen over the years. If someone at the age of 60 is still working, why should they get a free bus pass. Stop free use of electricity points for electric cars. Know quite a few people in high paid jobs with electric company cars that can use these for free, they can well afford to pay to charge them or charge them from home.	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs. Concessionary bus travel is determined by the Scottish Government. Charging for use of electric charging points is a good idea and will be investigated further.
Have your say on council tax	6 Your say on Council Tax	Would support a 3.5% increase of the revenue generated was spread across all services not just the likes of social and education.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	If spent on schools or childrens services I would support the change.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Yes, just do it. Council Tax being per household rather than per person reduces the impact of increases and those who struggle to pay can access support. Be clear about how it's being spent on things people care about and less is being spent through efficiencies and people will pay it. Good services need funding.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Aslong as funding was spend within the council areas then a rise in council tax is justified	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. Every pound raised in council tax is spent to deliver services in West Lothian.
Have your say on council tax	6 Your say on Council Tax	I support increase in council tax. If not increased, then jobs and services are at risk	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would gladly pay more council tax if it meant my child could get a school bus to school & not public transport.	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	If the tax goes up fine but I would expect it to be used correctly....	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	If it was on schools and social care- yes	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Would you support an increase of more than 3.5% if all funding raised above this was spent on key identified priorities, such as schools and social care? YES so would be looking for a guarantee of this given the budget cuts you are already proposing on schools, education and social care!	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs. Although the council has had to make savings to balance the budget, services are improving in a number of areas (e.g. educational attainment).
Have your say on council tax	6 Your say on Council Tax	I would only support an increase if it was spent on key priorities especially social care, additional needs support services in schools and other school improvements	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I do not support an increase if morethan 3.5% . ; Services are going to be limited across the whole pf the community. ; I don't have kids at school, you're planning on charging me separately for gareden refuse. ; Money has thrown at social care and its still failing the most vulnerable people in our community. Charging everyone else is not the solution.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	As a band D home owner, this increase seems fairly reasonable but for larger houses then the increase should definately be proportional.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	I have budgeted for a 4% rise. Not too far off then.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I support the increase and support an additional increase but only if their were obvious benefits to soical care that won't be garnered otherwise. Not just for a slightly better service.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Tax should be pegged to inflation. Why wouldn't it be?	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Regretfully, on behalf of people with a lower income, I agree that Council Tax does have to rise as planned by WLC; ; Could Council Tax on higher tax band properties rise at a greater percentage than in the lower bands?; ; Above all, we need a r-evaluation of all domestic properties so that the council property tax system can start from a fair and accurate base, but I realise this has to be a Scotland wide initiative.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The current council tax legislation means that any proposed percentage increase needs to be applied across all bands. Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	For now, I don't understand this problem well enough, so for me, this 3.5% would be a must.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	I agree council tax needs to be increased to provide more money to the council so they can in turn provide vital public services. Those who can't afford council tax either don't pay or get a discount so are largely protected from increases.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I don't mind an increase in my council tax if I see what it's for.; I'd want a good reliable service from the council, good efficient quick bus service, choice of community services, efficient recycling, schools making their own decisions, and excellent social care. ; The measure of a civilization is how it treats its weakest members.	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs. Although the council has had to make savings to balance the budget, services are improving in a number of areas (e.g. educational attainment).
Have your say on council tax	6 Your say on Council Tax	Not an issue with paying a fair amount for services as long as those fudging the system are dealt with.; ; If paying more for key priorities like education and social care how is it ensured that it will be spent in those areas.; It should also not be used to increase the profits of companies that are at present contracted to provide that care. Who even audits these companies to make sure there is quality care and value for the large sums being spent.; Outsourcing is privatising the NHS by the back door and means it is no longer true to the principles that it was setup to embody.	1. The respondent advised that they agree with the proposal.	The council has no control over NHS expenditure. The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure. The council must consider both internal and external provision to ensure best value. In some circumstances it may be better value to deliver through external provision. Use of external contractors is vital to the delivery of social care. Without this, councils could not deliver social care services due to the high demand.
Have your say on council tax	6 Your say on Council Tax	I am not a West Lothian resident but supported a small increase in my own council area.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I'd support the further increase if schools and social care clearly benefitted.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Yes - there is a good case for increasing council tax after it being frozen for so long in the past.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would agree on council tax increase if it will not be wasted on pay rise for people on 6 figure salary and bonuses and extravagance parties. Any increase in council tax would 100% should go towards education, health and transportation services only and not in fat cats pockets.	1. The respondent advised that they agree with the proposal.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities. No council staff receive bonuses or extravagant parties. All council tax goes towards delivering essential services to local communities.
Have your say on council tax	6 Your say on Council Tax	Yes, only 3.5 (three point five) percent. If you a increase in your income how can that increase your funding gap if you're applying your oth expenses.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	While any increased bills are not welcome, the level proposed if not excessive and if any excess is used for specific identified causes then ok.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I do not mind paying more tax as I can afford it. Clearly paying more without improvements is undesirable therefore you have to have SMART goals via (preferably) a truly agile methodology.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The council's aim is, and always will be, to ensure that West Lothian continues to be a great place to live, work, visit and do business. To achieve this aim we will continue to prioritise the money that we spend on services to make sure that our investment has the biggest and most positive impact on the community. As validated by external auditors and other inspection bodies, West Lothian Council continues to perform well against key performance indicators and activities. This will continue to be monitored and reviewed.
Have your say on council tax	6 Your say on Council Tax	Increase council tax by 5% per annum BUT only if the extra £1.5 Million is "Ringfenced" for schools and social care.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support an increase in Council Tax of up to 5%	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Definitely not more than 3.5% as we already pay a really high amount.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	I feel council tax is so high, I was surprised to see the data that it's low in WL. While I family wants to incur a rise, continued investment in school and social care is important so I'd support the increase in a 'feels like we've no choice' basis.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	3.5 % seems fair	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	I can understand the need to increase council tax but people need to be assured that money is being used wisely	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would not support higher than 3.5%. ; ; look to charge for services that are "optional" / that most residents do not use.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Council tax needs to raise at sensible amount to allow the council to fund its services. 3.5% does not seem like it is a high enough increase	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I'd support an increase in council tax to the same level as other areas in Scotland, at 3.5% per year if that is the case or higher.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Higher council tax is unavoidable, but increases should not be across the board, they should be higher for the more expensive homes	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	Support a 3.5 per cent increase but not beyond that. Given current costs many people will struggle to make higher payments.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	Yes if it is to help keep and value staff particularly in education	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Schooling I agree.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Tax more....we need to contribute to make it work	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Yes reluctantly agree on the increase, what needs done needs done.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	It is inevitable that council tax will have to rise. People deserve a clear explanation of how much is required and what this will be spent on, rather than it looking like it is filling the bottom of a deep hole.;	1. The respondent advised that they agree with the proposal.	Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation. Council tax is the balancing item in the annual revenue budget of the council. Full details of how the council allocates its resources to individual services is provided in the annual activity budget which is available on the council's website. A summary of key areas of spend are included in the council tax leaflet which is provided along with bills.
Have your say on council tax	6 Your say on Council Tax	This is inevitable. Clear communication is needed as to where this is going.	1. The respondent advised that they agree with the proposal.	Full details of how the council allocates its resources to individual services is provided in the annual activity budget which is available on the council's website. A summary of key areas of spend are included in the council tax leaflet which is provided along with bills. The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	Happy to pay if used correctly	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Yes, I would be happy to pay increase.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I suggest the council charges property developers more to increase its income. If you are going to keep agreeing to land being developed then the whole of West Lothian should benefit by these developers giving more back. ; If you keep increasing the Council Tax it will lead to a lot more people not being able to pay and the council will have to pay more money to try and recover the money via Sheriff Officers. ; I would be happy to pay 3.5 if it was spent on schools and social care.	1. The respondent advised that they agree with the proposal.	The council collects developer contributions for legally agreed investment required as a result of development. Developer contributions are subject to legal agreement and are for specific items such as infrastructure.
Have your say on council tax	6 Your say on Council Tax	Yes, I would support an increase in CT	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Council tax increase is better steady each year rather than a freeze and then a high increase.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I agree that it should rise in principle year on year. However it should be a gradual rise.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Aa above, where the Council can increase funding, including Council tax, it should seek to do so	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Support increase if goes on services	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would support an increase of more that 3.5% if ALL funding was spent on schools and social care.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Gradually increase CT ie next year 4.5%. Less than this will damage council services.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	An increase in Council tax would benefit us all. 88p per week is the equivalence of a postage stamp.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Agree fully on a council tax rise and so does my husband.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Council Tax is a difficult issue for me. I am happy to pay more	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I think that a modest increase in the council tax is required.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Council Tax: I'm ok with CT rising by 3.5% each year until 2028. ; I would support a increase in more than 3.5% if it was to be used for schools.; I would support an increase of more than 3.5% if the money was used to keep a decent level of transportation connectins which in itself helps with social connections and care.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	I fully support an annual increase of 3.5%, and would support a further rise to 4%, on the proviso that this is reviewed following the easing of the current financial crisis in three years time.; In three years, there should be further consultation and the majority view of council tax payers taken into account.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Yes. I would also support an additional option on the council tax bill to make an additional one-off or monthly subscription, on top of the council tax bill, to fund anything the council wishes. Or, through a tick-box survey, support additional areas the council would like to request voluntary funding for. Allow the opportunity for the people of West Lothian who can help more to contribute more on a voluntary basis.	1. The respondent advised that they agree with the proposal.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities. Council tax reform, for the suggestion provided, can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	I completely support the 3.5% increase in council tax. However, I would like to see this increase also benefit me. I have lived in Forestbank since 2008 and during this period we have had our three children. Unfortunately, there is not a single decent park or playground in Forestbank where my children could enjoy playing. My children go to Howden St Andrew's Primary school and over the years I have only seen the conditions deteriorate. Since 2008 I have only seen the road conditions going from bad to worse. There isn't a single stretch of road in west Lothian that is pothole free. During winter season the gritters would only cover the main roads totally ignoring the internal roads connecting to the main roads. I strongly believe that my council tax contribution is not benefiting me at all and rather it is going towards other unnecessary council schemes.	1. The respondent advised that they agree with the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs. The council's winter maintenance service has not been reduced since 2008 and the council's road condition, especially for A and B class roads, perform well compared to other authorities.
Have your say on council tax	6 Your say on Council Tax	I would not object to an increase of less than 3.5% but no more.	1. The respondent advised that they agree with the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax but not an increase beyond 3.5%.
Have your say on council tax	6 Your say on Council Tax	I fully approve of this increase in the council tax that the council are proposing and would support the council being able to make the increase more than 3.5% if this was spent on key identified priorities such as schools and social care.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	Yes, but only for those who can comfortably afford it on decent wages	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold. The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	I agree with the increase for those who can afford it, provided that goes to the right cause but not for those who would struggle to afford it.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold. The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	The council are alright.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would only support it going up Only if you do as you say and apply it to social care as they need it the most.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	I would be happy with the increase if the money is ringfenced for schools and social care and for people that really need it most.	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	yes but I want a say where it goes	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. This document is part of the early stages of public consultation on budget saving and income measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Yes but I want a say where it is spent	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. This document is part of the early stages of public consultation on budget saving and income measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Have your say on council tax	6 Your say on Council Tax	long as money gets spent used for what it's meant	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services.
Have your say on council tax	6 Your say on Council Tax	yes as long as it can be used for everyone. no more increases in council tax if you don't have the facilities	1. The respondent advised that they agree with the proposal.	It is noted that you agree the need to increase council tax to support delivery of key services. The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	The people who do pay council tax regularly are as always penalised ; Let's charge them for more services, going the same way as Edinburgh council and look at the mess they are in	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	We have the tenth lowest council tax charges in Scotland - so 9 councils are cheaper? Would be nice if people were receiving 3.5% pay rises to help deal with increased council tax charges. That's before we get anywhere near talking about how you expect us to pay for all of these other things too. Despicable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Given the tenuous financial situation of many families in the current economic climate, as well as the reduction in the quality and quantity of services already provided for ever increasing taxes, I would not support an increase in excess of 3.5%.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	You are saying our council tax is lower like we should be grateful. Our services are amongst the worst in Scotland too ... You get what you pay for and all that. If I'm paying a premium for services, I tell you what, I expect a premium. You would truly have a cheek increasing this	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No. And certainly not without very clear evidence of where the money raised would be spent.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Would not support a rise in council tax pensioners haven't even had a cost of living rise. What with gas and electric prices, fuel for car prices and shopping all up in price can I ask how do you think we can pay anymore	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Any increase at a time where the cost of living crisis is spiralling out of control is unacceptable. The council does not spend the money it gets wisely and any increase in council tax will be for minimal gain to residents of West Lothian	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I dont think there should be any increase in the council tax if all the savings stated are made why increase this tax when people cant afford it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I would not support a rise of 3.5% in council tax. . People in West Lothian are often on the breadline and with energy costs where is the extra money for increased council tax.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No I do not wish to pay more council tax.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Not with a cost of living crisis. Put it up when energy bills are back to normal.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Absolutely not...my C tax is like another mortgage...ridiculous proposal and especially given the current climate?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	NO!!!! Times are tough. I don't care if we pay less than wherever I live in West Lothian already get a poor enough service without paying more!; I have no kids, don't use the council facilities, you fixe the roads, sweep the street and empty my bin.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No. Everyone is struggling with increased cost of living as it is.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No council tax rise during cost of living crisis.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	It is all very well to say cut staffing, raise rent and or council tax however working people do not get any raise in salary to reflect a rise in everything else needed to keep a roof over our heads.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	No, because I have no faith in how wisely any increase in council tax will be spent. The ridiculous green bin addition rollout is one such example. Yet the only bin everyone in West Lothian really wants is a glass bin like Edinburgh and others...	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	What would you provide for this increase? Worse street lighting?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	All of this in worst cost of living crisis?!?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Sounds about right. Take away more and then charge us for it. ; How would we bridge the gap? Overstaffed management salaries sounds like a good starting point.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	No our budget is already squeezed as it is more council tax for your larger houses over 500.000	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Absolutely not. I'm in a higher tax band and probably have less residual income than those on benefits because I pay all my own bills. I'm sick of seeing everything going to those supposedly on low incomes. Increases only mean the council ends up paying the council tax for those on low incomes so really mugs who claim nothing who get the brunt of every increase as usual	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	As before, get your house in order before asking us for more money! The service we get is declining year after year, but for a second year you want more money. Makes no logical sense. You would not dream of paying more for a worse service anywhere else, why should we tolerate it with the council?!?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	If you go ahead with the proposals in this sham consultation exercise then the council should NOT charge a single penny in council tax. Given the current state of council services, residents should be entitled to a refund of CT.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Reducing council tax would result in additional cuts to services as the council has to have a balanced budget by law.
Have your say on council tax	6 Your say on Council Tax	How is anyone supposed to afford a tax increase now?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	With cost of living being the way it is this would not be a sensible decision. This would not be in line with salaries and is unfair and it would be hoped that there would be some support to bridge the increased budget cut. This should not be taken into considerable when paying for key identified priorities such as schools or social care.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Lessen services jobs etc to save money and to increase our bills. That makes it harder for people and families to live their lives especially during the current situation with energy bills, petrol etc.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No. Unless it would mean that funding for education would increase	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I do not support any increases as a family we are struggling o get by with recent increases in day to day life. However we will have no option when the council makes these changes.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	There is already a squeeze on household's. There would be absolutely no support for this. The council already has too much wasted income. This is clear to anyone with any business knowledge. The council need to hire an external party to get their affairs in order.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. The budget gap faced by the council is a result of funding being insufficient to cover the increasing cost of delivering services due to factors such as population growth and indexation. The council is subject to rigorous external audit and both Audit Scotland and EY have confirmed, over a number of years, that the council has robust financial management.
Have your say on council tax	6 Your say on Council Tax	I don't believe an increase in council tax would be acceptable if services were not maintained.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	People are already struggling with the cost of living. Any increase just now will tip people over the edge. If energy, food, clothing bills stabilize and wages go up, it worth a review then BUT NOT NOW.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No, efficiencies should be found and structural changes implemented. People are already struggling without having to pay more	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	People are on their knees perhaps ask the people working for council to remember they could be the last straw. Where are people getting the money for all your planned increases.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Only increase if people can pay.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Individuals on low incomes are able to apply for a number of council tax discounts and reductions.
Have your say on council tax	6 Your say on Council Tax	Council tax is already extraordinary expensive compared to other UK areas.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian Council's council tax is currently less than the Scottish average and considerably less than the English average council tax bill.
Have your say on council tax	6 Your say on Council Tax	I couldn't afford a higher council tax increase, I struggle at the moment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Individuals on low incomes are able to apply for a number of council tax discounts and reductions.
Have your say on council tax	6 Your say on Council Tax	On a low income and being in a band D property, council tax is already high enough to pay as well as rent and other bills which have increased. I, personally, would struggle to budget and pay these bills if it was to increase	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Individuals on low incomes are able to apply for a number of council tax discounts and reductions.
Have your say on council tax	6 Your say on Council Tax	I do not support the increase cause I didn't get a pay rise so where will I get money for that?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I'd be happy to pay extra council tax if council services were actually effective and if as a teacher I was being paid to reflect this. Inflation has risen but 10% minimum however our salary has not reflected this. Whilst we are currently fighting to obtain this, I feel I would be unable to provide this and also feel with living in a poverty stricken area, there will be lots of families who just don't have the money to pay this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No council tax is expensive enough	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I have to say no as due to the overall financial situation people just don't have the ability to pay much more. Increasing with little chance of receiving amount required creates a vicious circle of increased debt for individual and council alike. Better to maximize savings as proposed and increase by a minimum amount in line with people's income levels maybe think about tiered contribution system, people earning more pay more etc.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No, support for such actions, while Shell earned in 3 months more then in a whole previous year...rich are making money we pay for covid pandemic which now is just a flu...NHS website.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	We struggle to pay this as it is! What happens when we can no longer afforded to pay this? All our bills are going up!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Conflict if you are reducing services to save money and increasing costs for services. It would make more sense to save the money to allow people to spend money and put more money into the economy.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	People are struggling at the moment and the last thing we need is to raise the council tax even further. This would only plummet more people into debt. I would not support an increase of 3.5%.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I think you will struggle to get people to support any rise more than 3%	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	No i would not support any increase with council tax.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	During a time when people are struggling to make ends meet, any increase, never mind more than 3.5%, will have a serious impact on people's household bills when people are having to choose between heating and eating.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold. At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.
Have your say on council tax	6 Your say on Council Tax	Cannot support an increase in the council tax at this time when all costs of living are increasing. How does this square with providing fewer services yet increasing costs?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	England pay more but they also earn more, I don't think you can compare in this way. Not sure people are coping with cost of living eating and heating, not sure this will be high on their priority when everything else has gone up can't see any end, don't see it being affordable. Will cost you more in other services recouping your money from those who just don't have it and god knows what your mental health services are going to do!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Affordability is a consideration when setting council tax. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold. At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.
Have your say on council tax	6 Your say on Council Tax	I don't mind council tax as long as it is spent wisely and for the people. Judging by all the suggested service cuts, this is unlikely therefore, I will not be happy to pay more and receive less	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	My understanding is that Council Tax money is spent on schooling, street cleaning, policing, rubbish, recycling and maintaining clearance areas. Given that the council currently charges tenants for recycling, in some instances house and garden clearance, and are already planning to reduce costs in education and given that WLC no longer pay for 21 police officers (which was stopped a few years ago). I would not welcome a 3.5% charge on council tax.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No indeed I would not support this increase	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I wouldn't support an increase of more than 3.5% and to suggest something at a time when inflation is moving past 10% is ludicrous. The council original pay offer was below 3.5% so you'd claim all of that back with this suggestion. I don't mind you increasing council tax by 3.5% but don't ever offer council employees a pay rise of 3.5% or less otherwise you're just grabbing money. If you want more money, take it from the big companies that operate within the council. The wealthiest companies should be paying more to support the communities that they benefit from. I'm pretty sure you could also look at restructuring the top part of the staff tree in the council - there'd be a lot of savings there. I've also previously suggested switching off certain street lights between certain timeframes - that would save on your energy costs. Why is your information newspaper printed in colour? Colour printing costs a lot more than B&W and most people will just recycle it when it comes in. You were council of the year once. There's a reason why you haven't ever been it since. You can conduct all the surveys you like but you never seem to listen to people.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The increase in council tax for 2022/23 was substantially below inflation, with 3.5% expected to still be considerably below the rate of inflation. A percentage increase in council tax, in monetary terms for most people, is considerably less than a percentage increase in salaries. Non Domestic Rates applied to businesses are determined by the Scottish Government, therefore the council has no control over amounts paid by companies.
Have your say on council tax	6 Your say on Council Tax	I think that is a big increase considering the amount of other increases that are happening and people already cannot cope. This will result in people not paying. I also grudge paying this when I work and live within the council and feel like everything is being cut, I'm stretched to my limits in my job and it seems like that is only going to get worse, therefore driving me out of a career that I worked so hard at to get into.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Yes the council is making money of each tenants by putting the council tax and rent up each year people like me can't afford it but have no choice to pay it or loose ma council house don't agree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Have your say on council tax	6 Your say on Council Tax	Council tax is already expensive. With all the cuts being considered how can this be justified?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	Council tax huge cost to normal household - should be reduced	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Reducing council tax would result in additional cuts to services as the council has to have a balanced budget by law.
Have your say on council tax	6 Your say on Council Tax	Council tax to stay the same not go up	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Not really sure what we get for our council tax, absolute waste of money. WLC is a joke	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	I don't support it. How about getting rid of pointless management jobs, stop fixing up houses of people who wreck them. Fine people for not looking after their council property and gardens. So much wastage within the council.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	I haven't a clue how the extra money could be raised, I just know that right now I am struggling to make ends meet. As a result, I couldn't support this as everyone is feeling overwhelmed by the financial situation right now. Wages are nowhere near increasing by the rate of inflation. Energy bills are rising at astronomical rates. Interest rates mean people are struggling to pay their mortgages and WLC is already struggling to meet the needs of its Homeless/roofless, vulnerable families etc. Foodbanks are running out of supplies and having to ration. ; ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. Have your say on council tax	6 Your say on Council Tax	I would not support a council tax increase of 3.5% per annum	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Right now my council tax is 4178, 3.5% increase would mean the following year (23/24) the cost would be £4324 then the following year (24/25) the cost would be £4474 and then the following year (25/26) the cost would be £4640 and the final year (26/27) it finalise at £4802. That would be a £700 increase over a 5-year period, which is 15% more than I am paying today. Given the current economic climate and the fact that service provisions will be reduced during the same 5-year period, I cannot support this measure.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Forget it. The reason the other places are higher is because they are cities and have more amenities. I do not have the money. Stop r"£\$ and pillaging middle class. We're truly already screwed with increases in tax, NI and no pay rises. So just cut the services.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	This would hit people hard at a time where everything else is hitting us thanks to the conservative shambles in Westminster. Not at all in agreement for this one sorry	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Higher tax band increase I would appose. We pay highest and also have to pay green belt factor. So don't even get services we pay council	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No never, keep council tax, it's your job to find ways to find additional income.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	It's a hard question to answer. A lot of residents wages won't be increasing with inflation.. As you have pointed out in your statement, most properties are in bands A-D which would infer the people in these properties may not earn a great deal. A 3.5% increase is a lot for the working poor. However, I understand that funding has to come from somewhere and if it was to be increased then I don't think it should be ringfenced for schools and social care, however important they are.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	It is noted that you agree with officers' assumptions regarding an increase in council tax.
Have your say on council tax	6 Your say on Council Tax	I don't agree with the 3.5% increase. Home in band E upwards go no reduction this year whereas lower bands got £150. This could have been used by the council	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	In 2022/23 the Scottish Government provided funding which councils had to use to reduce bills for those in Band D and below. The council has no discretion over the reduction or what the funding could be applied to. The Scottish Government mandated that it be used to reduce bills.
Have your say on council tax	6 Your say on Council Tax	People are already on the breadline and with everything going up people cannot afford to live. A small increase might not seem much to some but to some families its enough to push them over the edge. There is no help for middle income families who try to do the right thing by working but can barely get by. No more increases. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.
Have your say on council tax	6 Your say on Council Tax	People on a very limited income couldn't afford increased council tax,	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.
Have your say on council tax	6 Your say on Council Tax	Would not support an increase, as I am a pensioner who cannot afford additional costs. I generally feel I pay a high Council tax at present along with factoring fees for my street. Plus cost of living has increased so there is a lot of pressure on finances all round	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I wholeheartedly DO NOT support such an increase when the services we need are being cut.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	We are already facing tighter household budgets at the moment due to the incompetence of the Westminster government's economic policies. Any rise in council tax would just add to this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	IN THE CURRENT CLIMATE 3.5% IS MASSIVE AND WILL LEAD TO MORE COUNCIL TAX DEBT. LEADING TO MORE LEAGAL ACTION HAVING TO BE TAKEN . THEREFORE UNLIKELY TO RAISE ANY MORE.MONEY !!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Do you think people's salary goes up by 3.5% every year?; I am sure there are other ways to save money over linear cuts.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The pay award for 2022/23 was agreed at a level higher than the increase in council tax. Although the pay award has yet to be agreed for 2023/24, it is envisaged that public sector wages will increase next year. A percentage increase in council tax, in monetary terms for most people, is considerably less than a percentage increase in salaries.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	I would not support any additional increase in council tax. As a householder in one of the highest bands and now retired, 3.5% already represents a large increase - any additional increase would increase financial strain, particularly against a backdrop of rising energy prices and inflationary pressures. We make no use of education, social care, leisure and many other facilities provided by the council yet bear some of the highest council tax charges in the area.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	I dont think there should be any increases to council tax think it is high enough. Stop mucking about with new bins, 20 mile per hour road signage ect and savings can be made there	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. Spaces for People was a Scottish Government initiative fully funded by them. No council tax was used for 20mph zones.
Have your say on council tax	6 Your say on Council Tax	I do not agree with further burdening residents with unrealistic increases in council tax when the council continues to commission services with the private sectors with a primary goal of creating a return for their investors.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure.
Have your say on council tax	6 Your say on Council Tax	I do not agree with an increase in council tax. I would suggest reducing the cost by looking at fuel efficiency within council run building where the heating runs when it is not needed. I would suggest not re-building Letham and Riverside primary schools but maintaining the current schools.; People cannot afford this increase in council tax.; There has to be another solution.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I have already listed several ways to save money, personally I could not afford a 3.5% increase. The amount of families who can afford all these increases will be very low. Especially after they all lost their jobs due to budget cuts.	2. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Our council tax is a significant bill to meet each year and I don't think we get great value for money. I don't support the increase - think we should look for other savings.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Definitely would not support a higher rise in tax. Householders are dealing with increases on every front.	2. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Council tax along with other essential basic bills such as rent and gas&electricity is already too high. I do not think council tax should be increased. You will just out more people in financial hardship.	2. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I am totally against the Council's proposed effective 18% increase in Council Tax over the planning period during a Cost of Living crisis on a tax that central government has previously pledged to abolish.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I believe that the savings efforts of the Council need to be substantially accelerated and made far more robust than what I have seen so far. If not then its clear a more radical form of service provision is required that does not feature the current Council/COSLA orthodoxy and configuration as part of the solution. On basis of whats been presented thus far, its part of the problem.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Since 2007/08 the council has delivered over £152 million in savings. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	Bad enough as it is, don't want to pay more council tax	2. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Families are already struggling with energy costs, interest rates etc. I feel this would be the wrong time to then add more financial burden with increased council tax.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Most people are facing bills they can't manage as it is. People aren't going to be able to afford this as wages are stretched. I pay council tax in Linlithgow yet don't get investment in the town as happens in other towns.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. There is investment in every ward in the council's revenue and capital budgets.
Have your say on council tax	6 Your say on Council Tax	I do not support the rise of 3.5% in council tax. The council needs to start living within its means to go forward not constantly charge more for a poorer service. Under no circumstances should council tax be increased, it should be decreased for lowering services and ringfencing doesn't work either. Sack managers who can't do their job !	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs. The budget gap faced by the council is a result of funding being insufficient to cover the increasing cost of delivering services due to factors such as population growth and indexation. The council is subject to rigorous external audit and both Audit Scotland and EY have confirmed, over a number of years, that the council has robust financial management.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Any increase of 3.5% is problematic unless individual incomes, including the State Pension, keep pace with the increase. If energy costs, rents, transport costs, Community charges etc etc continue to rise it becomes especially difficult for thos on low income.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. A percentage increase in council tax, in monetary terms for most people, is considerably less than a percentage increase individual and family income.
Have your say on council tax	6 Your say on Council Tax	No because this is not going to happen.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	More fleecing the people and business's and causing poverty, you people are disgusting!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	More bills put onto working families that quite simply cannot afford it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold. At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.
Have your say on council tax	6 Your say on Council Tax	Fortunate (in some ways) to live in a band F house. The Council tax is crippling. Any increase because of the size of the bill causes yet more hardship to us as a family.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold. At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.
Have your say on council tax	6 Your say on Council Tax	I don't support the increase in council tax of at least 3.5%. Why is it when councils can't manage their budget appropriately it is the household that has to pay. Where is the household to find the extra money when in a cost of living crisis, I struggle at times to understand what my current council tax pays. Councils need to be more efficient. When look at staffing levels do they need the amount of people in higher paid roles? Are there efficiencies there?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The budget gap faced by the council is a result of funding being insufficient to cover the increasing cost of delivering services due to factors such as population growth and indexation. The council is subject to rigorous external audit and both Audit Scotland and EY have confirmed, over a number of years, that the council has robust financial management. The same cost of living crisis pressures faced by individuals and families also impact on the council. The unavoidable impact of increasing costs for the council means that the council needs to identify savings or generate additional income as the council must have a balanced budget by law.
Have your say on council tax	6 Your say on Council Tax	Against this as a way to bridge funding gap	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Given all the other increased this is not feasible for most families	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold. At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.
Have your say on council tax	6 Your say on Council Tax	I do not support as households are squeezed enough	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No to an increase - cost of living crisis will push families over the edge. See previous comment on council tax bill of more than £3,000 already!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No increase	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	How can you decide to raise council tax during a cost of living crisis??? Reduce your spending rather than taking more from people who are already struggling to make ends meet	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I don't support an increase , however I think the money collected should be used in schools and social care	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Would not support larger increase with the current cost of living increases being so significant	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No i would not support any increas ein council tax when you have just outlined all the useless services that you want to keep. instrumental music being a prime example	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	NO INCREASE IT IS CRIPPLING ALREADY	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	I am not happy with this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I do not agree with an increase of 3.5% each year and I would not support any additional increase to be used within schools or care priorities. This is a key example of bad planning in previous years from both councils and politicians. I am sickened by the lack of planning and the extreme cases mentioned in this document due to leaving it so long before implementing changes..too late!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council has delivered balanced budgets each year since 1996. The budget gap faced by the council is a result of funding being insufficient to cover the increasing cost of delivering services due to factors such as population growth and indexation. The council is subject to rigorous external audit and both Audit Scotland and EY have confirmed, over a number of years, that the council has robust financial management. External audit and regulation provides no evidence of reckless spending or poor planning. The council's medium term approach has provided time to plan and implement changes which is not universally seen across local government in Scotland.
Have your say on council tax	6 Your say on Council Tax	I would not support an increase in council tax with everything else that is going on ...	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	no we don't agree with council tax now its unlawful lies by the greedy government FYI no bodys money is going up how do use expect people to pay for it when government are allowing gas and electricity companies to rip us all of and put many into serious debt not to mention mortgages going up food rising to 10% inflation petrol pumps ripping us off all unlawful under the 20/30 agenda great reset sorry but no way were flipping sick of this their will be a civil war coming us against the people in high power positions	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I think an increase of 3.5% is too much at a time when pay is low and cost of living is high. The 25% of properties over band D would see a substantial increase.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No because wages are not increasing in line with inflation	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Absolutely not. Council tax is already far top high and you can't justify cutting back on Services while increasing council tax.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	People can not pay any more with the current financial difficulties.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No. We continue to pay substantially more every year for a lesser service. You used to get large item free pick ups per players now they are charged so not included. Bins are collected less often. ? Festive lights might not even be supplied by the council. We should not be paying more for a lesser service.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	I would not support this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Please don't.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Nope. New partnership buildings did not need to be built when there were buildings already built then sold off. Remove blanket free school meals.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The council has delivered substantial savings through consolidating buildings. New buildings are also more efficient, delivering savings in day to day costs, particularly energy. The council must deliver school meals in line with Scottish Government requirements which is currently universal free provision until P5.
Have your say on council tax	6 Your say on Council Tax	With the cost of everything going up this is the last thing we need!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	People are already struggling as it is. The Government are part of the problem.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Not sure I have the complete picture here. Are we saying after all the cost savings you have discussed here? Do you still have a gap of 17.9 million in the budget if the council tax was not increased by 3.5%? People are already paying a great deal of energy costs and council tax. I don't think increasing the council tax further will be acceptable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Yes. The scope of the financial challenge facing the council means savings and increased income, either by council tax or discretionary charges, is required. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	An increase in council tax would really be ridiculous at this time, this would undermine the benefit of any energy offset that's being applied. No one likes tax increases, but it is likely that we will be already impacted by mass tax increases this year. Council tax will just add to the difficulties.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	As much as I would like to say yes, most salaries aren't increasing by 3.5% each year. Mine and my husband's included. Council tax is already one of our highest monthly household costs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. A percentage increase in council tax, in monetary terms for most people, is considerably less than a percentage increase in salaries.
Have your say on council tax	6 Your say on Council Tax	I think we pay enough for council tax	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	I think we are already paying sufficient council tax without a further 3.5%	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No with cost of living g prices I don't think council tax should go up	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	We're taxed through the nose as it is, can't afford to heat our homes.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No I would not support this	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	I disagree with council tax rises in the current climate.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	I would not support an increase of £3.5% or more.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Unacceptable!!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No, families can't afford this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No I wouldn't support a rise	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Absolutely not.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	People cannot afford to pay an extra 3.5%	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	I do not agree in 3.5% year on year rises, it really is the working poor just now.; this is a really expensive bill on top of everything else.; WLC always needs to make budget cuts and savings, think of other ways to raise the required money, as the wages do not increase in line with this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The pay award for 2022/23 was agreed at a level higher than the increase in council tax. Although the pay award has yet to be agreed for 2023/24, it is envisaged that public sector wages will increase next year. A percentage increase in council tax, in monetary terms for most people, is considerably less than a percentage increase in salaries.
Have your say on council tax	6 Your say on Council Tax	I don't support 3.5% every year.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I find it difficult to support an increase in council tax when council services are going to be cut further! While I appreciate the budget gap needs to be met, most services already seem to be stretched or have been cut. I feel our local area over last year has looked a mess with cut backs on grass cutting, bin uplifts etc. local amenities have been closed or reduced.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	Give that we pay double what our neighbours pay in council tax and we get bugger all extra for it I wouldn't be happy with a rise. ; Perhaps the council workers could be treated like your average private business worker and start and finish at the time they are supposed to rather than going round picking up fellow workers and dropping them off at home time before finishing time. It's a joke. ; Also it's easy enough to get items from stores through a council worker. This must run in to thousands in unworked hours and supplies from stores	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The council robustly investigates and pursues all cases of fraud.
Have your say on council tax	6 Your say on Council Tax	No. Adjust your spend, we are having to do this dont add to the wider problem	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	You cannot increase council tax whilst reducing the services I use .	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	Cost of living is already crippling people, they can't afford it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.
Have your say on council tax	6 Your say on Council Tax	No as currently many wages are not being increased in line with this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The pay award for 2022/23 was agreed at a level higher than the increase in council tax. Although the pay award has yet to be agreed for 2023/24, it is envisaged that public sector wages will increase next year. A percentage increase in council tax, in monetary terms for most people, is considerably less than a percentage increase in salaries.
Have your say on council tax	6 Your say on Council Tax	I do not support the annual increase because of the current financial crisis on households. I understand that means cuts in services but households are already too squeezed to pay an additional 3.5 pc on top of soaring inflation, real wage cuts, higher interest rates and the exorbitant rise in fuel . ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	You cant honestly raise council tax at the same time as removing funding from other vital areas!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	No - this exceeds what many receive as a pay increase and will leave people unable to meet their bills.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.

The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No I do not support the increase.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	More bad news!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	This is scary	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No I would not	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	NO	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No, I wouldn't	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No , in the current economic recession & spiralling costs, I would not support higher increases	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No I would not support a higher increase in the current economic climate.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No it is too easy just to increase tax, the Council need to be accountable to local taxpayers, there are always areas which can be managed more efficiently, the decisions are just hard esp when it involves letting staff go but other jobs exist.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	In current times large increases in bills would not be welcome, or even manageable, and put a massive strain on people. As both a member of staff and a member of the public in West Lothian I would prefer more savings from within the council rather than increases of more than 3.5%. Improving community engagement could help in making savings, possibly filling gaps where services are reduced.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	i am not sure i support an increase at all. service levels have dropped but the customer should pay more. this does not really sit well with me. i also can not understand where the approximately 500mil GBP is being spent in West Lothian. i am sure it must be possible to find additional savings to reduce the impact on the customer.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	I would not support an increase if the current cost of living crisis continues. Also, I would not support if start to charge for garden waste.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Would definitely not support an increase, especially if all these services are not even in place.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	How would you find the additional income to bridge the increased budget gap? I think this answers your own question. Everybody is already struggling £20/£30/£40 genuinely doesn't sound a lot but it is. People are finding it difficult to make ends meet. The price of everything is going up. This will cause more people to be in dept and from there it would be a downward spiral.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold. At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.
Have your say on council tax	6 Your say on Council Tax	Increasing council tax would have a detrimental affect on working people who do not qualify for benefits - people are already struggling with pay rises not covering the increase in all other daily living costs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Not in a million years as the current facilities on offer are little or non at all including the likelihood of getting a GP appointment	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The NHS delivers health services (including GPs) and it is not funded by council tax.
Have your say on council tax	6 Your say on Council Tax	I don't think 3.5% increase is affordable for everyone. I think it's inevitable that there will be increases in taxes everywhere but I think the public would want 0-0.5% increase so I think a 2% increase would be better as even though it's more than we the public would want it's still a good increase.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Reducing council tax would result in additional cuts to services as the council has to have a balanced budget by law.
Have your say on council tax	6 Your say on Council Tax	Raising council tax by more than 3.5% for whatever good cause is not acceptable in this difficult financial time. The use of food banks is at the highest level ever so no extra should be taken from people.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	With current pressures on cost of living I think we should keep charges down	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Lower	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Reducing council tax would result in additional cuts to services as the council has to have a balanced budget by law.
Have your say on council tax	6 Your say on Council Tax	3.5% is way too much. I again go back to the staffing at the council, this needs to be looked at from top to bottom. Too many times do you see council vans with 3/4 employees reading the paper or taking a nap. Roofers that are not allowed to work because there is a chance there may be a breeze, 6/7 employees looking into a pot hole not doing anything. How many down time hours do the council pay for on an annual basis? Too Many.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. Your response in relation to staffing will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	I don't want to pay more tax.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	no I wouldnt support this. As a single person I dont feel the benefit of the cost of my council tax - my street is dark - my grey bin is always full - the library is closed - the bus service is poor - Im disabled but work and have my own home so get no help - my friend who doesnt work pays less CT in a year than I pay a month and gets much more help	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	No, I couldn't afford it	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I wouldn't support an excess in fees until I was confident that the money would be budgeted properly for the priority services. There us so much wasting of money at the moment, realigning systems need to give me confidence that it works.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The council has delivered balanced budgets each year since 1996. The budget gap faced by the council is a result of funding being insufficient to cover the increasing cost of delivering services due to factors such as population growth and indexation. The council is subject to rigorous external audit and both Audit Scotland and EY have confirmed, over a number of years, that the council has robust financial management. External audit and regulation provides no evidence of reckless spending.
Have your say on council tax	6 Your say on Council Tax	Things are unbelievably difficult financially just now. This is just morally wrong	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs or increase income.
Have your say on council tax	6 Your say on Council Tax	The population of West Lothian has no money as it is.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Disagree with increase as cannot see the benefit I get just now for the bill paid ; ; What is the council tax covering all I see is the bins being emptied this need protected.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	No. As our council tax is already high as it is and with the cost of living crisis we are struggling as it is never mind increasing council tax!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	We pay a ridiculous amount in council tax and the banding of E for my 3 bed semi is ridiculous. We are paying more for a reduction in services...that is not fair. We don't get any help with benefits and would really struggle to pay anymore...; I'm sure many people are the same, it's a massive amount of money every month.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	No as wages are not increased by 3:5%	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. A percentage increase in council tax, in monetary terms for most people, is considerably less than a percentage increase in salaries.
Have your say on council tax	6 Your say on Council Tax	a 3.5% increase , that going to work with wages increase and inflation, your putting more people into debt and especially how aggressively you chase after people and add money and interest , you are exploiting your customer base while doing this and putting them in harms way, especially the lowest social economic group and vulnerable people	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs. A percentage increase in council tax, in monetary terms for most people, is considerably less than a percentage increase in salaries.
Have your say on council tax	6 Your say on Council Tax	If the council actually delivered on promises to cover council tax. Why have we no glass recycling service? Our green been has never arrived, public areas aren't always well maintained, parks on our local area are awful. Do an extra 3.5% would not be welcomed.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	I would not support this. Individuals who are working are the having the most financial difficult at the moment and this is squeezing it even further. More individuals will required support from the government or lead to increased poverty.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Until we are no longer in a cost of living crisis, council tax should not be raised. People will be forced out of their homes and the council will then have an even bigger homelessness problem to deal with.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.
Have your say on council tax	6 Your say on Council Tax	Ridiculous to propose a 3.5% increase considering the cost of living crisis and rising food, gas, electricity, clothing and petrol prices and stagnation of wages. If this rise continues individuals will not be able to afford to keep their homes.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I dont believe a higher rise is justified until heavier management costs have been stripped back and all options exhausted	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The council has one of the leanest management structures of any council in Scotland. The council has delivered substantial management savings to date but continues to investigate savings and efficiencies in management structures.
Have your say on council tax	6 Your say on Council Tax	I received a pay rise of 3%, we cannot afford more bills to increase at the higher rate than I am earning, it's not sustainable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. A percentage increase in council tax, in monetary terms for most people, is considerably less than a percentage increase in salaries.
Have your say on council tax	6 Your say on Council Tax	you need to do the services that council tax is payed for feel like the way the world is right now people are struggling as it is to make ends meet just now how can they find the money for to pay more after	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	3.5% is unaffordable! I get that savings need to be made and income needs increased but this is too much. Far too much money is given to those who are perfectly able to work but are too lazy and have an easy life getting everything handed to them. I get that some people genuinely need help and they absolutely should get it but there are far too many who need to get off their behinds and stop getting everything handed to them. There's little support for anyone working and paying taxes, we just constantly get told we have to pay more and more. I have gone from being in a comfortably paid household to scraping the barrel every month just to pay the essentials. Maybe top council workers could take a hit in any wage rises planned for them to help the budget.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The proposed increase is considerably below the current rate of inflation. A percentage increase in council tax, in monetary terms for most people, is considerably less than a percentage increase in salaries. Benefits are determined between the UK and Scottish Governments. The highest paid employees (i.e. those earning above £60,000) received a flat cash increase in pay for 2022/23 which in percentage terms is considerably less than those at the lower end of the pay scale.
Have your say on council tax	6 Your say on Council Tax	Currently no as cost of living too high more increases will make it harder for people to live	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	This is already too high and with cost of living this would not support our residents	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I feel my council tax is too much for what we receive. Costs continually going up for less is a disgrace. Cut in services is getting worse.; I DO NOT agree with the teachers strike and if teachers pay is increased way above the averages of other services, it doesn't seem fair for the public and other services to suffer In proportionally.	2. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	Realistically It won't be spent on what it is needed for this is obvious around west lothian and has been for a while.; charging more for a basic service being received all ready cant be justified. To ask resident how this could be obtained if answerd no is concerning. I don't support the increase to council tax.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	No, stop giving money away to folks who aren't contributing.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. Most additional payments or benefits are determined by national government (e.g. child bridging payment).
Have your say on council tax	6 Your say on Council Tax	I would not support an increase of more in this current financial crisis as everyone is currently struggling and cannot afford a larger rise	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Disagree. With the inflation raising more than 11% how do you think the householders will be able to pay for an increase of 3.5% every year. I would like to recommend every 2 years.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	; I do not agree with an increase in council tax .; Look into re-assessing all those houses with extensions who are in lower bands.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	At the current time, raising Council Tax will hit far too many people when as it stands we are ALL already worse off due to the mismanagement of UK finances via Tory government ! People are scared to cook and put heating on,some food costs have gone up by around 20% and more,now is NOT the time for raising council tax ! It seems to be that our minority led Labour council are NOT doing right by the residents of West Lothian,and it is NOT down to Scottish Government cutting budgets, it's down to WM giving less in real terms via the Barnett formula ! WLC has a cash pot set aside for a rainy day, what exactly constitutes a rainy day ? will the cashpot of around £1million be kept to raise the wages of the executive or to help the residents of West Lothian ? DO RIGHT for a change, help out the people in West Lothian !	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. West Lothian Council has the lowest unallocated general fund balance of any council in Scotland and once it has been used, it is no longer available for future emergencies or needs. The budget gap faced by the council is a result of funding being insufficient to cover the increasing cost of delivering services due to factors such as population growth and indexation. The council is subject to rigorous external audit and both Audit Scotland and EY have confirmed, over a number of years, that the council has robust financial management.
Have your say on council tax	6 Your say on Council Tax	Council tax is already to high and should not be increased anymore.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Those residents who actually pay council tax already pay enough. Current council tax is too high. The council should be looking to collect council tax from more of its residents, not continuing to take more from those who already pay. Too many freebies for too many people. Maybe that's why the population is increasing in West Lothian? ; ; It's becoming like the Health Service. You cannot continue to provide a service to more people unless they contribute. The council needs to review its strategy. ; ; I would not support an increase in the rate of council tax.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	No it's okay spending on schools and social care but it's the working person that will again bear the sore end of this people on benefits who shouldn't be have no concerns as they're having it paid for them. It seems that it doesn't pay to work	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No!! does funding for schools and social care not come from issued budgets and funded from Scottish government	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. 81% of funding for schools and social care comes from the Scottish Government with the balance being funded by council tax.
Have your say on council tax	6 Your say on Council Tax	Nobody can afford this. Most of the cuts already mentioned are sensible.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	People can hardly afford to pay any bills - increase in Council Tax is not appropriate	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	We don't all hold the government to ransom and threaten to go on strike if we don't get a pay rise ; But still earn to much and don't qualify for benefits ; Think you ask for enough council tax money ; Yous need to stop wasting money and be more productive ; Including employees	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I wouldn't support a bigger rise until you can prove that you can spend the money that you get in more sensibly. Roads are atrocious...buses are often not running and I velieve the council wastes money.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Do not support an increase at all. Times are tough enough for us	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Would not support however there is no alternative	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No way to increases	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	This is the most unfair tax of all. The value of a house bears little link with the income of its inhabitants. It is time for the council to stop the practice of householders doubling even tripling the size of their homes and remaining in the same council tax band until their property is sold (sometimes never). I am surrounded by properties that have done just that and I am paying a higher rate band than households with 3 generations of occupants.; I do not support any increase in council tax. This tax should be linked to the combined incomes of the residents who live there.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	I pay council tax yet stay next to a rubbish tip; No one willing to deal with this and rats have appeared but even then (not enough rats seemingly or where they came from); If I need to stay next to a rubbish tip then I would imagine I should pay less for my council tax not more.; ; I also stay next to a shop that is allowed drivers to wake everyone up playing music and accessing shop from 3.30 am; not just 1 van but 3 with different goods ; ; So no increasing my council tax is an insult for what I have to put up with.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No I would not. Give some relief to bands E and higher. We received increase every year while bands A-D reduction. People on higher bands struggle too.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. In 2022/23 the Scottish Government provided funding which councils had to use to reduce bills for those in Band D and below. This was funded and required by the Scottish Government for one year only.
Have your say on council tax	6 Your say on Council Tax	No i don't support the rise as again many families are struggling as it is without having the added stress of increasing council tax and then paying for bins on top of this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Not my job to find it ! Not I am educated to the standard the people making those decisions should be to find it so your passive aggressive there sums up this entire survey. You continue to over charge for council tax and provide very little service and the service you do provide is not up to a good standard.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs. Every pound raised by council tax is used to deliver services to local communities.
Have your say on council tax	6 Your say on Council Tax	Again, working families are being punished enough due to tax increases and I feel if there are any more increases to council tax, families will not be able to live.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Let's see raise council tax and cut all services. Makes no sense at all. Clearly lining someone's pockets and not the peoples.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs. Every pound raised by council tax is used to deliver services to local communities.
Have your say on council tax	6 Your say on Council Tax	If a 3.5% increase is put on council tax then there should not be extra charging put on garden waste or less winter maintenance and festive lights etc.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. If additional income cannot be generated, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	In the current financial difficulties it's too much to ask people to pay	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	With everything else going up, mortgages, gas, electricity, cost of food, petrol etc no to the additional increases of 3.5% each year. People are going to struggle even more if not end up losing their houses.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Instead of council tax going up again! Help people instead of increasing their bills	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Keep council tax down when every other bill is going up this does not help families what's so ever?! ; ; People are struggling at home to make ends meet stop putting up the bills! To support schools and teachers wages, we all want a wage rise!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No I wouldn't. Anyone buying a new home is in at least a band E which we are being hammered for. I am not on a high wage so struggling just now. Not fair that people in council homes that are larger are paying far less c tax when they have more dispersible income. Should be readjusting all the bands to make it fairer	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	Some of us that do not get any financial help through benefit top ups can not afford council tax increases. This need to be kept to a minimum otherwise we risk losing our home and becoming homeless which is another burden on the council.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.
Have your say on council tax	6 Your say on Council Tax	No increase. Those scrapping by each month with no financial help can not afford an increase. Why should those earning just above the benefit limit take the burden. Bands A-C should be exempt from anything above what is absolutely necessary.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	Councils & COSLA need to stand up to the SNP run Scottish government who have bled councils dry over the last 14 years while managing to increase money for their own central government projects & fat cat quangos. ; Try getting the Scottish government to save money by closing down pretendy embassies abroad duplicating staff & offices that the UK government already has there costing over £9million per year. ; Perhaps the SNP run Scottish shouldn't have just given away £5 million to other countries at COP27 for climate reparations?; How much money is fed into Prestwick airport every year. Total cost circa £50 million.; £50 million costs for the malicious Rangers prosecution.; £500 million in guaranteed loans to Gupta for the Lochaber smelter that was bought by him for £5 ; £30 million on a referendum...give it a rest ; An extra £152 million for ferries that aren't even finished yet. ; Over £500 million in bad loans & investments written off by Scottish government; £2.5 billion of Covid support money gone & not accounted for. ; I think it's disgusting for the council to try and make residents pay more council tax to pay for the mistakes of the Scottish Government	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The council regularly emphasises to the Scottish Government the need for a fair settlement for local government as well as working with COSLA (the body that collectively represents local government in Scotland) to emphasise this point.
Have your say on council tax	6 Your say on Council Tax	Increasing by more will impact households who will then depend on other parts of the council to support them. Children will be most impacted. ; ; If the council are making huge cuts, why does the council tax also need to be increased? Huge amount of money was wasted in changing areas to 20mph then back to 30mph.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The implementation of 20 mph was funded and determined by the Scottish Government as part of the Spaces for People Initiative arising during the pandemic.
Have your say on council tax	6 Your say on Council Tax	No Increase when cost of living is going up inflation 10%, savings should be made elsewhere and not by taxing the population	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Council tax should not increase as we pay to much for to litte	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	No, increasing council tax, which is already expensive not a solution.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Increases in council tax is just cl going to make the cost of living crisis worse for working class families.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	I do not support the increase in council tax. It increases year on year and each year we are hit with a reduction in services. Bin collections are sporadic, recycling centres never open. Green spaces and road verges are not maintained and only attended to following serious near miss or accident reports. West Lothian in general looks tired, unloved and very grotty. Too many housing developments have been granted without thought to green space, impact on existing residents or the infrastructure. Roads maintenance is non existent with all roads covered in pot holes or regularly closed /diverted traffic routes for patch repairs which last a number of weeks before needing to be done again. ; I would recommend the council reduces its number of nonsense projects and wasteful spending such as milestones, distance signage and actually serviced its residents and maintained what we currently have	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The council's aim is, and always will be, to ensure that West Lothian continues to be a great place to live, work, visit and do business. To achieve this aim we will continue to prioritise the money that we spend on services to make sure that our investment has the biggest and most positive impact on the community. As validated by external auditors and other inspection bodies, West Lothian Council continues to perform well against key performance indicators and activities. This will continue to be monitored and reviewed.
Have your say on council tax	6 Your say on Council Tax	No increase in council tax is supported rather it needs to be reduced	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Reducing council tax would result in additional cuts to services as the council has to have a balanced budget by law.
Have your say on council tax	6 Your say on Council Tax	Sorry but don't agree with this at all! In this difficult time with the gas and electricity prices this is a bad news to increase the council tax!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I absolutely would not accept a higher increase. People can't afford to eat or heat their homes. Where do we find more money?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Council Tax is wildly regressive and shouldn't be increased until the ratios between the bands are changed so that the richest pay more.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	When is normal people aren't getting a wage rise of 10% when you get people on benefits that are getting 10% rise mind blowing! think it's outrageous to put it up right now when people who work really hard can't make ends meet	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	It is not the right time to increase council tax for people given the current cost of living crisis this will further impact on families and single occupancy households to stretch their finances further.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I would not support such a high council tax increase. Instead I propose a council employee wage freeze, and a reduction in subsidised bus services.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Council tax should remain as is	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	older people are struggling financially as it is so no increase in council tax please.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	could not afford any further council tax increases	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No more council tax increases	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	With the cost of living crisis I don't think the costs should be passed to residents	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	No, I would never support something like that. Sorry	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I would favour a small extra increase in council tax (1%) if it was ringfenced for adult social care.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Could not give a blanket agreement of support without details of how this would affect / benefit schools / social care.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I would struggle to play more	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Keep the council tax low.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	not increase people will stop paying if it is not affordable	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	do not increase as people are struggling as it is	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I can't afford a council tax increase like others I am in a council new build putting me in band E -far too expensive. your affordable housing is not affordable	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	Service are already slipping, bins being emptied once a month, areas not being kept tidy, overgrown shrubs, some areas are an eyesore while others are generally tidy. How will the new proposed budget affect the current state of West Lothian?	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council continually reviews service provision using our Best Value Framework to ensure that we deliver value for the public and continue to achieve the expected levels of performance. There are rigorous internal scrutiny arrangements in place to assure the quality of our services and we are also subject to external audit and inspection.
Have your say on council tax	6 Your say on Council Tax	We pay the highest level if council tax currently and don't get a great deal from that. Even basic street cleaning has disappeared, grass cutting and pavement cleaning are very haphazard and winter road and pavement clearing are pretty non existent. Requests for extra bins for grit refused. Yet, other areas in Livingston appear to get all of this. So, how does this work? Our child is now an adult and lives in Edinburgh, so child provision etc is not on our radar, although we retain a keen interest on what happens in our schools etc.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	Cut to the chase , you're putting up taxes again	3. The respondent advised that they had no comment to make or posed a question of the measure.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	I don't have the depth of knowledge of council budgets etc to answer this question reasonably.	3. The respondent advised that they had no comment to make or posed a question of the measure.	This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Have your say on council tax	6 Your say on Council Tax	It's not our responsibility to tell you how/where to make the savings needed.	3. The respondent advised that they had no comment to make or posed a question of the measure.	This document is part of the early stages of public consultation on budget saving measures. The council is required to consult with communities on proposed changes.
Have your say on council tax	6 Your say on Council Tax	Are people able to pay an increase on council tax? or would this be arrears to chase, with no staff?	3. The respondent advised that they had no comment to make or posed a question of the measure.	All council tax raised is used to deliver local services and affordability is a consideration when setting tax levels. The council has existing processes to pursue all debt.
Have your say on council tax	6 Your say on Council Tax	Increase tax yet provide less- this is becoming boring now. You've suggested many crazy ideas including even cancelling some Christmas lights for kids to enjoy yet you are raising taxes???	3. The respondent advised that they had no comment to make or posed a question of the measure.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	Its not how would we find the additional income to bridge the budget gap - the question in this climate is more simple - how will people find the money to pay the 3.5% or greater increase? I would imagine that the increase you think you may achieve will be well below this as people simply cannot afford any further increases in their household bills and so many will simply be unable to pay.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold. At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.
Have your say on council tax	6 Your say on Council Tax	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	no involvement	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	My head is starting to hurt now. Are you asking me to do your job?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	I'm not in a position to comment fully on this	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No comment as I do not live in West Lothian	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No comment as I work here and don't live in West lothian	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	UTC. Not a WLC resident.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	N/A	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Unsure	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	NA	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	I dont live in West Lothian so I dont feel that I can comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Not a resident so can't comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Does this mean we are already one of the highest council tax bands for all councils that don't have a city to cover? Mentioning the average for England isn't fair either because London throws their average way higher than the average actually is.	3. The respondent advised that they had no comment to make or posed a question of the measure.	West Lothian Council's council tax is currently less than the Scottish average across all councils not just city based authorities.
Have your say on council tax	6 Your say on Council Tax	N/A	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No Comments	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	no comments	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	I do not live in West Lothian	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Unable to comment again due to lack of available information.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	I can't see any point in continuing this survey as it is a waste of all our time without the information, we need to give an informed opinion.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Dont know, but i dont think people can afford any more than they are paying - asking people to pay more but get less as everyone is making cuts, Police/Fire/Council - thats where the council tax goes.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities. Council tax only funds council services not the Police, Fire or NHS.
Have your say on council tax	6 Your say on Council Tax	Council tax	3. The respondent advised that they had no comment to make or posed a question of the measure.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	As a working people we don't get the opportunity to get a pay rise so how can we pay for something that we already do for increase but our income doesn't ?	3. The respondent advised that they had no comment to make or posed a question of the measure.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs. A percentage increase in council tax, in monetary terms for most people, is considerably less than a percentage increase in salaries.
Have your say on council tax	6 Your say on Council Tax	I would need more specifics to make a judgement.	3. The respondent advised that they had no comment to make or posed a question of the measure.	This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Have your say on council tax	6 Your say on Council Tax	I don't actually know what our council tax currently goes towards for me the pot holes, state of green spaces is shocking	3. The respondent advised that they had no comment to make or posed a question of the measure.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities. Full details of how the council allocates its resources to individual services is provided in the annual activity budget which is available on the council's website. A summary of key areas of spend are included in the council tax leaflet which is provided along with bills.
Have your say on council tax	6 Your say on Council Tax	If you don't ask you don't get. Thank you for asking	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	no	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	I don't pay council tax	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	None	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	I don't pay council tax	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	I don't pay council tax	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	How can the council state reduced earnings as a reason for cutting funding after delivering a 4.84% increase in council tax? Again I am repeating myself but still require an answer the additional funding received from increased tax has gone where?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your response. Your comment has been noted. The budget gap faced by the council is a result of funding being insufficient to cover the increasing cost of delivering services due to factors such as population growth and indexation. The council is subject to rigorous external audit and both Audit Scotland and EY have confirmed, over a number of years, that the council has robust financial management. Costs have continued to increase and by law the council has to balance the budget - this requires either increased income or reduced costs.
Have your say on council tax	6 Your say on Council Tax	I do not support an increase of more than 3.5% as I am fed up paying for services I do not, have not and will not use eg schools, roads etc. I understand the need to increase council tax by UP TO 3.5% and can see why this is necessary but I do expect that action be taken against those who refuse to pay Council Tax bills when they are legally required to. Too many Council Tax bills are written off as unrecoverable debt and this is why the rest of us have to keep paying out more and more money.	4. The council is already doing this.	The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Council tax is a regressive tax that should not be raised under any circumstances. The council through COSLA should lobby for a fairer settlement from the Scottish Government before any attempts to increase council tax. That also goes for the cuts proposed throughout this consultation, more money should be secured from the government to prevent cuts.	4. The council is already doing this.	The council regularly emphasises to the Scottish Government the need for a fair settlement for local government as well as working with COSLA (the body that collectively represents local government in Scotland) to emphasise this point. Council tax reform, including how increases to council tax are applied, can only be reviewed at a national level with corresponding changes in council tax legislation. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I don't agree with raising the charges to all, more effort on finding where there is large wastage is more appropriate.	4. The council is already doing this.	The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure.
Have your say on council tax	6 Your say on Council Tax	If we all pay council tax and use our services then our communities will be better places to live because right now there are villages that look like they have been forgotten. Yes celebrate new school builds but let's not forget communities schools that look neglected.	4. The council is already doing this.	New schools are fully funded by developers. The council's capital programme is focused on maintaining existing assets to support service delivery and aims to maintain suitability, condition, compliance and sustainability within available resources.
Have your say on council tax	6 Your say on Council Tax	How would council propose this additional revenue spend to be spent transparently?	4. The council is already doing this.	The council has delivered balanced budgets each year since 1996. The budget gap faced by the council is a result of funding being insufficient to cover the increasing cost of delivering services due to factors such as population growth and indexation. The council is subject to rigorous external audit and both Audit Scotland and EY have confirmed, over a number of years, that the council has robust financial management. Detailed information is contained in the annual budget report and activity budgets with all funding allocated to supporting local services.
Have your say on council tax	6 Your say on Council Tax	Large internal efficiency drives with streamlined delivery and checking should lead to savings	4. The council is already doing this.	The council continues to investigate ways to consolidate and better coordinate activities to allow streamlining of operations and removal of duplication. This will help ensure that activities are completed and managed in the most effective way.
Have your say on council tax	6 Your say on Council Tax	If I thought that schools, social care and health care was a priority and the services provided were excellent then I would, but its seems we are being asked to pay more and more for less and less services.; ; We all want community services that we are proud of but it seems that the councils seem ell bent on ensuring all their council offices are the most up to date buildings in the whole of west lothian	4. The council is already doing this.	The council has undertaken a programme to rationalise the office and partnership centre estate, saving significant revenue and capital costs. There are no plans to build offices with the council looking to further rationalise the property estate.
Have your say on council tax	6 Your say on Council Tax	Start publishing to the penny what you spend your budget on - this will show where you are wasting it and we the people who pay for it can see what we are getting for our money and is it value for money. I sincerely doubt it from the evidence you've provided.; If you can ensure every member of staff offers something and their job is needed this would also help. Do all staff work to their full potential or not so much so you pay overtime. Can you account for what each member of staff does each day?	4. The council is already doing this.	The council has delivered balanced budgets each year since 1996. The budget gap faced by the council is a result of funding being insufficient to cover the increasing cost of delivering services due to factors such as population growth and indexation. The council is subject to rigorous external audit and both Audit Scotland and EY have confirmed, over a number of years, that the council has robust financial management. Detailed information is contained in the annual budget report and activity budgets with all funding allocated to supporting local services. The council's planning structure (Corporate Plan, Management Plans and individual work plans) support this.
Have your say on council tax	6 Your say on Council Tax	If I thought you used the money wisely - yes.; But you don't - you still seem to operate in the past where money was limitless.; If you had moved with the times you wouldn't have wasted so much money and you would be in a better position.;	4. The council is already doing this.	Thank you for your response. Your comment has been noted. The budget gap faced by the council is a result of funding being insufficient to cover the increasing cost of delivering services due to factors such as population growth and indexation. The council is subject to rigorous external audit and both Audit Scotland and EY have confirmed, over a number of years, that the council has robust financial management.
Have your say on council tax	6 Your say on Council Tax	It would make more sense if you provided monetary figures for the proposed rises. Pensioners and others on a fixed income need to know what 3.5% looks like in financial terms.; In a civilised society education and social care must always be supported to the max.	4. The council is already doing this.	The annual budget report includes the proposed total, monthly and weekly increases in council tax for each band. Further information is available in reports to the council's PDSPs.
Have your say on council tax	6 Your say on Council Tax	I'm a single occupier so I benefit from the 25% discount and I also received a lump sum discount on top of this as well this year. This was much appreciated.	4. The council is already doing this.	The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.
Have your say on council tax	6 Your say on Council Tax	Reading the above prompts the question, why would increasing the council tax result in an increase of council services when there has been no evidence of this in the last 5-10 years?; As I said earlier, recoup lost revenue would be a good start!	4. The council is already doing this.	The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity.
Have your say on council tax	6 Your say on Council Tax	Efficiencies should be explored. Schools and social care should be impacted last.	4. The council is already doing this.	As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	Approach the Scottish Government, they have run all public services into the ground, the £20 million they have "put aside" for another referendum, which I for one strongly disagree with, would more that cover the budget gap of £17.9 million !!!	4. The council is already doing this.	The council regularly emphasises to the Scottish Government the need for a fair settlement for local government as well as working with COSLA (the body that collectively represents local government in Scotland) to emphasise this point. The £20 million is a one off provision whereas the budget gap is a recurring gap which has to be found every year.
Have your say on council tax	6 Your say on Council Tax	Council tax in higher bands is already so high. Especially when core services are not being met- salting roads at winter, road maintenance, street cleaning, bins being collected	4. The council is already doing this.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	I would support this provided that Council staff get a pay increase that is not dissimilar to the Council tax rise.	4. The council is already doing this.	The pay award for 2022/23 was agreed at a level higher than the increase in council tax.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Social care needs more review. I would not support more funding going there. VFM ends to be looked at. Based on my previous understanding of interactions, especially in connection with dementia, I'm not sure they are even providing a service!	4. The council is already doing this.	The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure. The council's aim is, and always will be, to ensure that West Lothian continues to be a great place to live, work, visit and do business. To achieve this aim we will continue to prioritise the money that we spend on services to make sure that our investment has the biggest and most positive impact on the community. As validated by external auditors and other inspection bodies, West Lothian Council continues to perform well against key performance indicators and activities. This will continue to be monitored and reviewed.
Have your say on council tax	6 Your say on Council Tax	The council needs to charge people appropriately. I pay the most in my street. I don't have the biggest house! Years of mismanagement means this is all over the place. I am happy to pay what I need to but if you make everyone in band g pay band g you will have more money. ; ;	4. The council is already doing this.	The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity.
Have your say on council tax	6 Your say on Council Tax	Efficiencies should be prioritised.	4. The council is already doing this.	The council continually reviews service provision using our Best Value Framework to ensure that we deliver value for the public and continue to achieve the expected levels of performance. There are rigorous internal scrutiny arrangements in place to assure the quality of our services and we are also subject to external audit and inspection.
Have your say on council tax	6 Your say on Council Tax	Ask those in government where to get the money as that's their job and why they get paid the big wages. Put cuts on those at the top !	4. The council is already doing this.	The council regularly emphasises to the Scottish Government the need for a fair settlement for local government as well as working with COSLA (the body that collectively represents local government in Scotland) to emphasise this point.
Have your say on council tax	6 Your say on Council Tax	Consideration should also be given to additional support from central government being pursued. The council provides essential services for inhabitants, often under centrally designated legal requirements. As such general taxation should be utilised to ensure safe and adequate provision of said services.	4. The council is already doing this.	The council regularly emphasises to the Scottish Government the need for a fair settlement for local government as well as working with COSLA (the body that collectively represents local government in Scotland) to emphasise this point.
Have your say on council tax	6 Your say on Council Tax	People are bored of hearing everything is increasing in price. We have all tightened our belts. Maybe you should sell some of those shiny red pool cars you have in Livingston as there appear to be about 30 of them.	4. The council is already doing this.	The council is currently investigating how to consolidate green fleet, having already made reductions, reflecting service requirements.
Have your say on council tax	6 Your say on Council Tax	Enforce your fines for parking, dog mess and littering. You're assuming a 3.5% increase in line with every other business that randomly tries it's luck to put up it's prices up saying the same every year.	4. The council is already doing this.	The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity.
Have your say on council tax	6 Your say on Council Tax	We must see the money is spent on the right things if an increase was to; Happen how would council show where this extra money is being spent this is my concern.	4. The council is already doing this.	Full details of how the council allocates its resources to individual services is provided in the annual activity budget which is available on the council's website. A summary of key areas of spend are included in the council tax leaflet which is provided along with bills. The council continually reviews service provision using our Best Value Framework to ensure that we deliver value for the public and continue to achieve the expected levels of performance. There are rigorous internal scrutiny arrangements in place to assure the quality of our services and we are also subject to external audit and inspection.
Have your say on council tax	6 Your say on Council Tax	As I said earlier, WLC should take action to force the Scottish Government to increase funding. To increase Council Tax is to subsidise SG's budget.	4. The council is already doing this.	The council regularly emphasises to the Scottish Government the need for a fair settlement for local government as well as working with COSLA (the body that collectively represents local government in Scotland) to emphasise this point.
Have your say on council tax	6 Your say on Council Tax	Higher council tax for less facilities. There are far too many people not paying in to the system making the deficit worse. Rather than constantly increasing the payments of those who consistently pay while reducing the service they receive you really need to go after those who don't pay for the service they receive. Also I'd immediately sack whoever created this awful survey, save yourself their wage, they don't deserve it!	4. The council is already doing this.	The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity.
Have your say on council tax	6 Your say on Council Tax	It would also help if some of the rationale for changes were better explained. We have recently had a new green bin introduced for all things plastic. I now have 4 bins, I don't really understand the need for the split between green and blue bins. I assume there is a reason, and probably some ultimate cost benefit, but this is never explained, neither is explanation offered to try to get better buy in to proposals from people who are interested to understand the pros / cons of these decisions that impact our daily lives.	4. The council is already doing this.	There was extensive information provided on the change, why it was happening and the benefits. This was available on social media, council website, inside council buildings and in the paperwork provided along with the new bins.
Have your say on council tax	6 Your say on Council Tax	It would also help if some of the rationale for changes were better explained. We have recently had a new green bin introduced for all things plastic. I now have 4 bins, I don't really understand the need for the split between green and blue bins. I assume there is a reason, and probably some ultimate cost benefit, but this is never explained, neither is explanation offered to try to get better buy in to proposals from people who are interested to understand the pros / cons of these decisions that impact our daily lives.	4. The council is already doing this.	There was extensive information provided on the change, why it was happening and the benefits. This was available on social media, council website, inside council buildings and in the paperwork provided along with the new bins.
Have your say on council tax	6 Your say on Council Tax	If council tax increases, collection will be more challenging, particularly with the cost of living crisis. This should be factored in when looking at resources.	4. The council is already doing this.	The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity.
Have your say on council tax	6 Your say on Council Tax	CT arrears need to be addressed and process needs to be more robust	4. The council is already doing this.	The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	We should be ensuring the rise in council tax is matched by increases in pay for our workers otherwise we risk sending more families into fuel and food poverty. We must also ensure that inflation coupled with a rise in council tax each year does not have a massive impact on our most vulnerable.	4. The council is already doing this.	The pay award for 2022/23 was agreed at a level higher than the increase in council tax. Although the pay award has yet to be agreed for 2023/24, it is envisaged that public sector wages will increase next year. A percentage increase in council tax, in monetary terms for most people, is considerably less than a percentage increase in salaries. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.
Have your say on council tax	6 Your say on Council Tax	However, pressure must also be brought to bear on the Scottish Government to adequately fund local councils. Where necessary, the Scottish Government should be pressuring the UK Government for adequate funding. Public spending cutbacks shouldn't always be the default position!	4. The council is already doing this.	The council regularly emphasises to the Scottish Government the need for a fair settlement for local government as well as working with COSLA (the body that collectively represents local government in Scotland) to emphasise this point. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	Cut energy bills of council services, including street lighting etc and reduce the cost of non essential or nice to have services	4. The council is already doing this.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	Cut council administration costs. ;	4. The council is already doing this.	The council continually reviews service provision using our Best Value Framework to ensure that we deliver value for the public and continue to achieve the expected levels of performance. There are rigorous internal scrutiny arrangements in place to assure the quality of our services and we are also subject to external audit and inspection. The council will investigate ways to consolidate and better coordinate activities to allow streamlining of operations and removal of duplication. This will help ensure that activities are completed and managed in the most effective way.
Have your say on council tax	6 Your say on Council Tax	Encourage more investment in our communities from private companies. And put pressure on them to invest in our infrastructure (like roads and things to do). That will increase the value of our homes and communities and encourage more wealth to come to West Lothian.	4. The council is already doing this.	The council collects developer contributions for legally agreed investment required as a result of development. Developer contributions are subject to legal agreement and are for specific items such as infrastructure.
Have your say on council tax	6 Your say on Council Tax	The council is having to increase council tax for years worth of freezes and insufficient funding from the Scottish government, this needs to be called out more publicly as the general public see it as a council failing. Yes it is at a time when households are under the most financial pressures but it should have been raised years ago this is the result of freezes and reductions in government spending. The Scottish Government should do a review of all public spending and ensure statutory services are appropriately funded everything else is extra and should be chargeable. ; ;	4. The council is already doing this.	For many years the council tax freeze was a requirement of funding from the Scottish Government. The council regularly emphasises to the Scottish Government the need for a fair settlement for local government as well as working with COSLA (the body that collectively represents local government in Scotland) to emphasise this point.
Have your say on council tax	6 Your say on Council Tax	An increase of 3.5 % each year for the next 3 years will undoubtedly create severe financial hardship for a large number of low/ middle income families in West Lothian and to suggest even more than this is unconscionable. To suggest putting people into financial difficulties whilst withdrawing/ cutting back services and amenities which are essential is totally unacceptable.; The Scottish Government who have been given funding by Westminster government should be pressured by the regional councils to pass this on .	4. The council is already doing this.	The council regularly emphasises to the Scottish Government the need for a fair settlement for local government as well as working with COSLA (the body that collectively represents local government in Scotland) to emphasise this point. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	Put up the council property rent. And bankrupt the numpties who aren't paying their rent or council tax. Taxpayers are subsidising these people not sustaining themselves for long enough. Action should be commenced as soon as a payment is missed. If they do t propose action to correct it and then follow through on this then they should be evicted.	4. The council is already doing this.	The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity. The council has a wide and varied commercial property portfolio where properties are let to small and medium businesses on flexible and competitive terms. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on businesses. It is anticipated that even with changes the council's rents will still be competitive compared to other landlords.
Have your say on council tax	6 Your say on Council Tax	More efforts should be made to recovery council tax from non-payers as the amount this would generate would be a greater number	4. The council is already doing this.	The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity.
Have your say on council tax	6 Your say on Council Tax	Incomes have in most cases not increased to support an increase of 3.5% in the Council Tax rates for next year. Focus also has to be put on the collection of the council tax for those who are not meeting their annual charge. Those in banding E upwards did not benefit for any additional government support in the recent changes.	4. The council is already doing this.	The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity. A percentage increase in council tax, in monetary terms for most people, is considerably less than a percentage increase in salaries. In 2022/23 the Scottish Government provided funding which councils had to use to reduce bills for those in Band D and below. This was funded and required by the Scottish Government for one year only.
Have your say on council tax	6 Your say on Council Tax	How about spending more time on trying to collect the council tax that isn't paid? Early intervention desperately needed to ensure that support is offered to clients at an earlier stage. I'm sure the council would be happier to see more payment plans in place rather than debts being written off via bankruptcy.	4. The council is already doing this.	The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Get rid of silly management structures and trim the fat on your pension pots before robbing me of yet more hard earned cash. It's a lottery if you will even empty the bins, yet you want more cash!	4. The council is already doing this.	The council has one of the leanest management structures of any council in Scotland. The council has delivered substantial management savings to date but continues to investigate savings and efficiencies in management structures.
Have your say on council tax	6 Your say on Council Tax	I think there needs to be clearer knowledge about where council tax is spent, almost like an itemised bill so we can see where our money is going because sometimes I feel like I pay council tax for sewage/water and bins and nothing else it would be good to see what it actually pays for. Unfortunately I don't think many people will agree with any sort of increase in council tax especially when the cost of living crisis is happening right now.	4. The council is already doing this.	Full details of how the council allocates its resources to individual services is provided in the annual activity budget which is available on the council's website. A summary of key areas of spend are included in the council tax leaflet which is provided along with bills. Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	I think the council should also be looking to collect council tax arrears from residents of WL before they reach balances that customers cannot repay and look at Bankruptcy as there only option; ;	4. The council is already doing this.	The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity.
Have your say on council tax	6 Your say on Council Tax	Don't agree with key priorities - they should be climate change, carbon reduction and capture, environmental etc. There is a need to change how we do things. Investing in peoples environment and giving opportunities for green travel, good local services in order to allow those people who can to better help themselves.	4. The council is already doing this.	One of the council's priorities is the environment and climate change. The council's Climate Change Strategy outlines actions in the council's journey to net zero. The council has made good progress in delivering carbon reductions and is ahead of target. The council will continue to investment in the environment within the parameters of available funding where demonstratable savings and improvements to the environment are evident.
Have your say on council tax	6 Your say on Council Tax	WLC needs to get tough on non-payers of both rent and CT where it is established that the person has not exhausted every avenue to get help and support with costs. ;	4. The council is already doing this.	The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity.
Have your say on council tax	6 Your say on Council Tax	I would be interested to see the additional revenue expected in actual terms if council tax rises by different amounts eg. 3.5% versus 4% or 4.5% for example	4. The council is already doing this.	Information on different scenarios is provided in the annual council tax scenario report to Corporate Policy & Resources PDSP. Reports are available online.
Have your say on council tax	6 Your say on Council Tax	Arrears should be chased up	4. The council is already doing this.	The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity.
Have your say on council tax	6 Your say on Council Tax	I am happy to pay my council tax and have done since its inception - I have neighbours who refuse to pay, or who do pay and then apply for a refund? How does that work?; Also the same neighbours who don't / won't pay receive exactly the same services as I do. Not fair.	4. The council is already doing this.	The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity. The council robustly investigates and pursues all cases of fraud. Discounts for council tax bills are determined by national legislation set by the Scottish Government.
Have your say on council tax	6 Your say on Council Tax	There is a lot of pressure on families and elderly due to cost of living and fuel prices increase, Child poverty has a huge impact on physical and mental health. We have tp make sure that they receive all benefits they entitle to	4. The council is already doing this.	The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold. At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.
Have your say on council tax	6 Your say on Council Tax	Hahaha. You propose a massive decrease in services and we will have to pay for the privilege? Start being more savvy with funding.	4. The council is already doing this.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs. The budget gap faced by the council is a result of funding being insufficient to cover the increasing cost of delivering services due to factors such as population growth and indexation. The council is subject to rigorous external audit and both Audit Scotland and EY have confirmed, over a number of years, that the council has robust financial management.
Have your say on council tax	6 Your say on Council Tax	It's not relevant that some people pay no or reduced council tax to the discussion about increasing council tax for those who do. For those eligible to pay council tax can you make second homes pay more council tax regardless of whether occupied or not and ask specific communities to respond together to give a consensus on which services might be reduced or redesigned for best fit. The latter may give you a better idea of what each group can live with in terms of services rather than each individual which can give you scattergun feedback which can be disorientating.	4. The council is already doing this.	The council maximises its position in relation to council tax within the legal parameters of legislation. The council requires payment of council tax for second homes to help encourage bring homes into use due to the ongoing shortage of houses.
Have your say on council tax	6 Your say on Council Tax	Reduce unnecessary, politically motivated services - for example Gaelic - that are not the Council's core statutory reponsibility, and cut taxes.	4. The council is already doing this.	As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities. The council's spend in relation to Gaelic is considerably low.
Have your say on council tax	6 Your say on Council Tax	Perhaps an external audit would find more ways to reduce the expenditure. If you make redundancies that means more people on the dole more children needing free meals more help with rents ect ect	4. The council is already doing this.	Thank you for your response. Your comment has been noted. The budget gap faced by the council is a result of funding being insufficient to cover the increasing cost of delivering services due to factors such as population growth and indexation. The council is subject to rigorous external audit and both Audit Scotland and EY have confirmed, over a number of years, that the council has robust financial management.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	If we really value the opinion of the public and of council staff, we should be far clearer about the impact upon services and what it will mean for daily delivery of services to the public.	4. The council is already doing this.	This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Have your say on council tax	6 Your say on Council Tax	Check people who are claiming the once person discount - there are people abusing this.; ; Most people would prefer to pay a bit more council tax to ensure we get good social care etc.; ; It is better to slightly increase council tax rather than change for things like bin.	4. The council is already doing this.	The council robustly investigates and pursues all cases of fraud. The council has a counter fraud team and engages in national fraud exercises with partners.
Have your say on council tax	6 Your say on Council Tax	Raise the necessary funds from the house builders and buyers of new build homes that are putting the increased pressures on council services.	4. The council is already doing this.	The council collects developer contributions for legally agreed investment required as a result of development. Developer contributions are subject to legal agreement and are for specific items such as infrastructure.
Have your say on council tax	6 Your say on Council Tax	Please listen to local people. We Don't have money or choices if council services are cut or taken away.	4. The council is already doing this.	This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Have your say on council tax	6 Your say on Council Tax	I think the council has already decided what THEY want to do. Please listen to people using the services.	4. The council is already doing this.	This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further. Increasing expenditure or not delivering savings would result in additional cuts to services as the council has to have a balanced budget by law.
Have your say on council tax	6 Your say on Council Tax	No as already stated, people are already struggling and this could tip them over into debt. I really do think that the Council needs to look at the management layers again, there still seems to be too many senior managers. The creation of the IJB has also created higher management posts that quite frankly, should not be happening when the NHS need to spend on actue services and the Council need to prioritize working on strengths based approaches and reducing the need/reliance on social care delivery. This is where the interconnectivity of the council should play its part, more community supports, closer working with GP practices etc., which has not been achieved through the IJB so far!	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Legislation enacted by the Scottish Government requires Integration Joint Boards to deliver health and social care services to adults. Councils and Health Boards are mandated to deliver these services through IJBs. This area is subject to ongoing change as the Scottish Government looks at delivering a national care service.
Have your say on council tax	6 Your say on Council Tax	With the cost of living crisis i think council tax should be scrapped untill the economy resets	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Reducing council tax would result in additional cuts to services as the council has to have a balanced budget by law.
Have your say on council tax	6 Your say on Council Tax	I think council tax should be used on improved housing repairs. Road gritting etc and environment	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Council tax income can only be used to support general services, it cannot be spent on housing. Housing rents fund council house repairs.
Have your say on council tax	6 Your say on Council Tax	4: Sell off council land,	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Receipts from sale of land can only be invested in assets and cannot be used for revenue service delivery.
Have your say on council tax	6 Your say on Council Tax	People struggling to pay as it is. The council have been wasteful (bins/paths etc) and need to come up with other ways to rectify their errors. ; 1:Sell off council buildings,	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Receipts from sale of land can only be invested in assets and cannot be used for revenue service delivery.
Have your say on council tax	6 Your say on Council Tax	Reduce your salary costs. Stop all kids from free school meals. Most don't need this. Parents not taxpayers should be catering for their children. Up the rent it is far too cheap on council properties and start collecting all your ct debts	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The council must deliver school meals in line with Scottish Government requirements which is currently universal free provision until P5. The scope for charging will be considered, taking account current charges, the position in other local authorities and the impact of charges on vulnerable people and the availability of concessions. The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity.
Have your say on council tax	6 Your say on Council Tax	In theory, this is acceptable and I would be willing to do this to see services improved and not just maintained. In reality, I pay factoring fees for my house so dont use council services here. I can't get a doctors appointment; have difficulties getting the additional support help my child needs at school; have little /no primary school community groups suitable for my children; have to cue in the morning to leave my home due to the high school traffic and there is talk of adding additional charges for gardening waste. As well as this, the general increase in the cost of living and now added threat of job loses to consider. I am concerned at this time where this additional money would come from and what difference this would make?	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	Considering the bins are emptied monthly, there is no facility for glass collection and many homeowners take their bins to a recycling centre when the refuse collectors refuse to uplift would suggest you need to focus on service before price.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	I think we shouldn't pay council tax cause you do nothing good with it	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Reducing council tax would result in additional cuts to services as the council has to have a balanced budget by law. Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	I agree with an increase in the bands A-D	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	I would support a higher increase for higher bands.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	Provide value for money using internal resources	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure. The council must consider both internal and external provision to ensure best value. In some circumstances it may be better value to deliver through external provision.
Have your say on council tax	6 Your say on Council Tax	Council tax on lower bands (A-C) should be frozen. Council tax on higher bands should be increased, with greater %age increases for higher bands. It is only fair that those with the most wealth should contribute the most.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	Current service offering does not warrant to the cost. Cost should be based on services used by households.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities. Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	No I do not support an increase of more than 3.5% if funding raised above this was spent on key identified priorities - schools and social care.; ; Based on 2022/23 revenue budget: £70.5 m primary school £60.5 mill on secondary schools - = £131 million.; £29.2 mill social work services £4.2 mill Homelessness services + community safety = £33.4 million.; ; What not encourage overpayment of council tax e.g., pay 3/4/6/ months upfront an get a 1%, 2% discount.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Discounts for council tax bills are determined by national legislation set by the Scottish Government. The council could not implement such a discount.
Have your say on council tax	6 Your say on Council Tax	West Lothian has the highest council tax payers in Scotland. More houses/flats being built daily. you want people to pay more?	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	West Lothian Council's council tax is currently less than the Scottish average. Thank you for your response. Your comment has been noted. The budget gap faced by the council is a result of funding being insufficient to cover the increasing cost of delivering services due to factors such as population growth and indexation.
Have your say on council tax	6 Your say on Council Tax	Due to the current climate the council tax as a minimum should stay as it is, if it is possible to reduce it this should be done.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Reducing council tax would result in additional cuts to services as the council has to have a balanced budget by law.
Have your say on council tax	6 Your say on Council Tax	A small increase would not be a disaster but only if cuts weren't made. The public feel it is essential services being cut constantly whilst management continue to line their pockets.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	We would accept a council tax increase - however we would also expect that our service are maintained and some that more recently have been abandoned (grass cutting, planting, litter picking) be reintroduced. West Lothian - from any approach road looks grubby, tired and unwelcoming.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	If the top level staff took a pay cut this would help bridge some of the gap. How can some members of the public pay this year on Year increase with the current state of the financial projections. People are currently struggling buy food and heat homes.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards, the way remaining services are delivered and a reduced workforce. It is proposed that future spending will be aligned to agreed priorities. The focus will be on posts that support the priorities rather than whether they are front line or back office based.
Have your say on council tax	6 Your say on Council Tax	A lot of savings were highlighted. Reducing council tax and giving back to the people would be helpful in a time of high inflation- people cant afford heating and eating right now.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Reducing council tax would result in additional cuts to services as the council has to have a balanced budget by law.
Have your say on council tax	6 Your say on Council Tax	5:do not waste extra funding of digital services,	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The council acknowledges that our customers expect access to council information 24 hours a day, seven days a week. To enable this, the council will continue to look at ways to improve the website both as a tool to provide information on services, but also as a tool for customers to engage with the council, e.g. making payments online.
Have your say on council tax	6 Your say on Council Tax	I would introduce council ran paid parking in central urban areas such as Livingston The Centre and football stadium, and Linlithgow town centre with incentives on green/public transport travel.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The council previously ruled out a decriminalised parking enforcement scheme. Without such a scheme the council could not introduce parking charges and fines.
Have your say on council tax	6 Your say on Council Tax	The more council tax is increased the less the council actually does.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	If wages to increase for many a 3.5% increase will be a concern for many. Review the free transport and prioritise social care over schools.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The council pay award for 2022/23 was agreed at a level higher than the increase in council tax. Although the pay award has yet to be agreed for 2023/24, it is envisaged that public sector wages will increase next year. A percentage increase in council tax, in monetary terms for most people, is considerably less than a percentage increase in salaries.
Have your say on council tax	6 Your say on Council Tax	Council tax is huge already...not sure what this pays for, bin emptying, but you are advising that we will be paying extra for some of these, roads..are in a terrible state. What else? Street lighting..maybe turn this off from 12/1am till 6 this would save a lot of money.	5d. It is proposed that this suggestion is not taken forward because it has been previously considered and will not be progressed.	Council tax in West Lothian is less than the Scottish average. The council has previously investigated changes to street lighting but it would not deliver any material savings and the cost to implement new technology would outweigh the savings possible.
Have your say on council tax	6 Your say on Council Tax	The visible waste / excess administrators / inefficient practices waste so much money justifying increases is impossible. Watching council road workers sitting in vans for hours drinking coffee while no work being carried out is very frustrating for council tax payers. Observing the short working days relative to the non-council workers and inefficient processes plus the volume of services and monies directed to undeserving residents needs fixing before fleecing hard working people of more money. Try looking at for example setting council rents based on household incomes not at a standard rate. Yes subsidise those that need it but where households have steady income (often at a high level) their rents should be closer to market rates. This would also perhaps encourage Tennant's who could afford the market rates to move to the private sector allowing needy people currently supported in expensive B&b accommodation to be able to be housed in council stock. Currently you bus pupils from Winchburgh to Linlithgow and Livingston passing the newly built schools which have to be open, heated and maintained for one years pupils only. This is a vast unnecessary expense which will continue for years.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Expenditure on council housing is funded by rent from tenants and in some cases additional funds are provided by the Scottish Government. The funds raised from Council Tax are separate and this is not used to fund council housing. The council's aim is, and always will be, to ensure that West Lothian continues to be a great place to live, work, visit and do business. To achieve this aim we will continue to prioritise the money that we spend on services to make sure that our investment has the biggest and most positive impact on the community. As validated by external auditors and other inspection bodies, West Lothian Council continues to perform well against key performance indicators and activities. This will continue to be monitored and reviewed.
Have your say on council tax	6 Your say on Council Tax	its very tough due to the cost of living crisis. And there would i feel need to be a fully justified and laid out plan for all wl residents to see where exactly this money would be spent in the areas of social care, education etc for any additional increase to be viable.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The annual budget report has information on each service budget, along with detailed information in service activity budgets. All services will be reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned agreed priorities.
Have your say on council tax	6 Your say on Council Tax	I already pay a significant amount for council tax and don't use education or social care, therefore as a net contributor I would be unhappy about a large increase. Brown bins and libraries are the only service I use regularly and the libraries are very poor.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	The council should stop using sub-contractors to carry out work that its own work force is more than capable of doing. Electricians for example are sub contracted to put in flood lighting to a school. The electricians who are employed with the council are able to do jobs like that as part of their role. I have never understood why the council does this.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure. Due to recruitment issues, by necessity, the council has to use subcontractors in some circumstances to meet statutory requirements.
Have your say on council tax	6 Your say on Council Tax	Again metrics in trial data must show this approach works first	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Not a good time to go so high maybe incremental rises. The public won't mind so much if we see a more modern slicker outfit	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.
Have your say on council tax	6 Your say on Council Tax	This is a difficult one to answer when my income is not increasing by this percentage. Money needs to be spent wisely and social care is a priority to stop hospital beds being blocked by people waiting for social care	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	Stop giving new doors and windows to homes for free. Encourage more investment in our town. More nightlife and sports / hobbies for young people (who aren't classed as vulnerable people). This can be taxed;	6. The respondent suggested an improvement. Officers will consider how this could be developed.	This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Have your say on council tax	6 Your say on Council Tax	I would agree on this if there wanst so many council trades men and women sleeping in vans on the streets for a good hour a day. You need to streamline how these people work more multi skilled operatives to get simple multi trade jobs done in one visit. Reduce costs across the board.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	Oncraa8ng the council tax by more than 3.5% would helpmthe key areas but very few households could afford it in the current financial environment. Even middle income households are having issues will spending, Not just low income households. There is a limited amount of monies to go around currently. Maybe when things improve?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Very difficult decision to be made, due to economic situation, working families who do not receive a deduction are struggling but agree that some increase is necessary, could this figure be staggered to reduce impact, i.e. 2% increase then 3 % following year, yes this will create gap, but as previous question, developers should be contributing something to communities as significant profits being made, should have occurred for many years and this could help to offset some of the deficit not all.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The council collects developer contributions for legally agreed investment required as a result of development. Developer contributions are subject to legal agreement and are for specific items such as infrastructure. Developer contributions cannot be used to balance the council's revenue budget.
Have your say on council tax	6 Your say on Council Tax	raise car parking prices	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council regularly reviews its charging and concessions policy and this can be considered as part of the next review.
Have your say on council tax	6 Your say on Council Tax	Can the savings be found from reduced energy costs	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has energy audits across all buildings to identify energy saving opportunities in each building. The council will explore opportunities for reducing the energy bill through the use of renewable energy solutions. The council currently uses Biomass and solar PV panels to generate energy in some council buildings. Other Renewables will be looked at for incorporation where economically viable.
Have your say on council tax	6 Your say on Council Tax	You're also very fond of trying to line the pockets of shoddy private debt-collectors (cronyism) and openly ABUSE the summary warrant system! - It's entirely disingenuous of West Lothian Council to claim it 'protects' low income households! - Nothing could be further from the truth!	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	The council follows the statutory process and does not abuse the summary warrant system. The council is always keen to agree payment plans with individuals and anyone who is struggling should contact the council on that basis.
Have your say on council tax	6 Your say on Council Tax	YOU CLAIM... "Although council tax is applied to all houses, not all households are eligible to pay council tax. Various council tax reductions, exemptions and discounts are available to reduce the tax burden for the most vulnerable in society and to protect low income households. "The schemes might exist - but they're NOT fairly applied! - The council has been charging me 100% council tax for YEARS, collecting it AGGRESSIVELY - despite the fact our household income is under £10K and we are on full tax credits! Theoretically we should get a rebate - but you people NEVER process the information!	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	The council has good performance in relation to processing benefit applications. The Advice Shop is available for any individual or family for advice and benefit checks. Please contact the Advice Shop to check your entitlements.
Have your say on council tax	6 Your say on Council Tax	If WLC could be trusted to spend this increase where they say they will then yes I'd support it but all that will happen is you will give the fat cats a pay rise or waste it on more stupid things like talking bins! Get rid of the talking bins! What a laughing stock they make of West Lothian	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Pay for council employees at all levels is determined nationally. The new bins compact waste allowing savings to be delivered in employee time emptying bins less often. This has delivered a saving for the council, demonstrating efficiencies in service delivery.
Have your say on council tax	6 Your say on Council Tax	I support tax that pays for services that are needed. But in the UK we are generally reluctant to pay tax because we don't see the benefits. But now, and in the past, we face paying more council tax for less services from the council. What other options do we have?; Perhaps, given the stench of marijuana that emanates from much of West Lothian, you could look into harvesting and selling it to generate profits? Let's face it, its current illegal status is hardly preventing anyone from buying it, so why not legalise and benefit from it.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	This is an illegal activity.
Have your say on council tax	6 Your say on Council Tax	This would be big increase	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	It would be good to see money saved where services are less required such as free school meals to all. Staff hours spent on unnecessary paperwork and meetings. Then it would be easier to agree and support a 3.5% increase.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	The council must provide these services at no cost as required by the Scottish Government. The council will investigate ways to consolidate and better coordinate activities to allow streamlining of operations and removal of duplication. This will help ensure that activities are completed and managed in the most effective way. The Scottish Government requires universal free school meals up to P5 and delivers prescriptions at no charge. The council has no ability to implement these changes to school meals.
Have your say on council tax	6 Your say on Council Tax	I have paid my council tax in full for this year until march 2023 but at age 60 due to compulsory redundancy i have had to cancel my direct debit as I do not know what wage I will receive month to month this is a sorry tale of woe I know too young to retire but too old to get a half decent new job... I am now working full time for minimum wage of £9.50 ph but when push comes to shove then anarchy gets a real possibility yes\no? By the way I claim no state benefits of any kind .. wish I did then I might not have to do this survey	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.
Have your say on council tax	6 Your say on Council Tax	This is fake news	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your response. Your comment has been noted. The budget gap faced by the council is a result of funding being insufficient to cover the increasing cost of delivering services due to factors such as population growth and indexation.
Have your say on council tax	6 Your say on Council Tax	Why does everything have to go up in percentages, the people who are on higher bands and rent are always going to be paing more then the people on lower bands. Why is it not just an increase of say £5/£10 for everybody so its fair.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax reform, including how increases to council tax are applied, can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	How much is being cut from Executive salaries and councillors expenses?	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council regularly reviews the organisational structure and operations for efficiency and effectiveness. There are statutory functions that the council must, by law, have in place. However, where there are opportunities to streamline business processes and reduce inefficiencies, the council will act appropriately to ensure that we are operating as efficiently as possible and delivering value for money.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	People on benefits should be making more contributions. It is the working people that are suffering at present.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Benefits are determined by Scottish and UK Governments.
Have your say on council tax	6 Your say on Council Tax	A 3.5% increase for every band including A to D would be acceptable, but not a disproportionate increase penalising those in upper bands above D. Everyone or nothing to keep it fair to all.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The current council tax legislation means that any proposed percentage increase needs to be applied across all bands. Council tax reform, including how increases to council tax are applied, can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	If you are going to increase the price in council tax and everything else then the government needs to up the wages to suit the cost of living. Families and elderly are being put under so much pressure and strain, not being able to eat or heat their home!! Wrong decision!	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The UK and Scottish Government make decisions regarding public sector budgets. The council's funding from the Scottish Government is set to be frozen. The council has no control over other organisations and businesses wages.
Have your say on council tax	6 Your say on Council Tax	Those of us with low incomes but living in high band houses would really struggle with high council tax rises on top of mortgage rises and power bills. I realise that it is not in your direct control, but surely it would be fairer for the Scottish government to raise income tax and use the money to support council spending	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Decisions regarding income tax are reserved to the Scottish Government who then make decisions on where additional funds should be invested (e.g. NHS, Police, local authorities).
Have your say on council tax	6 Your say on Council Tax	in light of cost-of-living impacts where all service providers and not just the council are increasing prices, it appears the cost of funding these means those in low incomes are likely to be hit the hardest. Could you not apply proportionate increases depending on the band with greater percentage on high bands who are more likely to afford the increases.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The current council tax legislation means that any proposed percentage increase needs to be applied across all bands. Council tax reform, including how increases to council tax are applied, can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	As for Blackburn Mill Centre this is in a very bad state an eyesore and does nothing for the identity of the people of Blackburn shocking that this can not be improved on. I believe council should step in and work with private landlord. It's dangerous to all entering it. Smashed glass trip hazards on floor dark lights out and very outdated decor. Sad times.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Although building is owned and operated by a private landlord, it is understood that there are plans to redevelop the centre. The council does not have the resources to take ownership of the building.
Have your say on council tax	6 Your say on Council Tax	The disconnect between property values and the council tax charges are obscene. Especially given the current situation those with valuable assets should absolutely be paying more	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	Many of the supposed most vulnerable get help left right and center. While many of the middle income bracket struggle to make ends meet but don't qualify for help because they work. Many do the vulnerable should pay their way I bit more instead of being a burden.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Benefits are determined by Scottish and UK Governments.
Have your say on council tax	6 Your say on Council Tax	Stop wasting money on other things and allowing parents to demand what happens in early education and the hours	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Expansion of early learning and education hours was a national commitment from the Scottish Government.
Have your say on council tax	6 Your say on Council Tax	Maybe if money wasn't being spent on pointless stuff that doesn't get used like 20 mph speed limits and widen paths during COVID what an absolute waste of money to then removed them all again. Stop spending money on unnecessary stuff wouldn't be in this mess	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Spaces for People was a Scottish Government initiative, fully funded by them. No council tax was used to fund these works. Council tax is used to support core council services.
Have your say on council tax	6 Your say on Council Tax	Higher band housing is not taxed sufficiently highly. Redistribute the increases, taxing those in the highest largest houses a greater percentage. I'm fortunate to live in such a higher band house, paying surprisingly low council tax. There would appear to be a greater number of higher band houses being built in WL in recent years, so such a relevelled increase would surely generate a greater net increase without hitting those in lower bands with the 3.5% proposed.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	Large properties with high value should bear the brunt of CT increases. Not 'normal sized' housing for families and couples	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	I think the Council need to look at the people who are receiving benefit and ensure they have to pay a portion of this as the large majority of the people claiming benefit should be out working	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Benefits are determined by Scottish and UK Governments.
Have your say on council tax	6 Your say on Council Tax	Pressure Scottish government to create higher bands like in wales	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	I am in a high band at paying over £200 a month, i fee the gap between myself and the lower bands is so big. I work 50 hours a week, my husband works 60 hours and we just get by. We live in what is considered a deprived area?! I feel the gap should be looked at and the also an assessment of the houses within these bands because it seems dated. This may generate more income.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	The amount of increase shouldn't be viewed as a % the higher the band the more increase. A fair increased amount per cap would be fair to allow the increase to be felt by everyone given	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	Depends how much more - 4%, 14% or 44% are all more than 3.5%! Only fair if all bands are raised by same amount. People who have more than one property, should be charged the FULL amount for each property with no discounts. If they can own 2 or more properties, they can pay the council tax for them! In fact charge them double and they might sell up to people who really need the houses.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council currently maximises income within the legal parameters of the council tax legislation. The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	Council tax for me is shocking. ; People with kids, bigger houses, multiple cars, multiple houses should pay more. They use more area, kore services than others. ; ; Shouldn't just be about property, but number in property	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The current council tax legislation means that any proposed percentage increase needs to be applied across all bands. Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	We all revive the same benefits, we should all pay the same tax !	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	Feel council tax is unfair system, The more you earn or try and get on in life your penalized and get the same services if you ae in band A . B,C,D,E,F (or if you don't work you get it free)	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	People have no money to pay more in council tax as they are taxed more already in Scotland than in England - suggest the higher taxes in Scotland can fiver thus cost.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The Scottish Government determines where to allocate additional resources generated from income tax. To date the focus for this investment has largely been health.
Have your say on council tax	6 Your say on Council Tax	No. With the cost of living rising in all other areas the community can't take this at this time.; ; I would means test the benefit systems better as there are people abusing this costing a significant amount.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Benefits are determined by Scottish and UK Governments.
Have your say on council tax	6 Your say on Council Tax	The answer to this lies with our Government and Politicians and far beyond a question for staff and customers to answer.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	Council tax bands A-C should not have an increase. Those of us that are working full time and get no financial help are already struggling. Schools and social care are important but my priority is to support my family first. I can't afford to do any more.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	Council tax bands should be revised	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	As a family of 5 who struggled to find a house we could both fit into and afford (we are stretched to the max) it irritates me to see older properties at a higher, often much higher price point in a lower council band. How about properly looking at what bands houses fall into. Our 4 bed in Armadale (we couldn't afford Livingston or Broxburn) is in band F based on 1990's pricing- I don't think so. We've kids with disabilities and need a certain amount of space. I'm sure there's plenty of properties artificially low in the banding. If that was to be rectified I imagine it would create a lot of revenue.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	Can council tax bands suffer different increases? A-D 3.5%, E-F, 5%, G 10%..?	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	Free services in school, should be reconsidered. I already pay for milk. Why don't you consider a small fee for transport and meals? Not for everyone but at least for the more wealthy families.	8. This suggestion is out with the responsibility of West Lothian Council. The Scottish Government requires universal free school meals up to P5 and delivers the concessionary travel scheme for children.
Have your say on council tax	6 Your say on Council Tax	First of all the government should not allow money from the benefits to be used for buying tobacco and alcohol.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Benefits are determined by Scottish and UK Governments.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Households in band A to D should be paying the same percentage as people in Bands E and F. Households on small incomes can apply for council tax benefit. A few years ago people in Band A to D didn't have to pay any increase in Council tax which isn't right as they are using the services like anyone else and households in Band E and F had to pay the increase. Obviously this was due to the SNP .I would support it if everyone in all the bands are paying the same percentage increase. Some young families are staying in Band E and F houses and it doesn't mean that they have more money than people in A to D bands. Some young families struggling with having to buy their homes and probably on a tight budget	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The current council tax legislation means that any proposed percentage increase needs to be applied across all bands. In 2022/23 the Scottish Government provided funding which councils had to use to reduce bills for those in Band D and below.
Have your say on council tax	6 Your say on Council Tax	I suggest re assessing houses which have had huge extensions and are paying much lower council tax rates. ;	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	A review of council tax banding when an extension has been added would be appropriate or review of banding every 10 years to align all properties in the county to the same band rate.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	Is it possible to taper the council tax bands to reflect property values, i.e. less than 3.5% per annum rises for lower property bands, and more than 3.5% for higher value properties, thereby shielding the less wealthy from these rises, which will be, in effected, compounded rises above 3.5% each year?	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	No comment section for health and social care. I wonder why? Over 65 with learning disabilities and non verbal any services restbite etc available in west lothian answer not for the last two years at least. Lawyers are minutes from your door	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Adult social care budget saving options are not covered within the council's consultation. West Lothian Integration Joint Board is responsible for planning and budget decisions around health and adult social care functions in West Lothian and there is a separate West Lothian IJB consultation on health and social care functions that can be accessed via the council's consultation. There are comments sections available in the West Lothian IJB consultation.
Have your say on council tax	6 Your say on Council Tax	Council tax charges for higher bands are currently at a level where monthly charges are nearly a mini mortgage. If this keeps increasing sling with other increases people who currently pay will find it harder to continue doing do. The way it is paid on value of property assumes you are financially able to pay more seems unfair	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.
Have your say on council tax	6 Your say on Council Tax	scrap it not fit for purpose	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	Suggest those with exemptions are looked at to help bridge the gap. Generally students work and could pay some perhaps reduced costs. Long term benefits should also have to pay a percentage.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Discounts and exemptions for council tax bills are determined by national legislation set by the Scottish Government.
Have your say on council tax	6 Your say on Council Tax	Feel I am; Already penalised as I pay more for same size house as other s and re I've less services due to factor as well. Should upscale houses to similar band as like for new to allow for fairer costs across all properties	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. The current council tax legislation means that any proposed percentage increase needs to be applied
Have your say on council tax	6 Your say on Council Tax	I know it wasn't the council's making but we are effectively paying for the years where Council Tax never went up to keep pace with rising costs?	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	For many years the council tax freeze was a requirement of funding from the Scottish Government.
Have your say on council tax	6 Your say on Council Tax	Who knows by how much your main source of funding will be raised by? And what outcomes will arise between UK & Scottish Govt approaches?	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Initial information from the Scottish Government is a funding freeze despite increasing costs. This real terms reduction, should it materialise, will not be confirmed until the council receives the local government finance settlement from the Scottish Government.
Have your say on council tax	6 Your say on Council Tax	Equality!!! Council tax the most unfair tax!!!! Council services should not cost individuals different rates based on house size or value. It should be an individual tax.....le the poll tax.. Example house ... 5 working adults... council tax £1250.00; house ...2 adults pensioners council tax £3000.00. All seven people have same access to council services nothing to do with property. HOW IS THIS FAIR???????	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Local taxation methods are determined by the Scottish Government. Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	Yes. Maybe those in massive homes could pay proportionally more.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	I blame Scottish Government for mismanaging funds, they froze council tax to try and get Independence	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	For many years the council tax freeze was a requirement of funding from the Scottish Government.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	This is a hard one when costs are increasing for everything and making it harder for people but understand if there is not an increase each year then further savings are needed to be made by the council. With the increases frozen in the past it makes it harder for people to accept increases again where if there had been increases every year it becomes the norm and more acceptable to people and the increases yearly	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	For many years the council tax freeze was a requirement of funding from the Scottish Government.
Have your say on council tax	6 Your say on Council Tax	The rate of inflation for council tax seems high (11% over 3 years). This will put significant strain on already high cost of living expenses. Would it be a possibility to have a tax per head within households (over a specific age band)?	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Local taxation methods are determined by the Scottish Government. Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	So this equates to a 17.5% increase over that time frame?! I do not think this level of increase is possible especially with current levels of pay for people increasing at only a fraction of this rate. ; You will be forcing many families (not just those on specific benefits) to face hardship unprecedented in my time. ; Is there an option of a scaled approach? A band a lower percentage up to higher F, G bands?	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	I don't think that is fair in a cost of living crisis to ask people to pay 3.5% extra on their council tax. Also the way council tax bands are decided is very strange. My elderly parents live in a street where the houses on either side of them and which are of the same size as their are in band D and their house is band F, so they would be paying substantially more than their neighbours if the price went up so much. This system needs to be addressed.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	If SG hadn't froze the Council Tax all these years ago, we wouldn't be in the mess we are now	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	For many years the council tax freeze was a requirement of funding from the Scottish Government.
Have your say on council tax	6 Your say on Council Tax	Wages are not rising in line with this increase so this would only put households in further financial difficulties.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. A percentage increase in council tax, in monetary terms for most people, is considerably less than a percentage increase in salaries.
Have your say on council tax	6 Your say on Council Tax	Tax the rich.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. The current council tax legislation means that any proposed percentage increase needs to be applied across all bands.
Have your say on council tax	6 Your say on Council Tax	I do not support any increase in council tax.; To make savings the council should cut services which are non-essential, and should consider reducing the amount of people who are exempt from paying council tax. Any reductions to spending should start with the salaries of senior management. I do not support any increase in spending on social care, unless this was a one off to build more council run care homes where an economy of scale can be achieved as far too much is spend on providing care to persons all living in individual homes. The council should also consider charging more people for care	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Discounts and exemptions for council tax bills are determined by national legislation set by the Scottish Government. Currently individuals do pay for care where it is assessed that they can afford to make a contribution.
Have your say on council tax	6 Your say on Council Tax	I would support an increase of council tax if bus fare/transport was free/cheaper. Food costs were lower. Power costs were lower. Leisure activities that provide crucial skills are free/cheaper. (Including gyms, swimming for exercising). More funding went to provide better healthcare at doctors (reduce wait times)	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council has no control over external and commercial providers or the NHS.
Have your say on council tax	6 Your say on Council Tax	I am paying more at The Vennel in Linlithgow for council tax than I was in the West end of Glasgow and i have a family to provide for. This is ex council flats with some of the flats still rented/given out through council and some of them let they're dog foul on the walkway without picking it up. I wouldn't support paying more if the area can't be kept clean.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	Scrap it	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Have your say on council tax	6 Your say on Council Tax	Needs a total revaluation for better consistences.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Have your say on council tax	6 Your say on Council Tax	I blame ***** (redacted)	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Have your say on council tax	6 Your say on Council Tax	Council tax bandings do not reflect true purchase prices of houses. They were determined many years ago and lots of properties are not within accurate bandings . By realigning bands you would be able to increase costs in the highest bands for those buying houses at over half a million.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Council taxes are way too high for middle income families and one student households should have their council taxes waived due to reduced stipends etc.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Reducing council tax would result in additional cuts to services as the council has to have a balanced budget by law. Discounts for council tax bills are determined by national legislation set by the Scottish Government.
Have your say on council tax	6 Your say on Council Tax	I do not support the increase in council tax, there should be a review as to the amount of money being handed out to households in the form of benefits, allowances etc based on the household income, including a review of allowances within households where pensions exceed expected amounts	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Benefits are determined by Scottish and UK Governments.
Have your say on council tax	6 Your say on Council Tax	I'm in council tax e and don't get any help both of us are retired and find we get higher percentage increase than people on greater salaries seems unfair	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	No I would not. 3% is enough and should be applied to all Bands and not just D and above we all use the same facilities and are facing economic hardship regardless of house that we live in.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The current council tax legislation means that any proposed percentage increase needs to be applied across all bands. In 2022/23 the Scottish Government provided funding which councils had to use to reduce bills for those in Band D and below. This was funded and required by the Scottish Government for one year only.
Have your say on council tax	6 Your say on Council Tax	Apply 3% increase TO ALL Bands is best approach.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The current council tax legislation means that any proposed percentage increase needs to be applied across all bands. In 2022/23 the Scottish Government provided funding which councils had to use to reduce bills for those in Band D and below. This was funded and required by the Scottish Government for one year only.
Have your say on council tax	6 Your say on Council Tax	I would support the increase if public sector workers received an pay increase in line with inflation and the cost of living. Charging people an additional 3.5% each year on council tax is unjust when current pay scales do not reflect this. Is the council as efficient as it can be? Can savings be made elsewhere that doesn't require additional cost to tax payers or services like schools and social care?	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The pay award for 2022/23 was agreed at a level higher than the increase in council tax. Although the pay award has yet to be agreed for 2023/24, it is envisaged that public sector wages will increase next year. A percentage increase in council tax, in monetary terms for most people, is considerably less than a percentage increase in salaries. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	As a Band F Tennant, perhaps a review of the whole banding process should be brought up to-date. Seems out of date valuing your house from hoping ago.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	Share our pain and look at council pension scheme arrangements, DB schemes are very expensive and a very large proportion of our council tax already goes on propping up generous schemes that we don't have access to.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services.
Have your say on council tax	6 Your say on Council Tax	Bring a to d in line with the rest	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The current council tax legislation means that any proposed percentage increase needs to be applied across all bands. In 2022/23 the Scottish Government provided funding which councils had to use to reduce bills for those in Band D and below. This was funded and required by the Scottish Government for one year only.
Have your say on council tax	6 Your say on Council Tax	The council tax levels is currently very unfair if you are a band E and above why assume people living in these properties are not suffering from the same economic/monetary problems. Everyone should be paying the same considering we all get the same services.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The current council tax legislation means that any proposed percentage increase needs to be applied across all bands. In 2022/23 the Scottish Government provided funding which councils had to use to reduce bills for those in Band D and below. This was funded and required by the Scottish Government for one year only.
Have your say on council tax	6 Your say on Council Tax	scrap it not fit for purpose	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Have your say on council tax	6 Your say on Council Tax	Not in favour of further increases - WLC must seek a political solution to the funding crisis with the Scottish Government. The local community should not have to shoulder the costs of this political problem.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Have your say on council tax	6 Your say on Council Tax	Pre school child care should not be available free for all, I feel that those on bigger salaries who can afford to pay for this should be paying. This would save the council a huge amount of money. I also feel that there are times when nurseries are over staffed due to them running late at night and over school holidays. I feel that term time was more efficient and those who need after hours care should be able to get this from a private nursery. Looking at pre school child care and nursery would help to save money on council tax.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The approach to delivery of early learning and childcare (ELC) including number of free hours is determined by the Scottish Government. The council looks to deliver the most effective service within the parameters set by the Scottish Government.
Have your say on council tax	6 Your say on Council Tax	Council tax freeze was one of the most short sighted policies in some time and has led to this disaster we are being asked to comment on.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	For many years the council tax freeze was a requirement of funding from the Scottish Government.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	COUNCIL TAX SHOULD BE ON THE AMOUNT OF SERVICES PROVIDED AND USED BY THE CONSUMER WHICH IS ONLY FAIR TO ENSURE THE COMMUNITY RUNS SMOOTHLY WITH A PERCENTAGE FOR UNIVERSAL THINGS, WHICH COULDNT BE SEPARATED. NOT AN INTRODUCTION OF A POLL TAX BUT SOMETHING THAT OFFERS FAIR ESTIMATE FOR SERVICES USED TO REFLECT VALUE FOR MONEY	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities. Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	We're fortunate enough to be able to afford taxes, and we support paying them to contribute to our local services. I think I would rather see affluent families paying for currently-free services - like prescriptions and school meals and breakfast club - before I'd want to see an increase of council tax on those struggling to heat and eat.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council must provide these services at no cost as required by the Scottish Government. The Scottish Government requires universal free school meals up to P5 and delivers prescriptions at no charge. The council has no ability to implement these changes.
Have your say on council tax	6 Your say on Council Tax	Please review council tax banding and update it to reflect the value of the properties people are living in. ;	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	It won't matter what the people say it will go up anyway always does or them that does pay it suffer for those that don't and they get the same as those that do pay it which isn't right	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Benefits are determined by Scottish and UK Governments. Discounts for council tax bills are determined by national legislation set by the Scottish Government.
Have your say on council tax	6 Your say on Council Tax	No. Council tax based on house value is an absolute con. We all get the same poor service why should people with a bigger house and less people pay more	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	yes.but as i stated previously as a pensioner i only pay 20% to council tax but 65% to rent...can these percentages not be negotiated to change?.for example 35% to council tax 25% to rent and 25% back to pensioners...it seems unfair that only those pensioners who live in a council home have rent and council tax to pay when a pensioner who lives in their own home only pay council tax.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation. The council has no ability to influence if individuals have a home paid for by a mortgage or an individual rents from either the council or a private landlord.
Have your say on council tax	6 Your say on Council Tax	It needs to be reviewed there are people who wrongly get a free ride and others who struggle to pay but do.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation. Benefits are determined by Scottish and UK Governments.
Have your say on council tax	6 Your say on Council Tax	The people who will suffer from this are those who are currently working and already struggling with the increase in all bills and utilities. Again, those who choose not to work get more money handed to them on a plate whilst those at the top of the pyramid feel very little change in their bank balances.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Benefits are determined by Scottish and UK Governments. At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.
Have your say on council tax	6 Your say on Council Tax	Make sure council tax increases are fair and not always the top bands! The banding system is out of date In relation to a properties value in many cases.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The current council tax legislation means that any proposed percentage increase needs to be applied across all bands. Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. In 2022/23 the Scottish Government provided funding which councils had to use to reduce bills for those in Band D and below. This was funded and required by the Scottish Government for one year only.
Have your say on council tax	6 Your say on Council Tax	I don't think increasing council tax is good for anyone but maybe add another band for the very big houses seems to be a lot of 6 bedroom houses paying the same as a 3 bedroom	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change bands or banding values.
Have your say on council tax	6 Your say on Council Tax	The way in which Council Tax is calculated. It's based on house valuations from the '90s. This means £500k houses in Linlithgow are paying much lower council taxes than some recent new builds in Winchburgh for example	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	Raise council tax for the wealthiest.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The current council tax legislation means that any proposed percentage increase needs to be applied across all bands. Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	Increase tax for the wealthiest.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The current council tax legislation means that any proposed percentage increase needs to be applied across all bands. Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	Council tax reductions should not be given to single parent families who earn over £40k a year, absolute joke	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Discounts for council tax bills are determined by national legislation set by the Scottish Government.
Have your say on council tax	6 Your say on Council Tax	Need to give attention service also specially NHS	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax is used to deliver local services under the remit of local government. The council does not deliver or fund NHS services.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	stop giving free child care to those who can pay for it.; Provide realistic free nursery hours and let those who Can't be bothered to look after their children pay for the additional hours.; Close nurseries over the summer and easter holidays,; Stop wasting money on 20 mile an hour road signs to remove them a year later.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The approach to delivery of early learning and childcare (ELC) including number of free hours is determined by the Scottish Government. The council looks to deliver the most effective service within the parameters set by the Scottish Government. The implementation of 20 mph was funded and determined by the Scottish Government as part of the Spaces for People Initiative arising during the pandemic.
Have your say on council tax	6 Your say on Council Tax	I believe nurseries should revert to being within the school year. I think there are too many free nursery hours and nurseries should be aligned with the school year with Easter and Summer breaks being the same. This would make a great saving and children in ELC will still gain a strong early years education with staff who are not overworked and exhausted, who came into the profession not to have their hours changed without much discussion. The family play such a vital part in a child's early year developments from nurture, communication and a sense of belonging, the time spent over Easter and Summer are important for a child's development in the family.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The approach to delivery of early learning and childcare (ELC) including number of free hours is determined by the Scottish Government. The council looks to deliver the most effective service within the parameters set by the Scottish Government.
Have your say on council tax	6 Your say on Council Tax	Re visit the housing bands they are not aligned you can have someone in an older 3 bed detached paying less than someone is a new 2 bed flat . Are we not paying enough!!!!	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	Council.tac bands should be reviewed, there should be increased charges for larger houses the top band isn't reflective of the types of properties. Families who occupy large houses should pay less than couples who occupy large dwelling	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	I would support this if services were delivered properly and efficiently.; There is currently almost 200 houses approved for building at Sibbald Brae in Bathgate. This will have a significant impact on all local services and amenities and should never have been approved (albeit with conditions).	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The Scottish Government made the decision to approve this development.
Have your say on council tax	6 Your say on Council Tax	We are in the highest council tax bracket. We do have a big house, but this is because we are a big family of 7. We could not afford a continued increase to our council tax of 3.5% for the next 3 years!!; Rather than raising council tax, the additional income could be found from reducing the number of free pre-school hours provided. Our youngest children do not need to be in early years education for such a long period of time. If families need the provision because they are working, then they should find the means to pay for the childcare. Council provided Nursery could revert back to the provision as it was a number of years ago so that children still have the experience of this type of setting before starting school. This surely would free up a lot of money to plug the budget gap.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The approach to delivery of early learning and childcare (ELC) including number of free hours is determined by the Scottish Government. The council looks to deliver the most effective service within the parameters set by the Scottish Government.
Have your say on council tax	6 Your say on Council Tax	I dont see why a single person pays 75% of a band when there could be 6 adults living in a similar band using 6 times more services etc; ; a single person should pay less; ; why is Band D always classed as the cut off for aid? Why not include single people in Band E as we dont have a dual income to fund many things	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	There should be an overhaul of council tax reductions, exemptions and discounts. People who get these reductions often have as high an income or more income than people who are on a low wage but don't qualify for any reductions. People on reductions are receiving the same services as every other West Lothian resident but either don't contribute anything or very little to council tax.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Discounts for council tax bills are determined by national legislation set by the Scottish Government.
Have your say on council tax	6 Your say on Council Tax	No I do not.; I have already completed this survey but would like to add that I think the council do not receive the correct amount of council tax from thousands of households. Lots of properties have been extended over the years and they have not been reassessed for their Council Tax band. I know of homes that are still band D but have almost doubled the size of their property by building an extension and this has not been declared/reassessed.; The council should get on top of this and reassess houses once their extensions or upgrades have been completed so that they are paying the correct, fair amount.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	Council bands should be reviewed and benchmarked against their current property value, not from the 1990s. Anyone who owns more than 1 property should be charged at the highest band with no concessions.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	make sure everyone pays people on benefits can earn more than I do working but I have to pay.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Benefits are determined by Scottish and UK Governments.
Have your say on council tax	6 Your say on Council Tax	Council tax should be demolished along with the over staffed over paid crew. If you cut the employee benefits, and bring inline with the private sector, the council will save millions and millions!	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	How about you ask people on benefits to do something like cleaning streets for the help they get? Let them give something back to community for years of sponsorship from our pockets!	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Benefits are determined by Scottish and UK Governments.
Have your say on council tax	6 Your say on Council Tax	Council tax, I pay this and in higher band, but also have to pay green belt for services that cost far too much. It's ridiculous as start of adambrae does not pay green belt. This is money I can't afford and would be willing to maintain as would my neighbours the small section of grass in our area.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council has no control over factor fees on private housing developments. This is an agreement with home owners in applicable housing developments.
Have your say on council tax	6 Your say on Council Tax	If everyone paid it including people on benefit etc but not sure how people are going to afford more you should look at things such as the increase in the wages of the most highly paid council officials by freezing there wages and putting to the savings into council spending	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Benefits are determined by the UK and Scottish Governments. Recruitment and retention of suitably qualified staff to deliver essential services to communities is currently very challenging. This would not be possible as the council needs to continue to have staff to deliver essential services.
Have your say on council tax	6 Your say on Council Tax	Council tax of coarse needs paying but people on some Benefits are receiving more money and paying a pittance in council tax than a lot of working people and OAPs who have to pay the full amount this needs addressing happy to pay but needs to be calculated more fairly.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Benefits are determined by Scottish and UK Governments. Discounts for council tax bills are determined by national legislation set by the Scottish Government.
Have your say on council tax	6 Your say on Council Tax	council tax needs scrapped, services provided are unreliable, and out of date for currant climate.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation. Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	council tax bands need to be assessed - banding very unfair.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	Schools and social care is the same service to everyone despite where you live so why should higher banding pay more?	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	I believe everyone should contribute to the council tax even families/people on benefits - the people on benefits should pay a minimal amount every month as every household the same council services, schooling and social care.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Benefits are determined by Scottish and UK Governments.
Have your say on council tax	6 Your say on Council Tax	Council tax banding - why does a dearer house contribute more? they do not get any additional council resources, the roads, libraries, council services, refuse collection is the same as everyone else in the area so unsure why they should be paying more.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	I agree with raising the council tax for those in higher bands but protecting those on lower incomes. I would be happy to pay an extra amount in council tax if it meant improved education and community services, improved roads and public amenities. Also raise rates for large companies whilst supporting SME's and charities.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The current council tax legislation means that any proposed percentage increase needs to be applied across all bands. Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold. Non domestic rates are determined by the Scottish Government.
Have your say on council tax	6 Your say on Council Tax	Band B council tax was reduced this year by cost of living award of £150 for band A,B,C,D. Some people got this award whether they paid any council tx or not as long as they were in Band A B C D. Surely this is not right. I presume they pay water and sewerage rates. ; ; The council tax needs to be sorted out as it is ridiculous. Also, quite a few good houses have been boarded up due to windows etc. been broken etc. It is a proper disgrace to give these people decent houses to live beside decent people.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	In 2022/23 the Scottish Government provided funding which councils had to use to reduce bills for those in Band D and below. This was funded and required by the Scottish Government for one year only.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	There appears to be no consistency with council tax payments in West Lothian, which I feel is very unfair, when we are all treated in the same way, whether we pay or not. We pay full council tax every month. I am 73 years old and my husband is 70 years old and still in full employment and have received no help with various situations e.g., 1. WLC workers would not pick up a fridge freezer which we paid £35 to have uplifted as we couldn't put it in our front garden. 2. Our gas fire is 24 years old 3. WLC will not carry out a gutter repair- Neighbours who pay minimum council tax get everything.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities. This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Have your say on council tax	6 Your say on Council Tax	The Council / Government needs to seriously address the issue of Council Tax banding. The current system is completely unfair and unjust. Accurately applying fair council tax bands would make the entire system fair ... at the moment, I am subsidising people in older properties that are generally much larger and a far higher value. Anyone with a new house built say post 1985 is generally in a far higher Council Tax band ... that older properties. For instance my house is Band G built around 1991, a work colleague has a very large 3 bed city centre tenement flat, is band D and his actual property value is MORE THAN TWICE mine!! How is that just or fair? The Council Tax bands MUST be reassessed !!	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	This whole consultation is vague. There's lots of WLC will no longer provide - food, music tuition, bus, teaching, childcare, janitors, sports facilities, service staff, bin collection..... You still want to increase my huge council tax bill - for what exactly?? I'm struggling to see what WLC is still going to provide for my money. Not one positive suggestion, not one ounce of creativity. Not one request for how things could be better just cuts and handing over costs to people you know can't afford any more right now. Shameful.	9. The respondent made a comment on the survey question.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	If you're going to commit to spending the extra on key priorities, there needs to be a clear picture of what would be funded if the increase is implemented that would not otherwise - just saying it's going towards schools when it just gets sucked into the schools budget doesn't help people see where the money is going, there would need to be proper clear ring fencing if that's the proposal you're making.	9. The respondent made a comment on the survey question.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	This is a strange question...you have just proposed huge cuts to schools and social care, but now ask if we would support a Council Tax increase of more than 3.5% if it was used in these areas.	9. The respondent made a comment on the survey question.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	This gets my head going in so many ways. You have spoken a great deal about making savings through the loss of services but expect people to pay more for less.	9. The respondent made a comment on the survey question.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	Council Tax is the stick to beat the councils with, it doesn't contribute as much to the coffers as people think but they get good value out of moaning about it.	9. The respondent made a comment on the survey question.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	I don't believe the funding raised would be used on identified priorities. There is a lot of money wasted by the West Lothian Council at the moment. There are many unnecessary people with fancy job titles, good wages and pensions, there are many unnecessary meetings which achieve nothing and too many incompetent people with jobs for life.	9. The respondent made a comment on the survey question.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	This would be a big increase	9. The respondent made a comment on the survey question.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	In addition I'd be very careful about asking a question in this way as people who don't pay any (or a very small amount of council tax) are being asked if they'd pay more they say yes when they don't in fact have to pay at all! You should only ask the people who'd actually have to stump up this increased amount!	9. The respondent made a comment on the survey question. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Funding the budget gap is not our responsibility, council tax is already ridiculous and certainly not value for money.	9. The respondent made a comment on the survey question.	Thank you for your response. Your comment has been noted. The budget gap faced by the council is a result of funding being insufficient to cover the increasing cost of delivering services due to factors such as population growth and indexation. The council is subject to rigorous external audit and both Audit Scotland and EY have confirmed, over a number of years, that the council has robust financial management. The council continually reviews service provision using our Best Value Framework to ensure that we deliver value for the public and continue to achieve the expected levels of performance. There are rigorous internal scrutiny arrangements in place to assure the quality of our services and we are also subject to external audit and inspection.
Have your say on council tax	6 Your say on Council Tax	This survey is too long, and now the text is getting way too long. You need to get some folks with experience writing plain English public surveys working on this type of thing. You're not going to get good return numbers with such a long wordy survey, particularly when your questions are all so vague and seem to be bending over backwards not to clearly define what the change of service is and what the pros and cons are. I didn't read above, too long, and I have survey fatigue.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	The format of this survey is poor and does not lend itself to true scrutiny of the proposals. The survey is badly designed and off putting to many given the large blurb of text under each heading - the language is in business speak which is essentially meaningless. There is a lack of clarity on the proposals and the reader is left to assume what the blurb is getting at. This survey should have been in plain English with examples of the proposals which would support greater engagement with the activity. There should be space for feedback on the methodology being used also - this has not been made available which adds to suspicion that the whole process is already decided, and course of action is already determined. The council and COSLA must do more to protect our communities and demand a fair settlement from the Scottish Government. This exercise highlights the political failure of the funding model and it will be the local community that suffers as a result. The end of the survey does not have a 'Finish' button, merely a 'Next'. Overall - very poor approach.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Have your say on council tax	6 Your say on Council Tax	As the cost of living is very high already I do not think people will have any extra money to spend when they are already trying to find extra for food energy and mortgages. I think if interest go up any more then there will be lots of people homeless.	9. The respondent made a comment on the survey question.	The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold. At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.
Have your say on council tax	6 Your say on Council Tax	We are all going to feel the pinch, it is all over the news	9. The respondent made a comment on the survey question.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	Also, and I know that some of the Councillors will flinch at this one, privatise some of the services. There are services within the Councils which could be carried out far cheaper than are achieved by direct labour organisations, and without lowering any quality if properly tendered and with strict supervision.	9. The respondent made a comment on the survey question.	The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure. The council must consider both internal and external provision to ensure best value. In some circumstances it may be better value to deliver through external provision.
Have your say on council tax	6 Your say on Council Tax	As stated before, you are asking the public to comment on financial issues without all the facts which are available to your highly paid officials. What I would want to know is, are you exceeding any spending on your legal statutory requirements. You have stated earlier in this document that you wish to increase charges to match the national average charged by other Local Authorities....Would you therefore look at reducing some of the funding grant to the national average!!! Also rent ... would they increase to the national average.;	9. The respondent made a comment on the survey question.	As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	WLC also needs to be far tougher on tenants who wilfully damage and neglect their tenancy costing thousands in repair costs.	9. The respondent made a comment on the survey question.	This proposal is focused on operational buildings only and has no impact on council houses. Council house investment is funded from rents, not council tax. By law the council cannot use general services resources to invest in council houses. There is a rent consultation which considers rent and investment in council houses.
Have your say on council tax	6 Your say on Council Tax	Everything else is increasing dramatically for households. Electricity, food, interest rates, fuel. Some families who previously were not in poverty probably now are. Increasing council tax just adds to that. There will be pressure somewhere else in the benefits system as a result....so again just shuffling the deck chairs.	9. The respondent made a comment on the survey question.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income.
Have your say on council tax	6 Your say on Council Tax	I can understand the need to increase costs but there may be less people who are able to pay it so their may not be as much of an increase as predicted.	9. The respondent made a comment on the survey question.	The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	I wouldn't support any increase where this went to Schools as it would just be an utter waste, West Lothian Council should absolutely consider the Heritage Tramway though.	9. The respondent made a comment on the survey question.	As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities. Given the pressures facing the council in delivering essential services, it is unlikely that the council would have resources to deliver a heritage tramway.
Have your say on council tax	6 Your say on Council Tax	The issue will be affordability given current inflation and fuel costs.	9. The respondent made a comment on the survey question.	The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold. At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.
Have your say on council tax	6 Your say on Council Tax	; Need to look at final salary scheme; Need to look at what is actually provided to the; Customer when council tax is paid; We pay the highest taxes in the uk	9. The respondent made a comment on the survey question.	Council tax in Scotland is lower than other parts of the UK and income tax for the lowest earners is also lower. The local government pension scheme has been subject to review and changes have been made to make it more affordable. Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	If you start trying to increase council tax by more than 3.5% you are going to end up in the same situation you were before it was frozen when it honestly felt like it was any excuse to increase it. The priority should be to make sure people actually pay it in the first place. Also, given the way the cost of living is going no-one will be able to pay any increase anyway. It is wrong to compare yourself to other areas, as you are not comparing like with like, especially in England. Also, it is the total income you should be looking at, Livingston has a growing population so your overall income is increasing anyway. You could review the bandings but be prepared for complaints	9. The respondent made a comment on the survey question.	The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity. Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values.
Have your say on council tax	6 Your say on Council Tax	We are currently in a living crisis, where people cannot afford to feed their families or heat their homes, impacting on both low in and working families, who do not qualify for financial assistance. If Council tax is increased, I think arrears will also increase as people will not have the means to pay it unfortunately.	9. The respondent made a comment on the survey question.	The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold. The council actively pursues all debt, including council tax, community charge, rent and commercial debtors arrears. The council will investigate other ways to improve debt collections including strengthening corporate debt management activity.
Have your say on council tax	6 Your say on Council Tax	I don't think you could identify an increase to a certain area again smoke and mirrors! Lose some of the high earning management . Stop using third parties who charge much more than employing local people.	9. The respondent made a comment on the survey question.	The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure. The council must consider both internal and external provision to ensure best value. In some circumstances it may be better value to deliver through external provision. The council has one of the leanest management structures of any council in Scotland. The council has delivered substantial management savings to date but continues to investigate savings and efficiencies in management structures.
Have your say on council tax	6 Your say on Council Tax	I think this needs to meet in the middle. I agree with a council tax rise but at a time of increased financial pressure on all families 3.5% each year is too much. This is more than wages are going up. I feel a maximum of 2% each year should be considered with cuts made in other areas and increased revenue created particularly from leasing buildings/rooms.	9. The respondent made a comment on the survey question.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. A percentage increase in council tax, in monetary terms for most people, is considerably less than a percentage increase in salaries.
Have your say on council tax	6 Your say on Council Tax	I think household's are bleeding out , hemorrhaging money ...; ; This may push many over the edge	9. The respondent made a comment on the survey question.	The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.
Have your say on council tax	6 Your say on Council Tax	With the financial crisis it is hard to find any increase in household monthly spending. Therefore any rise in council tax should be minimal and only if absolutely necessary.	9. The respondent made a comment on the survey question.	It is noted that you agree the need to increase council tax to support delivery of key services. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold.
Have your say on council tax	6 Your say on Council Tax	On one hand, you wish to increase tax but on the other hand, you will offer fewer services... Where is the cost-benefit for the residents?	9. The respondent made a comment on the survey question.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Raise council tax in line with pay rises otherwise we will be paying far more in real terms.	9. The respondent made a comment on the survey question.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. A percentage increase in council tax, in monetary terms for most people, is considerably less than a percentage increase in salaries.
Have your say on council tax	6 Your say on Council Tax	Well as bands A-D are mainly subsidised - it's not fair or equitable to apply 3..5% to band E and above as this would be more of a financial hit to customers who already pay a substantial amount which by default will subsidise A-D.	9. The respondent made a comment on the survey question.	The current council tax legislation means that any proposed percentage increase needs to be applied across all bands. In 2022/23 the Scottish Government provided funding which councils had to use to reduce bills for those in Band D and below. This was funded and required by the Scottish Government for one year only.
Have your say on council tax	6 Your say on Council Tax	I would happily pay 3.5% increased council tax if that would have an effect (positive) on my daily life. Currently I feel that this is not happening.; Also would suggest again that the council should start collecting debt in a more efficient way and should play an extreme part of identifying issues before they grow out of hand. (debt related issues)	9. The respondent made a comment on the survey question.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs. The Corporate Debt Team is happy to discuss options with anyone struggling with outstanding debt.
Have your say on council tax	6 Your say on Council Tax	I have a proposal I'd be interested in sharing with the authority that would utilise public buildings, provide hundreds of thousands (potentially millions) in revenue and be transformational in developing our young children both educationally and socially...Hey	9. The respondent made a comment on the survey question.	Please provide details to allow further consideration.
Have your say on council tax	6 Your say on Council Tax	Ok so the cost of living goes up, now you are going to charge more but most people's wages aren't going up, more stress to working families as usual.	9. The respondent made a comment on the survey question.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. A percentage increase in council tax, in monetary terms for most people, is considerably less than a percentage increase in salaries.
Have your say on council tax	6 Your say on Council Tax	Unfortunately, council tax is high when you are on a higher band. Due to deprivation in West Lothian and people living in social housing and ex social housing this is why the council bands are predominantly A-D. However, with someone like myself who came from a deprived area in West Lothian and worked really hard to achieve my goals, I will be the one who has to pay even more on what already is very high council tax.	9. The respondent made a comment on the survey question.	Council tax bands and the valuations for them are set nationally by the Scottish Government. The council does not have the power to change banding values. Council tax reform can only be reviewed at a national level with corresponding changes in council tax legislation.
Have your say on council tax	6 Your say on Council Tax	We do not seem to get much for our Council Tax... there always seems to be brand new vans with workers sleeping in them, and it is the Council Tax payers that are funding it.; ; When are the drains going to be maintained? The flooding that happens almost invariably is down to choked drains that haven't been cleaned out for years and years.	9. The respondent made a comment on the survey question.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs. Where individuals are concerned about the productivity of workers, this can be raised with the council anonymously through the contact centre.
Have your say on council tax	6 Your say on Council Tax	Council tax is far too expensive as it is for the poor service provided.	9. The respondent made a comment on the survey question.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	So council tax is going to increase but services are going to decrease .. where is the logic in that?	9. The respondent made a comment on the survey question.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	I just feel that we would be paying more for services but getting less for it.	9. The respondent made a comment on the survey question.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	I would normally be ok with a rise but concerned about fuel and mortgage payments currently concerns me about working, tax paying people losing their houses and becoming homeless or pushed further into poverty.	9. The respondent made a comment on the survey question.	Thank you for your response. Your comment has been noted. As the council's forecast budget position assumes an annual increase based on officer assumptions, additional savings would need to be identified to cover reduced income. The council tax reduction scheme is set nationally and determines the level of council tax benefits available to individuals. It is a means tested benefit available to those with income below the prescribed threshold. At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	BUT I would like assurances that all other council funds are being properly spent. How much has just been totally wasted messing about changing speed limits up and then down again? ; What is that other 3.5% being spent on?	9. The respondent made a comment on the survey question.	The implementation of 20 mph was funded and determined by the Scottish Government as part of the Spaces for People Initiative arising during the pandemic. Thank you for your response. Your comment has been noted. The budget gap faced by the council is a result of funding being insufficient to cover the increasing cost of delivering services due to factors such as population growth and indexation. The council is subject to rigorous external audit and both Audit Scotland and EY have confirmed, over a number of years, that the council has robust financial management.
Have your say on council tax	6 Your say on Council Tax	Did you need to waste money turning A listed houses into a conservation area but now you lack this funding to finish the refurbishment of the play park in Bridgehouse? This was done as a vanity project of a certain Councillor. I smell a rat.	9. The respondent made a comment on the survey question.	The council continually reviews service provision using our Best Value Framework to ensure that we deliver value for the public and continue to achieve the expected levels of performance. There are rigorous internal scrutiny arrangements in place to assure the quality of our services and we are also subject to external audit and inspection.
Have your say on council tax	6 Your say on Council Tax	There is no way to ensure extra funding raised would reliably go into schools. We have already seen over the previous years how the PEF funding was used, as parasites latched onto schools with gilded promises, wild claims and initiatives, manufacturing titles for themselves and draining schools already dwindling resources.	9. The respondent made a comment on the survey question.	Pupil Equity Funding has been provided to schools and the requirements of the funding means that head teachers have full discretion on its use. The council's best value framework determines whether services should be delivered internally or outsourced, and looks to deliver best value across all expenditure.
Have your say on council tax	6 Your say on Council Tax	People are more likely to tolerate an increase in council tax if they are able to see where/how it is being invested and used.	9. The respondent made a comment on the survey question.	Full details of how the council allocates its resources to individual services is provided in the annual activity budget which is available on the council's website. A summary of key areas of spend are included in the council tax leaflet which is provided along with bills. Extensive information on how the council's funding is spent is provided in the annual revenue budget report considered by Council at the start of every calendar year. This is available on the council's website.
Have your say on council tax	6 Your say on Council Tax	This doesn't sound like the 3.5% is for new funding to schools , but only to resolve an overall budget deficit.	9. The respondent made a comment on the survey question.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities. New schools built in recent years have been fully funded by developers.
Have your say on council tax	6 Your say on Council Tax	It is always the middle income who get hurt most. My wage has not increased but my cost of living has.	9. The respondent made a comment on the survey question.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	Council tax is dear enough. people are struggling just now because of the cost of living crisis	9. The respondent made a comment on the survey question.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	There's not enough money to equal to inflation. Prices are skyrocketing, the main concern is how do we get by this.	9. The respondent made a comment on the survey question.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	If being placed on services- this would be sorted	9. The respondent made a comment on the survey question.	Thank you for your response. Your comment has been noted. The budget gap faced by the council is a result of funding being insufficient to cover the increasing cost of delivering services due to factors such as population growth and indexation. The council is subject to rigorous external audit and both Audit Scotland and EY have confirmed, over a number of years, that the council has robust financial management.
Have your say on council tax	6 Your say on Council Tax	why charge for additional services such as bin collection, when this is likely a hidden cost in the council tax bill; how much of this fee is being fed into staff bonus etc.; i'd be happy to pay a reasonable fee for council tax IF the service was acceptable	9. The respondent made a comment on the survey question.	No local government employee receives a bonus. All council tax raised is spent on delivering services in West Lothian. Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities.
Have your say on council tax	6 Your say on Council Tax	To bridge the gap, Perhaps reducing council leaders salary's and tightening up expenses would be a better idea. Ensuring they are working the hours they are employed to work whether that be at the top, or the guys you see having a cigarette whilst emptying the bins, not to mention the umpteen council vans you see parked up at the side of the road on a regular basis where no work is happening. ; Our schools are a mess, our children and vulnerable should be our priorities, why are we not prioritising their needs	9. The respondent made a comment on the survey question.	Elected members salaries are determined nationally, with the council fully disclosing salaries and expenses annually. The council has a robust approach to performance management to ensure everyone is delivering agreed objectives and outcomes.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Have your say on council tax	6 Your say on Council Tax	Council services are wildly inefficient as identified in ever area of service. Tighten up and provide same service for less. Bureaucratic red tape and poor staff contracts waste money	9. The respondent made a comment on the survey question.	Thank you for your response. Your comment has been noted. The budget gap faced by the council is a result of funding being insufficient to cover the increasing cost of delivering services due to factors such as population growth and indexation. The council is subject to rigorous external audit and both Audit Scotland and EY have confirmed, over a number of years, that the council has robust financial management. The council's aim is, and always will be, to ensure that West Lothian continues to be a great place to live, work, visit and do business. To achieve this aim we will continue to prioritise the money that we spend on services to make sure that our investment has the biggest and most positive impact on the community. As validated by external auditors and other inspection bodies, West Lothian Council continues to perform well against key performance indicators and activities. This will continue to be monitored and reviewed.
Have your say on council tax	6 Your say on Council Tax	With everything going up you are now going to put our tax up which I think is very greedy. I live in a private rented and pay Alex Adamson because I can't pay both so now this is going up I'm going to get in more debt. Feed the rich steal from the poor that's West Lothian council down to a T	9. The respondent made a comment on the survey question.	Council tax is not a charge for specific services but a tax providing a contribution to the delivery of local services. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities. Council tax provides local services that everyone relies on, however a large proportion of council spending is focused on supporting vulnerable people and those on lower incomes.
Have your say on council tax	6 Your say on Council Tax	An increase in council tax paired with fewer services, eg libraries, recycling centres or community centres doesn't sound like a fair deal.	9. The respondent made a comment on the survey question.	The proposed increase in council tax would contribute to the overall resources of the council available to fund service delivery. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. It is proposed that future spending will be aligned to agreed priorities. The council is required by law to have a balanced budget, with reduced funding the council needs to reduce its costs.
Have your say on council tax	6 Your say on Council Tax	How can you state there will be a £17.9 million budget gap if you don't increase council tax by 3.5% when the previous sentence say that you will raise 93.249 million with the increases the maths do not add up and you want to cut funding to education !!!!!	9. The respondent made a comment on the survey question.	The percentage increase is the incremental movement on existing council tax bills. The £93 million is the total income (including the increase) raised from council tax. Although both these figures relate to council tax, they represent different elements (total v incremental movement).
Have your say on council tax	6 Your say on Council Tax	So you stated earlier that spending cuts produced a saving of 30.3 million which helped cover a deficit of 36.5 I believe it was with further cuts to services to alleviate the 6.2million gap. With Council tax increases you intended to raise 93.249 million so that will leave you with 56.249 million and you are still implementing all these cuts on essential services that we pay for through our council and income tax. How do you justify continuous yearly council tax increases when you are constantly cutting funding for services but have a pot of £56.249 million through these tax increases ?	9. The respondent made a comment on the survey question.	The percentage increase is the incremental movement on existing council tax bills. The £93 million is the total income (including the increase) raised from council tax. Although both these figures relate to council tax, they represent different elements (total v incremental movement). Council budgets are set on incremental movements each year, where the movements in income are compared to movements in cost. The council has a gap because projected movements in income are not enough to offset increases in costs. The total council tax budget cannot be used to offset the gap as this has already been allocated in previous years to balance the council's budget - only the annual difference can be used. For context the council's total annual revenue budget is £490 million of which council tax funds £93 million of that. If the council was to fully allocate the total council tax budget to offset the new budget pressures, cuts in existing service delivery of £93 million would be required.
Have your say on council tax	6 Your say on Council Tax	Any increase in taxes needs to come with a far greater level of detail about what the additional income would mean. The same could be said for all the savings detailed within this consultation. There is never enough detail to allow for people to provide a fully informed opinion and we are then left to assume or preume, often wrongly, what the approach loosely outlined will mean.	9. The respondent made a comment on the survey question.	This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further.
Have your say on council tax	6 Your say on Council Tax	I think the council will go ahead with their plans anyway, but this will divide communities into those who can and those who have to do without.	9. The respondent made a comment on the survey question.	This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further. Increasing expenditure or not delivering savings would result in additional cuts to services as the council has to have a balanced budget by law.
Have your say on council tax	6 Your say on Council Tax	I think that the council has already decided on the cuts, but I would like to say that it is poorer people who will be hit worse as they depend on council services more.	9. The respondent made a comment on the survey question.	This document is part of the early stages of public consultation on budget saving measures. Further public consultation on specific changes to services is an integral part of the change management process and will be undertaken as proposals are developed further. Increasing expenditure or not delivering savings would result in additional cuts to services as the council has to have a balanced budget by law. As the council will have less overall resources, the number of services delivered will have to reduce with services being reviewed based on the impact they have on priorities. This will include changes to service standards and the way remaining services are delivered. It is proposed that future spending will be aligned to agreed priorities. It is hoped that by prioritising spend, the impact on specific groups can be minimised.
