Modernising our council	1C Digital Transformation	Again cutting staff costs and cutting staff is not a solution. Stop putting people out of a job ! Be more present. Stop being unseeable and behind computer screens. Have staff available to go and see or call rather than stupid automated services that help no one !	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Personal support needed for people who will find this difficult.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Using multi media customer services is actually going to make it harder for customers as a lot more people are having to give up their broadband/ Internet and can't always afford to use their data due to price rising on everything.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Nothing achieved so far so how are you going to do this with the massive team you already have? Is the answer going to be get more staff? If this is the case I strongly disagree with this. The team there was tasked with delivering and hasn't. Please don't throw more £ after this team.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	Sometimes you need a human not a machine	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Depends what areas are being digitilised	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	Still need to consider people who are not able or willing to access services digitally. Need to ensure access to services for people who are unable to use digital services.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Internet/ data is not always in everyone's gift and people don't all have skills to navigate new technology.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Does it include doing away with necessary services or do you think everyone is technically minded; Nit everyone can do stuff online	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1C Digital Transformation	Not everyone can use digital technology, e.g A lot of elderly people in particular. This will make services less accessible to them.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	not all use or can use digital services need some face to face.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Some customers can't access services digitally and they mustn't be disadvantaged as a result. Recent changes to public access computers at IT suites haven't had regard for customers when Microsoft packages were removed.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Totally disagree with the argument that this will improve customer choice and accessibility, many older residents do not have access to the internet and as most of the local council offices have relocated to Livingston making it increasingly more difficult for older residents. Most people would rather speak to a human on the end of a phone	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Please keep in mind that not everyone can access digital and automated services. It is also likely that the very people who need assistance the most will be those that fall into this category.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	It is often difficult for elderly residents to use technology although the efficacy of the services maybe enhanced, the danger of lack of understanding technology would lead elderly resident to feel left out and undervalued	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	This I hope would not result in services being difficult for older people and people who do not have access to the internet to get the service they require.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	I do not agree with this. automated systems are very frustrating and often don't answer all questions or problems. ; Many elderly people are confused by then annas many disabled too. Peeler who are hats of hearing will struggle too. Too often now technology is seen as the answer but often creates discrimination	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Pls provide a service for the digital averse/not interested/ too scared of being scammed that would likely include me - but definitely anyone over 65 - we will eventually fade away into the dim and distant past but until then we still have a vote ...just saying	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1C Digital Transformation	The money that has been spent on digital transformation in the last 5 years is ridiculous and a lot of people are still not using it or can use it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	it's not as simple as the delivery of new IT systems, existing staff need to be trained properly on any system that is introduced, or you will reduce staff costs, and put extra pressure on individuals to adopt new technologies and ways of working, whilst expecting them to do more.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	Not great that people would be out of work.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	You need to remember that not everyone has online access so some level of human contact must be maintained	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Sack staff, replace with technology that there is still a good part of the population who cannot access easily due to abilities, either age or actual disabilities that would stop them and/or cost of living can't afford to have access, then hire new staff paying more to fix when the technology breaks down or you realise that there is people lot is not accessible to. As much as yes technology is part of every day just reducing you staff to replace them with it is not the way to go when there will always be people that cannot access easily.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Not all customers are of a digital era and therefore are forgotten about when it comes to a digital transformation, but this ties in with my previous comment about cutting staff for computers, it's not a clever way to work.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Too much digital world now people still need face to face contact and over the phone talking as technology can actually take longer to sort things out.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Not everyone uses technology & its usually a nightmare trying to go through your website trying to find the actual thing you need. HATE automated service !!!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Disagree, what about those who not access internet, or choose not to participate in social media?? Customer service and support is vital. Visibility in the real world is necessary such as leaflets / new letters to update and inform people on essential services re bin collection, road repairs and positive events or info on groups/ country parks etc in local area .. people need to access services and be informed not just on internet.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Alot of elderly people don't have smart phones etc and prefer to speak face to face .	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1C Digital Transformation	Digital equals disaster for the old . They're not of the digital culture	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Just be aware that not everyone has or is able to use or access iPads etc	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Many elderly & disabled residents are unable to use digital technology.; Make improvements internally that WLC staff and employees will use but do not make more things online as this would be discriminatory to the elderly & disabled.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Not all residents are technologically savvy and able to operate these systems. This could alienate and affect a great number of elderly or learning disable/additional supports needs people. A lot already struggle with the online systems and no support is given. If you call to take care of something you are often directed to a web page or email address which is not an effective system	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Would that mean reducing staff levels, in certain jobs automated process is not very personal, thinking of the older generation and the not so technical minded.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	You have to remember the older generation and those who are not IT literate	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Not everyone is technology minded! What about the disabled and elderly?? ; All about saving money? Saving money for what????? ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Not all residents have access to digital devices and still need access to face to face services	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	As long as it does not have an adverse effect on OAPs and cause difficulty in them or anyone else reaching the service they require.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1C Digital Transformation	Support unless staff reduction results in poorer services.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	My experience of digital services is poor and I don't imagine the staff costs cut will really save overall as the technology will be costly to maintain.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	Disagree with this. Less human interaction with the public is the wrong way to go forward.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	The services are a disgrace; Your employees are doing there best .	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	So this cut again is at the detriment of your constituents as we will have longer waiting times while trying to contact local agencies as all your so called digital solutions never meet the standards they are supposed to you only have to take the example of private companies such as Sky, BT, Royal Mail and utility companies to name but a few who's reduction in staff to boost profits only effect the customer who no longer receives good customer service due to automated/ digital services which are supposed to be more cost effective but deliver a much poorer service. So again how can you justify previous tax increases against a reduction in quality services from a human to digital/ automated content ?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	I do not agree with making more use of technology at the expense of human interaction, which in real terms means job cuts for council employees.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	Another saving that sounds like staff will be made redundant... Automated systems have limited use and are not suitable for all in our society particularly the elderly and vulnerable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	No some people cant do online	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	People loose their jobs, robot is taking over.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Don't feel that this is very good currently so sorry that savings could deliver an even less useful service for us customer	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1C Digital Transformation	Many of our customers, especially those most vulnerable, aren't able to rely on digital technologies to access services, therefore I think this is a false economy. To many people, this will seem like WLC are effectively isolating them and cutting them off from service provision, it will not be increasing customer choice, it will be reducing it for those that need us most.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	The council services that I use are all face to face. I don't really want to use digital services because I prefer people.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	I am not confident using computers and IT. Not everyone wants everything digital. Please keep some services face to face for equal access.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Although I have a computer and Internet access I don't want to deal with payments and booking services online I want to speak to staff at community centres	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	It is nice to have some human interaction and some empathy and help most of the time even a multimedia customer service would not be able to help	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Can't get face to face appointment and no e-mail communication as it is	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	No prefer to speak to somebody	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Technology doesn't work want to speak to a human to answer questions not possible on an automated system	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	I would rather have a person to speak to	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Can't determine what this actually means as no detail given	3. The respondent advised that they had no comment to make or posed a question of the measure.	Not enough detail in the proposal
Modernising our council	1C Digital Transformation	The IT we currently have in school DOES NOT WORK! One set of netbooks for 12 teachers/classes. Two thirds of which won't connect to the internet. WiFi that's not fit for purpose and pupils that have no access to IT at home - or the skills to use it.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council has made significant investment in the IT infrastructure and will continue to allocate appropriate resources to introduce new technology where appropriate. The council's ICT Strategy seeks to deliver change in line with advances in technology and changes in council priorities, whilst still having a clear framework within which to operate.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1C Digital Transformation	'a reduction in staff costs' - is the council proposing redundancies?	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council is committed to working with employees and trade unions in managing changes to its organisational structures and staffing requirements. The council will seek to achieve agreement to change through constructive and open dialogue.
Modernising our council	1C Digital Transformation	I am not sure about this.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment.
Modernising our council	1C Digital Transformation	Ditto	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment.
Modernising our council	1C Digital Transformation	Have any service areas been identified where this will take place or will it be council wide?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	Without knowledge of what this means or entails due to the vague information given it is impossible to give thoughts on this	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment.
Modernising our council	1C Digital Transformation	What technology and how will it be used?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Comment is in the form of a question
Modernising our council	1C Digital Transformation	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	None	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	..	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	N/a	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	Same comment as above	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	See above.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	Don't fully understand the proposal	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	I'm not in a position to comment fully on this	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	Not sayvet	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	I don't feel I have enough knowledge on this area to offer an opinion	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	,	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	Neutral	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	NA	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	Unsure	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1C Digital Transformation	See 1 a	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	no comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	I am unable to provide further input as the level of detail within the estimated saving briefing doesn't allow me too.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	No idea what this means as you have not actually said what you will do. Significant amount of jargon. Plain English required. Again can't support as you have not specifically stated what you will do.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	Again, what does this actually mean? How many staff will lose their jobs?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	See 1a	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	Similar comments to 1a	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	As before.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	It is also essential to provide staff with the correct equipment i.e., computers, tablets and connectivity to allow them to be able to use digital systems, forms etc. with groups and individuals in their communities.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council has made significant investment in the IT infrastructure and will continue to allocate appropriate resources to introduce new technology where appropriate. The council's ICT Strategy seeks to deliver change in line with advances in technology and changes in council priorities, whilst still having a clear framework within which to operate.
Modernising our council	1C Digital Transformation	difficult to provide specific feedback without knowing the actual detail around the proposed plans.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment.
Modernising our council	1C Digital Transformation	Seems reasonable but again lacking any detail for consideration	3. The respondent advised that they had no comment to make or posed a question of the measure.	Not enough detail to comment
Modernising our council	1C Digital Transformation	So what happens when the power cut goes off? Whats the business continuity plan?	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council has detailed business continuity plans for all aspects of service delivery including backup options for systems.
Modernising our council	1C Digital Transformation	Most other councils in the UK and even locally (Glasgow) have far better online and mobile provision. Getting updates from the council is ad-hoc and its clear that a communications team needs to be setup.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council uses a variety of platforms and channels to help residents of West Lothian to stay up to date with news in the local area and also, provide them with access to council services and new information. We track engagement levels with each channel and continually look for ways to improve our reach and content.
Modernising our council	1C Digital Transformation	So this is where some redundancies or movement of personnel may occur however it is the world we live in	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council is committed to working with employees and trade unions in managing changes to its organisational structures, staffing requirements and terms and conditions of employment. The council will seek to achieve agreement to change through constructive and open dialogue.
Modernising our council	1C Digital Transformation	There needs to be a serious review of IT projects. Their purpose, the worth of some of the IT lead and the outcome against cost. ; The pre-work involved to get anything done is obscene. The various stages of arcane project management theory that litters the projects is incredible. It is so inefficient and not fit for purpose. The stages of closure, pre work, if the project changes etc are incredible. ; It smothers any innovation and takes too long.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council has made significant investment in the IT infrastructure and will continue to allocate appropriate resources to introduce new technology where appropriate. The council's ICT Strategy seeks to deliver change in line with advances in technology and changes in council priorities, whilst still having a clear framework within which to operate.
Modernising our council	1C Digital Transformation	The council's IT department must surely be in the firing line for efficiency savings whilst at the same time supposed to be leading a digital transformation. The IT department currently cannot provide the required support to services who are currently trying to make these changes. It's doubtful that this consultation will change this and if anything make matters worse.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council has made significant investment in the IT infrastructure and will continue to allocate appropriate resources to introduce new technology where appropriate. The council's ICT Strategy seeks to deliver change in line with advances in technology and changes in council priorities, whilst still having a clear framework within which to operate.
Modernising our council	1C Digital Transformation	Send the west lothian Bulletin digitally instead of print	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council uses a variety of platforms and channels to help residents of West Lothian to stay up to date with news in the local area and also, provide them with access to council services and new information. We track engagement levels with each channel and continually look for ways to improve our reach and content.
Modernising our council	1C Digital Transformation	The council website could use some improvement. However, more elderly constituents do not access information in this way; recent changes to bin collections, for example, are not always easy to find.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council website is intended to keep West Lothian residents informed about council services and the local area and also, it provides them with access to the council services that they need (for those who wish to transact with the council online). The council will continue to review processes, procedures and methods of service delivery to support improvement and efficiency in services whilst delivering on commitments.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1C Digital Transformation	It would help to make the website more accessible. At the moment it is extremely hard to navigate. Information, for instance, regarding education is sometimes impossible to find.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council website is intended to keep West Lothian residents informed about council services and the local area and also, it provides them with access to the council services that they need (for those who wish to transact with the council online). The council will continue to review processes, procedures and methods of service delivery to support improvement and efficiency in services whilst delivering on commitments.
Modernising our council	1C Digital Transformation	Greater use of website and social media to provide information to the public.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council website is intended to keep West Lothian residents informed about council services and the local area and also, it provides them with access to the council services that they need (for those who wish to transact with the council online). The council will continue to review processes, procedures and methods of service delivery to support improvement and efficiency in services whilst delivering on commitments.
Modernising our council	1C Digital Transformation	I think improved IT services would be better	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council has made significant investment in the IT infrastructure and will continue to allocate appropriate resources to introduce new technology where appropriate. The council's ICT Strategy seeks to deliver change in line with advances in technology and changes in council priorities, whilst still having a clear framework within which to operate.
Modernising our council	1C Digital Transformation	As a resident I do not understand what this will mean to the services I receive due to the vague and broad terms used in this consultation document.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The resident advised they had no comment to make
Modernising our council	1C Digital Transformation	As a resident I do not understand what this will mean to the services I receive due to the vague and broad terms used in this consultation document.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The resident advised they had no comment to make
Modernising our council	1C Digital Transformation	Will a reduction or delay on service provision, resulting from these proposed measures, result in delays which may in turn require even more costly solutions? Without more details I cannot comment meaningfully on this proposal.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	More specific detail would be useful to understand how digital solutions will lead to savings, and in what specific ways these will impact services.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	Again no substance to this so impossible to understand what you are referring to	3. The respondent advised that they had no comment to make or posed a question of the measure.	The council is actively reviewing the number and usage of systems and applications that are in place as part of our plans to rationalise systems and improve our management of data and information.
Modernising our council	1C Digital Transformation	Easy to use is a must and ensure that all users can access no matter of age or ability.	4. The council is already doing this.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	Customers need to be able to speak to someone	4. The council is already doing this.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	So far, we have struggled to realise savings from the implementation of digital solutions- what is this measure going to do to change that?	4. The council is already doing this.	The council is actively reviewing the number and usage of systems and applications that are in place as part of our plans to rationalise systems and improve our management of data and information.
Modernising our council	1C Digital Transformation	I think that ensuring that current digital services are running efficiently is more important than introducing new digital services. Integration of teams will work, if it does not overwhelm employees.	4. The council is already doing this.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	As a side note, what on earth have the Digital Transformation Team been doing and what have they achieved? We are told nothing so why don't we start to truly demonstrate to staff the difference we are already making and start to build a culture that honestly celebrates achievements (I don't mean celebrating success which was more demotivating than I've ever seen a celebratory event).	4. The council is already doing this.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	Again, reliable WIFI and devices for teacher and young people.	4. The council is already doing this.	The council is actively reviewing the number and usage of systems and applications that are in place as part of our plans to rationalise systems and improve our management of data and information.
Modernising our council	1C Digital Transformation	Staff laptops are not up to standard. Lots of recurring faults in brand new equipment or being unable to download the necessary app in order to use equipment ie visualiser	4. The council is already doing this.	The council has made significant investment in the IT infrastructure and will continue to allocate appropriate resources to introduce new technology where appropriate. The council's ICT Strategy seeks to deliver change in line with advances in technology and changes in council priorities, whilst still having a clear framework within which to operate.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1C Digital Transformation	a review of all technology in the organisation should be carried out, and slimmed down	4. The council is already doing this.	The council is actively reviewing the number and usage of systems and applications that are in place as part of our plans to rationalise systems and improve our management of data and information.
Modernising our council	1C Digital Transformation	Social media is free use that to communicate	4. The council is already doing this.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	I hope that all of the 32 councils are cooperating in these processes..	4. The council is already doing this.	The council is working with others through the Digital Office for Local Government
Modernising our council	1C Digital Transformation	Visual online contact with council staff should always be an option, eg Zoom/Teams.	4. The council is already doing this.	The council has implemented the national Near me platform to allow video conferencing for customers
Modernising our council	1C Digital Transformation	This is good but I would like to say people on uc have to do their own administration for this we all need access to Internet and need device to us also we need to learn how to write things in as a lot of people have never done this or most of the time don't have access to Internet or device you say go to libraries sorry but not everyone can do that me myself can't go out as I get high anxiety and thinking about having to go to a public place is very scary also some people don't have money for Internet or a phone laptop I am single parent of 5 year old I don't have a phone to do my emailing on but if not I would not be able to sign into my account or get anything and if I don't do what they want on time you get money stopped this is very concerning as a parent my 20 year old is in receipt of UC but had no access to phone Internet to go in to his UC so has when with out any money for 3 months nothing and I myself get next to nothing and I have had to keep him so he would not starve or freeze I feel you should provide some kind of scheme where low income people could get phones or laptops or such like given to them by council as my daughter got a laptop and a dinghy for 2 years internet free and laptop so she could do all her UC and school info as myself don't always have Internet to access info I need from school or myself	4. The council is already doing this.	Although the council cannot provide individuals with laptops or computers, the council has free access computers across West Lothian for everyone to use. These can be accessed in partnership centres and other buildings. The Anti-Poverty Service is available to help provide advice on completion of benefit forms and online services. Provision of laptops for some children during Covid-19 was funded by the Scottish Government.
Modernising our council	1C Digital Transformation	Will this new way of working provide for people and families who require help but are suffering from digital poverty? Is there provision in the change to take those people into account?	4. The council is already doing this.	Through the Customer Service Strategy the Council is committed to ensuring a range of contact methods are in place to suit the varied needs of customers. At a time of significant financial uncertainty and the cost of living crisis, good quality advice services are needed to support people, particularly those on low incomes. The Anti Poverty service will continue to provide support and advice to vulnerable people in the community.
Modernising our council	1C Digital Transformation	I also believe we should subsidise equipment to staff members who are struggling with cost of living	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	No paper copies of tax etc statements ; Everything online	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	The council acknowledges that our customers expect access to council information 24 hours a day, seven days a week. To enable this, the council will continue to look at ways to improve the website both as a tool to provide information on services, but also as a tool for customers to engage with the council, e.g. making payments online. Through the Customer Service Strategy the Council is committed to ensuring a range of contact methods are in place to suit the varied needs of customers.
Modernising our council	1C Digital Transformation	Cut leaders and employ more hands on workers to get us out this crisis mess	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	The council regularly reviews the organisational structure and operations for efficiency and effectiveness. There are statutory functions that the council must, by law, have in place. However, where there are opportunities to streamline business processes and reduce inefficiencies, the council will act appropriately to ensure that we are operating as efficiently as possible and delivering value for money.
Modernising our council	1C Digital Transformation	It's been noticed all council vehicles are being fitted with computerised displays for reporting missed bins and beats being completed. This is a complete waste of money as this work can easily be carried out during debrief at end of shift. Or if those duties were passed on to drivers made up to a charge hand role for crews they could carry these duties out	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment.
Modernising our council	1C Digital Transformation	there should be more people 'on the phones' to deal with matters. It can sometimes take hours to get through to certain departments if you're trying to report things, then there is that wait to see if anything happens in regards to your initial phone call.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Customers are encouraged to phone through the contact centre and leave a voicemail in queue at peak times; or alternately email us, or use the appropriate forms on our website
Modernising our council	1C Digital Transformation	shut off telephone lines and get rid of phone numbers. ; close CIS offices	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The council continues to offer different kinds of access for customers. This can be speaking to someone in person through an office, by telephone through the contact centre or digitally through our website or other online portals.
Modernising our council	1C Digital Transformation	moving with technology can only be a good thing if the correct systems are put in place. A great example I have seen is one which the contract or submits to almost a workflow style system to which the works are approved by the requesting officer before being remeasured and passed by the surveyor and finally passed by the secondary signature on the payment this would speed up many payments when it comes to TMC ad-hoc requested works.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1C Digital Transformation	As mentioned previously, Digital Transformation should include the closure of buildings and investing in staff to work remotely on full-time basis. Closing/Selling Buildings not really required would therefore make substantial savings. Investments should then be put forward for more Digital Processes. Allowing staff to attend buildings on a hot desk service only when required.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	As mentioned previously, Digital Transformation should include the closure of buildings and investing in staff to work remotely on full-time basis. Closing/Selling Buildings not really required would therefore make substantial savings. Investments should then be put forward for more Digital Processes. Allowing staff to attend buildings on a hot desk service only when required.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	Councils should consider working together and sharing resources, especially digital. I have worked in two different councils and have had to complete mandatory learning for both councils. What is frustrating is that the content is the same but the outlay and design is different. By sharing content, man power can be reduced.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council is actively reviewing the number and usage of systems and applications that are in place as part of our plans to rationalise systems and improve our management of data and information.
Modernising our council	1C Digital Transformation	The reality is that the council will invariably choose badly when it comes to technology and reduce the staff regardless of whether or not that technology is in place. As well as this 'advanced' technology needs skilled staff to work with it and get the maximum out of it. The reality is that technical skills within the council are lacking. Recruitment should include a technical test that at the very minimum should include a validation that the individual is able to use MS office products at least. I spend significant portions of my time providing assistance to staff at all levels who should have better skills coming in the door. With regards to choosing technology. Procurement is a tricky process and staff without experience often handle work that is outside their skillset. Leading to a competition where the winner is not chosen by the best or most knowledgeable people. As well as this there should be an inclusion of preset questions on key topics like cyber security and data protection requirements. iTrent a is a key example of technology chosen by the wrong people. the interface is horrendous and the system is slow, clunky and unintuitive. As well as this a quick google search shows that the top results where users comment on the product are all negative. When technology like this gets chosen and staff counts are reduced we are led to a 'google customer service' scenario where people hide behind inboxes and its not possible to get coaching or guidance session with a staff member. Or worse as with iTrent, no training was provided whatsoever and the guides produced could have been made by school children based on the quality. You can fill a workshop with the best tools in the world, but if the people using them dont know what to do then the product will always be bad.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has made significant investment in the IT infrastructure and will continue to allocate appropriate resources to introduce new technology where appropriate. The council's ICT Strategy seeks to deliver change in line with advances in technology and changes in council priorities, whilst still having a clear framework within which to operate.
Modernising our council	1C Digital Transformation	Provide a digital device (tablet or similar) and adequate wifi to all council buildings along with adequate wifi, some community centres do not have public access devices or wifi. Doing so would allow staff in these buildings to encourage customers to do things digitally, using customer portal and so avoiding unnecessary calls to CSC or appointments in CIS offices	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has made significant investment in the IT infrastructure and will continue to allocate appropriate resources to introduce new technology where appropriate. The council's ICT Strategy seeks to deliver change in line with advances in technology and changes in council priorities, whilst still having a clear framework within which to operate.
Modernising our council	1C Digital Transformation	The council I.T infrastructure needs to be able to cope with modernisation. There should be enough qualified I.T staff to lead the way and not so much bureaucracy to hinder change	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council has made significant investment in the IT infrastructure and will continue to allocate appropriate resources to introduce new technology where appropriate. The council's ICT Strategy seeks to deliver change in line with advances in technology and changes in council priorities, whilst still having a clear framework within which to operate.
Modernising our council	1C Digital Transformation	I also suggest you involve older and less educated service users in user acceptance testing to help identify user problems that will not be obvious to the more tech literate people implementing the changes.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	Not sure how costs can be combatted here, but, for instance I have an old laptop that cannot take modern IT solutions, such as "clickshare" I don't have the required port on my PC for the required technology. There have also been incidences where I don't have the required adaptor either, if all this was standard throughout, this would reduce the need to buy separate equipment for IT problems. I also don't have the required adaptations for some other digital display equipment. As a minimum, I would suggest uniformed IT equipment across all of WLC regardless of property (education, operational, etc... and all WLC staff (such as projects, MIs, RPs, Projects, TNRP, Education, H&S, Trainers, etc...)	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council is actively reviewing the number and usage of systems and applications that are in place as part of our plans to rationalise systems and improve our management of data and information.
Modernising our council	1C Digital Transformation	Please also consider cost effective cloud measures.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council is actively reviewing the number and usage of systems and applications that are in place as part of our plans to rationalise systems and improve our management of data and information.
Modernising our council	1C Digital Transformation	Please hire a consultancy who knows what they are doing to implement this, given the information security risk	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1C Digital Transformation	Have you thought about providing a 'live chat' facility where it would help customers speak to someone without phoning?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	The council should seek to cut specific projects and programmes that don't deliver any meaningful outcomes or contribute directly to delivery of the 8 priorities.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council is proposing to achieve efficiency savings through transformation of services and reduction of duplication and will maximise opportunities to automate processes to reduce manual processes.
Modernising our council	1C Digital Transformation	Improve the council website with online chat made available rather than phone calls if info not available on the website.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council website is intended to keep West Lothian residents informed about council services and the local area and also, it provides them with access to the council services that they need (for those who wish to transact with the council online). The council will continue to review processes, procedures and methods of service delivery to support improvement and efficiency in services whilst delivering on commitments.
Modernising our council	1C Digital Transformation	While I am in favour of digital systems and prefer to use them as an initial search for information it is very frustrating when you have a very complex or unique question and cannot get through to an actual person. Often the question only requires a few minutes but automated services which give stock answers are not always helpful. I would rather have an email address that I could send the query and know that it will be read and responded to or I will be called back but tracking down relevant email addresses is not always easy.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	There should be a chat feature on the website	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	See above. Changing systems without reviewing and redesigning business processes and the people performing them will result in a costly mess.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	ensure public wifi works for the number of people using it	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	Get a data science team in to do AI work and you'll save more	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	Please make sure you test all new interfaces so they are intuitive for all users and not just able-bodied, clear sighted users. Please also don't cater to just the latest devices. All interfaces needs to work for people who don't have the highest spec kit. Also; don't assume everyone is as technically literate as you. Use the government digital standards as a minimum.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	Invest in ipads etc to allow for on site reports and updates without need to go back to the office or re-type work onto another format.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council is actively reviewing the number and usage of systems and applications that are in place as part of our plans to rationalise systems and improve our management of data and information.
Modernising our council	1C Digital Transformation	Another vague statement. How are we to provide input if we don't know what this means on the ground? We are already doing great work in the community in Social Policy to bring technological solutions to problems. Why is this not recognised? Why do staff not know what's going on in throughout their council? Should we not let them know of new programmes of work etc??	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	Automated processes are very frustrating for everyone, but more so especially for the elderly they cannot cope with this. I understand you will be saving in staff costs and need to look at these options but not all pensioners have someone to call for them and automated services can be very stressful. If an option right at the start of the call was a number for pensioners (preferably 1), could be anyone born before???? you are directed straight to an "actual human" this would make life easier for pensioners as I think people forget they are having to constantly adapt. Anyone with an elderly parent I'm sure will understand this. You could trial this withhith	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	some areas of the council have access to some platforms and not enough licences to enable other areas to use them - such as e learning authoring which gives customers a way of doing some personal learning before a 1-1 interaction and coaching is needed	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	The councils "pay for it" system could be much better and more efficient. Officers in front line roles don't have access to behind the scenes for this and therefore can't check whether applications have been paid etc. This leads to inefficiencies.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	I believe there is more that can be achieved in this area. There are still too many occasions when forms have to be filled in for what seems like no apparent reason. Also, it seems that we have not maximised the use of workflows to reduce the need for form filling.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1C Digital Transformation	Make online portals easier to use for people	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	Automation provides lots of opportunities for improvement and efficiencies, but funding must be available to implement and then support the projects on an ongoing basis. It takes time to properly redesign a service and make sure that customer needs are fully considered in this process, and initially this takes extra resource before we could see any reduction in staffing. The advantage to the current ways of working is that people may be able to adapt to unforeseen changes more quickly than an automated system. We need more people who have automation skills.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	There is little justification for printing given the modern digital tools staff have at their disposal. Elected members could take the lead by not wanting paper copies of committee reports which is a ridiculous waste of printing and staff resources.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council regularly reviews the governance arrangements that are in place in order to ensure that there is good management, effective stewardship of public money, good levels of public engagement and that the desired outcomes for stakeholders are achieved.
Modernising our council	1C Digital Transformation	do not spread yourself too thinly across multiple platforms - choose one and utilise that (e.g. social media presence should be limited, choose a technology partner and strive for efficiency with them).	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council is actively reviewing the number and usage of systems and applications that are in place as part of our plans to rationalise systems and improve our management of data and information.
Modernising our council	1C Digital Transformation	In my experience of change management and business improvement, significant new IT solutions usually take a period of increased costs during the introduction, training and shakedown periods, with poorly thought through risk management plans usually resulting in a (hopefully temporary) bad experience for both staff and customers alike. Limited local beta testing is essential before full go-live is implemented.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	The web site requesting services is not adequate and could do with being updated. Automatic responses are already in place it is the manpower thats required to respond to these	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	What is the point of sending newsletters to all. If some want a print copy surely it is cheap to have them request one & for it to be mailed out than everyone get one. The newsletter can be emailed.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	I think it is essential that the council continues to develop services to match the digital age. Better customer experience should be the top priority for any digital transformation we undertake. Internally, the council could reduce costs substantially by taking an aggressive approach to reducing printing.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	Council website for paying rent/council tax should be made easier to use to increase accessibility. Maybe a phone app?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	As suggested in answer to question 1 an online ticket type system would be favourable as it allows users to submit, check and update queries.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	Investment in new technologies, such as an app would assist with customer service and customers ability to access services/information for themselves	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	It is very difficult to get un touch with the housing department, the online portal is not user friendly.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council continues to offer different kinds of access for customers. This can be speaking to someone in person through an office, by telephone through the contact centre or digitally through our website or other online portals.
Modernising our council	1C Digital Transformation	why does the council provide staff with mobile phones? personally I'd be happy to use my own phone and access calls and emails that way. I understand that many private sector businesses allow staff to access emails on work phones so can we not overcome security issues ? I'd also suggest that you could remove desk phones. I cannot remember the last time a desk phone was used. Surely mobile phones, teams etc suffice now?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council is actively reviewing the number and usage of systems and applications that are in place as part of our plans to rationalise systems and improve our management of data and information.
Modernising our council	1C Digital Transformation	Please be careful on capital and ongoing spend in this area. Are we considering more outsourcing of services to private parties who have greater delivery scale advntages and who have already invested in modern ICT infrastructure?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	Digital funding for schools allowing technology for all pupils as done in other authorities would help with raising attainment and closing the gap	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1C Digital Transformation	As more and more people embrace the online world, you may wish to consider a 'live chat' function on the website. Although a phone service would probably need to stay in place to some extent, its opening times may not need to be so generous.; Would an App be a way of encouraging customers to connect with WLC digitally?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1C Digital Transformation	This measure is welcome as long as there is appropriate investment in technology to support service delivery with reduced staffing. More automation and bots will be fundamental to achieve this but the council also needs to ensure that all technology works seamlessly together to improve efficiency. Eg is there a solution to embed video conferencing platforms and phone lines into the same system.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	The Digital Transformation Team have been in place for a period of time however there has not been any information on the measures that they have now put in place for creating efficiencies. We need technical staff with the correct knowledge to drive this and sufficient resource in this area in both qualified staff and technology.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	why do we all have desk phones? Hardly anyone uses them. Surely It should be looking at an audit with a view to reducing their numbers. Most staff are using their own phones anyway and the directory is a shambles. TEAMS is a game changer so IT should be looking at this as a potential saving	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	Council website needs to be much better, clearer, easier to understand and easier to navigate.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	there should be a team of people (maybe once a week drop in) who can help those use technology.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	Need more public computers and support for people who cant use them	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	Digitising a bad process will only make that bad process fail quicker so a detailed look at what is done and how it is done will be required. Services will need to be honest with themselves and not try to hide behind it's always been done like that or don't see why we need to change, and we don't need help from anyone outside out service to deliver change.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	What has been done to shift customers away from the Contact centre? Live Chat, updates on service requests, live social media updates ? We haven't moved forward one bit in the past five years with this.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	Currently our digital platforms and access to digital platforms are such that they are not always accessible. Students are relying on their own phones meaning batteries are very low and a number are using personal data to access programmes like TEAMS.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council is working to ensure access to devices where relevant
Modernising our council	1C Digital Transformation	Also greater insistence of training, cpd, and meetings to be held via teams rather than increasing mileage costs and time costs for travel to meetings. Consider also the carbon savings. Seems absurd to have meetings in person nowadays.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	the use of online meetings has grown significantly over the last two years
Modernising our council	1C Digital Transformation	There is currently a big push on digital technology in the classrooms, but my school currently has a lack of equipment that is equipped to do the jobs we need. Also training for staff on how to use new technological programmes etc - there is very little available. If this is cut further staff will be unable to deliver the curriculum the way the government sees fit.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The council is working to ensure access to devices where relevant
Modernising our council	1C Digital Transformation	At the moment the website is frustrating. I often have to clear cache / cookies to get into ipay for school things and that's from safari, a browser most people must use? ;	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1C Digital Transformation	1C Digital Transformation: Fully support this but if you want to match provision with the way customers access services then you need to shift the front door to apps as most customers access services from other providers via smart phones. Most business now have apps and most people with smartphones access them to buy, change or cancel services every day of the week. These apps are integrated with those companies back office or legacy systems to provide seamless service to the customer. In 2021 the number of smartphone users in the United Kingdom rose to 53.5 million, making it 78.9 per cent of the population and its expected to rise to over 65 million by 2026. Activities on smartphones in 2020; Activities Share of respondents; Email service 85%; Searching for goods and services 81%; Internet banking 76%; Messaging apps 71%; Social media networks 70%; Reading online magazines and news 70%; Listening and downloading music 62%; Searching for health advice 60%; Making video or voice calls 49%; Playing games 41%; Selling services or goods on the internet 21%; ; The council has a much more complex set of services than most businesses so you may need to consider an app for Tenants along side an app for the Environment Services and one for Education. Whatever you do its time to join the future.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	The council also needs to consider how customers want to interact with multiple services. Currently a customer with multiple needs has to access services through multiple pathways; repeat their story multiple times. Digitalising individual service processes does not always improve the customer experience. How can we introduce data-sharing consent at the first point of contact with the council, then have automated referral processes that streamlines multiple processes? For example as a low income customer if I want to apply for council tax reduction, housing benefit, free school meals, school clothing grants - why can I not tell the council my situation once and then automate the processes? Highland Council have introduced Apply Once. Could the council use data much more effectively to target resources and services much more effectively (and as an earlier intervention) to prevent reactive expenditure?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	Technology for self processing or self help should be increased and a dedicated app with personal login to self manage accounts payments, rent, council tax etc and should be linked to social services for benefits or DWP users	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	If you are adopting new technologies, you should apply considerably resource to testing them with your users. By which I mean identifying your hard-to-reach groups and contacting them, or via relevant intermediaries and not leaving it to the views of people who willingly engage with you or who you can easily reach - that does not provide a balanced view.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	Birmingham City Council have their tree map on-line so that the public can view trees and report any problems observed giving specific details and upcoming works can be advertised. It also shows the value (biodiversity, CO2 capture, health index) of the canopy cover helping to educate the public. On-line TPO system as 1A above	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	Provide a mobile app for services.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	It would be great to see more interaction from the council on social media posts including answering/replying to misinformation. Also if the council could log enquiries or add comments received on post advertising surveys into the consultation that would be great. Still keep a phone number as this is sometimes helpful. Maybe consider live chat/PMs/DMs	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Customers who transact with the council through digital services return positive feedback on their experience, however, we will always look for ways to improve the customer experience and welcome feedback on how we can do better.
Modernising our council	1C Digital Transformation	Self-service technologies seem valuable, but perhaps retrain willing workers to build an in-house software development team who can cost effectively continually improve customer offerings. That might allow some other displaced workers to backfill roles of the interested future developers. Many large corporates would be happy to support such tech re-training free of charge.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	'Reduction in star costs' ie sack workers!	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Our customer interactions and feedback clearly show that people are increasing choosing to use our digital services. This offers customers greater choice and flexibility in the way that they access services and we are working to increase our use of technology across the council and improve the efficiency of our processes and response/resolution times for customers.
Modernising our council	1C Digital Transformation	What cash benefits been undertaken that point to £502,000 savings; BTW what are the £2,000 to be spent on: spurious accuracy	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment.
Modernising our council	1C Digital Transformation	Where will 502k go?	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1C Digital Transformation	Where does rthe budget come for to fund technologies when staffing needs to be cut.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment.
Modernising our council	1C Digital Transformation	It's not fair that people in the community or work place have to pay for to save money it's all to pot	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment.
Modernising our council	1C Digital Transformation	Tje council needs to stop taking on agency staff as it's costing the council money	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment.
Modernising our council	1C Digital Transformation	Like most modern organisations , management structures should remain lean and flat to avoid becoming top heavy and expensive to maintain	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	The council continually reviews service provision using our Best Value Framework to ensure that we deliver value for the public and continue to achieve the expected levels of performance. There are rigorous internal scrutiny arrangements in place to assure the quality of our services and we are also subject to external audit and inspection.
Modernising our council	1C Digital Transformation	Cuts should not involved schools even more so for children with additional support needs. This is a major disaster. GIRFEC needs must! Reduce cuts on heavy management from the top. Totally against school cuts!	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment.
Modernising our council	1C Digital Transformation	Job losses ?!	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment.
Modernising our council	1C Digital Transformation	Dakiuj	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	I know cuts have to be passed down but this is unbelievable. The UK and Scottish Govt should work together and forget indie2!!!	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	Reduction in staff costs = is this a reduction in jobs?	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment.
Modernising our council	1C Digital Transformation	Sjld	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	dakujwm	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	Another upgrade, how many skips will be ordered this time? Get a bloody grip!!	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	I need help	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	Moisture readings above 78!	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	There be dragons.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	People with knowledge and know how are required not the same old bods kidding on they can do the job.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment.
Modernising our council	1C Digital Transformation	100% for citizen empowerment. As long as the council acts in a timely manner or are proactive to dealing with issues and whilst on site checking around the impacted areas. I.e. apply a little n+1 thinking. If someone reports one pot hole and there is another in the vicinity fix it too. Similarly if one team sees drains are blocked or streets are filthy with debris call it in an have the other appropriate teams fix it.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment.
Modernising our council	1C Digital Transformation	I think having to download the Authenticator app is a step too far for a lot of people and makes it too complicated. I know there is another way of verifying the account but again it feels like more faff than online banking.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment.
Modernising our council	1C Digital Transformation	Not always a less of a human makes things better, the same with money. Digital currency can enslave society. You can freeze someone's account and with no cash in the market, you force people to think in your way, or they can get their money frozen. Are we call it freedom? So, which digital transformation are we talking about?	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment.
Modernising our council	1C Digital Transformation	Charm we choice ha ha ! Your service department are rude! How about training them on empathy and how to be realistic	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	If there has been a failure in service please raise a formal complaint and this will be investigated by senior management and reviewed by the Head of Service

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1C Digital Transformation	If you are relying on using the current telephone service whereby customers are supposed to be able to contact the council you need to do a whole lot better! It's totally unacceptable that someone calls is kept on hold for 20 mins to then be disconnected without speaking to anyone. Do you ever give any thought as to how frustrating and in some cases the despair the customer feels when they require help? It is totally unacceptable.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Customers are encouraged to phone through the contact centre and leave a voicemail in queue at peak times; or alternately email us, or use the appropriate forms on our website
Modernising our council	1C Digital Transformation	Think you should look at doing away with in person voting and going digital with all.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	This proposal is out with the control of West Lothian Council.
Modernising our council	1C Digital Transformation	What technologies? what services? This consultation is (redacted).	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1C Digital Transformation	Not enough detail to judge the impact this might have.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	Explain please! Vague nonsense	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	Again, this isn't consultation its telling us what you are going to do. What will impact on customers, WL residents, be? Needs to be far more detailed. Above statement is just more management waffle... Make staff redundant and replace with a 'press option 1' Never get to speak to a human!	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	What comments do you expect people to make here? There is no question to answer.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	Again, this statement gives absolutely no detail whatsoever. If you are asking the general public to give an opinion on elements of change that could impact the services that local tax payers fund, you need to sort yourselves out and actually provide the relevant information.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	unsure on this one	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	Word salad. Means nothing to me and I'm a degree educated 46 year old.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	Not enough detail to make constructive comments. Experience has not been good to date, as above.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	There is no obvious public service potentially being lost here. There is improvement proposed. If this question relates to saving money or keeping unnecessary jobs (in the presence of improved technology), why don't you just make that clear. If you're trying to involve the public in hard decisions to make savings that result in losing jobs, make that clear, don't hide the negative impact on jobs! If every potentially saving is portrayed as good news, and provides a clear net benefit to the public, why are you consulting? It is illogical. This consultation so far appears to be an exercise in rubber stamping decisions that have already been made rather than presenting options and pros and cons to the public and have them inform decisions.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	The format of this survey is poor and does not lend itself to true scrutiny of the proposals. The survey is badly designed and off putting to many given the large blurb of text under each heading - the language is in business speak which is essentially meaningless. There is a lack of clarity on the proposals and the reader is left to assume what the blurb is getting at. This survey should have been in plain English with examples of the proposals which would support greater engagement with the activity. There should be space for feedback on the methodology being used also - this has not been made available which adds to suspicion that the whole process is already decided, and course of action is already determined. The council and COSLA must do more to protect our communities and demand a fair settlement from the Scottish Government. This exercise highlights the political failure of the funding model and it will be the local community that suffers as a result. The end of the survey does not have a 'Finish' button, merely a 'Next'. Overall - very poor approach.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1C Digital Transformation	The lack of real facts and figures about what is going to change makes it a challenge to comment effectively. More information is required before any meaningful consultation can take place. We should be provided with a statement for each section and the option to agree, disagree or have no opinion. I would strongly urge the council to re-present this consultation in a more user friendly format.	9. The respondent made a comment on the survey question.	Thank you for your comment about the survey, the council will carefully consider all feedback and use it to review and improve our consultation approach.
Modernising our council	1C Digital Transformation	The format of this survey is poor and does not lend itself to true scrutiny of the proposals. The survey is badly designed and off putting to many given the large blurb of text under each heading - the language is in business speak which is essentially meaningless. There is a lack of clarity on the proposals and the reader is left to assume what the blurb is getting at. This survey should have been in plain English with examples of the proposals which would support greater engagement with the activity.	9. The respondent made a comment on the survey question.	The comment does not relate to the question being asked

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1C Digital Transformation	This feels purposely vague to allow free reign to make any chances decided at any time.	9. The respondent made a comment on the survey question.	The comment was not relevant to the question
Modernising our council	1C Digital Transformation	That 2,000 is very specific	9. The respondent made a comment on the survey question.	The comment does not relate to the question being asked
Modernising our council	1C Digital Transformation	Staff reduction should be addressed with clarity to the public and not through mass redundancy of loyal, committed council workers.	9. The respondent made a comment on the survey question.	Thank you for your comment, the council proposes to use responses to the consultation to support the review of council services, prioritisation and decision making.
Modernising our council	1D Allocation of School Resources	I agree that greater use of technology should be used - does this mean reducing teachers? If you are to replace teachers with technology, how will the technology be funded to ensure that all children have access to devices and connectivity?	1. The respondent advised that they agree with the proposal.	The proposal is not to replace teachers with technology.
Modernising our council	1D Allocation of School Resources	Anything that cuts down current waste / duplication must be welcomed. ;	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	My experience of this is positive - the challenge is selecting third party providers!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools will hopefully be more able to make effective decisions about what they need, so this could be a good thing.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Sounds good though very vague (as are most points in this survey)	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Any changes to help cut savings is more than welcomed as i'm sure a streamlined funding model will deliver the best support etc required in all schools	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There must be significant savings in this vast budget. Maybe the target for this measure should be higher.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Education should be taking a share of the cuts. Overly protected by politicians at expense of many other vital services.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	More efficient allocation of resources is to be encouraged.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The education budget is the largest and there should be room for savings what does the education customer service team do. Could this not be absorbed by other teams	1. The respondent advised that they agree with the proposal.	Proposed budget reductions are spread across centrally based teams as well as schools, but centrally based budgets are very small in comparison with school budgets.
Modernising our council	1D Allocation of School Resources	As long as the 'third party' understand how schools work and how resources are used. ; Technology should not be use to replace quality teaching staff.	1. The respondent advised that they agree with the proposal.	It is intended that technology is used to complement quality teaching.
Modernising our council	1D Allocation of School Resources	OK - as long as focus continues to be on not only learning but also on supporting young people with their mental health and wellbeing - especially following their disruption during Covid.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Focus on reducing/eliminating top-heavy management structures and greedy, bureaucratic tender processes that leave council departments forced to use contractors and suppliers which are often seriously overpriced.	1. The respondent advised that they agree with the proposal.	The council is bound by regulations contained in the Public Procurement Legislation which set out the procedures to be followed at each stage of the procurement process leading to the award of contracts within certain spend thresholds.
Modernising our council	1D Allocation of School Resources	Children need teachers not computers to learn. invest money in training, early intervention, behaviour management, adequate support and long term savings will be made.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is essential, please do it.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This will be a positive step if it tackles the varied needs of children as it is proven the prescribed teaching we have falls short for many of our young learners. Flexible learning in improved environment, developing further the strategy to learn and have fun.	1. The respondent advised that they agree with the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1D Allocation of School Resources	Modernisation and smarter working will only bring positives. Value for money and ensuring if we are paying for things that it actually makes a difference. Schools working better together and sharing best practice and skills will benefit everyone.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	In what way is technology to be implemented to deliver the curriculum? All discussions at national level are that technology should never be used to replace teachers.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	OK but without real work yet to be done, it is difficult to grasp how the £5 million savings are to materialise	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil support is very important in schools and shouldn't be cut.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This will be interesting to see implemented. Support staff are stretched as it is. Admin staff are being given more and more tasks with little or no training.; Mainstream schools are having to cope with more and more pupils with additional support needs without support which can be very disruptive to the whole class. There should be more specialist provision not less.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	I cannot think of any cost reducing ideas here. However, would suggest where there are more "demanding" children, there is not a waste of staff resource catering to one particular child at a particular school, but if properly assessed they should be sent to a school that caters to the child's needs for that ward? (ie. one teaching member of staff to one child due to issues that child presents... where is a school or specialised group within a school could help better?) May also lead to better teaching for that child, however, would probably need considered on a case-by-case basis. (Again, may need to consider a shuttle bus and if this would be cost effective). Would remote learning time be a consideration here also? (Could still be carried out under teacher supervision - remote learning similar to what was carried out during covid? Perhaps a "reasonable" deposit scheme could be implemented per year for electronic resource that could be refunded if equipment is returned in good condition?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools need pupil support staff. Children are struggling in schools and them and teachers need the support from PSWs	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Technology can not replace teaching staff.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools need money as children are the future. Teacher numbers shouldn't be reduced.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There is adequate staffing of schools as it is especially with regards to pupil support workers. Inclusion often means high tariff pupils are left unsupported within schools. There should be no cuts within the schools budget.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As long third party providers doesn't mean lower quality.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As long as standards and curriculum are maintained or improved.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The children are our future I do not feel that any savings should be made from school budgets and if anything more should be placed on giving kids the best education so they can leave school and continue further education so they can work and contribute to society	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Cut school busses back to the statutory limit instead.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I can see that using technology to deliver the curriculum might be a good way forward, so long as it is recognised that some pupils are more disadvantaged than others and will still be able to access lessons/teaching/support.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	could schools with lower roll numbers be amalgamated to save the building running costs, Reduce building operation costs where possible that has the least impact on education.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Is there any evidence that suggests that pupils benefit from the use of technology? Might it be that they only benefit from e-learning when it is supported by qualified staff?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I agree that school resources need to be managed in line with the financial challenges the council faces. The council should benchmark against other councils to find the best practices being delivered.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Needs more funding for different types of activities outwith the classroom such as outdoor learning, wellbeing trips for rewarding pupils who are doing as asked and attainment methods	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Needs more funding for different types of activities outwith the classroom such as outdoor learning, wellbeing trips for rewarding pupils who are doing as asked and attainment methods	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Budget restrictions impact hugely on successfully implementing essential strategies to raise attainment and support individuals. This is becoming increasingly difficult, but as mentioned, all staff are willing to give their all to support essential cutbacks.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are the places providing the education for our young people, who are the future, and every investment should be invested there. Maybe investment in more 'lower paid' staff, ie pupil support staff, admin as opposed to promoted senior management staff would be a best use of limited resources.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Headteachers and their teaching staff are the ones best situated to serve the needs of pupils. Get rid of the unhelpful bureaucracy.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools have to take their share of reductions - it will be hard but other services have taken a bigger hit in the past and schools are the biggest part of the council's budget. It is only right that savings have to be made in this area too.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As long as there is no impact to the current setup	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As long as level of education is improved	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	I think its very important that schools are well resourced and staffed and this isn't taken away.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This could be a good idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Sounds ambitious. Hopefully does not overburden already stretched resources.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The staffing at 50 week nurseries can be absolutely ridiculous during the holiday periods. There can be up to 9 members of staff for a handful of children. Surely savings could be made if there was one local hub school used instead of opening up individual nurseries. I believe that opening nurseries from 8 a.m till 4 p.m term time only is the way forward. These children will move on to their allocated primary schools and these schools certainly do not provide childcare until 6.15 or during the holiday periods.;	1. The respondent advised that they agree with the proposal.	1140 hours is mandatory for the council to provide. Term time offer available in those settings which have physical capacity.
Modernising our council	1D Allocation of School Resources	As long as the children don't suffer as a consequence.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I agree that reducing the cost of resources such as print and reference material in place of a digital resource is a good thing, but children do still need the support and guidance from experienced and dedicated teaching staff. I have had 3 children go through the education system in West Lothian at both ends of learning capacity, my eldest needed learning support and help choosing the correct career path, another was top of his class all the way and needed support with best university choices and help with application. The staff in school that have helped my children have been invaluable, their experience was needed and was invaluable. On the other side of it there have been times when supply teachers are used and that is when issues arise, continuity in learning is essential, children react positively to someone they know and trust and who understands how they learn individually, not as heard mentality but gets that they are all individual people with individual ways of understanding and growing. Education is not a business its a foundation for the future, it cannot be treated as a profit and loss organisation.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	After reading the above, I will continue to trust your decisions in the areas I have no experience in , but thank you for the opportunity to co-operate !	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As a parent of children who had to make the move to online learning very quickly during the pandemic there is merit in using technology more to deliver the curriculum if this means that learners can continue to have access to quality learning and support. However if this move would decrease face to face contact time to any great extent then this needs carefully balanced to ensure learners still receive adequate support. The use of teams has had varying success with access to materials, posting of homework and completion of work.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As long as education remains at the heart of the changes. Greater use of digital technologies are good however, human interaction, stimulation and thought provoking teaching need to be front and foremost.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I agree that change and improvement is needed in schools.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agreed. The best people to decide on resource allocation in schools are Head Teachers, who know their community and their childrens' needs.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Is critical that resources in our schools are properly funded. If not it is our children that suffer. In todays society our young people can find life extremely difficult. Especially because of the pandemic and the pressures of social media. it is vital that support for pupils is readily available and that it is accessible for our teenagers. Schools also need to embrace technology in their curriculums which is a much more efficient way of delivering education and really benefits students.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There is scope for efficiency through greater use of technology in the curriculum, however this will have to be balanced with pupil needs. Schools currently often run on a very tight staff with little scope for absence or change without significant impact on delivery to pupils.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	strongly feel money and restructure is required in the education system, there are too many kids going through school without the correct support.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	If you're considering integrating technology into schools, pupils need to provided with laptops/lpad each.	1. The respondent advised that they agree with the proposal.	Digital devices to be issued.
Modernising our council	1D Allocation of School Resources	The ever increasing demands on schools through the varied Additional Support Needs is already placing great strain on Pupil Support Departments. Any changes to staffing etc were these to involve cuts would certainly be detrimental to any service delivery. At times of osterity it appears that Pupil Support is first in line to be looked at and in a society where Mental Health and Financial hardship is a constant headline any impact on the support offered to young people should be maximised not minimised.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Curricula can be delivered in multiple ways (online distance learning being one example). However, as previously stated, our communities are facing the worst cost of living crisis in our time. How will we ensure balanced opportunities if they are unable to provide the technology necessary for their children's education?	1. The respondent advised that they agree with the proposal.	Digital devices to be issued.
Modernising our council	1D Allocation of School Resources	Education has been a protected budget for some time now with many areas of waste in each school. I've seen first hand simple things that cost money being spent simply because schools have the budget to do so. Education is important but the traditional way in which we deliver it, the limited curriculum and the single minded approach have seen our children in this country drop in standards. We could provide them with the skills they will need now and the future by ensuring that the practical skills are more developed. Utilising technology again is not new.	1. The respondent advised that they agree with the proposal.	Digital devices to be issued.
Modernising our council	1D Allocation of School Resources	PSW are essential to support the most vulnerable children and without them learning and teaching would not be as effective.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Money must be available to enrich learning, technology will not be used to replace teachers	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil support workers are essential and frequently support the most vulnerable of children. Without them teaching would not be as effective.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I think there is a balance between using technology to deliver curriculum. This needs to be developed mindfully, and evaluated carefully before simply agreeing to long-term use. Some pupils require additional support. Learning needs to be inclusive.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Again, sure school roles and budgets can be more efficient. But I'm against any strong cuts that will impact education	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	bit removed from schools as not got children at school, but any improvements would be great for schools	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agree with this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I believe its not resources but looking after staff and developing the staff to provide for a forever changing environment for children.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	In principle, this would seem to be necessary in times of funding but education can only be enhanced - in some areas - by the use of technology; not delivered. Qualified, conscientious and dedicated teaching staff are irreplaceable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	For example, using a common digital learning platform across all schools - negotiate for a package across all schools and supporting services as a way of saving cost. ; ;	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agree with a review of 3rd party providers. This work could be brought in house easily. ; ;	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools should get what is needed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	It is not really clear from the explanation above what all of this would mean in practice. I would hope that through improved use of technologies we could reduce the admin burden for school staff. Greater use of technology for teaching pupils could open up new opportunities with schools no longer being restricted to set class sizes for the delivery of particular lessons if pupils are learning in a different way. Attracting nursery pupils in from the private sector would be a saving.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Happy to see efficiencies being adopted within the education sector	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School provisions are important and an area that should be focused on.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Any help in schools is much needed and much appreciated.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Education is key to our future. Don't mess with the kids education!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I support this only if it results in maintaining/improving the excellent education my children get, instead reducing waste in the system. Greater use of technology worked in Covid but seemed to put pressure on staff so that needs to be addressed. I am concerned about the reduction in support staff, I feel my children are exposed to behaviour and less teaching in class as a result of children with additional needs, a support system that works for all children must not be diluted to save money. Prioritise education quality please.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There is already too much focus, resource in this area with no added value.	1. The respondent advised that they agree with the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1D Allocation of School Resources	So long as children's education is not affected in any negative way	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	sounds like a good idea	1. The respondent advised that they agree with the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1D Allocation of School Resources	utilise technology across the schools network	1. The respondent advised that they agree with the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	remove unnecessary managerial positions in schools;	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Maximising the use to technology to deliver the curriculum, as well as professionals from outwith education (such as sports, the arts) will provide a richer and more engaging learning experience for learners and will likely reach a wider range of learners	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I would be concerned if individual schools are given the freedom to make choices which then in my opinion gives rise to different technology being used between schools. I believe in a unified approach to the allocation of resource and use of technology within an organisation.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I understand the need for use of technology to deliver areas of the curriculum however staff are needed to ensure this is done correctly. Pupil support staff are an essential part of the school community to ensure that children are supported in their learning.	1. The respondent advised that they agree with the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1D Allocation of School Resources	I'm happy with my son's school provision, although it is a shame that there are not many activities for the children and parents to socialise and after school clubs are inexistent (it would be good to have them even paying for a fee, for example, a sports club since this is a unique opportunity for children at SEN schools to socialise). Some activities would reduce the isolation of the children and their parents.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools' budgets are currently tight, with many offering no scope for further efficiency. Investing in our youngest, oldest and most vulnerable citizens is a test of the community we are. Savings in this area must be handled with care and fully costed - with both intended and unintended consequences fully considered.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The opportunities of web based learning across multiple school campuses for a variety of subjects must be grasped, with cooperation and collaboration across learning establishments, such as Falkirk and West Lothian College, expanded to its maximum potential.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Its quite clear from the skew of savings proposals that the baseline budgets for schools, young peoples services and environmental services are generous and should bear the bulk of efforts for savings and bearing down on expenditure such as supply teaching and sickness absence management.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Teacher workload cannot be impacted and added to with administrative tasks, this is not teacher responsibility.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	It does not state what sort of ways these services will be allocated or maintained. As long as Childrens education is prioritized rather than funding this would be good.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The needs of children should always be prioritised.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I've wroked as a site manager in a school and have seen the waste of funds schools get away with.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	All school resources should be looked at and see where resources could be better used. ASN allocations in Primary and Secondary Schools need to be looked at so they are distributed out on more of a need's basis rather than on a roll basis.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Taking away additional support or resources will not help pupils that are struggling or that have additional needs	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Using technology to deliver the curriculum must not reduce face-to-face time between teachers and pupils.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Children need interaction with teachers and other people rather than just screens to learn effectively. Savings shuld be by sharing facilities/buldings/sports fields/peripatetic teachers.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	All schools need adequate staffing levels. As long as this is met I would be happy for this change to happen.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Depending on who these 3rd parties are. If to help support and assist then great. Technology could be used alot more in schools too for learning from afar.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agreed. I understand Education is a top priority but it is time that they took their fair share of the efficiencies that the council is required to deliver.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	greater use of technology to deliver the curriculum - as long as there are still teachers supporting pupils this is a potential positive change, it could lead to a more flexible approach to curriculum and greater options for pupils. However they still need to be taught by a teacher, otherwise we would be as well using youtube to teach out pupils.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As long as pupils don't suffer & teachers/staff are paid fairly then I agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	It is critical to engage with external agencies to provide additional support, despite this being a costly exercise. Impact has shown that this is generally a successful intervention. With additional key personnel appointed to schools to support in class/individuals, once again, this intervention is a key driver to success of health and wellbeing of all.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	As grandparents to 2 young grand-children it is my belief that they deserve the best education to enable them to achieve their full potential as adults. ; They are entitled to the best education possible and if the above means they will receive that then that can only be a good thing.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Provide IT equipment for 1 per pupil. Currently don't have enough for 1 between 2 making tasks difficult to complete esp if IT focused	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	All consultations must be learner centred and fully involve staffing at all levels within school establishments. With a primary focus of inclusion, learners needs must be prioritised to support governmental goals of raising attainment and closing attainment gap. School staffing at all levels play a vital role in learner safeguarding reducing pressure on other services within authority.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	It's unclear whether this means reducing school resources/support or just allocating resource differently which somehow saves money - if it's the latter, seems sensible	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As long as it improves core services.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There seems to be more and more pupils requiring additional support every year, but if the parent perhaps helped/supported the school(s) or sought external help then the school would not require as much resource.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Provided student's will be supported in other ways within the school, I see this as a positive step. Most children (not all) have the digital skills to enable them to develop positively however, I believe children still need a 'face to face' person they can go to for problems arising within the school environment.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I would like more information on the third party part.; The curriculum is very out dated so more technology based is a step forward	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Third Party Providers should be kept to the minimum. People need job security,so local councils should train and employee people	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There is already a shortage of additional support provision in West Lothian. Support for neuro-divergent pupils and those requiring mental health support must be a priority when planning these savings. All teachers need to be up skilled if inclusion is to work.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The Council needs to make savings. My concern as a Teacher revolves around getting adequate time to train to use new technology effectively.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	In the context of savings required and reflecting that Schools are such a large element of the council's budget, this saving is supported.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	this sounds like a good proposal for education and pupil support.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Why wait. Just get on with it now	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	We have to move with the times and implement the required changes to increase the level of service	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Great idea, reduce time off school and increase psychological help for supporting pupils and parents.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Better internet access and ict needed for this!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Quality in education delivery is very vital than it is to other areas of the administration. It is the next generation and the knowledge potential. So it is important that this cost reduction/saving does not compromise on the quality.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am sure there are people in the community who would volunteer in schools to cover any staffing issues.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	3rd party's will this not increase costs ?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	More than happy with this idea and looks like it could be a big cost saving exercise compared to others!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Seems sensible	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Anything that cuts down current waste / duplication must be welcomed. ;	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is a good idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	That's very good I'm.halpy with that	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I agree with this proposal.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This would be amazing the additional support and extra resources.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Sounds good though very vague (as are most points in this survey)	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

Modernising our council	1D Allocation of School Resources	Reasonable proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Reduce anything that you can	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Yes,	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	No objection	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agree although more detail required	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Great savings doing fantastic	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agree with this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Makes sense	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	good move	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Sounds reasonable	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Great!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Sensible proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	"It is proposed that the model for determining devolved school resources is revised further to identify opportunities for more efficient service delivery"..... aye ok..... so budget cuts directly to schools- say what you mean please! Greater use of technology to support and deliver the curriculum - LOL out loud! aye if your west calder, winchburgh or sinclair- my daughter's school cannot even get a new bulb for a smart board projector- come on- who do you think you are kidding. To even suggest "will enable the council to continue service provision." is an insult to the intelligence of west lothian's parents and pupils. Utter lies - it is not going to be possible to continue to do much with a direct 5million saving coming from school budgets- live in the real world please	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I would just like to comment that I don't envy the Council having to make these cuts and they will not be popular. It would be worse if Scotland was Independent!!! I cannot believe the state of the country just now under Scottish Government. If they would concentrate on the day job!!! I am very depressed with this consultation. If cuts are needed then so be it. IO know WLC are looking aheads but what a mess!!!!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Sounds like a reasonable approach.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Sounds sensible	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agree that school resources need to be targeted for efficiency. And schools could do a lot to improve their green credentials by stopping printing and making better use of all the digital technology they have had made available to them,	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Strip this back to the minimum levels rather than go above and beyond.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	We need to make sure that using private contractors is cheaper - councils and governments don't always get the financial deals	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Seems reasonable although I would have thought that this would have been already happening.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Families are under increasing pressure to provide pupils with devices for AAL. If the focus moves to digital delivery the council has to provide the resources in order for this to be an efficient way of working.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Remember that teachers are there to teach not administer.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Using technology to deliver the curriculum more effectively, and with reduced travel could work well. Learning has been gathered through the use of Teams to deliver teaching through COVID, and this should be built upon. Ideas such as one teacher delivering to two classes of children via video link, supported by support staff in two classrooms could work well.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	A very large budget- this is a fair reduction level	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Good idea.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Just achieve the saving.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agreed - schools should be treated no different to other council services. They need to take a fair share of the budget reductions that are required	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Great.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I agree with this proposal if it starts in last year of school	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Very good idea.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Again technology has its place.; Basic skills of reading writing and being able to spell without using Google would be good.; I think more resources/funding should be made available for schools.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Using digital technology in school is good.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	I guess the only comment is that hopefully these savings won't impact on the quality of teaching	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Reduce support staff	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	I agree with greater use of technology to deliver curriculum however I do not agree that the parents take the charge for this. Many children are having to use their own devices in school for their class work or research.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Support is available for families without access to suitable technology,
Modernising our council	1D Allocation of School Resources	This proposal is good as the use of technology in education will better help children with learning whilst preparing them for living in a society where technology is at the forefront of everything we do. Changes to resource allocation should also help deliver a more targeted education.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Any negative impact on the education of school pupils will not improve their employment opportunities or their further education. I do not agree with cutting core or support services. Delivery of some core services by better digital delivery will be a good use of investment. ; If children are and will be the future they deserve the very best.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I agree that staffing for pupil support is more than is required	1. The respondent advised that they agree with the proposal.	Thank you for our comment.
Modernising our council	1D Allocation of School Resources	The education system has been needing modernised for a long time, this could be a positive if again done properly	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	There's not enough staff or resources in schools as it is.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	This is an area I have experience of having led digital transformation at **** (redacted) in Falkirk and now Digital lead at **** (redacted); We are very fortunate in schools to have free access to digital technologies through the Glow intranet. I have seen digital technologies support and enhance education and allow St Mungo's to move into remote learning with much less disruption than I saw elsewhere. At Linlithgow Academy we have invested in staff development and additional devices. Staff are enthusiastic to embrace technology and the increase in productivity that would result. However, we are constrained by a network that cannot support a digital approach. Wireless Access Points installed in the school months ago have yet to be switched on. Machines connected to the local area network are failing due to their age and are connected to the network to points in the wall that are regularly prone to failure.; We would like to adopt a BYOD policy but cannot do this due to poor WiFi. Pupils cannot access vital learning tools eg immersive reader and therefore require teacher/learning assistant time. Teachers cannot teach effectively using digital technology and therefore cannot improve efficiency and effectiveness and spend time on other duties.; There needs to be an investment in network infrastructure, additional devices for pupils without their own device and staff training. Although this is not an immediate saving it will lead to savings if rolled out effectively and as a matter of urgency.	1. The respondent advised that they agree with the proposal.	The Council is supporting access by all pupils to digital resources through appropriate technology.
Modernising our council	1D Allocation of School Resources	DSM seems to be used for a lot of "nice to have" works such as decoration and flooring so there may be an opportunity to reduce the current spend. However, given the cuts in other budgets (both capital and revenue) a lot of schools are going to look terrible very quickly and not particularly inspiring or attractive places to learn.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Devolving decision making is welcome as it is the schools themselves that will know their requirements. Move away from 3rd party providers and bring services in house.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	The use of IT in school might engage kids more	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Yes save but what's the cost of putting this in place	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	So long as the level of service and support is unchanged this is fine.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. It is the intention to maintain high levels of service and support.
Modernising our council	1D Allocation of School Resources	Makes sense, as much as possible should be provided in house	1. The respondent advised that they agree with the proposal.	Thank you for your comment.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	There are too many managers/high level practitioners in Education (and possibly in other sectors of the Council?). These are a very expensive resource and can be ineffective due to the motivation to justify their position/compete with/confusion with other High Level Teams becoming a primary focus rather than that of truly supporting their real rationale/purpose.; For instance - do we need as many position holders such as Pedagogy officers, Equity and Excellence Officers, Health and Wellbeing Officers and Inclusion and Wellbeing Officers - do these overlap/compete? Shouldn't we invest in "in the classroom" roles which are dedicated to supporting children more effectively in schools?; How many of these positions are PEFunded - is there an inequity here - there should be more "on the ground" staff to support the closure of gaps and learning needs rather than "fly over" staff who focus on data and policies quite far removed from reality? Covid has created a real problem in terms of learning gaps and challenges around learning behaviour, emotional and social issues which are affecting all children drastically in schools today more than ever before. Is there an "Emperor's New Clothes" culture developing? Are we truly focusing on Getting It Right For Every Child or have the different lenses and the deep dives and the chiming obscured our vision and attention?; Invest in support staff instead - they are a very necessary element of effective learning and teaching.; Use the community more - much more!;	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Pupils and parents evolved and embraced the changes to learning during the lockdown. I think that this was a huge learning curve for many teachers and support staff in schools over a short period of time. ; The learning from this should not be wasted as digital and technology will play a huge part in our current and future young people's future lives and careers, we therefore need to ensure we are equipping them with the digital skills, training and education to succeed in the current and future technological society they will be part off.; We also need to ensure that we provide our staff with the correct digital skills and training to support our young people to become strong, confident learners with digital embedded in their education and learning.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Agree, need to look at resources - shouldnt be input driven (e.g. teacher numbers) but focused on the priority of attainment within the parameters of reduced resources.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Although I agree with most of this I feel admin and support staff are a vital part of the education system and as such should not be reduced. Changes to education services must not have a negative impact on our young peoples learning or wellbeing,	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Yes - as long as this is done through efficiencies not service reduction	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	This sounds really interesting. I would like to be updating on these proposals if possible. I was chair of the School Board at Dean's High School a long time ago now but I like to know how the changes will take place. It is a shame that we still have denominational schools we should try harder to have schools being integrated and save more money.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. The provision of denomination schools is covered by specific legislation.
Modernising our council	1D Allocation of School Resources	Sounds like a plan that any modern business would implement when there is a budget deficit. WLC should be no different	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	This should be done but not at the detrimental effect on the pupils	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	As long as no online home schooling is involved. Parents have jobs to go to.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Home schooling is not part of this proposal.
Modernising our council	1D Allocation of School Resources	If services are maintained on a more efficient way, then fine.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	The focus should be on outcomes and attainment so I support looking at savings in this area, including reducing teacher numbers. The scope for savings in the pupil equity fund should be explored.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	I agree with this proposal from senior level onwards not for primary aged children	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	I agree as long as it's senior level and not primary	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Agree schools need to contribute to budget cuts	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	As long as the staff have the appropriate qualifications and administrative abilities to provide the service and not on just ad hoc basis because you are already in a post.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	I would stop funding events such as Advent Fayre, cut management roles, get school deutes to take classes (or cut their numbers), raise car parking prices	1. The respondent advised that they agree with the proposal.	Budget reduction proposals include reducing management and devolved school budgets which fund promoted posts.
Modernising our council	1D Allocation of School Resources	With the level of savings expected, and the level of council funding that is allocated to schools, I do not see how this can be avoided. Though it clearly is a risk to education outcomes.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Use technology to give young people access to excellence and aspiration. Too much mediocrity in the classroom destroys ambition and enterprise in this country.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	As long as the kids benefit from what is going to happen and not job cutting costs that don't work	1. The respondent advised that they agree with the proposal.	Thank you for your comment.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	That's a great way to help children and families especially in the current situation with cost of living they need all the support they can get	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Don't know enough of the detail to comment, though the principle of developing budget to the schools sound on the surface desirable as long as the result helped closes the attainment gap.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	It's about time the ring fence around the education budget was lifted so that savings were introduced in line with other services have had to take.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	As long as the childrens education isn't going to be affected	1. The respondent advised that they agree with the proposal.	Thank you for your comment. The intention is to continue to provide high quality education.
Modernising our council	1D Allocation of School Resources	This is amazing schools need good resources to support children with all different learning needs and abilities	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	1.Online session/vedios for support kids on homework and other learnings so it's easy accessible and not time bound for kids and facilitators.;	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Any increase to additional needs provision us welcome	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	I would be happy to see this saving being made through beneficial changes/adaptations to resources for the children and their learning. As long as overall education for all pupils wasn't compromised.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Support a viable directly to students must not be disturbed and quality of education must not be compromised	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	As long as the education of the children is not adversely affected then yes go for it.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	As long as there is sufficient funds for schools to access additional support for specific pupils. This will enhanced their outcomes with minimal disruption to other pupils.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	I think this is fantastic idea. Our education system is not fit for purpose as it is far too focussed on academia and does not recognise that many of our young people will never be interested in pursuing academia but would still wonderful contributions to economic life through vocational employment. Young people who currently get access to this tend to be ones who have already displayed behaviour that is too challenging or disruptive for mainstream secondary school so there is stigma attached to this kind of learning opportunity. How about looking upon this as a positive learning choice, focus on trades, customer service, administration & information management, care industries. I feel we send a message that if you are not academic and likely to go to university you are ot really worth the effort. We seem to put our resources in the top tier of young people (academically) and the bottom tier (behaviour challenges and learning ability) but what happens to the young people in the middle who are neither academic nor challenging. In order to be a "teacher" you must be recognised as this by the General Teaching Council however West Lothian Council employ a vast amount of staff who would make just as meaningful a contribution to these young people as a recognised teacher. Young people should be accessing more vocational options, smaller group learning opportunities all of which can be delivered by competent, qualified and specialised existing employees who happen not to be teachers.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	could be a good idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	by making schools more responsible for the costs and budgets, greater use of technology to deliver the curriculum and changes to administrative and pupil support this would be beneficial. Pupil support could be streamlined as could administrative roles by consolidating admin tasks it could reduce number of hours required	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Digitalising schools and making sure that inequality doesn't arise from that is an excellent goal. Do not sacrifice key in-school services such as mental health professionals or family link workers because that adversely affects the children.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Could be a good idea depending on how its done	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Agree leaving schools to decide what is needed most	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There have already been significant cuts in this area and as it is one of the Council priorities, I feel that this should be reflected in the budget allocation. Pupil support for children with additional support needs is already stretched.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I think the fact you think you can save 5million on this means it's highly unlikely that this won't have a detrimental impact on education. There is no way you can save that much money through efficiencies without it cutting staff or funding in real terms. There is a distinct lack of detail here that i think means a risk to service provision	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment, which will be considered during the decision making process.
Modernising our council	1D Allocation of School Resources	Schools are already hugely underfunded. Why make that worse.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools have suffered since 2008 and the austerity programme, coupled with the impact on schooling due to the pandemic, so reducing resource allocation is not investing in our futures. Absolutely look at where there is waste in the system, and reduce administrative burden, but substituting technology for teaching is a backwards step. To use an example my older son had his first 2 years of university on line with the majority delivered via pre recorded lectures. He would state he learnt a lot more from The few F2F tutorials he had, as this was much more interactive, allowed discussion and Q&A. The same principal applies at school level.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As a parent with children in school , taking away any staff is ridiculous . There are so many ASN children in school requiring support which a single teacher cannot provide. My child has 5 ASN children in his class , he has faced huge disruption for 2 years. Schools need more staff	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	All pupils must received the correct level of support for their needs. Robbing services from one area to apply to another is not acceptable	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The treatment of pupil support workers is also shocking - stop the temporary contracts and offer them permanent jobs. Invest in pupil support! If more powers are devolved to head teachers then perhaps the heads of education should take a reduction in pay - how do we justify salaries of £100k a year?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Pupil support workers benefit from the same good employment practices and policies as other employees of the Council.
Modernising our council	1D Allocation of School Resources	I think that schools need more pupil support provision and think that there should not be cuts made in this area.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I'd be interested to know how you plan to alter pupil support and cutting numbers does not help pupils.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Not a chance, schools are already vastly underfunded with extremely stretched resources as is. This council is failing students every day with the amount of cuts that have already been made, anymore would be signalling even further that money is more important than the education of the children in this authority. There are barely enough pupil support workers in school as it is to support the ever increasing needs of students with additional support needs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Hard to justify savings here as this directly impacts educational provision for future generations. Would be disappointing to see provision lessened and would be more appropriate to cut services in other areas to balance	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Concerned about any reduction in pupil support staff given the level of additional support needs in our schools.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are already under-resourced as it is.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Third party providers are inefficient slow and change there subcontractors so often much of the time is spent going over the same details with different people	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Subcontracting arrangements are covered by legislation and out with the influence of West Lothian Council.
Modernising our council	1D Allocation of School Resources	I have concerns that will be a real step backwards and I am not sure the proposal will be aligned with GIRFEC. This is a generic statement but the finer details should be provided to the public for a more informed response.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I think it's very important that our children are educated correctly and to a high level. They are the future of our nation. We can not "skimp" on education.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	I strongly disagree with this proposal, schools and resources have been cut FAR TOO MUCH over the last few years and the young people of West Lothian are being negatively affected far too much. Digital Learning is a JOKE! Young People were affected far too much during the lockdown period, and having 2 of my own, seen the detrimental effect this had on their education and subsequently their exams - THIS NEEDS REVIEWED!!! STOP REDUCING THE OPPORTUNITIES OF YOUNG PEOPLE - THEY ARE OUR FUTURE!!!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Removing vital services and reducing in school support through a cut in support staff and partner agencies will make it extremely challenging for teaching staff to deliver an equitable curriculum, meaning the needs of all.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Following the interruption of education across 2020-22, it is imperative that the well-being and Education of our learners is protected and that schools are resources well enough to ensure this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil support staff are essential to providing a good learning experience for young people so I would be against cuts here. 'resources to deliver additional support in schools' is opaque and again I would be against cuts that enrich the learning experience for young people, especially those who don't have access to extra curricular opportunities outside school.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is one area where we should never be cutting corners. Our children are the future and they deserve no more cuts. Use of technology to deliver curriculum sounds totally unacceptable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The school years are the foundation for our next generation and funding cuts should be kept to a minimum in these areas to provide the best level of teaching and support for all levels of capability.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I do not think education services should be reformed in anyway by digital, it is socially fundamental that children continue to experience social interaction with their learning. Whilst it is important to use digital as a tool for learning it should not replace humans in the form of teaching and learning	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	There will continue to be an appropriate mix of face to face and digital learning to support young people but also to prepare them adequately for the digital world
Modernising our council	1D Allocation of School Resources	As an ex teacher, schools already have devolved management structure. Pupils are way down list of priorities its all about ticking boxes and staff feeling undervalued. Again above statement is just more elaborate waffle	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are already running with limited resources they need more not less funding.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	This would align with the contact time across several other authorities.
Modernising our council	1D Allocation of School Resources	Would strongly advocate against cutting pupil support or in class assistance any further. This is already stretched beyond compare in WL's schools and is absolutely vital; In the current societal climate.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools struggle to support pupils as it is without cutting teaching/support staff.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Concerns include - An increased demand for support for children and young people post covid and this planned reduction outlined above. Significant concerns about reducing support staff who we need to safely organise and manage breaks, lunches and meeting learner needs. The ongoing impact of budgets decreasing but staff with permanent hours and contracts not changing - we are already in some cases struggling to manage this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This should not be touched, do not try and make savings on our future generations.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School budgets are already stretched too far. Reducing staffing of teachers and additional support staff will result in poorer outcomes. There's already a problem with supporting pupils with additional difficulties and a complete lack of behavioural support, as it's been eroded over the last 10+ years. Schools are struggling already to provide good outcomes for the least able. Any further cuts will only make things worse.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	It's not administration or pupil support staffing arrangements that the council should be revising but janitorial services. Does the council know that they pay janitors to do nothing aside from opening and closing schools? Where I work the janitor showers in work hours, watches non work related items on line, disappears for hours at a time, sits with other janitors chatting for hours at a time, takes a free lunch and leaves early. Nothing is repaired except with a roll of duct tape. All other jobs are out sourced; admin staff are more than able to make these referrals. The council should consider having a central pool of janitorial staff that can be called on by cluster schools rather than having one from each school sitting around.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Oh my god, could you waste any more money and resources? A THIRD party? You have the people who can help you already employed...Contractors just waste money not save it. Have you not worked with OTHER councils re vest practice?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Cuts to schools, not good. Remind me, what do we pay taxes for?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School education is very important, the need of additional support is very high at present. I feel that education and members of staff should not even be added into the consultation. I feel we are failing our children of the future with this idea.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1D Allocation of School Resources	Reductions are likely to hit poorer families more and reduce the quality of schooling. This seems like a poor focus for a major cost saving approach.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	From what I've seen of the APSW who are centrally employed and put into schools to support ASN children, they don't even know the basics let alone advanced aspects of the job! They do much less than the PSWs at school and even end up not supporting the ASN children as they have no experience and do not know how to deal with them. This means the APSW ends up in classes with no ASN children whilst the school PSWs have to support the ASN children!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Talking about BSMS, ours is almost AWOL. Only visits in the days before the return is due to finance. Which is once a term! Offers no Support to our school at all. Never answers the phone and rarely replies to emails!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Class sizes need to be maintained at a manageable level to ensure all children receive an adequate education, oversized classes have been an issue for many years. In addition at my son's school they had no English teacher for over a year and then they wonder why kids have poor exam results..on top of a pandemic?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	A lot of savings to be made which can only mean less resources available to support the pupils learning. Is this likely to have a greater impact in schools in more deprived areas that require greater resources and support?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I do not agree with school resources being cut further. I feel that schools are already struggling. My son has additional support needs and attends a mainstream school. He has already been identified as needing extra support in classes and due to staffing the school have informed me that they do not have the resources to provide the support he needs. He does not meet the criteria to be in a specialist school but yet cannot get the support he needs to continue in mainstream. I know that any cuts to school funding will most definitely affect my son and other children in similar situations. The schools already do not have enough funding so I do not understand the logic to cut this further. I worry about my sons future because he is not getting the support he desperately needs. Furthermore this is our future generation and there should be more funds invested in our children's schooling especially after the covid pandemic. I do not support a cut in school funding at all and feel that savings could be made elsewhere	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Who in schools have the knowledge and experience to control devolved budgets. Tried before it didn't work. Extensive training will be required. Increased technology in schools is fine, but lack of funding means it goes out of date, state of the art schools don't exist because technology moves on. Contracts with IT providers may be a solution to this problem.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Maybe ask the schools what they are needing instead of using an out dated model that may work for one school but not another. What would a third party know about the true requirements individual schools are needing rather than corner cutting to save money	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School services are already on their knees and the young people of West Lothian deserve investment not cuts!! The council MUST ensure no cuts to education and school services or we are simply robbing our young people of the best possible education that can be delivered	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Does this imply schools will be more responsible for their own budgets? Will we see them asking parents for financial support? Or going into partnership with outside agencies?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Streamlined easy to access education resources would save money. Devolved School Management processes speeded up and modernised	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	You should not be looking to save money here. City of Edinburgh school children aged P5-S6 are all getting an ipad this week. When are West Lothian children getting one? What is a Devolved School Management funding model???	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I would be concerned about changes within school that would be of detriment to equal learning opportunities for all learners. This has the potential to exacerbate inequalities within our communities.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I think our children have suffered greatly during covid and to impact their education any further worries me greatly. Why would you not be ploughing all the resources available into the care and education of our children	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Pupil support should NOT be reduced. Office support is vital. Be creative & (again) look at top tier management positions rather than front line vital staff	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Education should be a priority and surely more efficient service (cutting services) is detrimental to the needs of the teachers and pupils	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School children have had a hard enough few years without further cuts. Resources need to be kept to tackle major issues such as bullying and bad behaviour - WLC is failing on this in our experience.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Absolutely not. The kids have been through enough and need consistency in staff and education.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupils in mainstream Secondary schools have practically no support if they have additional needs. Cutting staffing support and teaching time to these pupils isn't helping them to achieve and raise their attainment levels.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Will there be cuts to ASN schools staffing. The current levels aren't sufficient enough to provide the support the children need. Staff are leaving to get jobs with better pay as the current pay isn't sufficient in the current cost of living crisis.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School funding is already stretched. There are increasing numbers of children with ASN and support is already often diverted from their needs to cover staff absences. I find the proposal unacceptable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	More information is required on third party provider, schools are already stretched in the staffing and services and all attempts to impact schools should be minimised at all costs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	If you are serious about cutting the education budget then show some balls and end the provision of separate Catholic schools. Whereas there is a legal requirement for Catholic schooling there is no requirement for this to be provided in separate schools.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Again, no detail. Reads like your plan is to reduce support for additional needs pupils by replacing staff with iPads and other technology. This Council administration seems determined to disproportionately impact the disabled community across all services. Not acceptable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Nope. Leave schools alone. These kids will be paying into your pension pot, they have suffered enough over the last few years, reducing school services will have an even worse effect on them.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are already staffed to the minimum. Support staff are difficult to employ. Lack of places in specialist provisions put huge demands on schools with no support given to already stretched staff. Schools cannot deliver what is expected with less support.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I hope this doesn't mean a cut to pupil support staff means less support for the children who need it. My Grandson doesn't live in West Lothian - but he has Autism and help is required for him to remain in a main stream school.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	WLC have already cut provision for support for learning to a level where it barely exists and many children who need extra support (especially after the last 2 years of home schooling) are not getting the teaching/ learning necessary to bring them back on track. WLC appear to have adopted a one size fits all mentality for education despite historical evidence that exists to show this doesn't work. Any reduction in teaching staff and/ or support staff will diminish the quality of education provided and further 'widen the gap'. Right now WLC should be investing in education not seeking to asset strip the engine room of our children's future.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Again, I think there needs to be careful consideration of how this goes forward. Additional support in schools through Support for Learning Assistants and Pupil Support Workers are there for a reason. Their wages are already very low for what they do but they provide fantastic support to teaching staff who would struggle within classes trying to teach the curriculum when they have young people with disruptive behaviour due to ADHD, autism and various other needs. Teachers cannot spend time individually with each pupil to get them through essential curriculum work so support in classes is essential. Also, depending on what is meant by greater use of technology to deliver the curriculum, I think replacing people, ie teachers with technology to get pupils through parts of the curriculum is not a good way forward as pupils need that interaction with teachers.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This sounds like more cuts?!? We should be investing in schools not the opposite!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	To decrease pupil support at a time that the mental health of our young people is at crisis point is a disastrous decision.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Schools now are finding that there is a massive increase in pupils with additional needs with a large added pressure to teachers. This means that it is harder to support both ASN pupils are other pupils in the class not receiving the same level of support. More funding for Pupil Support Workers.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	What changes to the admin and support to staffing arrangements. If this means cuts then who is going to help pupils with the new technology etc especially if teacher time with pupils is being reduced?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There is not enough support in school as it is. Composite classes in my opinion don't work. Why does there need to be such top heavy management in schools. I believe in digititation but children should still have books home with them and not online.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	If this means following a similar route to English schools, where each school has its own governors, then I agree. Why should the council make broad decision which do not suite each individual school.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am a parent of two children with additional support needs. They are both part time at school as they can't cope in mainstream and can't get them into a more suitable school due to funding.; There is not enough support in the schools they are in and their education is suffering greatly, I am aware that this again is due to lack of funding and staff resources.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I very much hope this does not involve reducing PSW allocations - we need more support staff in schools, not less.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	It is unclear how such devolvement will reduce costs whilst maintaining services - there is a lack of PSWs and admin support available at present - indeed there is a lack of special support for children and young people with severe needs. If this will essentially be a "shifting" of funding pressures to a school management level, then I do not agree with this proposal.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Third party providers have constant waiting lists and are over-run in their own establishments and are therefore not providing a service currently. This will not ensure that we are getting it right for every child and I cannot see how it will provide opportunities for efficient service delivery.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I was involved in PC at a local primary a few years back and HT had to be creative to stretch her resources then. I can't imagine there are £5m savings you can make without huge impact on schools pupils and staff. This is a sorry suggestion	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are already struggling. This is not an area that should be being stripped further.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Cutting pupil support may back fire in costs due to young people failing at school/non attendance, causing problems in adolescence and unskilled or unemployable young adults.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	It is very short sighted to reduce money for schools. There need to be many more pupil support assistants and smaller classes. There are very few classes without children with additional support needs and behaviour issues, many classes have a high number of these children, who have no support, which directly impacts how the teachers can teach and the pupils can learn.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Further funding for schools is needed not a reduction. Children have a 2 year gap from covid that is still to be addressed	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Would not want to see ANY cuts to my child's education provision when resources already at an all time low.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil Support Workers are essential resources for school. By removing or reducing them further (as previous budget cuts have forced schools to do) you are truly impacting upon the day to day positive experiences for all our children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Teachers are unaware as to how they can 'utilise resources' currently, nevermind with more cuts. Whilst most teachers are in agreement that teaching the curriculum through digital technology is helpful, the reality is that children do not have any access to working wifi or digital devices to be able to do this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	More teaching assistants to help writhing the class rooms as teachers are struggling	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School resources are already severely stretched and only a bumbling buffoon would attempt to further cut spending to the education of the next generation. This should be increased, not reduced.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	There is already poor support in schools. This is a necessary function and should not be reduced!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil support staffing needs to be enhanced - not streamlined. Schools need full time admin.	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Staff are already spread too thin within schools and are highly underpaid. This would be detrimental for both pupil attainment and staff morale.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Section 1 D essentially says that West Lothian council are cutting expenditure in education. Our children deserve better not less !	2. Modernising our council	1D Allocation of School Resources	No amount of I.T will cover the needs of children who are presently receiving extra help from PSW staff, nor will teachers be able to keep up with admin especially when waiting for photocopiers etc. And what happens when the internet goes off?! Who will deal with the disruptive children?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Why would anybody think that saving money from Education could be a feasible option when Scottish Education is already on it's knees from years under the same Government. Are we really going to penalize the future generation for our mistakes???	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The schools need more money, resourcing and support, not less. There were 3 council workers cutting hedges in my street today, they had been trimmed recently (I can see a saving there). Stop cutting grass and just let it grow in vast majority of places.	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There CANNOT be any reduction to the number of teaching staff, PSW or school admin. We are a completely stretched service and cannot handle any less bodies in the school building than we currently have. Everyone plays an essential part and without them it would be incredibly detrimental to the education of our children. There is no way we can maintain let alone raise attainment with less staff.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Modernising our council	1D Allocation of School Resources	The quality teaching delivered during RCCT time cannot be squeezed into the remainder of the school day. It is already crammed enough. Education and attainment will suffer without those 2.5hours of allocated time. Staff also work better with long stretched of RCCT. 15 minutes here and there does not give staff enough time to plan quality education.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	PSWs are essential parts of the support and provision of education of our children. We CANNOT cope with any less PSW hours.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Third party providers seems a ridiculous suggestion when you have a wealth of highly educated, highly motivated and experienced teachers at your disposal. This saving if £5 million is awful. DO NOT cut school funding.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Technology is becoming too much in schools everything too much on computers or phones. Schools very much need the support staff for the teachers as there is a lot of children need extra help and it's difficult for teachers to give as much time as they would like with a big class. More support is needed especially for children with additional needs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Cutting £5 million from schools sounds like a huge thing to do! Especially as the restructuring of management was only around a £500,000 cut. My children's school already has a tiny amount of support staff and my son doesn't always get the support they feel he needs which they have often said was due to staff issues and lack of resources. I'd hate to see even more resources cut from school.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	While I understand that it is important to make sure the education services are efficient, cutting funding to such a vital service does seem harsh, especially pupil support and help for those most vulnerable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School resources are already stretched to the maximum with teaching staff spending ridiculous amounts of their own money on supplies in order to deliver the high quality, engaging lessons that children deserve. There are not enough support staff in many schools and given the high level of additional needs and EAL children in many classes many staff are close to breaking point as it is without reducing or 'streamlining' this any further. You cannot expect schools to continue to raise attainment, parent children and prepare pupils for the wider world while constantly reducing the support and resources available. While digital learning clearly has it's place it does not replace experienced and passionate teaching and support staff.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Support staff in schools are VITAL! due to ever increasing numbers of children who NEED additional support....this is a area where more not less public cash is required..the rights of the child must be respected and implicated.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	We need more staff in schools along with smaller classes. I can imagine the cuts being suggested are to have less teachers & bigger classes. Technology in schools is not allocated fairly so a lot of schools have very few fully operating laptops, computers & smart boards. The servers can't cope with the up to date programmes!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I think there are better places to cut £5m rather than from our future!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Reduction of school funding should be kept to an absolute minimum. Education is fundamental. Further digitalisation of the delivery of the curriculum is not recommended and could be damaging to our next generation. Disagree with proposal.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Technology has its place but children still need teachers and PSW to help them access this as well as having interactions with other children and adults.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	A re-alignment of places with demand.
Modernising our council	1D Allocation of School Resources	We are already stretched to breaking, with class sizes too big to teach and not enough support staff for the ever-growing number of ASN pupils with SERIOUS behaviour and learning difficulties. MORE money is required in education, not less.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	1.) Currently we already have no support offered for students who have ASN. This means not only is that pupil not receiving equity in education, but disruptions from this have a huge impact on the learning of all students. This is already misaligned with the Rights of the Child. Further cuts will create an environment in which all students suffer, resulting in school becoming a baby sitting service.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	2.) We currently have >10 netbooks to furnish a department of 3 subjects dealing with more than 150+ seniors (not even thinking of the junior class loads). It would be AMAZING to have the appropriate technology, but in order to do this, the entire school would have to be updated to include actual wifi connection, powerstations and appropriate desks in which to use this technology. Also, as we learned during lockdown, school is more than something that can be thrown 'on line' it is about building relationships. The loss of these relationships has been detrimental to the growth of 90% of our returning students. Choosing to cut any support or teaching staff is at the least irresponsible, and at the worst demonstrates exactly how little the education system is respected in this country.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	technology can never replace staff effectively in a school setting. We need more teachers and support workers, not more technology.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Technology does not deliver the curriculum- teachers do!!! Technology can support with this but cannot and should not take over the job of teachers. We need more, not less support staff. We have 33 percent of pupils in WLC with ASN, this figure is growing each year. We need to be improving staffing ratios to help with this, not cutting them.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I disagree with reducing staffing levels in schools, I feel school staff are often underpaid and undervalued. Teaching (and working with children in general) is demanding and often not acknowledged. I feel schools are understaffed and often a great deal of "teaching" can fall to parents and guardians. All children should be afforded equal opportunity, their success should not depend on how involved their parents are in their education.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Would not like to see any redundancies through this or a reduction of education provided on any level.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	All schools should be receiving more pupil support staff and permanent contracts for teachers, not reducing.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Reductions in staffing in schools would lead to significantly reduced quality of experience for children. Relationships would suffer and I can imagine existing staff would bear the burden, leading to higher levels of burnout and ill health in an already stretched service.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I personally feel that it is currently a struggle to provide additional support to pupils with the funding and resources we currently have and feel it would be detrimental to cut this further. Use of technology to deliver the curriculum throughout lockdown was not effective and pupil engagement was poor despite efforts to make it as accessible as possible. The government confidently promised schools funding for technology which is yet to be seen so whilst this theoretically sounds great I'm concerned that practically it will not be possible. I'd be open to learning more about this though.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The labour-Tory council coalition has some serious questions to answer if this goes ahead.	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	We cannot reduce the number of PSWs in schools. They must be retained if not added to. Schools do not function without these members of staff.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil support is needed in schools . Teachers need more support not less.	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Major concerns; Schools are already underfunded and staff overworked leading to high levels of stress and I'll health; We must invest in our education system at a time when families are relying on schools even more to provide a safe, warm space where their children receive quality education to prepare them for their future jobs. To cut funding is inconceivable at this time and I urge you to reconsider such proposals	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I do hope this means providing more support staff and not taking them away, because the latter will be hugely detrimental to all involved, the teachers/practitioners, the rest of the children but most of all the children requiring the additional support. It is not child centred practice, it is not equity, or anything else that GIRFEC, Building the ambition, CFE the UNCRC, and all other legislation or documentation instills in practitioners to strive for. It just makes everybody's job harder and therefor is worse for all the children. Support staff are invaluable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am wary of any increase in technology - what lockdown has shown us is that there is a need for more in-person and face to face teaching and support required, not less. Furthermore, pupils support services are already chronically understaffed, underfunded and overworked - any cuts to these areas would be tantamount to educational devastation.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	If the schools want this then they need funding to ensure all children are supported! Not all parents have the money to support this! This current climate leaves many families struggling to support their children at home never mind now being asked to send devices into school!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I would be very concerned if pupil support staffing resource were to be reduced. This is vital to enable children to achieve their potential, enable wellbeing including positive mental health and reduce inequalities. Any reductions would limit children's life chances at a crucial time, store up mental health issues and increase inequalities, measures that would incur increased costs in the future.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	To my knowledge when you bring in outside help it costs considerably more than hiring staff to do the work which is needed. If outside help is required then obviously positions are available within the school to help pupils, more effectively too as they are in school. Schools are already crying out for support staff but you are gradually getting rid of them so pupils do not get the help they need when they need it. Early intervention at an early age is more beneficial than waiting for outside help which is not always available as they will be spread even thinner if they have to provide help to all schools.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Staffing in schools is at crisis point. There are not enough staff or allocated hours to support the rising needs of our pupils. Inclusion policies must have the necessary support, resources and staff in place, this needs increasing significantly rather than cut. There is already an impact on our children as result of previous cuts and further cuts in this area are beyond comprehension.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Greater use of technology will require more investment in technology in order to be successful. Investment in online resources will also be essential. Administrative and support staffing are already stretched and ASN pupils require more support staff allocation. Reducing costs through school staffing will be entirely detrimental to children in West Lothian.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Concerned about making changes to pupil support - what areas would be reduced and what will the impact on our learners be? Arguably we have some of the highest levels of deprivation and additional support needs - reducing support levels is a backwards step at a time when the council have already reduced their ASN specialist provisions. Reduction in such supports will only further exacerbate the psycho social challenges our young people face. The impact of this will be life long and you must carefully consider the longer term aims of such a proposal.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	These cuts will breed inequity in an already inequitable market for our students. Cuts must be made but these cuts must not further exacerbate the challenges we have worked so hard to soothe over the past decade.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Additional support for vulnerable groups is shocking in this area. And therefore reducing the demand for this even more would have a huge impact. Mainstream pupils are supported with many groups, bussed to sporting events, taken on school trips, supported by active schools, given many opportunities. But pupils with disabilities are often ignored. They are not given the same sporting opportunities, additional support staff have little or no training to deal with complex needs. Funding is limited so people are made to feel they are an inconvenience and unsupported. This are needs to be increased, support staff need to have value and all children with additional needs require the offer of the same opportunities to that of mainstream.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As a parent, myself and other parents found that using technology to teach the children did not work. Some children can't learn that way and will really struggle. I found also that unless we sat on our childrens shoulder they could easily not pay attention. I feel that this is a mistake and a chance to go for 'low hanging fruit' by cutting teaching numbers. Childrens education needs more money and support as it has fallen away the past few years not cuts. Scotlands education system used to be one of the best but with all the extra holidays and now proposed teaching cuts our education system will soon be one of the worst	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School funding should be protected above all else. More and more is being asked if teaching staff but without the resources to support them. Mental health in young people will continue to be an increasing challenges and schools will need more help to tackle this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Oh dear, your quest for more technology will only be at the expense of special needs children and disabled children having less school caters and helpers and there are so very few of them at the moment to go round. I know this personally so more finds for carers for children please. £5 million would go a long way for them.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	We already have an unacceptable teacher to pupil ratio at Williamston. Our daughter is not getting the support required due to this and with an increase in housing this will only get worse. The staff level should be increased not decreased	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Reducing admin and pupil support is an mistake. They are paid very little and, without them, schools would cease to function.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I do not think these elements should be linked. We need more support staff in school not less. Schools are best placed to know their needs not third party providers. As covid proved technology is beneficial but human beings and close face to face contact is far more valuable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This would be detrimental for learners to have access to high quality teaching and learning. Additionally this would be worrying as an employee on a fixed term contract in relation to job prospects within WLC.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I strongly feel school resources need to be highly invested, children are already behind and this does not seem to have been rectified. Third party providers may cost more? If funds are reduced in education it will increase other costs further down the line.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Losing more staff from schools is a ridiculous idea as we are already stretched to the limit. This is due to the amount of pupils with complex needs being placed in mainstream schools with little or no support for these pupils. Teachers cannot 'Get it Right For Every Child' if all their time is taken up trying to support pupils who are unable to access the curriculum independently and they have no support staff in class to help support these pupils. Inclusion/Presumption of Mainstream only works if you have the staff to implement it - we currently do not so to reduce staff further will lead to a massive strain on already exhausted teachers. If the idea is to have teachers leaving the profession then this is the right way to do it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	This is concerning. There are already huge differences in funding for schools across West Lothian. Some schools viewed as having high SIMD scores receive scant budgets and resources in comparison to others. Some of our secondary schools appear to be awash with money - and access funding from PEF and SAC budgets. Other schools are scrimping by on very little and are struggling, barely able to buy jotters, pencils and so on. Linlithgow Academy fares much worse in this respect than, say, St Kentigern's Academy in Blackburn.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The scrapping of Autism Units across West Lothian and putting the ASD pupils into mainstream classes has caused extra pressures on pupils, classes, and staff.	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	From working online during lockdown with young people, it is difficult to provide a good level of education through a digital medium - this should be a support. More students also have additional needs every year and they need the support provided by the pupil support staff to be able to achieve and feel safe.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Technology is not currently up to scratch so would not be able to support this movement.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is a terrible idea. Education is the future of our society and is central to social mobility. Children took a huge hit during covid for a disease that hardly effected them, and we owe them more resources not less. Strongly opposed	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There should be no cut here at all. To truly GIRFEC we need continued and actually additional funding. More support staff for our pupils work ASN, particularly in line with the presumption of mainstream and to support those within specialist provisions and more teachers to support teaching and learning in smaller groups within mainstream.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Within education work, the effects of the pandemic has proved so much gap in children's learning and deteriorating secure attachment which is caused by online learning. Children need to learn and to be nurtured at the same time. The classroom is already a hectic job and if all support will be taken away or reduced, what else is left for children's future?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Again this sound like less nurturing approach to education systems.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I do not believe 'a greater use of technology to deliver the curriculum' would be beneficial to the children. They need a qualified teacher present to support their needs when learning in all areas of the curriculum.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Leave schools out of this money saving plan. They need every penny and every bit of support they can get.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This worries me. £5mi is a massive saving which means cuts when the kids need more support not less.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Through lockdown, digital technologies were a necessary to deliver courses but using digital technology to deliver more courses is a step backwards. Pupils learn best in a face to face environment. More use of, for example, the Virtual Campus for delivering courses will lose this interaction,	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This will result in job losses for teaching staff and a negative impact on attainment and equity for young people through having fewer opportunities available.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Less resources in schools....they are limited currently. Some S1 pupils ie West calder high School pupils have had trips and residential whilst st kents s1s have not been given the same opportunity. Not equal fair or equitable. St kents needs investment and travel and residential opportunities for our young people. Make it fairer as its not currently. Remember invest now for the return of the future workforce. This is now highlighted here. I hope to see action. Teaching staff are excellent but Council need to support them as they are not currently.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Most of the schools I know have a huge increase of ASN children due to the Scottish government's inclusion policy so if there are further cuts, this is going to majorly impact the quality of education that children receive.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Also, there is a lot of burnout and lack of retention for teaching staff, especially new staff. Cutting funding further would only serve to increase these issues, causing more staff vacancies and a poorer education for our children. Please do not touch education. This is something I would definitely change my voting oover!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Is efficiency just a euphemism for "we have no money to employ you". The most valuable resource in a classroom is a teacher/ pupil support worker. Removing this and relying on technology will have a negative impact on our most vulnerable learners who are already deprived of 1-1 support they require which has also been removed.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Is efficient deliver another euphemism for a lack of funding. A teacher or pupil support worker is the most valuable resource and to pull funding away from schools which are already resourced well with technology will just put further strain on raising attainment and will mean our most vulnerable ASN learners are deprived of additional 1-1 support they so urgently require.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	this is hugely worrying - school are woefully understaffed and core staff are at breaking point. This is not a good cost cutting measure, it will be unpopular with parents and school staff.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Again, need details not just general jargon!! However, we need to put MORE MONEY into our Education services, not less. We need smaller class sizes and more teachers. Schools are at breaking point, teachers are on their knees already with lack of support and trying to teach an over crowded curriculum whilst dealing with increasing numbers of behavioural issues within the class. More support and not less is required. Far less "Getting it right for every child", we aren't getting it right for any child or adult at the moment. So a HUGE NO to this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	In my experience additional support pupils in schools need more staff allocation to ensure their safety and that of the staff and other pupils in their classes. Agree with other suggestions though.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	How about losing some of the reporting and hyper-metrics that are required so that teachers have the capacity to teach well. And I'm not a teacher - I can see what's happening though.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Schools have responsibility to report on pupil progress.
Modernising our council	1D Allocation of School Resources	Education should be the priority of any government. Reducing spending on the most vulnerable students is a retrograde step which must be halted.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Not all schools have enough tech to accommodate this. Many schools are still sharing devices throughout the schools. Cuts to education usually mean twice the work for teachers to fit everything in (they are already struggling to fit in what they need to do in the hours they have).	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Any reduction of staff would have serious detrimental impact on learners. Again, many schools are struggling without sufficient support staff to enable children to meet their full potential. Primary schools often have many children on the spectrum (and/or other needs) which need 1-1 support, something which they just don't have the staff to cover. This has been made particularly hard given the amount of children who have been unsuccessful at securing a place at a "specialised school" in recent years.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Teachers are still struggling with the after affects of covid. The recovery phase does not simply stop because the council has decided it should. Schools are fighting to regain the respect, educational attitude and attendance they had prior to covid as well as ensuring health and wellbeing, nurture, covering the curriculum and trying so hard to raise attainment all the while dealing with their own, and family health issues/ concerns and raising household costs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There is a requirement for more school resources not less. Staff are under considerable stress to deliver a comprehensive curriculum that is being hindered by lack of staffing and more children being entered into mainstream with considerable ASN requirements. Funding meant for whole school requirements is currently being filtered into providing 1:1 support for children with complex needs which then takes the support from others that need it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This seems a bad idea: 5m less for schools. Have we 5 m of inefficiencies? I am afraid not. I honestly think that you should think carefully about this saving: you are investing less in our future	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Greater use of technology to deliver the curriculum - Digital learning is not a substitute for real actual learning (nobody has a great in depth discussion with a computer and therefore learning is superficial at best.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	changes to administrative and pupil support staffing arrangements - Teachers require more support to deliver Quality Teaching not less PSW's are shamefully underpaid for what the do and cutting back in support workers for education will seriously damage the inclusion policy of the council and the young learners will suffer as a result. These jobs need done and teachers that already work in excess of 45hrs a week may not be able to pick up the slack and you may even find the Council will have a recruitment problem for teachers.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Reducing resources reduces the quality of provision. Reducing resources when ELC settings are open 1140 hours a year stretches provision and learning experiences.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are already up against it regarding budget, so this would be a mistake. Again our technology is already outdated and wifi signal sub par , so this would just secure schools and pupils being negatively impacted further.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	There are issues with the current technology in schools linking with parents/carers so not convinced this will work. My sons have been identified as missing from school when they are in the school building for instance. Logging an absence without a phone call would be useful	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Probably impossible to achieve without impacting the core functions of the schools	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am not keen on the idea of Technology taking over from human input.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Education for all our children is of great importance for the future of west lothian and beyond. Pupils who require extra support are already not receiving this from WLC due to cuts already made in this area. It is a false economy to make too many cuts in this area, as to do so will cause a knock on effect on the pupils whole life, the local community, and of other services such as social care.	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Reduction in staffing could prove to be a false economy with regards attainment and achievement of young people.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Third party support is always a poor alternative.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Definitely not. The schools have been hit hard enough. Teachers run off their feet and pupils suffering no way	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Reducing staff in education would be the final straw in ruining our education system.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools, particularly primary are not coping and are at breaking point. We are understaffed, stressed and failing to meet children's needs daily as a result of current budget cuts as it is. Without our support staff, teachers and resources schools will crumble. Pupil needs and behaviours are becoming increasingly severe yearly as a result of parental stress and mental health, abuse, violence and lack of parental skills. As a result, staff are not coping. We are still expected to meet attainment levels with all of this in mind and this is not possible.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	We are still expected to meet attainment levels with all of this in mind and this is not possible. We need more adults on the ground in order to educate and survive or schools and our children's futures are going to crumble. Cutting budgets for education is the worst thing you could do for our children and staff. We need these human and physical resources in order to meet pupil needs, keep children safe and help them to achieve.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Reducing staff in education would be the final straw in ruining our education system. Schools, particularly primary are not coping and are at breaking point. We are understaffed, stressed and failing to meet children's needs daily as a result of current budget cuts as it is. Without our support staff, teachers and resources schools will crumble.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil needs and behaviours are becoming increasingly severe yearly as a result of parental stress and mental health, abuse, violence and lack of parental skills. As a result, staff are not coping. We are still expected to meet attainment levels with all of this in mind and this is not possible. We need more adults on the ground in order to educate and survive or schools and our children's futures are going to crumble. Cutting budgets for education is the worst thing you could do for our children and staff. We need these human and physical resources in order to meet pupil needs, keep children safe and help them to achieve.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools must receive an increased budget to meet the needs of all learners. Money must be used to enrich learning and technology must not be used to replace teachers.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools must receive an increased budget to meet the needs of all learners. Money must be available to enrich learning, technology must not be used to replace teachers. Pupil support workers are essential and are frequently used to support the most vulnerable children. Without them, learning would not be as effective.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools must receive an increased budget to meet the needs of all learners. Money must be available to increase the technology available to enrich learning. Technology should not be used to replace teachers. Pupil support workers are crucial to support the most vulnerable. Learning and teaching will suffer and attainment will not increase.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Schools must receive an increased budget to meet the needs of all learners.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools must receive an increased budget to meet the needs of all learners. Money must be available to enrich learning, technology must not be used to replace teachers. Pupils support workers are crucial for supporting the most vulnerable. Without this support, learning and teaching would not be as effective.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools must receive an increased budget to meet the needs of all learners. Money must be available to enrich learning and technology must not be used to replace teachers. Pupil support workers are essential to all aspects of school life and without them learning and teaching would be significantly less effective.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools must receive an increased budget to meet the needs of all learners. Money must be used to enrich learning, technology should not be used to replace teachers. PSW's are essential and needed to support the most vulnerable pupils, without them teaching would not be as effective.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Teachers cannot be expected to deliver core curriculum to the same standard in less time if they are deployed to other tasks and replaced by PSWs/CAs for 'clubs' - the long term impact of this will be a 'lost' generation who are already at significant disadvantage due to lockdowns and the concomitant social/emotional impact of these events. Greater use of technology than is the case now, is to be avoided as the lack of involvement in lockdown learning demonstrated - this is a 'tool' to be deployed with skill and professional judgement by experienced teaching professionals - it is not a replacement for face-to-face learning.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	It is critical that no changes are made to school funding resources. Our children are still recovering from the short and long-term impacts of the global pandemic and economic slowdowns - many of which will not be felt for years to come. It is critical that we do not reduce teacher numbers, nor can we replace teachers with PSWs or CAs as this creates further issues for children in terms of stability, relationship building and willingness to attend school.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This proposal is far too vague to have an opinion on. What 'resources' would be 'utilised' and what 'additional support' would be created by cutting educational funding? Lockdown has taught us that technology being used to deliver the curriculum is not very effective. And the technology in schools is from last century so unfit for purpose.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Education is the bedrock of a society, these young people are our next Nurses, doctors and industry leaders. Any reduction from this budget would feel like pulling the ladder up behind you. I am sure you can dress the savings up in nice woolly comfort words but cuts to this budget would hard the whole of society.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	No money should be cut from school budgets! More money should be allowed to schools and less to bonuses for higher management within the council.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Admins within school are under a great deal of pressure with more work being added to their working day and I can't see how hours can be reduced and being able to meet requires of Management and Teaching staff. This also applies to PSWs who are a vital part of a school	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are understaffed, under resourced and under funded already. Cutting staff and resources will not only ramp up staff stress and absences but will also leave our young people without any chance of success or attainment. Pupil needs are at an all time high and the demand for human and physical resources is therefore needed even more than ever.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	We need more adults on the ground in order to educate and survive or schools and our children's futures are going to crumble. Cutting budgets for education is the worst thing you could do for our children and staff.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Reducing staff in education would be the final straw in ruining our education system.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools, particularly primary are not coping and are at breaking point. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Not clear what you are meaning! but if your intention is to cut services for kids with ASN which I hope not then this is totally wrong as this is in much need of funds so that these kids get the deserved education they are so entitled to and taught by qualified teachers in smaller set classes. A lot of these kids are highly intelligent and deserve more than a blanket curriculum designed for lower level. Social Anxiety holds a lot of these kids back not their intelligence and if these classes were smaller then they most likely will have opportunity to show they can do what they would be doing if they could manage an average class.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Strongly oppose this, the schools in west Lothian are already failing well behind and need more nit less support. In addition, more tech is known to increase inequalities gaps not close them.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	A reduction in school staff in my opinion is not a great thing.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Decreasing the amount of teachers will have a big effect on the children and teaching staff. Cuts to hours will mean that more will have to be squeezed into the school day and children won't have the time to consolidate what they have learnt.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Support staff must be protected as these jobs tend to be the first to go but are vital to the ever increasing needs in our schools.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are already operating with the minimum staff requirements. Any cuts to school staff, particularly teachers and psw would have a large impact on the ability of schools to keep children safe and deliver a quality education.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are already insufficiently funded. More pupil support is needed, not less.	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I think that schools are key and we should not be cutting down on teaching staff or pupil support. As it is, we have a shortage of staff and this impact is being sorely felt in schools. I think it is essential that we invest in our young people and not short change them. It is important that schools keep up to date with technology and use this where appropriate but currently there are severe resources shortages in this area.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Additional support cuts are already having a significant impact on young people in our schools. They should not be cut further.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I firmly disagree with this. Making cuts in schools in terms of admin staff and pupil support workers is increasing the workload for teaching staff in school as the jobs they do still need done at the end of the day and only leaves teaching staff to do them. Therefor results in the lower quality education provided to all children and burn out and exhausted teachers.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	You are completely devaluing education. These children are the future workforce. There is already a huge attainment gap and this would increase it further. These children deserve high quality experiences with qualified teaching staff. There is already a lot of pressure for teachers due to workload, lack of resources and having children who struggle in a mainstream setting. PSW are extremely valuable to teachers as they work with groups and support individual children who are struggling in the class. If they are no longer used in this way, the attainment gap will widen as teachers will struggle to support the children who are off track. There are already so many needs in a class that it is impossible so support them all without help. Teaching time will greatly reduce if the class teacher has to deal with disruptive behaviour without PSW. Before making any decisions, you should go into primary schools and see what it is like already. This will show the damages you will cause if you go ahead with these ideas. The children deserve better.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil support in school is a vital part of the school function if this is to be reduced further then it will literally be at breaking point. We are already under staffed for the job we are being asked to do reducing this further is only going to make things worse not better	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Modernising our council	1D Allocation of School Resources	Provision by way of third party providers always end up costing more than keeping the tasks in house. There is also a need for an internal member of staff to check the work before it is implemented - not really a saving or as simple as sending it out to a third party ony	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	We are already short staffed in school as it is, with teachers being stretched to full capacity every week. This does not allow for collaborative working, therefore impacting significantly on the delivery of the curriculum and attainment. This has already hindered my own career progression as there is no room to expand our department with qualifications offered and has also meant that I cannot carry out an enquiry project to introduce music provision in primary schools, creating links with cluster primaries and allowing for a more progressive and consistent curriculum from 3-18 as stated in the Curriculum for Excellence policy. At the moment, pupils are not receiving expressive arts subjects in primary school to an acceptable standard, if at all, which impacts massively on our uptake and attainment at senior level. This is not an equitable approach by the council;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Headteachers have responsibility for prioritising devolved resources to meet the curricular requirements within their schools and ensure the delivery of the Broad General Education. Professional learning opportunities are devolved at school level to meet the needs of all staff.
Modernising our council	1D Allocation of School Resources	So many of our additional needs pupils do not receive the help and support that they need and deserve to be able to thrive in education. I have asked many times for pupils to have support in class with them and have been told no due to already diminished staffing levels. This is not acceptable. Pupils are unable to access learning because of budget cuts, through no fault of the classroom teachers who are doing everything they can to support these pupils to the best of their ability whilst also delivering curriculum to hundreds of other pupils.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Its important for children with additional support need to be fully supported- not enough support currently	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Modernising our council	1D Allocation of School Resources	reliance on 3rd party providers can be costly, if those people actually considering contacts, don't have a full understanding and implications that can a rise.	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	By devolving the finding to schools the head teacher will have less time to manage the day to day running of schools. Technology is not the answer to improve attainment and reach the significant number of children who are under achieving or have live with high deprivation.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	More staff are needed in schools not less. The facilities of special provisions have reduced in recent years which means children in mainstream schools require more support not less! To enable our next generations to reach their full potential and support our economic systems money needs to be spent on supporting them in schools, not taking it away!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools cannot cope with less SLT. The workload of the current SLT in schools is already untenable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Any reduction in this adds to additional workload for teachers. This is absolutely unacceptable as teachers are struggling with overwhelming workloads already!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Third party providers would not be acceptable to teach our children during the core day as they are no substitute for properly qualified GTCs Teachers. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are already stretched for resources - we should be looking t increasing support; (With staff) for our children not less. The needs of our children are increasing with the Inclusion Policy that exist and is only workable with adequate support in classes.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Please don't cut pupil support further we are an integral part of the school that is already understaffed grossly and any further reductions will push staff to beyond their limits. The young people rely on us for support and reducing that or taking it away will place them at greater risk or harm and certainly in terms of mental health this would be a massive blow. The daily running of the school in terms of attendance and getting the young people in and settled in the morning would be hugely impacted. Overall if you reduce the pupil support provision you risk causing much more harm than good.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Unsure how you can reduce admin and psw's in schools when they are constantly working more hours than they a paid at the moment. Rarely put in overtime sheets and do this overtime out of goodwill. Maybe look at the bigger picture where there are staff in schools who are not performing. Not the staff who work hard and are committed to the job, school and children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools have already been stripped to the bone of staff and resources. Schools need more pupil support workers and more specialised teachers to manage the ever increasing number of pupils with specialised needs. If we are to rely on a greater use of technology, we need to be provided with that technology in the first place.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	The resourcing of schools has already reached and exceeded a critical point. Resources are tight and further restrictions will impact directly of the type of pedagogy that the council wishes to promote e.g. play. Without suitable resourcing for this children will miss out on the benefits it brings, e.g choosing from a range of materials to create a picture is a meaningful learning experience requiring the child to make decisions. If there are limited resources the child does not have the opportunity to learn by making decisions and evaluating the impact of the decisions they have made. Rich learning experiences are in danger of becoming time-fillers with little impact on the child's learning and development.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	For a start there is not enough school places and secondly if your schools were concentrating on preparing children for a life in the world instead of teaching them things they do not need to know then education would not be an issue but the past few years the education system in West Lothian is absolutely awful	2. Modernising our council	1D Allocation of School Resources	The school system is not fit for purpose for the children of today and is not allowing opportunities for children to learn and grow at their natural pace;	2. Modernising our council	1D Allocation of School Resources	Staff are not in a position where they have tolerance and understanding and are not able to deliver a fit for purpose curriculum for the children of today. Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School is the most important part of a young persons growing up - it's a place they socialize, feel safe and have a secure environment where they can learn for their future. The education system is already struggling with reduction in staff and resources - department budgets are being cut and resources are more expensive to buy so some departments are finding it difficult to continue to function as it is - a reduction in school resources and funding is not an option.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	At a time following Covid when we are seeing increasing numbers of students with additional support needs and mental health difficulties, this will make school even more traumatic for some of these students and will further increase pressure on teachers and school staff, many of whom are struggling themselves as it is.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The reallocation of staff used to provide additional support in schools to cover core staffing requirements will have a hugely negative impact on some of the most vulnerable children with reduced in-class support, additional teaching and alternative provisions no doubt being withdrawn or reduced.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	At all costs, the staffing levels and class sizes in our primary schools must be protected - preferably improved upon. In addition, the standard of graduates and the training with which they are provided is deteriorating and should be enhanced. The negative effects of an excessively wide, fragmented curriculum rather than one which makes our younger children literate and numerate as they begin their secondary education, is vital. We cannot, at secondary level, fully repair damage already caused, in these areas.	2. Modernising our council	1D Allocation of School Resources	At all costs, the staffing levels and class sizes in our primary schools must be protected - preferably improved upon. In addition, the standard of graduates and the training with which they are provided is deteriorating and should be enhanced. The negative effects of an excessively wide, fragmented curriculum rather than one which makes our younger children literate and numerate as they begin their secondary education, is vital. We cannot, at secondary level, fully repair damage already caused, in these areas.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Totally disagree with this proposal, schools, their provision and resources are already stretched. The increasing numbers of young people with additional needs is a clear indication that a reduction in this area would be counter productive and is not providing or meeting the needs of all children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	If there were more staff in every school then the council wouldn't have any problems	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Inclusion has led to a significant increase in pupils with ASN's attending mainstream schools and at present many are simply being failed by schools who do not have the required number of support staff to accommodate and adequately cater for these additional support needs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As a teacher I'm deeply concerned about these proposed cuts. Teaching staff are already pushed to breaking point by the workload and there is already a lack of support staff in most schools.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is not worth the savings proposed. Support staff and admin staff are ESSENTIAL members of the school. I highly suggest you come into a school and shadow them for a day to see the insane workload they have. Removing their invaluable help would be suicide for the schools.	2. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	I thought it interesting how many of many colleagues found the recent online training about De-escalation infuriating and found the whole process negative and even counter-productive. Someone in WLC might look at figures for course completion and see it as a success without really understanding the impact. It gave the sense (particularly with the repeated sections) that the person who signed it off is remote to its impact.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are already struggling for resources as it is, this is not going to benefit any of the young people across West Lothian. There are schools who barely have supplies to allow pupils to do even basic art lessons. There are schools sitting full of broken instruments that cannot be used and cannot be replaced because there is not budget for it. You cannot continue to take away from schools and yet still expect pupils to learn and staff to teach. This is an outrageous proposal and shows that you care not for the future of our young learners at all.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There are not enough staff as it is to deliver the Scottish Governments ambitious curriculum. Especially since the council has taken away allocated spaces to schools such as Burnhouse. Schools are dealing with a wider variety of pupils than ever. Many coming from Primary with IEPs and PIDs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Please see management structure in previous answer. No savings should be made in schools.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Support in schools is already suffering and has been with cuts in recent years. Schools lack the support of adequate resources and pupils support workers to fully meet learners needs. The number of pupils with ASN continues to rise. The council must fund MORE support staff in schools not reduce this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil support workers and specialist teachers are vital to the school. If the changes suggested are implemented, the quality of learning in West Lothian schools will be dramatically decreased because teachers are only one person. Without the support and input of support workers and specialist teachers, the delivery of the curriculum in the time given will become impossible.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The support structure that is already in place is by far not good enough. Support staff are continually overstretched and dare I say under paid.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The key factor in pupil development, support and improvement is working with qualified teachers and supportive adults. Pupils learn best when directed and supported by a trained, nurturing individual. This cannot be achieved through technology. In fact many pupils are "tired" of this approach due to online learning and lockdown. They lack motivation to complete these tasks and much prefer the social and human side of learning.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	5 million needs to be invested in schools not saved from the budget! Schools need more support staff and more control over those staff with a greater pool of supply teachers. They need more specialist teachers in music, PE and the arts and general. They need new books and class sets of computers!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	They need bigger buildings and halls for performances and PE lessons. Outdoor classrooms and resources are needed to develop our young peoples learning. So many things that schools need and all that ever happens is budget cuts. Disgraceful planning.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I don't think spending less on schools is a good idea.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I do not support this. I do not want to see greater use of technology in schools, I want to see more appropriately skilled humans in my children's schools. I want staff to get to know my children and work with them/support them. I do not want a pool of resources popping in and out as no progress will ever be made that way. This might save money in the short time, but the long term effects on our children could be absolutely devastating.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools should not be adversely affected by council budget cuts. They staff are already stretched. Any impact on the cut back will result in a failure of our children and their future education. This in turn has a knock on effect with job skills in their future for them.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Again reducing staff. No wonder kids struggle at school, the staff don't have enough time to educate them properly	2. Modernising our council	1D Allocation of School Resources	Absolutely NO more reductions to education. It's a disgrace as it is, and massively under funded	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	So i suspect you mean getting rid of personnel here ie staff. There can be nothing more digital as already exists	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Modernising our council	1D Allocation of School Resources	As long as school services aren't cut. We are being told weekly "were not doing that anymore" etc.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am aware that currently a lot of work with children with Challenging and/or Additional Needs is being provided by Pupil Support workers (not advanced Pupil Support workers). These staff members are low paid and have the least training and are being put under a great deal of stress by having to work in very challenging and difficult circumstances with few appropriate resources to enable them to meet the needs of the children in their care. This is the current situation so further cuts must not impact on them further or we will begin losing valuable staff members due to burn out.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Equally, children and young people have just come through one of the most challenging times of their lives. Getting back into the Education system has been very difficult and many have struggled with this. Any big changes could have a detrimental effect and must be thought through with this at mind.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There are often multiple pupils with complex additional support needs in my classes, and I have no support. We have a handful of pupil support workers in our school, far fewer than we need for the number of pupils who require such support. It is already extremely difficult for me to support all pupils in my class to access the curriculum. Making cuts to these services would only make this already dire situation even worse. I fear that more and more teachers would feel demoralised and this could lead to many teachers leaving the profession/having to take time off for stress etc.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	With regards to additional support, if the Scottish Government (and by extension Local Government) is truly serious about 'Getting it right for every child', then they should be investing more in additional support. As a secondary school teacher, I know from experience that we are already vastly under-resourced in terms of additional support. I am challenged everyday by the gap between what the government and West Lothian Council say they value (that is, inclusion) and the reality of teaching in a mainstream school.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There is a lack of support staff across most primary and secondary school education settings so cutting further back on this would be a big disadvantage for the children	2. Modernising our council	1D Allocation of School Resources	Schools are already understaffed so reducing staff ie pupil support workers this will only directly impact our kids learning at a time which we should be supporting this more than ever after covid.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Administrative roles and pupil support within schools are vital. Any move to streamline these (aka cut down on numbers) will have a detrimental effect on the running of school and ultimately impact the service students receive and therefore attainment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1D Allocation of School Resources	Concerned that this will result in less teachers in an already overstretched service. Current teachers are at breaking point and any moves to create a more 'efficient' service will result in burnout and an already higher sickness rate.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1D Allocation of School Resources	ensure pupils receive the majority of work in school, and via a human	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Your schools are in need of urgent repair and modernisation, the teachers need help with disruptive and disrespectful pupils, and cutting £5m from their budget is unthinkable and frankly shameful on your part.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	This is one area where i have really strong views. The education system within the area needs investment, not a reduction in spending. My son was repeatedly failed by his primary school because they didn't have the staff numbers or skills to recognise his dyslexia quickly enough. He's not suffering from mental health issues (depression and anxiety) because he thinks he's stupid.	2. The council is committed to ensuring an appropriately qualified workforce to provide appropriate learning experiences, meeting the needs of all learners
Modernising our council	1D Allocation of School Resources	So privatisation of school services then. No!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	In my eyes this is an awful move as children are the adults of the future and as currently many are unable to work out change without a till showing them, unable to spell use correct grammar to kention a few things	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Everything should be in house, no outsourced service, but again this must not allow any reduction in quality of service	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1D Allocation of School Resources	administrative and pupil support workers are very important within a school. Pupil support workers help pupils access the curriculum by supporting class teachers a valuable asset to a school community reducing staffing would be very detrimental to the school community.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Removing pupil support staff and learning online is not the way to use money effectively. This will only widen the gap in educational achievement and the council will be directly responsible.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1D Allocation of School Resources	I really hope this doesn't mean less teacher facing lessons. Home schooling was far from successful apart from private schools. Hopefully we can maintain the classroom setups that are currently available.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil Support Workers are essential in supporting children not only with raising attainment but also regarding supporting the health and well-being of learners, particularly those who have additional needs supporting social inclusion. Additional support has been used to support covid recovery and also to raise attainment. They have also been used to cover staff absences as there is challenges accessing supply teachers. There is a concern that if staffing is scaled back then how will schools ensure there is a teacher in front of a class when teachers are absent or in times when it can take time to employ a teacher? Digital technologies are already being used - there is no substitute for teacher/ pupil dialogue.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Staff to child ratios must be maintained to ensure high standards and an upward trend in education results and quality within the sector and enough support is in place for all pupils. I am 100% against any cut backs affecting education and 100% in favour of increased funding to ensure quality of service and security for childrens education.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1D Allocation of School Resources	The schools need better funding and support. Facilities in some schools need updating and refreshing. If there is an option to do this independently then it could be more cost effective allowing schools to fund raise on their own. Supporting staff are vital to school services.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As far as I can see, schools are already working with the bare minimum of staff to support an ever growing number of children with a wide variety of additional support needs. Extra resource is needed in this area, rather than efficiencies.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Support staff are key to the children, there is not enough support for the children just now without reducing. Technology is great however not suited to everyone.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Is there more information on this? A link to a paper written? "through a review of provision by third party providers" - What does this mean? £5 million is a lot of money, hopefully we are not sacrificing education standards for children	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There are so many children who needs additional support at school. If they don't get help at school they will be left on their own.....this is sad as again children will be paying the biggest price od council's saving program (€). We should concentrate on our new generation, support them and looking for the saving in different directions....	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Additional support is already struggling to support the extreme needs within our inclusive schools. With the presumption of main stream, we have a huge range of needs within every classroom in our schools. There are already huge issues with a lack of support in some areas and this will cause even more challenges and ultimately will mean we will be failing many, many of our young people. We spend so much time in our school teaching children about their 'rights' from the United Nations rights of the child. Wjere are our children's rights here?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil support staff are not trained and are not paid enough to assume this role. I feel very strongly that this would also be detrimental to children's learning and their school experience. The roles within schools are already so tightly stretched, there is no space for any more additional responsibilities within current remits.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	As a member of school staff and as a parent of pupils in WL schools I am strongly against this proposal. The proposal also does not outline specifically what these changes would look like - which is not helpful at all. I hope that the proposal would not require pupil support staff to undertake responsibilities which should be that of a fully qualified teacher, and only a teacher	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There has been so much in the last couple of years about the negative effect on children's education due to covid and school closures. This is a time we should be investing in children's education to support their learning and giving children the best opportunity to succeed, not cutting budgets by £5 million.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am absolutely against this and anything that reduces support and face to face teaching of the curriculum within the classroom. Schools and children's education should not be penalised by the council's need to cut costs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	You cannot take any current provisions away from support staff within schools particularly for additional needs children. The services are currently stretched to capacity to take more away would mean catastrophic results for children, parents and the staff that are already in place. It is absolutely disgusting this is even being considered. If there's money for talking bins then there's money for schools. Children have the right to a safe and nurturing education. To take away current provisions would seriously impact that, this includes the child with the additional needs and the rest of the children in the class.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1D Allocation of School Resources	In primary schools, admin staff are extremely limited already and are a huge resource to the schools. In both of these areas, the reduction of wages will be minimal considering they are amongst the lowest paid in the schools so in order to save the amount estimated there will be a huge amount of job losses which will force people into claiming benefits, debt, homelessness and so many other major issues.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There is already a limited number of pupil support staff in schools and reducing them further would be of absolutely no benefit to our children and their educational needs, never mind any other needs they will have. Quite often there are children who require a one to one staff member, largely due to the lack of provision for children with additional needs, this cannot be removed for the safety of individual children and the other children in the school.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Reducing support staff would have a negative impact of pupil attainment. Reduction to admin staff would also be of concern as this is another essential role in the school community.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	It's amazing how this is worded to avoid basically saying "we plan to replace appropriately qualified members of staff with a Youtube video." It seems to me the council is willing to sacrifice the quality of learning and support provided to children in this case. I would oppose any such move.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There is not enough additional resource in schools for additional support needs, therefore a suggestion that there will be changes with a potential reduction to this number is very concerning. More information is required to determine what a review of third party provision means. I run a business providing primary school aged children with after school and weekend clubs, if there was opportunity to work within school time this would allow more children to access this extra curricular activity if the council were funding this instead of parents	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1D Allocation of School Resources	the schools need the admin support and support for kids that struggle	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Children would suffer. In the long run if the child's education was to be affected due to not having the support needed. They may end up in later life not being able to hold down a job.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	All children would be affected by this cut them that need support and them that don't. Also the Teachers need the help to support these children to allow them to do the job. More pressure on the teacher the less that Teacher can give to each student.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are already underfunded?? Education can't be diluted any more than it is?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Technology can't deliver the personal touch and learning from a teacher surely? If a child can't read or write how does more technology help?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1D Allocation of School Resources	I have a child who has dyslexia, without this additional support he would struggle massively. Children who rely heavily on additional support need to be taken into consideration as this could cause major issues for them moving forward if this was taken away.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

Modernising our council	1D Allocation of School Resources	I think that private nurseries should actually be offered more in support for children with additional support needs and have a budget set for them additionally to have staff that can support their children. It is vital and important that children can gain the support.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I think children with additional support needs do need the additional resources and adult interactions especially with pupil support workers in schools, and additional adult staff that can help them through out their day.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I cannot comprehend how you think it is possible to cut any more funding for schools. We are already operating with far too few staff members and not enough resources.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As a teacher, I regularly have to buy provisions for my classroom and rarely have the support required from other staff to ensure that all of the children in my classroom have access to the level of education to which they are entitled. If this is cut further, it will be devastating for many children, particularly those who require additional support to access the curriculum, of whom there are many.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are tight and the whole system needs to be re-evaluated however, cutting things back from education would not have the desired effect. West Lothian is a poor area and needs to be able to support the children better not just in education but before and after school support.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1D Allocation of School Resources	Making any cuts would cause a huge detrimental affect to our education system. If anything, we want to get these children to the best they can be, be able to socially survive in the real world, but also be able to hold down a job. In turn this should help making savings for the councils budget if we cut down on the amount of people who aren't working and claiming benefits. Teachers and PSWs are at the forefront of making this happen and ensuring that these children are leaving confident with a true understanding of what they have learnt.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are struggling as it is so what will the effect of this be? It's hard enough to come out of school and get the job you want so we really need to be ensuring that the right resources are ploughed into primary schools as an early intervention in order to ensure we are giving every child the best start in life. Pupil support workers are a KEY part of the school, sometimes doing nearly just as much as the teachers in some areas of the school. Teachers and PSWs don't have enough time to do what is required at the moment to be the best they can.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Where to start? - I'm just glad I no longer have children at school! This will be another round of cutting funding from those that dare call out the naked emperors; and diverting funding to whoever is the trendy box-ticking flavour of the month.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The removal of this funding would have a severe detrimental impact on the children. It is currently very challenging to ensure the curriculum is delivered within the current school day, removal of funding for staff, resources etc. would only be disastrous.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1D Allocation of School Resources	Schools are struggling as it is. Students are not getting a stable learning environment due to lack of teachers. Add in the gaps from using technology. For example students used lpads at school but at home may only have access to android. Furthermore my child's school going away fro teams back to written homework as lack of student ownership. All being left to parents.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1D Allocation of School Resources	I hope people do realize how much, effort and human interactions are inevitable for extra support for pupils. Please don't replace too many things, human interactions with technology.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	We need more ASN workers in schools not less	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School budgets are also under attack. In over twenty years of teaching I have never known money to be so tight in the school and have never spent so much of my own money to make sure that my class have the books, materials and resources they require to enjoy an education not done on a shoestring.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The policy of closing Special Needs Schools and inclusion means PSWs are needed now more than ever, for whilst inclusion to mainstream schools is a valuable thing, the support needs to be in place for these children to succeed.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	There has been no closure of Additional support needs schools.
Modernising our council	1D Allocation of School Resources	Schools are already suffering from previous cost cutting measures. Support and administrative staff are stretched thin as it is and to cut them further would be of severe detriment to education.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I disagree with any reduction in budgets to schools.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	West Lothian Council does not have a good representation of early years support for children with additional support needs mainly autism. The small amount of support given to these children should not be cut.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	We must be very careful to provide the best schooling for our children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This seems like a very high value to be taking away from education. It's seems unrealistically high to find efficiencies of that value without major reductions in services and resources.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Very wary of the phrase 'greater use of technology to deliver the curriculum' - what does this actually mean?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools already finding meeting the needs very difficult with the rise in presumption of mainstream, reduction in budgets, staff absences / inability to cover posts, increasing workloads and demands of the job (more added and nothing removed).	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Is it wise to have a situation where 3rd party provision is countenanced within such an important area of WLC's remit?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Technology currently in use is impacted by lack of internet, faults are not dealt with, a lot of time wasted on the phone before and after class time trying to speak to someone to deal with a problem. Resources are not shared with equity as there is no consideration for families who are forced to rent in medium to high areas but have low incomes. Extra resources are only given to those in poorer areas who may actually be well paid and enjoy living in those areas. Reduction in resources for any school is of great concern if we wish to maintain the quality of education. Some new schools have huge budgets whilst others have little or no money to maintain (never mind) upgrade the building.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The use of technology to deliver services in school worked for many during lockdown.; However, it was not suitable for all and that means that it is not in line with GIRFEC. There are a great number of young people who are unable to or unwilling to access technology for learning and need in person support.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Staffing in schools is already under pressure with reduction in teachers and pupil support staff. Teachers are already stretched to the limit without removing more support staff and if administrative staff was reduced, who would complete the necessary work! The attainment gap will never be reduced if teaching and support is reduced. Education is supposed to be the Scottish Government's top priority.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School resources, including pupil support, need INCREASED and not reduced (by £5 million. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	not sure what this will look like - but west Lothians provision for those requiring additional support needs is one of the poorest in Scotland therefore I do not agree with this as it can only make poor performance in this area poorer. however it would good to understand the detail behind this	2. Modernising our council	1D Allocation of School Resources	My child attends St John ogilvie rc primary in deans, Livingston. He was diagnosed with autism 2 years ago but has needed extra support since starting nursery at 3 years old. My other child also requires additional support to help regulate his emotions. Reducing support staff in schools will greatly affect children like my sons, who rely on them just to make it through the day. Teachers also rely on them to meet the needs of those with challenges, so they can continue to meet the needs of the rest of the class. Reducing support staff will ultimately affect everyone negatively.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	We cannot reduce PSW allocation at the same time as increasing the number of pupils with additional support needs. We need to support our learners and have the capacity and resource to do so. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	PSWs are an essential part of the teaching team. They deliver individualised interventions to support class teachers to raise attainment. Reducing the number of PSWs will inevitably have a detrimental effect on closing the attainment gap.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	We have gone through two periods of remote learning where we have used school technology resources to ensure the continuity of education and the funding has never been there to plug the gap of the resources lost during that period.	2. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	You mention that there should be greater use of technology to deliver the curriculum. How can this be achieved when the Capital Enhancement fund only provides enough points to fund one classroom of technology for a Secondary School. The inconsistency of technology between West Calder and Winchburgh is vast and unequitable, yet you continue to plough money into these new flagship schools and ignore the needs of the remaining.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There is not enough support in schools at present to support pupils with additional needs, which is having a detrimental effect on pupils, GIRFEC should be paramount when looking at education. Technology is a good resource but the use of it during COVID demonstrated that pupils do not always engage with it, what will be in place to support pupils who don't engage or can't afford the technology. I am aware of pupils, who during covid, were meant to receive laptops to support them to access online lessons which never happened.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am very concerned about the possible reduction of pupil support within schools. There are currently lower levels in school than previously and there is without a doubt a higher number of pupils with additional support needs in schools either emotionally or learning. Covid has had a huge impact on all pupils not just those in the lower quintiles where spending has been focussed to close the gap.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am concerned to see such drastic cuts to resources in schools. Schools are already coping with less than optimal staffing across admin, pupil support and teaching, reducing this further will have significant impact on pupil's welfare and learning. School are being required to do more and more to support and educate children whilst resources are being withdrawn. The school system is already near breaking point and further reductions will only accelerate this. Children's education that has already been greatly affected by the Covid pandemic will suffer further with a long term impact on the economy.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Not clear what the impact is on support for children with additional needs as a result of "utilising resources provided to deliver additional support in schools for core staffing requirements." Are you actually proposing to reduce the provision of support for children with additional support needs? Considering that Councils have an obligation to provide this type of support is this not just the erosion of a key service for a group of children for whom the Council have a clear responsibility to support? Will this proposal not make GIRFEC more difficult to implement within schools by reducing availability of support staff?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	How does delivering curriculum through technology help anyone, particularly children and young people with additional needs. I feel this will lead to standards and grades dropping.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I disagree with this proposal. Staff and service cuts are not a viable option. More teachers with smaller class sizes and an update to the councils dating school stock is required.	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Absolutely not.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	You CANNOT punish children and their education opportunities because 'us' i.e. adults failed to control spending and maintain growth in the area.	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Education is already completely unequal and we feel that throughout the country with a lack of talent development. Children must be given a fair shot at a future.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil / staff ratios should not be cut.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School funding is woefully inadequate and moving to digital platforms decreases learning effectiveness.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Our education system must be protected at all costs. Any savings from education must not come from reducing staff or their contact hours as those already do not meet the needs of the most vulnerable students. The best way to find savings in this area would be to review how the procurement process works and allow school greater freedom in how they purchase supplies and services to ensure the best value for money can be found rather than being forced to use a limited list of suppliers who artificially inflate their prices for schools	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	As a family we have become victims of overstretched and under funded additional needs support both in mainstream and special provision. This is having a long term effect on my children and thwir future. Please do not put any more children in any more danger than they are already in by trying to save such a huge amount of money on education. It is vital that we educate children in a safe and appropriately equipped environment. It is also essential to retain and support the education workforce appropriately in order that they can provide pur children with the education that they deserve.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is the last thing we need - more change and undermining of school resources. Having a son who works in secondary education, it is concerning where all these machinations will end.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Greater use of technology, read the Case Studies please, does not per se improve teaching. Feedback on the provision of iPads to all pupils during Covid is not good. How many pupils learn by looking at a screen, reading a script and gaining a useful depth of knowledge? Generally, only those that are already above average pupils might get some help from it. That's the question you need to ask yourselves. It is the teacher's ability in front of the class that drives attainment. If you have a good teacher, then the class performs better. Real life handling of chemicals and the like in a safe environment build learning and depth of knowledge, not videos of the same event. And let's not forget, make class learning interesting, not just another video to be forgotten in 30 minutes. I'm sure that there are some resources that are not delivering in our schools but, again, if you keep cutting away the depth of knowledge and support then you will probably find that attainment levels fall & social issues etc will continue to increase.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Review the management structure in all individual schools and centralise where possible	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Management structures in schools will be reviewed.
Modernising our council	1D Allocation of School Resources	Staff and teaching in schools should be ring-fenced. This is hugely important for ongoing outcomes	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	After a decade of austerity and the implementation of the presumption of mainstream for pupils with additional needs there is not the extra staff to be able to cut support in mainstream or addition support needs provisions. Teachers and Support Workers in particular are already stretched too thin. Cutting in this area will directly harm the lives of young vulnerable pupils.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools need all the staff and resources they can get. Please do not cut school funding!	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am not sure about the greater use of technology to deliver the curriculum. I have grandchildren and I have lots of friends with children. During Covid most lessons were delivered online and this is where some children fell behind. I know this is the age of technology but children also need interaction with their teacher in person.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	schools are short staffed enough puples with mental and learning difficulties that need support cant get any and the teachers are struggling to keep up and support these pupils whilst teaching a full class.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	you should not ever think of cutting education budgets. these should be ring fenced and expanded to make sure all puples in all schools have the same opportunities. i know for a fact kids in bathgate for example are falling behid cause the teachers are told no when they ask for anything like art supplies or computers so jids can do music tech. you should be supporting these school not cutting them off at the knees	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools should be protected as much as possible, what do other council areas in Scotland do differently? Is there a best practice example you could use or review. My experiences of third party consultants is that they will tell you what you want to hear, charge a lot of money for reviewing and leave you to it, working or not.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I would hope these changes would not have any negative impact on key resources and services which benefit pupils, such as the Inclusion services and those that provide specialist support to schools. We have already seen other services squeezed over the years and again this is going to have a negative impact on pupils. The have a right for their needs to be met and this needs to be taken into account at all times.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Schools and teachers are already struggling with the expectations put upon them and the time frame on which they are to achieve their targets. Further reducing teaching support would impact negatively on children's curriculum development and work achieved in schools.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Sounds like you want to damage future generations to save pound now. Schools need more pupil support staff. They need more resources. They need more support from the building owners in ensuring the environment is tight for each young person.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Totally agree all children should be taught digital who needs pen and paper or teachers for that?!; That was sarcasm not sure this form would pick that up!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	That sounds to me like you want to cut staffing within the school which is completely wrong. The schools need more staff, not less.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The priority for the council needs to be to ensure that future generations are supported to be able to engage in the economy in the future. Cutting the budgets which support some of the most vulnerable, especially at a time when the health and mental health of these young people is at the lowest. Technology I agree with, however not at detriment to those who need support	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	changes to administrative and pupil support staffing arrangements - pupil support staff are already some of the most overworked staff in schools. Any further reductions in this area will have a detrimental effect on pupils wellbeing, mental health, attendance and achievement.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This may include utilising resources provided to deliver additional support in schools for core staffing requirements - does this mean the outreach teaching service being taken away? This would have a negative impact on the educational experience for hundreds of pupils across the authority and may lead to a greater cost in the long run as specialist placements are sought for a larger number of pupils. This does not make sense to me.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools should not receive cuts to pupil support staffing - schools are already on their knees offering support to pupils.	2. Modernising our council	1D Allocation of School Resources	I agree that a more robust service is required however I feel that more money is required for staffing and resources rather than making savings.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Sorry, did that just say were giving schools £5 million LESS? Surely I misunderstand. I can't imagine a country where we are developed enough to understand that educating our children is the only way for society to progress and flourish, then cutting the funding to educate their youngsters. I'm sure I've misunderstood this, because reducing any education budget is idiotic.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I think with the current climate teaching staff benefit from the support of both additional support staff and pupil support to keep their classes in check as their are no deterrents to misbehaving in class hence without support disrupts the full class.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I have a daughter with additional needs and her infrastructure was in place since she was placed in the education system for extra help. I can see a dramatic decline in this service despite being promised additional help throughout her school life. The school couldn't even provide a subscriber for one of her exams resulting in her failing the subject, this is her future that is at stake and surely this needs to be addressed without more cut backs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	What does 'utilising resources provided to deliver additional support staffing' mean? Is this a cut in teacher allocation for pupils who need support? What is the model for the 3rd party provider to meet these needs. Worry 'staff training' is deemed a replacement for face to face support for learners by a teacher	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Shocking that, especially after COVID and the associated mental health issues and widening of attainment gaps, resources for children's education, particularly Staffing, are set to be reduced by WLC..Increasing children's digital exposure and reducing their access to qualified and devoted human employees at a time when behaviour issues,mental health problems and attainment gaps have risen sharply in order to save money would represent a significant failing on the Council's part.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Does this mean less teachers? Our young people are the future and education is vital.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	5 million pounds of education cuts is frankly unacceptable. Pupil support and administrative support are already cut to the bone and running at extremely low staffing levels. This has a tangible knock on effect on schools abilities to support young people particularly those who need the most support.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Given the state of our education system in this country and the hugely detrimental effect covid has had on our young people and seeing first hand as a parent of 2 children who attend schools in West Lothian I don't think you should be looking to make savings in this area. It's already grossly under funded and teachers are stretched to breaking point. Given the council does not provide enough care for additional support need children in specialist schools and the wait list for additional special needs diagnosis and support are through the roof, even suggesting to make savings to additional support staff funding and resources in mainstream schools just shows the complete lack of care an understanding from this woeful council! Furthermore wording your detail in such a way where it's not at all clear the exact impact to the reader and asking that reader to comment is to me another failing and one that feels designed to provide little clarity to the reader on the hope they won't click on to what's actually being suggested.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Primary schools can barely operate at present - what will it be like with a reduction of vital staff?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	We are in a world where our special schools have been greatly reduced and therefore more and more children with special needs are entering the mainstream system. With support staff at present it is virtually impossible to offer high quality education because of the challenging behaviour these children display in Primary schools e.g. assaulting teachers and other staff members, throwing chairs and other objects, trashing classrooms so much that the teacher has to remove the children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	There has been no reduction of Additional support needs schools.
Modernising our council	1D Allocation of School Resources	Schools across West Lothian Council are already on their knees with budget cuts and how it impacts the school curriculum. The failed Inclusion policy and reduction in Pupil places for children with ASN has already had a detrimental impact on pupils in mainstream schools. Violent incidents across WLC are rising and pupils in many schools no longer feel safe in their classes due to these cuts as pupils with ASN needs are struggling to cope in the mainstream classroom. It is an absolute disgrace that budgets are to be further cut. Schools need more money not less. Early intervention is sadly a distant memory and this will having a lasting negative impact on children and young people in years to come.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is of great concern. Schools are not being allocated budgets fairly for the children. Some schools receive more funding than others due to their postcode, this is grossly unfair and potentially harmful for children's learning and experiences. Schools need the investment. Third party provision of IT can also be concerning depending on the support model and SLA.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School resources MUST NOT be cut, you have cut them so much already that you are destroying childrens education. If anything you should be adding £5 million to school resources not take it away. WLC is already a disgrace of a council, do not make it any harder for our children than it already is just now.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are already on their knees and not able to provide all required support services. Cutting funding & resources is outrageous. Our children deserve better than what's being provided. They are the future and are worth better investment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil Support Workers are essential in ensuring learners reach their potential, not just academically but through supporting Health & Wellbeing and social inclusion.	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Interesting that these amendments will create a significant saving. All in favour of the savings, but not at the expense of the quality of education offered within west lothian schools.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	So this means kids that have disables get left behind like always, they need the help & support, nice	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Struggling already with basic resources like paper and pencils.; Staff shortages esp PSW's to support pupils. Increase of identified pupils with additional needs but no staff or resources supplied; You cannot provide a more efficient service with cut backs	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Absolutely ridiculous. Schools are on their knees fighting against budgets and children are not getting the care and education they deserve due to staffing. More special and inclusion schools need to be re opened as ASN children are greatly suffering in mainstream settings due to there being no places in specialist provision (tiny intake each year is ridiculous). The curriculum is already overcrowded without reducing staffing numbers further. Teachers need more time out of class to ensure planning and resourcing meets the needs o f every child, as opposed to increasing workload and decreasing time.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	From working in a special educational school, I see first hand the need for funding to support children with severe and complex needs. The best support is having enough staff to ensure children's needs are being met so they can access the curriculum effectively. Reducing the number of support staff would have a detrimental effect on the inclusion and achievement of pupils.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As the council continues with the presumption of mainstream, the number of children requiring additional support in school is increasing. The most valuable resource to support pupils is more staff and so it is vital that pupil support workers are valued for the work they do in supporting the inclusion of pupils.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Greater use of technology to deliver the curriculum' what does this actually mean? Children do not learn effectively from staring at a computer screen they need experiences that support their unique developments. In addition speaking key interventions supported by psw in the early years (and beyond) is crucial to support children, help them develop independence and manage the teachers ever growing pupil cohort.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil support time is essential to ensure progress of all pupils and provide support for children with additional needs. To reduce this time would not be appropriate.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	That is a high saving, and again does this mean reducing the work force in schools. My daughter already missed out on particular experiences in her high school class due to staff shortages and it appears like you intend to remove more staff - this doesn't provide a better education for young people. And you can't constantly use technology as a way to save money, because it always means reducing actual people.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Are you crazy? The staffing is already critical with absolutely no capacity to cope with even a 'Covid' isolation. Any staffing reduction, especially for more digital is negligent. Digital integration is already too much, allowing for gaps in teaching to be papered over with 'media' time. Digital learning has its place- of course. However it is already causing problems with 'end' learning and needs to be halted. The education hierarchy that sit in Livingston are not in touch with the actual classroom crisis. They are not ensuring that staffing ratios are adhered to in accordance with government policy- this is especially true for the number of support staff required in a class- I guarantee this is overlooked yet this consultation recommends 'saving £5 million'- NEGLIGENT and shameful.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	We have failing schools caused by what? Poor management lack of core skills and not enough money being spent for the good of pupils. Look at the statistics West Lothian stop hiding. Years of playing around with curriculum, integration without support. Wake up	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Education is the one place that should not be cut. Good schools not only provide a future for all children but are safe secure places for some of our most vulnerable children. This should not be jeopardised and any cuts to this would be a failure of both central government and the council.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	All schools needs vary and can be subject to change at various points throughout the academic year. I would be concerned about the significant impact this could have on teachers, pupils, parents etc.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is a terrible idea and would seriously be detrimental to the children of West Lothian. School staff are already unable to provide for all children who have ASN and taking away support staff is a sure way of making inclusion fail more than it already doing. There is other ways that the council could save money in schools such as allowing schools to order things not using PECOS which is already the most expensive way for schools to acquire what they need. Removing staffing will not only affect ASN children but all children in school who need any kind of support or who have anxiety. Children are already suffering due to the effects of covid and this will be even more detrimental to their learning and well being. I am disgusted that the council think this is an option. They are taking away from the future of our children and this will have serious implications for both children and staff. Disgusted this is a suggestion. Shame on you West Lothian council	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As a teacher in WLC I want more detailed information regarding these proposed changes. In stating that there will be 'greater use of technology to deliver the curriculum' this raises concerns around pupil engagement and access to technologies. Is this to be delivered in school or at home? Creating resources and delivering learning via technologies requires teacher planning time - how is this being accounted for? Where pupil support staffing has been mentioned, what will this mean? Schools have significant numbers of children with additional support needs which is becoming increasingly more challenging. Having worked in a school that has greatly benefited from additional staffing to help raise attainment I worry what impact reduced staffing will have on attainment and the well-being of staff and pupils in schools.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Modernising our council	1D Allocation of School Resources	The ICT / digital provision in schools for pupils in the secondary school phase is appalling to the stage that it is detrimental to the learning progress of some pupils (and in my view goes against the legal standards set by GIRFEC).	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	It is shocking that such a significant area of savings is being cut from the education sector (from which there have been cutbacks after cutbacks for nearly a decade). Additional support provision in secondary schools is already scant so to cut it further would be tantamount to practically removing it altogether. I am concerned at your phrase "third party provider". Public Private Partnerships have shown that, in the long term, this is certainly not value for money.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	In terms of schools, the proposed 'restructuring' will have a huge impact on learners, teachers well being and work load and the jobs of teachers fulfilling the roles you wish to stop. This is a huge mistake and slap in the face to every teacher in the profession.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Sorry, but our schools are not delivering. cutting £5 million from this is just going to make it worse.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As an employee that works in education I feel that schools are already in an untenable situation without the threat of reducing staff numbers. Class sizes are large, additional support is minimal and children who are vulnerable or have challenging behaviour are not getting the support they require to be able to fully access the curriculum.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	In regard to this statement within a school, I do not see how using digital technologies to support children and reducing staff numbers can work. Covid had a huge impact which we are only just beginning to reverse within the school. There is a huge amount of work to be done to support pupils to get to where they should be within their learning but also mentally, emotionally and socially.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	If the council is proposing to replace GTCS registered teachers with non GTCS registered staff then they will be failing this generation and future generations. Children are already suffering from the effects of Covid which will prove to be long lasting if they are not supported correctly. In addition to this the children will be missing out on quality teaching experiences which are integral to their development. Alongside this there would be a requirement to condense the curriculum even further to fit it into the remaining time which does a disservice to the national curriculum, the children and the staff trying to deliver the teaching. It is atrocious that a council is willing to put our children's future at risk with these proposals!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Funding allocations for schools should be done on a needs basis. Not all schools are on an equal playing field and it is evident that some schools receive very little support, due to poverty, from parents. WLC should help support these schools - true equity! Education is a right and the same standards should apply across the board. If a school is large they have more spend on a shared resource - upgrading play. Does this mean children in smaller schools should not have the same equipment. Central purchasing - if one school gets it - all school should also be entitled to it. There are a number of schools that are not fit for a 21st century style of education.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	The Scottish education system is broken. For a variety of reasons, mostly political (and down to a decade of austerity with another decade of it to look forward to, and a curriculum implemented shortly after the first recession now described as 'not fit for purpose...'). We are already running our department on fumes. There is no money to be spent on books (I am an English teacher) and we routinely run of basics like jotters. Thanks to covid and West Lothian's failed insistence on using technology to solve problems (it didn't work during lockdown; it's not working now we are back to face to face teaching), pupils are struggling to cope with everything from exams, basic numeracy and literacy, and organisational skills. There isn't much WL can do about the curriculum but we have to acknowledge that the system is already on it's knees, staff are broken, pupils are miserable and, despite what results might suggest, not as skilled as their qualifications might suggest, and that any further reductions will only makes this worse. In my ninth year of teaching, it has become increasingly apparent how much more able foreign students who come to our school are than the ones taught here - in everything from literacy, technical accuracy, organisation, confidence... In my current S3, a pupil who spent most of S1 and S2 under lockdown and covid-related disruption, is writing, at age 13, at a level more sophisticated than any of our Advanced Highers. She spent her entire primary years abroad and has really received very little input from Scottish education. The Norwegian exchange students, reading, talking and writing in their fourth language (!), outperformed our own students in every way. Even our current Ukranian students, many of whom have yet to grasp the basics of English and are using translation apps to access learning, are more focussed, determined, and thoughtful, better organised and more responsible, than many of our pupils. Why is that? And how on earth can this possibly be improved with the thought of even further cuts? What can actually be cut and what are we setting ourselves up for in the future? Each day of teaching requires a massive effort to overcome the feeling of futility, knowing that regardless of how much I do and how hard I try, these pupils are being failed by the system and that there is nothing I can do about it. The sole purpose of schools, the building and all the people in it, is to help these pupils prepare for the rest of their lives.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Our eldest child is in primary 1. I note from her homework assignments she is to use a computer, laptop or tablet device. Whilst we are able to provide this I assume the WLC needs to offer it, at the taxpayer's expense, to families who cannot afford one. I have no objection to this, however it would be reasonable to suggest as such a young age homework that was less expensive to adopt could be utilised. Furthermore what impact does the use of technology have on writing skills for example.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	It is unclear what this means however 'changes made in the allocation of resources to schools' is concerning. Please do not take any money away from schools. The potential £5 million it 'saves' now will not save money in the future if the quality of the education and the schooling experience. This would directly impact our young people and their future. I urge you to invest rather than save on our young peoples education and future.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Any changes here that save money means less support for children in school. There is already poor support in schools for children as it is especially in secondary education and particularly around mental health. Teenagers are suffering the worst mental health in a long time, possibly ever, off the back of covid. Making more use of technology and making changes to support staff will be detrimental.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	These cuts would have a significant impact on schools and children's prospects. Schools are already struggling with the current budget constraints and need additional funding not cuts. These measure will reduce attainment and social wellbeing and increase the attainment gap. Lockdown proved that time in school with teachers is more successful than digital learning. Administration and pupil support workers are vital to the effective running of schools.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	What the hell are 3rd party providers getting involved with schools. Too many government agencies pay out to 3rd party providers...dilution of duty, dilution of safety.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Budgets in school are already strained and schools have a lack of resources already that cannot cope with the burden of the curriculum.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Face to face teaching is vital. Many learners do not cope learning virtually and some cannot access the technology needed to fully engage in lessons.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	I don't agree on greater use of technology to rely on educating and providing curriculum to children. It's just going to encourage more isolation, less discipline and poor social skills and I think we have all had a taste of how bad that is long term on the children based on lockdown. I highly doubt we will be raising scotlands brightest pupils and successful adults from West Lothian if this is the sort of cuts that are going to be happening going forward.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I object to savings being made through reducing staff while still having an expectation to deliver quality teaching and learning and raise attainment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There are too many things on the curriculum at present and teachers dont have the time to teach children on how to use a computer. With conversations with friends with children at schools the parents always comment about the P.S.W's are hard pushed with noisy/disruptive pupils demanding their time. They cannot devote their time to the pupils whom they are employed to help	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Everyone complained that this type of education did not work during the Covid lockdown, the use of See-saw and Teams caused more work for teachers to find appropriate copyright free material online (The need to fully watch Youtube video's before uploading);	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Reducing staffing levels is completely unsafe. Education standards are going to continue to fall. Increasing technology is a huge mistake causing everyone to spend far too much time on front of screens etc	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	'Greater use of technology to deliver the curriculum'? As a teacher in West Lothian for the past 20 years this about sums up the 'respect' with which education staff in the council are treated. At a time when there are more additional needs in schools than ever and the impact the policy of 'inclusion' is having on all, removing additional support is nothing short of madness. As far as funding goes, recent changes have meant every resource must be ordered through PECOS providers who almost always charge almost double the prices items could be purchased from elsewhere. Significant savings could be made here if this was not the case.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is extremely alarming! Schools are already struggling with huge class sizes, lots of pressure to ensure they are getting it right for every child! Resources and staff are already extremely limited without a £5 million cut! Children have missed so much already through lockdowns. I have no idea how staff will meet increasing demands and raise attainment with such huge cuts!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Do not support, education resources cannot be cut any further	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The provision of high quality Education to our young people is paramount. These young people are the adults of the future and the people who will bring in money to the economy if they are prepared for working life. At the moment we are not meeting the needs of all of our children due to the large class sizes and the inclusion of children who require specialised/targeted support placed in mainstream schools. Their inclusion in effect causes exclusion of others in the class who are not benefiting from undisrupted quality learning and teaching. Cutting pupil support workers would make the situation even worse. We need smaller class sizes and adequate pupil support for us to truly meet the needs of all. Technology is a resource that is important and effective but is not the answer to filling education time not provided by the teacher. Not all pupils can access learning in this way. More money should be put into Education not taken away. School buildings need to be expanded to accommodate smaller classes.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Again education services must be protected and prioritised. Staffing must be optimal with a full range of subjects available to young people and additional support and early intervention continued.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	In addition, I think you need to be much more transparent with your 'greater use of technology to deliver the curriculum'. What exactly does this mean? In a world where technology is eating aggressively into everything we do and having failed so many children during lockdowns what do you hope will be achieved? Details needed.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	The education of our young people should be at the very core of what we do. After all they are our future generations who will inherit the world we have created/are creating for them. If you/we cut services such as pupil support and alter the curriculum to suit the agenda then the consequences are likely to be catastrophic. Scotland once had a world renowned education system. Now we seem intent on picking it apart. No longer are we up there with the best, rather we are scraping the barrel with half-baked ideas that will only harm our young people rather than help them. The details are far too complex for this opportunity but suffice it to say I will continue my discussions with our MSP and councilors who have been voted in to help achieve the very best outcomes for future generations.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	What does 'utilising resources' actually mean for schools? I think these proposals are too vague and somehow staff and residents are to decipher what is meant! Greater use of technology to deliver curriculum- how is this going to be done? Again too vague. Does it mean reduced opportunities for pupils by reducing opportunities? This needs specific examples and explanations on how it will not impact on pupil opportunities.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Greater use of technologies to deliver curriculum has me concerned as a teacher. We have tried and tested video content delivering to pupils during lockdowns and online video seminars now back in school for visitor speakers- children do not engage nearly as well as face to face.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I recognise that the cuts have to be made everywhere, however, it is estimated that a third of pupils have additional support needs, and that figure is from before the pandemic during which some children's ability to learn has been significantly impacted. I would be concerned about the potential impact of such significant cuts to PSAs and the use of ASN resources to plug core budgets, particularly as teachers and school staff are already struggling to address the need in classes.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	No, no, no - schools have been cut to the bone with teachers and staff stretched to the maximum throughout the last few years. There should be less use of technology to deliver the curriculum, children need core face to face teaching time not multiple online resources that they have to plough through themselves.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Education should always be a priority and making sure savings NEVER efforts our children's Education for the future within West Lothian.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	If the above is suggesting a reduction in the number of fte delivering education to our children then that is shocking, it is simply not possible to maintain quality provision of learning - there are already many who believe there are not enough teachers and additional support providers in our schools to meet the ever increasing needs of our children. Let's also not forget that we are only beginning to understand the impact of covid on our young people. They need more support in school, more time in school, more quality experiences inside and outside of school.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Allowing more technology curriculum delivery should be a priority for the council. Any changes which lead to staff reduction whether teaching, admin or pupil support will lead to a negative impact on pupil learning and achievement and should be avoided at all costs. We already have a depleted workforce who work incredibly hard to meet pupils' needs, to reduce staff further will only hurt our pupils.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	No idea what is meant by "a greater use of technology to deliver the curriculum". Nothing will ever beat quality lessons and human interaction. Technology should be used to support the delivery of lessons, it can never deliver them.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The support in schools currently is not nearly good enough to meet the demands/needs of the children. With a distinct lack of special needs provision it is getting more and more difficult to get it right for every child. We need more support not less or we will be failing the next generation. Inclusion seems to be a term banded around that means teachers need to try to support increasing needs and behavioural issues whilst trying to raise attainment. It is not manageable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Do not agree with this paragraph. Additional support is already under severe pressure. You are failing the most vulnerable in society. Third party providers will cost more money and provide a poorer service.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

Modernising our council	1D Allocation of School Resources	It is all very well saying use more digital, but internet speed is very poor and some devices are very old. Cutting staff at a time where children missed out on face to face teaching will be detrimental to attainment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Schools are already struggling with limited budgets. More support in terms of pupil support workers is required in every school. With the presumption of mainstream, there is now such a diverse range of children with additional support needs within every school. Class teachers are struggling to cope with the demands of these needs in the classroom and cutting pupil support workers further will lead to class teachers leaving the profession. It is unmanageable now in classrooms, never mind extra budget cuts.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Education services should be protected as much as possible from cuts so that the continued recovery of pupil learning post covid can continue	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Less should be spent on pupil support services for behavioural issues. That is a social work issue and should come from the social work budge, and it would be more appropriate to place all of those children into specialist units where an economy of scale saving can be made rather than paying for individual teacher support persons for each individual unruly pupil. An increase in digital technology usage would be helpful to children, but I think money should be spent first on ensuring that children are receiving a decent standard of teaching in the basics before it is spent on gadgets.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	More responsibility on the class teacher for support and admin (above and beyond what is already being done) will result in a lesser quality of teaching.	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	More technology is needed for this to occur within schools and also outwith schooling. If learning is to continue from home then technology is needed at home also. Schools do not need a drop in pupil support or admin staff. Pupils are struggling and still catching up with problems due to covid. If there are less staff members to achieve these same goals then students will suffer. More responsibility on the class teacher for support and admin (above and beyond what is already being done) will result in a lesser quality of teaching.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	needs more teachers not less	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The Business Support Manager is a vital resource for all school managers to support and manage their devolved school budget. I would have serious concerns if the Business Support Mangers were cut further and would become an additional work load issue for senior leaders in schools.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I don't agree with cuts being made in this area.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Computer screens instead of teachers!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Seems like you're sacking more workers here...?!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	So cutting costs in education will benefit who	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Probably not such a good idea .	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	less teachers more pupils	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Unacceptable!!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Disagree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Totally against	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	not interested	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Not happy with this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I do not agree with these plans.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	DONT NEED ANY CUTBACKS.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	additional support for pupils is obviously a key core staffing element within all schools and I would expect is allocated based on individual and school needs. However, this shouldnt be done at a detriment to other pupils.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Technology to deliver the curriculum can be positive if it provides the skills required when progressing to both work and university. For example self-study and review, or conference presentations etc. Will this mean that schools have less resources to be more innovative in their approach to education, placing a greater reliance on PTA and families to fund activities and learning materials etc?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools do not currently have enough resources to provide support for pupils in order to meet their needs at the current time, constantly balancing meeting pupil needs against available psw or teacher time. Cutting support provision either through reduction of pupil support workers or support teachers would have a direct impact on their learning and create an even bigger learning and attainment gap.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Technology is being utilised within schools to enhance learning however the network systems are not suitable to support an increase in pupil use and staff are constantly trying to develop their own technology skills to keep up with new developments. Many parents are also reluctant to increase pupil technology use at home either as they believe their children have too much screen time already or due to lack of resources at home Overall cutting any support provisions within schools would result in lower pupil attainment, reduction of quality learning experiences, a decrease in support for pupils with learning gaps, increased teaching staff unemployment and would not be beneficial in any way to pupils, parents or staff. Education should be one of the councils highest priorities - children are our future and without investing in their education we are not investing in a Scotland fit for the future.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	You should not cut Education every school support staff is needed to help our children.As a parent of a child who had additional support needs his pupil support worker has been invaluable at helping him to progress pupil support workers and teaching staff are fantastic.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	More funding needs to be allocated to improve west Lothian school facilities, good teachers and easy access to schools for parents such as car parks etc.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	More resources in schools such as technology items for each child such as tablets or PCs rather than shared learning or take your own. Every child should be given the chance of getting a free equipment, not just the deprived.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I'm not sure how resources can but cut further in schools, I feel my childrens school is in need of resources and would like to see additional staff to support my child's learning not being cut.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Being a member of staff in a school the current level of allocation for school resources is insufficient. It does not meet the ever changing demands of the pupils in the classroom and is failing school pupils and staff. The purpose of Cfe is "getting it right for every child" which with the current level of allocation is nearing impossible without further reductions. In school we are having to cut course options for pupils reducing choice preventing some young people from obtaining qualifications in a particular field. We are not providing our young people with the correct level of support needed, in particular with regards to those children who experience ASD with current levels at an all time high and only expected to increase. There is an inability to retain teaching staff due to cuts, leading to increased pressures being placed on us in the classroom which are becoming unrealistic. We as teachers are going the extra mile to ensure pupils achieve success taking time out our own free time to help them achieve extra qualifications or have the ability to have a teacher face to face which they are not afforded by the option of the money saving digital academy. The expectation is on teachers to deliver a course and prep for this course in 2 x 50 minutes periods at some schools, for pupils that they will never have the opportunity to meet face to face, why are these pupils not being given the opportunity to learn these courses within their own school? Where they can get one to one support and feedback in real time?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	More is needing spent on schools not less. St Kentigners has leaks in their roofs. Why isn't this sorted immediately before it ends up in a big job	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Issues with the roof at St Kent's currently being addressed.
Modernising our council	1D Allocation of School Resources	Please use plain English here - what does this actually mean? Does it mean schools must be self-funding for certain things? Isn't that just shifting the problem rather than solving it, since service users will pay one way or the other?; Schools are struggling as it is. Education should have increased investment, not decreased. Savings should be made elsewhere to accommodate ring-fenced education spending.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This appears to be a huge saving. What assurance do we have that numbers of pupil support workers will increase in line with need? Does "greater use of technology to deliver the curriculum" mean reduction in teaching staff levels?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am very concerned the implications this has for support for pupils, not only those with additional needs who are already underserved, but support for pupils in class. The pandemic has had a huge impact on children's learning and social skills. It is a crucial time to address these issues and more is needed to support children & staff in schools, not less!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Not clear what you are proposing here but as far as I'm aware there are already so many children needing extra support in class and that are distributing others education with their challenging behaviour. If anything teachers and parents need extra support for this not less.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	How can we truly GIRFEC I'd we do not have the critical resource of manpower that we need - support staff and additional teachers??? Agencies visit us and make suggestions, we cannot action these without bodies to do this. Children with ASN often require 1:1 support otherwise they or their peers suffer. Often staff are hurt as well.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Head teachers know their schools best and should be allowed to make decisions about how individual budgets are spent for their particular school. If these decisions are made elsewhere, it would be detrimental to pupils.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Headteacher have responsibility for budgets and will be consulted on any changes.
Modernising our council	1D Allocation of School Resources	Schools across West Lothian already have a shortage of PSW's who are vital in aiding to raise attainment in our schools. Further cuts of staff will have no benefit on the pupils or the teaching staff.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Lack of information given here!! Teachers already make good use of technology in delivering the curriculum- how would this save money? The mention of changes to pupil support staffing is extremely worrying. Pupil support workers are essential in schools and are already severely underpaid for the jobs they do. Reduction in this will have a huge detrimental effect on education.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As a teacher, I can unequivocally say this is incomprehensible and quite frankly dangerous. Pupil support is needed more than ever. The inclusion expectations in mainstream settings are unmanageable. Reducing pupil support will only negatively affect both learner's education and teaching staff will leave the profession. Furthermore, it is immoral to cut staff during a cost of living crisis.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am extremely concerned to hear the council wishes to cut funding to education by £5 million. There has already been a huge impact on childrens' learning due to covid so education should be a priority. There is already a huge shortage of resources in schools, both in terms of physical resources and PSWs. With there being more educational needs in mainstream schools we need more skilled PSWs and resources, not the council taking away £5million pounds.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Think this is over ambitious given the current cost of living crisis where more children are likely to be in poverty. Their well-being is supported by being at school and this must not deteriorate due to cuts	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I believe if we do not invest in education we are storing up even greater problems for the future. Children need support and high quality education, which is dependent on motivated , valued teachers and support staff. It might be better to have a narrower curriculum and do that well.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is unbelievable. The pupils in our schools do not get the support they need as it stands how can you determine that it can be withdrawn any more than it already has. There is not enough provision in West Lothian for pupils with special educational needs and the mainstreams schools have autistic and pupils with other difficulties who do not have the adult support needed. I cannot understand how you can possibly take any more money away from this than you already have.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools require an increase in pupil support workers not a reduction. This suggestion to save money is ridiculous. How can this possibly be suggested given the commitment made to support inclusion of children with Additional Support Needs (ASN)? Every class should have a pupil support worker to assist.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	'Tis is nowhere near specific enough out clear as to what exactly is going to happen and having 3rd party people involved is vey dangerous to the standards off education.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil Support Workers in every school are the backbone of the education system. They are the ones dealing with the day to day problems in school/home and also helping children with their confidence to achieve greater things. Agile learning will not work without PSW's. It is hoped that you are not going to use third parties as a cheaper way of providing a service. After all PSW's are the poorest paid in the education system. Any trimming of staffing levels should start at the top as we seem to have excessive amount of higher management. Using technology for the curriculum shouldn't be a daily thing and again what happens when these systems fail. Pen and paper shouldn't be alien to children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I disagree with this. School need to best decide how to spend their own budgets sleep don't on individual needs of school. "Greater use of technology to deliver the curriculum" sounds like you're trying to replace teachers.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This measure is very ambiguous. I don't think additional support should be altered to save costs and I believe that children need their teachers much more than they need technology. I do not agree with this measure.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Personally I feel there is too much emphasis on technology in schools and too much screen time for kids. My kids never bring books home anymore even though their school have a library which is a shame. Schools seem to be underfunded as it is so cutting funding isn't going to help.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Reducing teachers will cause more harm than the good any savings could make. Parents will expect that their children receive the same amount of quality schooling that the rest of Scotland receive, delivered by qualified teachers. In an post pandemic era where the core areas of literacy, numeracy and health and wellbeing are of top priority along with quality teaching and learning experiences, giving children less time with qualified teachers will not allow for education recovery to continue. If anything, more qualified teachers are needed to support educational recovery, to target the attainment gap and the gaps created by a loss of schooling over the previous two years. Smaller class sizes, more additional support and an increase in non-class contact time are the only solutions to support high quality teaching and learning. Reducing the school day and pupil contact with qualified teachers would be detrimental.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Training electronically makes sense rather than at venues. However schools need more resources for ASN pupils and not a reduction. The amount of ASN pupils with high individual needs is increasing in mainstream school and impacts on whole classes so reducing this does not make sense since there are limited numbers for inclusion & wellbeing unit. Increase these provisions to help mainstream schools.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is actually a point where education requires greater funding, not less, and the children require even greater support otherwise the outcome for Scotland will be felt for decades to come.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am totally against any reduction in school budgets! I have first hand experience of how challenging it has been for the children and staff during Covid and although my children are of senior school age, it is very clear that it has had a detrimental impact on child across all school ages.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The fees to use school facilities for clubs and societies are already very high, would not like to see these groups targeted to raise funds and further exclude people.	2. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Many educational establishments across the authority do not have the resources required to support a move to even more of the curriculum being delivered digitally. I know of classes using laptops that will no longer hold a charge, struggle to connect to the internet and even have missing keys on the keyboards. Schools that do not get significant PEF money are already struggling to provide resources for pupils and are at a disadvantage to other establishments.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	In short, schools cannot operate without pupil support staff (non-teachers) who build positive relationships with pupils and undertake tasks that are essential to the success of the young person.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There is also an increasing number of ASD pupils in school who need bespoke packages of education to meet their needs. This requires schools to be creative and rely on pupil support workers to have a high level of training and skill to work with these young people in partnership with teachers, often in small groups or 1-2-1 support which the teacher cannot do with another 29 pupils in the class.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil needs are becoming more and more complex and schools are stretched at present. I am very fearful that any reduction in staff supporting pupils will have a detrimental impact on attendance as pupils will stop coming to school as they will not feel safe and supported. This will have a knock on effect on attainment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are seeing a huge increase in mental health in young people following COVID, cost of living crises, family break ups, social media influence etc and it is essential that pupil support staff continue to support these young people so that they are healthy enough and supported to access education. If children are not supported in school by pastoral support to manage their mental health, they will not be able to attain and go onto a positive destination with increased life chances.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Really important to ensure we have the learning support for children as massive gap in children moving up to high school age due to covid impact while at primary. We are already trying to proactively support our children with this but not all families are in this position. We need to get the fundamental basics instilled in our children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I have an autistic child that has been out of school for 18 months. The ability for my child's school to help is extremely limited while government and council processes continually put more and more demand on them.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	We need to give more support to teachers and pilot support workers. Please listen to them as they know best what they need to do their job. All teachers and support are there for the good of the child and therefore know best. Start listening to them.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Constantly devolving school resources will eventually lead to the reduction in quality of service, equipment, goods and food supply. Third party providers only care about the Pounds saved and not about delivery of quality education	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	We need more money to give these children the education they need and deserve, or we need specialist units to support ASN children. Teachers being attacked, children being put in unsafe positions, and lessons being disrupted by children screaming should not be the expected norm and it will only get worse by removing funding.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This year has the highest number of additional needs we have ever seen, and without an adult available even in the corridor to come in when things are challenging, it provides a risk to the rest of the class. It is not sustainable at the moment, it is not safe at the moment, and everyone is struggling.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are at a bare minimum and struggling to survive as is. The larger the school, the more worse the situation. Our school is currently trying to run all P1 classes and a nurture room with no PSW support as PSWs are timetabled to be with us, but constantly pulled away to cover 1:1 support, chase absconding children (with needs identified but no shift on specialist support), the personal care nappy changing of children with identified needs...	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I don't want the schools budgets cut back. As a disabled person I find that younger generation with disabilities are being placed in a main stream school. This isn't acceptable. Not when the teacher had to spend hours with 1 student. I agree all children should socialise. Could a separate support room be made for kids with extra needs. Not shunning them. They just need more support and not distraction.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Please please please don't force our children to live an online life.	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This worries me. The children have already moved online to a large extent and need to build balanced lives. Moving education online too much may result in longer term impacts including poor mental and physical health. Likely to add cost back into to the system only in a different place.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	ASN is continually understaffed and until the class sizes are reduced to 6 staff will continually leave, continue to be exhausted and more is already at an all-time low. Staff are never listened to at Authority level. ASN school are not fit for purpose and certainly not big enough. Try providing the correct learning environment first before you embark on yet another ludicrous proposal.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As a parent and teacher in West Lothian I am concerned about what these changes will be. Not enough clarity is given regarding the proposals. Agile learning was described as being embedded in all WL schools but this is untrue. How can our ASN pupils be supported fully in mainstream primary school with less Pupil Support Workers and Support for Learning staff. There is not enough digital technology in school at present. Please provide more clarity about what is planned.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Kids already struggle with basic reading and writing and the fact more support staff have gone into primary to help shows this to be true. The overuse of electronic devices doesn't help either. There is already a huge shortage of teachers and you want to make cuts again, I find this ridiculous and other areas would benefit losing funds than a child's education	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Our schools are struggling enough already, they cannot take any more cuts! Our kids deserve much better state schooling than they currently get! The gap between state and independent schools is widening and it simply is not fair. It's not our kids fault the country is in tatters, but if we don't arm them with a decent education then how are they going to be the change that fixes this mess!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	My concern about this policy is that the levels of stress would increase, resulting in higher levels of stress and more absence as well as inevitable staff reductions leading to higher levels of stress in pupils furthering the need for a 'crisis response' instead of being able to put support in early to ensure that the crises are averted where possible.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are currently not coping as things stand. Staff are stretched to their limits and policies and cutbacks to support and staffing have resulted in many teachers being expected to do an impossible job with limited support. Early intervention is no longer early intervention as it is now seemingly a crisis response unit all the time due to schools being unable to manage those children who need extra support.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	If the provision by third party includes greater outsourcing, the service provision will inevitably be of a lower standard (witness what has happened in the Care sector giving outsourcing to private companies). As for increasing the use of technology, research has shown, very clearly, that less personal input from teachers and teaching assistants is detrimental to the learning process, encourages children to turn off, and perhaps lessens the attention span of individual children. Counter-intuitively, it might be more efficient to increase the personal input and lessen the technological input.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Clearly a need for investment in Education is required. As a parent of a S1 pupil, it is demoralising to understand that certain subjects that were previously statutory and core to the curriculum are no longer available due to a lack of resource or staffing.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	We need every penny that can help us give out the best service so yes we do need the council support	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Education is at bare minimum already. With a growing population of young people we should be adding more to the education budget. Especially ASN provision.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	More money is needed within the ASN sector. Schools are struggling and they should not have to deal with budget cuts on an already struggling sector.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Being realistic about what schools are actually delivering. Too many teachers spend their own money and time on lesson plans and resources as what is available is severely lacking. For too long teachers have worked unpaid overtime to plan lessons. Teaching and education is treated too much like a vocation than a profession but it can be both but importantly with great pay and understanding for what the role actually entails. Permanent contracts instead of constant supply work would also create job security for teachers. Too many teachers are finishing their probation years without jobs whilst schools are understaffed. Support staff are also an absolute lifeline in schools and should be more valued and offered progression in their roles.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There urgently needs to be a review of the provision to avert a crisis within the next 2-3 years. Children are suffering in terms of education and well-being, and staff are burnt out, leading to absences due to ill health and people leaving the profession.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The criteria for staffing levels is no longer fit for purpose and a higher ratio is required for the safety of children and staff alike. + Mainstream education is forced to adapt without sufficient support.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	The numbers of ASN children entering education with significantly higher needs than previous cohorts has risen considerably. This has two negative impacts:	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Modernising our council	1D Allocation of School Resources	Usually when you use third party service providers it costs more than doing it yourself. What milestones, performance measures are you using and going to share to justify outsourcing and demonstrate it is giving the same or better level of service?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I take it to mean: reduction in 3rd party provision. With the aim that you can maintain core staffing.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I take it to mean: reduction in admin staff.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I take it to mean: - reduction in pupil support staffing levels - more online learning	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	My view: More use should be made of volunteers in the education sector. For example - small group tutorials or homework clubs, mentoring, fundraising (probably happens already), practical jobs eg fixing broken taps or painting the walls or whatever.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Disagree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	No This is madness	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	No This is madness	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	DO NOT CUT FUNDS FOR SUPPORTING OUR CHILDREN	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Disagree. Do not cut funding to education.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is very ambiguous and unclear. Tinkering with additional support for our most vulnerable children is cruel and leads to even worse outcomes for this group. Those with additional needs are already those with no or limited voice in the system and the proposal to take away essential support and redirect is scandalous. Outcomes for all will be poorer as a result of support being redirected. The poorest will achieve less due to less support and peers without needs will also achieve less due to increased challenges within mainstream class environments.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Disagree with this proposed action.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Strongly disagree	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Completely against this proposal.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is a massive saving in an area that probably actually needs investment in time and manpower. It is good if technology can help deliver the curriculum but technology cannot deal with modern day problems pupils and workforce are facing.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This process devalues and deskills staff currently working in the area, who are stretched to the max and the moment and are taking work home. Making staff feel valued and building capacity inhouse would be a better way of saving money and retaining staff.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This statement is not clear- as a SfL teacher in a school in WL, I am concerned as to what this means. We need more staff and more funding, not less. There are a huge number of children with ASN in our mainstream schools and we need adequate staffing and funding to meet their needs. This can not be done alone with one teacher with a class of 25-30 children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The Council will continue to meet its statutory obligations to meet the needs of all pupils.
Modernising our council	1D Allocation of School Resources	If this means that pupil support will be reduced, it is currently insufficient at the moment for the society we are currently living in. If this means pupil support staff will take on more work then this is not acceptable on the salary they currently on as they are not qualified to teach. Children deserve to be taught by qualified teachers.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	School staff and resources are stretched to their maximum at present and to reduce funding/resources/support staff could have a huge detrimental impact to learners and teachers and may result in a loss of valuable education staff.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil support is vital for many children who do not cope with the demands of modern schooling. We are failing our children in their education as it is and cuts in this area would be detrimental to their education , limit their opportunities and is therefore unacceptable , This is an essential area that is needed for those children from backgrounds where they are at a disadvantage in their home life .	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The Council will continue to meet its statutory obligations to meet the needs of all pupils.
Modernising our council	1D Allocation of School Resources	I think pupil/teacher interaction is important. not everything can be delivered via technology. ; We should not cut services in the education area. education is key to survival of every country. we need an educated population.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This concerns me. Schools are already struggling to support increased need and this has impacted the support my child receives in school. Digital will not be effective without an investment in the infrastraycture, such as wifi, to support this. Some authorities already have each pupil and teacher with a device (eg Edinburgh secondary pupils and staff all being issued iPads). Without these kind of developments WL risks being left behind and pupils disadvantaged further.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Education is one area that should not see anything other than significant investment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Third party should not be used	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I don't think any funding should be removed from; Schools. There's a lot of catching up to be done due to covid. My son did a lot worst in his nat 5s than expected due to covid and lack of support. They need more funding not less. Any technology changes are welcome of course as kids love all this anyway	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Again costing more outsourcing and costing more and less effective	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are running on empty children are our future stop cutting services you have already allowed ASN services to be run down in the name of savings	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The Council will continue to meet its statutory obligations to meet the needs of all pupils.
Modernising our council	1D Allocation of School Resources	Funds should not be cut from schools	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I do not agree with cutting staffing levels or to relying on digital learning - children are online too much already without staring at a screen for 1/2 the school day.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Most teachers feel overworked already cutting further help or getting outside help does not seem like a good solution to this issue.	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Absolutely disagree with third party providers as education is paramount and also any changes or reductions to Servies for core staffing cost or additional for additional support services. The educational attainment gap as hugely increased during the period of Covid and clearly supports that use of technology was not beneficial for the majority, yes to be used as a tool to assist teaching. Aware of the constraints of funding and i am sure there agree some budgetary cuts need to be achieved, but at what cost long term?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The Council will continue to meet its statutory obligations to meet the needs of all pupils.
Modernising our council	1D Allocation of School Resources	I wouldn't support a reduction in pupil support as classes are already large and children have various needs	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The Council will continue to meet its statutory obligations to meet the needs of all pupils.
Modernising our council	1D Allocation of School Resources	Students may feel less safe of unknown non-teaching staff ; ; Could Open University options be pushed more by schools ; ; It feels like there has always been an issue of lack of school resources so looking at what would be the most efficient resources to invest in may be good but worried we will have less options in each school; ; Advanced Highers run at select schools or coordinated better seems to be a sensible move – less teachers needed ; ; ; Children will not be able to connect with 3rd party providers in same way they do with teachers s onot sure this is a good idea.;	2. Modernising our council	1D Allocation of School Resources	I would be sceptical about the level of learning and standards a third party provider would be held to over a qualified teacher.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	This point is extremely concerning! Schools already have stretched budgets as it is and this would ultimately mean the loss of qualified teaching staff, which considering schools need more support, not less, leaves me very concerned as a parent. The loss of staff will mean bigger class sizes and less quality teaching time per child in each class as the teacher will have to share their time across more children or group children into less appropriate bigger groups to try to meet all children's needs! Rather than placing children in groups for their specific individual learning needs	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Do not undermine the role of the teacher in the education sector.	2. Modernising our council	1D Allocation of School Resources	Schools are already understaffed, by reducing staff further this will impact on children's education, pupils need more support staff not less	2. Modernising our council	1D Allocation of School Resources	This is about childrens education, educating children is THE most important issue we have, to cut services in ANY way is wrong ! Schools worked fine when I was younger, we didn;t have business managers, we did have janitors for every school, we had a good education back then and schools full of stock/supplies ! Cutting support staff is NOT an option, support staff are vital, I know this having been a support worker myself, we offer children FAR more than help with their education !	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Cutting staffing and pupil support in schools is a bad idea.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Education should NOT be cut especially when with all the extra housing being built there actually need to be more schools, particularly another high school in Linlithgow (which often gets over-looked compared to other towns due to some misconception that everyone who lives here is rich!).	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is NOT the way to make cuts. As an Open University tutor, whilst teaching online and using technology is great it is still not a replacement for face-2-face teaching or having specialised teachers. It is appalling that in West Lothian primary schools there are no music teachers (using Charanga is NOT a means to effectively teach music especially if teachers are not confident about music/have no music skills). No art teachers. No PE teachers. No drama teachers. The teachers you are currently employing are working with minimal help or support and pulling rabbits out of hats daily. I'm sure for what it would cost to employ more staff you'd save one what you are losing when staff go on sickness/resign etc.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	pupils works better if they got good relationship with their teachers, and that's only possible with more permanent posts	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Again you are out sourcing this. Is the council not got people or even the school themselves that could deal with this instead of outsourcing which could cost you more.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Classroom assistance has been cut back already but the number of pupils with additional educational needs have increased in some classes. The pressure on teaching staff therefore increases and not acceptable.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The suggestion that there could be a reduction to pupil support staffing arrangements would impact badly on all pupils in a class. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The Council will continue to meet its statutory obligations to meet the needs of all pupils.
Modernising our council	1D Allocation of School Resources	I find even the suggestion that we should save money by cutting pupil support staff terrifying. As parents and teachers we rely on the education system to support our children and pupils. Stripping away pupil support will directly damage all of our children. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are stretched to the limit currently. A reduction in budget of £5 million would be catastrophic for education in West Lothian. A 4 day school week would be unacceptable to working parents.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	education has suffered greatly in the past from cuts and the attainment gap in our schools is widening. cutting funding and pupil support services is only going to have a detrimental effect on the gap and increase it further. pupils with learning difficulties need additional support not less we should be prioritising increasing funding in schools not cutting it	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This sounds like a way of cutting staff numbers right at the time when numbers should be increasing to improve the school experience for children. ; ; I cannot believe the council are even considering taking money out of the most vulnerable section of society and the one where investment is proven to be beneficial.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	VERY concerned about pupil support as due to the increase in anxiety and mental health issues that reducing pastoral support young people will be effected and tragedies will occur	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The Council has invested in counselling and mental health support services.
Modernising our council	1D Allocation of School Resources	School budgets are already really stretched and teachers regularly use their own money to provide resources for the classroom. Particularly in ASN schools, the short staffing is very difficult to manage therefore if it is further cut this will have a detrimental effect on pupils in our care.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil support is vital to support teachers and pupils across all schools and already the number within schools is too low. To support attainment more pupil support workers are needed, not less!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I disagree, schools funding is already at a point where it feels stretched/squeezed and this year already I feel that children's education has suffered already.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	We all have to be very careful on cutting school budgets as they are on their knees at this time	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Please don't take the support for learning out of primary schools, the deprived areas already have to compete with more engaged/supported schools for things like psychologists etc, removing support for learning directly accessible will detriment these areas further.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Reducing staffing who are able to form meaningful relationships with children, many of whom are high tariff, will surely lead to greater pressures on a system struggling to cope already.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Very concerning to see such a significant reduction in spending on our young people proposed.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Changes to pupil support staffing levels would impact on service delivery for pupils to support interventions and raise attainment. If administrative staffing were cut it would increase time HT's spend on non teaching and learning related tasks.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is hugely concerning. If this means a reduction in management again this will also mean a reduction in the number of teachers and pupil support workers schools are given funding for. With the inclusion agenda and reduction in number of pupils with more complex additional support needs (beyond academic needs) being allocated pupils support hours already happening, this is having a detrimental effect on the ability of schools to support children who require support to help them with their attainment. I have no issue with children with more complex needs attending their mainstream school and, in many situations, this could be a great thing for that child and their community but it has to be done with the correct level of support for that child above and beyond the pupil support team that is already allocated to the school to support children with a variety of needs to ensure they reach their full potential. I dread to think what could happen if this is reduced even further. Safety of pupils and staff will be impacted, the attainment gap would almost certainly increase and the positive outcomes for children will be affected.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are a very important part of the community, most are struggling to provide resources and support for the children they have within their schools. Pupil support workers are an essential job within a school both for the teachers and children, as many schools now support children with varied and complex needs within main stream settings.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As West Lothian Council is committed to a presumption of mainstream for pupils, it is very concerning that there are to be changes to pupil support staffing arrangements. As more and more children are brought into mainstream schools, there is an even greater need for increased levels of support to ensure that inclusion is fair and equitable for all pupils and staff.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The Council is committed to meeting its statutory duty to meet the needs of every child.
Modernising our council	1D Allocation of School Resources	Schools and children must be the focus as they are the future and deserve every chance in life to succeed. Thus, we must do everything we can to allocate schools enough resources. Schools should not be cut in any way. Funding should be increased.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Education is key, staff should not be removed from schools, their budgets should be increased to help and nurture our young people to become the best they can be.	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Technology doesn't deliver a curriculum, teachers do. Curriculum resources can be presented on digital platforms, but this does not help when someone simply needs a concept explained to them. Skilled teachers are a priceless resource.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Modernising our council	1D Allocation of School Resources	Support staff already cut to minimum in schools	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Completely disagree with using funds allocated to deliver additional support for core staffing requirements. The only instance that this would be acceptable would be that all staff are fully ASN trained and monitored to work within differentiated learning that is built around individual need and I don't think this could be done without complete educational reform (which I definitely think is required). Removing pupil support isn't a sustainable idea. We know that children and young people are experiencing more mental health and well-being issues than ever before and are less able to cope in the large classroom environment. What is needed is for Education to survive without significant third party providers is to work with learning resources including ABE, CLD and Active Schools and Community Sport to be better integrated within learning communities to allow for alternative support and provision that could help relieve pressure on core education services and help address the needs of targeted children and young people. However, there are certain areas where the council has to rely on specialist providers coming in and supporting children with the likes of bereavement, suicidal ideation and mental health counselling.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The Council will continue to meet its statutory obligations to meet the needs of all pupils.
Modernising our council	1D Allocation of School Resources	There has to be more additional support in schools to support teachers who have children with additional needs in their class, also Primary One classes should have additional support in each class all the time. Teachers are so stressed with the demands placed upon them .	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I have to laugh at the thought that you do not think additional support is not already a core staff requirement! Every teacher I know already has around 1/3 of their class who need additional support for various reasons and we have to fill out several documents and forms to firstly give evidence of the child's needs, secondly what we are already putting in place, thirdly what support we require and then we often have to duplicate this each year for each child. ; I don't understand how technology will reduce costs, is that to replace teachers?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Reducing money in education, just like health, will be a disaster and completely go against the whole PEF initiative. You want successful adults, you must put in the money as children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	PEF represents a significant addition, not a reduction, to school budgets,
Modernising our council	1D Allocation of School Resources	Devolved school resources are only deemed a positive if the schools have the structure and staff within them to manage all the responsibilities. It is fine cutting PSW and admin staff, but who is going to do the work ? Restructuring to save money is always a dangerous thing as it tends to be after the fact that the issues arise and there won't be anybody left to solve the problems.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Talking of third party providers for service provision also in the long run will not save money. Parents wouldn't be happy with a 3rd party in the classroom. What is to come out of teacher's timetable to accommodate this? The curriculum is as full as it is and to have a 3rd party in delivering lessons in the classroom is detrimental to the children's learning. What happens if the school can't find appropriate third parties to deliver curriculum in the classroom, have they to go without? It is not really closing the attainment gap or helping with equity.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is absolutely absurd. To try and take away 5 million from an already squeezed education system is at best incompetence from the decision makers in West Lothian. Very little can be said to describe how stupid this actually is. What good is this to the young people in our community?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Any reduction in school staff will hinder the students and if teachers have to do more admin then they will not have the time to teach properly.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I would be concerned about any reduction to administrative support in offices as the amount of work that has been delegated to schools to allow savings to be made centrally the last number of years has increased steadily and is unsustainable. To reduce staff would increase the likelihood of errors.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools need admin and pupil support staff to run. Cutting these will only lead to more problems down the line. Have the people "at the coal face" been asked about the allocation of resources through this new method and whether it will actually work in practice. These models are developed by not actually asking the end user as to how impacts their way of working and if it does make life easier and save money.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	DO NOT REDUCE STAFF NUMBERS IN SCHOOL. It was very clear during the lockdowns that many pupils did not engage in academic learning while removing teaching was undertaken. In addition, with the social services having cuts made to their budget and CAMHS having a massive increase in caseloads, school staff are finding their workload increasing rapidly. Cutting any staff numbers will have a massive impact on the young people in the authority and further widen the gap between those in the most and least deprived areas of our communities.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The Council remains committed to closing the poverty related attainment gap.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Core staffing requirements is very ambiguous in its term. Schools need a variety of staff in addition to teachers if they are to cope with the increasing number of children attending mainstream with complex needs that quite simply cannot be met in a class of 30. The ideology of education versus the reality of school funding needs to be meet better. ; Technology cannot teach a curriculum, it can hold and share information but it cannot fulfill the requirements of a person.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Sorry I do not agree with third party involvement in schools. It leaves staff and pupils at the mercy of others. While this might seem like money saving initially it does not continue and loss of control is significant.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is worrying as schools seem to have no money as it is	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I hope lessons have been learned of the positives and negatives of different methods of learning during Covid. The delays in achieving developmental milestones during that time must not be replicated to save money	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This sounds as though you are going to greatly reduce the quality of education for our young people this is unacceptable and short sighted -it will cost money longer term and have a negative impact on young lives and futures. All when these young folk have already had a poor educational experience due to the pandemic. This is awful.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Terrible, we need support staff and teaching staff to help our kids, especially those who need additional support	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Education needs significant investment, not reduction. But also the allocation of additional funds to schools needs to be closely monitored, I removed my child from a school that had been allocated over £100k to support attainment due to being in a deprived area, the only investment of that money was a family liaison worker who called round to chase up book bags! A colossal waste of resource.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I would prefer to see money allocated to staffing costs than to more technology. Our children's world is full of technology, person to person contact is essential for social skills and mental well being.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Again with the third parties, not always value for money. Everyone knows these companies think of a number and double it when the council are involved. Not value for money and more redundant people in West Lothian.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	How can we possibly GIRFEC if we do not have staffing in place that is essential to ensure we meet needs. Presumption of mainstream isn't correct for all. We need to resource this correctly to ensure success for our learners.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There is already a lack of PSWs to support the increasing high level of need in our schools	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Need more details than this....£5 million is a MASSIVE amount of money and you're very vague on what the impact would be on our children. ; This looks like an ill thought out idea. 🙄	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The proposals for education savings are absolutely ludicrous. At a time when an overhaul of the education system is required along with SQA how can we ever achieve the vision if we lose 100 teachers, specialist provision and our children have less access to things that nurture their development. The proposals are also deliberately vague - do we actually understand what is being suggested?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This will not work, resources that should be readily available are already scarce in most schools and lack of Pupil Support workers is having a negative impact in most schools with more and more behaviour challenges impacting learning in most schools. Teachers cannot teach due to trying to deal with these outbursts.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Cutting support staff in school will massively impact not only the children who they support but increase the workload for core teaching staff. Our children deserve the maximum amount of support, both for those with recognised additional needs and those who are from more challenging backgrounds. We owe it to our children to give them the very best opportunities to succeed in whatever they aspire to do. This cannot be done if key support staff are removed from schools as well as removing physical resources.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil support for ASN students is a vital part of education and key to helping teachers to support ALL students to access the curriculum and achieve their potential and both Primary and Secondary levels. Cutting ASN staff numbers will have a direct impact on this and is a backwards step for tge students in our communities.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Reducing the amount of support provided in schools should not be an option. With the reduction in specialised schools we were promised more support in main stream schools. This has been depleted over time and schools are now struggling to manage excessive demands on staffing due to the support required for pupils who cannot manage in a mainstream setting. This is leading to us not Getting It Right For Every Child, far from it.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Due to constant funding cuts, the schools within West Lothian are facing a hard enough time as it is. Pupils are being thrown into schools where the support staff are not available to support them in class. Teachers have maximum class sizes of 33 with no support despite many additional support needs. A cut to any education service is a crime- the teacher and school staff are already on their knees and feeling undervalued! It should not be a case of cutting funding or devolving resources- this would only widen the already HUGE attainment gap between SIMD households, but it should be a case of how can more funding be issued!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I'm not sure how technology can 'cover the school day?' We all so in lockdown how the attainment gap grew!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School budgets need to be protected. Otherwise our most vulnerable children will be severely affected. Huge classes mean there is less time for each child and attainment will fall. PSWs could lose their jobs when they are so badly needed in schools. ; ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Budget is now extremely tight in schools. Less budget would be detrimental to the children and resources are vital in delivering high quality education.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Front line staffing in a schools must be protected.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Education should not suffer as a result of the council's budget shortfall.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. The budget shortfall applies to education equally along with all other Council services.
Modernising our council	1D Allocation of School Resources	The challenges in school are greater with more disruptive behaviour and therefore we need more investment in staffing not less.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Changes to administrative and pupil support staffing arrangements should be left alone, they are inadequate as it is	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There is already a lack of staffing relating to pupil support in schools where schools are struggling to have enough support in place for pupils in mainstream. The individual teachers in schools know what support is needed for their pupils not some third party division outside of the school which will be out of touch with what actually is going on inside a school. Majority of pupils struggled to access Teams at all during lockdown online learning and fell behind in their learning as a result. This was due to lack of funds to purchase equipment to access teams and or lack of access to WiFi. Why would we choose to put more pupils at risk of not being included and disadvantaged in their education because of their families economic background.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Basics in schools are already underfunded. Schools will fall into disrepair and pupils not be supplied either basics if further cutbacks are implemented	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil support workers need to be retained in classrooms to provide equity for pupils with additional support needs. The number of PSWs in classes has already fallen significantly and there are more ASN pupils than ever in mainstream schooling.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil support is key to addressing the needs of today's children and the increasing demands of inclusive education. Will the Devolved School Management funding be able to respond adequately to the growing needs or will it be just a paper exercise of reducing support that is urgently needed in today's schools?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There is currently not enough pupil support staff and not enough teaching staff in general to meet the every growing needs of our pupils. The council aims to raise attainment but this will not happen if the education budget is cut further.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Reducing funding for the schools and the Head Teachers' authority to spend appropriately for their school should be off the table. The school system is already stretched and this proposal would clearly negatively impact the system further.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	While I agree partly with this as some resources could be purchased at one location with a larger discount and then be distributed after school clousers with covid and now potential strikes by teachers I do not support a reduction in teaching staff for children in way. Children are already behind and affected by covid without reducing staffing.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	I am concerned for the implications this will have on education, my children's classroom and in the time they spend with their teacher, or in fact, a person who is qualified to educate them. 1 of my children has an ASN and already struggles with change at school. To have more change is simply unacceptable for him. He adores his teacher but she is already overworked and his classroom understaffed with no full time Support worker to support the many other children who also experience ASN's. Our children deserve better than they are currently getting.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	This is not acceptable. The children of West Lothian deserve better. Many of them need support, nurture and stability when at school because they simply do not receive this at home. They do not need less time in class with a consistent adult they need to be more supported when in school to prevent future issues developing and cycles repeating themselves.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am concerned about potential changes to pupil support staffing arrangements. Pupil support departments provide vital support to a pupils with a range of needs who find school challenging. The covid pandemic has increased the support that children and their families need. A large proportion of this support comes directly from pupil support staff who are already working at capacity. Any change to staffing here will have a direct impact on pupil and staff wellbeing.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Absolutely not, our education services must be retained to ensure our young people have the right support in place to ensure they receive the education they need to succeed.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I can't see how schools can operate efficiently with fewer pupil support staff. More and more pupils are being diagnosed with mental health issues and additional learning needs - how do you plan to get it right for these pupils without the appropriate support available.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Terrible idea. Young people have suffered enough since the pandemic. They should be supported with additional funding to catch up with lost learning and to close the attainment gap. The idea of reducing funding to schools will have a major impact on our future generation (of voters).	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools need the most funding so this should be top priority	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is the part of the proposals that terrifies me. Schools are struggling to meet demands placed on them already. Cost of living crisis is hitting families hard and schools are seeing the effects on the children and families that they serve. I fear that the changes to pupil support arrangements simply means that those roles will disappear and our schools and communities will be all the poorer for it. Many teachers are already struggling and are disaffected by the role (as evidenced by the imminent strike action), further cuts to funding and staffing will only serve to turn more and more people away from the sector, leading to a crisis in education.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	without schools and the resources to keep going how can we teach and have our future go on to do greater things all people who are be it the teachers the cooks the cleaners the school crossing play a vital roll in our kids future	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	A big fat no, cutting down on pupil support is not good, there is not enough as it is. Making it online is not great as some people dont have access to online provision.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Again, School resources and staffing are already stretched to capacity. Reducing this will impact on the education of all children	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Many of our schools are understaffed as i see. Not sure i would like to see third-party companies involved in teaching which can create issues in regard to the authority which eventually affect our children. Technology is great but high dependency on these at school may not be the best. It should be well-balanced.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools must continue to receive sufficient funding and more to ensure the attainment gap doesn't get wider	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Education is important and should be given all the resources needed.	2. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	There's not enough funding in this area. ASN are underpaid for the work they do which is increasingly challenging as the number of pupils with diagnoses has increased. We have far fewer admin staff due to previous cutbacks. And 'making greater use of technology to deliver the curriculum' - what does that mean? The virtual campus for AH is nowhere near as effective as in person teaching. I have observed colleagues trying to deliver virtual AH effectively and the amount of unpaid overtime that goes into it is ridiculous. Classroom teachers are trying to get it right for every child and with even less support staff, there will be a massive impact on stress on teachers.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	So teacher skill and expertise are worthless now?! The education of children in schools seems like it is not valued by you anymore! Schools are already on their knees thanks to previous cuts! PSWs who are already also stretched to the max are going to be further stretched?! What happens when the child in my class with severe autism is having a really tricky moment and needs adult intervention, at the same time my child who is known to be aggressive starts attacking others meanwhile my child who suffers from daily seizures has an episode. All at the same time. (which has happened.) You've taken my psw with these cuts. Who helps me?! No-one knows my children and their needs like I do. Absolute disgrace that once again teachers and schools are targeted. I'd LOVE to see some of the people making these decisions come in and see the reality of a school over the week as it is now, let alone once you've demolished us through funding again!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Do not agree with this schools are already stretch snd with the increase levels of needs in school school support staff are more needed now and bringing in a third party could ge a disaster.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	With the ever increasing demands on schools and the need to support all learners, I think reducing resources further within schools will have a detrimental effect on all learners. How is this getting it right for every child? Also why not close some small schools and pull them into larger schools I.e Dechmont.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Support staff are overstretched and this is impacting teaching staff. Pupils who are in desperate need of support are going without.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School Pupul Support Workers are worth their weight in gold. They provide regular support and challenge for learners and any cuts to this service would have a negative impact on attainment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Cannot afford to make this amount of cuts. Without high investment in education, poverty attainment gap cannot be minimized. Young people are the future of the council and with cuts of this level young people will not be given the best educational experience making them fall behind others. ; Special education needs to be further invested in as this is lacking significantly and young people being pushed into mainstream schools which do not have the provisions to support young people. ; More investment in pupil support to look after young peoples mental health and health and well being as if this is not at the forefront of education then everything else will not be achievable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The curriculum should not be delivered through greater use of technologies. Our children deserve the right to a full education that is delivered in person by a qualified teacher. Children need to be in social spaces with adults to guide them in their learning. I do not agree with delivering the curriculum in this way.;; Additional support in schools is crucial for ensuring all children have access to an education thatewts their needs not our financial needs. I would not like to see any service cut for children and young people.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupils have suffered greatly through Covid, schools are already working with extremely tight budgets, the poverty gap in attainment has yet to be tackled effectively... it is therefore absolutely not the time to introduce a further cut to school provisions and budget. Support staff and support for our young people is needed more now than ever. The key word being more - pupils need more support, not less.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is completely unacceptable. Technology cannot deliver a curriculum in any way whatsoever. Schools are already struggling with large class sizes, increased expectations and falling standards year on year. To get rid of additional support teachers will simply mean that we are failing thousands of children and widening the already large attainment gap.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Ridiculous. It is clear the decision makers in local government do not have a background in education. Stop making cuts/changes/restructuring to pupil support in schools. If you insist on limiting SEBN schools and special schools and continually ululate this idea of 'inclusive' schools then mainstream schools needs to be appropriately staffed with high quality teachers and support assistants.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	There needs to be clearer information provided. This statement is too broad and does not give enough detail. The younger generation are already suffering post covid, mental health is at an all time low. Children need to be able to go into school and have the best support, adequate level of teachers, pupil support who can spot Children who are struggling either educationally or may be dealing with things in their home life. This is certainly not the area where funding should be stripped back.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Reducing staffing levels in schools could be disastrous for some schools. Pupil support is already completely strained. Since covid there are more children struggling with their mental health and are unable to access the curriculum without one to one support of pupil support workers. Teachers are stressed with workload. Support for learning teachers are essential to ensure that pupils with additional support needs and teachers have support in raising attainment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This idea would mean less support for children, less options for nurture, mental health support, learning support and supporting children with additional needs. Supporting children in mainstream with additional needs is already stretched and many schools are struggling to cope. with the change to the cohorts in specialist provisions mainstream schools, specialist schools will not be able to Get it Right for every Child with cuts to pupil support. Already administering schools is a far more demanding job than it used to be with changes in policies and increased roles devolved to school office.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Supporting children in school should be a priority for the council. There are more children within mainstream primary schools with additional support needs who require high levels of support, what happens to these children if support is taken away? This would surely not fit with the GIRFEC agenda!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Yes schools need more staff to support children! Smaller class sizes would allow teachers to target learning better and provide the time to give meaningful feedback to raise attainment.; Digital technology is a crucial part of the curriculum and schools are failing the children we support, due to lack of up to date technology available to them. The budget should be used to provide 1:1 devices to children, this is something other councils already have in place!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	We need investment in more enhanced pupil support workers to be in classes, so that asn pupils can fully access their right to a mainstream education.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Each year we have an increased amount of pupils with complex additional support needs in our school. Greater use of assistive technology is welcome however should not be seen as an adequate replacement for pupil support workers supporting pupils learning and social communication in person. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	It is important that children's education is not further compromised especially since the covid pandemic. It is vital that children have more than adequate support services which they can access whenever required.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are already struggling to provide the resources needed and are having to provide from their own pockets. This is only going to get worse as staff cannot afford to do so, and neither can some parents so the children will be the ones who suffer.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Once again, digital technologies cannot be relied upon to deliver services. Education needs face to face and relationship building contact. The mental health of our young people is already in significant decline at large. ; ; Reducing qualified teacher contact for pupils is not the answer and should not be part of a plan to reduce costs. Our young people deserve to be educated by professional, trained, appropriately qualified staff. These are our future workforce, decision makers, voting public. ; ; ; It would be unjust to attempt to save money by denying our children and young people a quality education.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	There are already insufficient additional support needs 'resources' in schools. Teachers are at breaking point as the inclusion agenda has plunged us, with insufficient specialist training, into situations where pupils who are not suitable for mainstream education command more of the teachers time just to keep things moving along. That time is taken away from other pupils who then don't perform as well. There are increasing numbers of pupils being identified with ASN in schools every year, some schools up to 50% of their role, and continually decreasing resources whilst class sizes remain the same. That gap is plugged directly by teachers, with more workload that is already unmanageable. Including a ton of admin we're not contracted to do which looks like it will increase too. And now your proposal is to throw specialists ASN teachers into a pot as core staff? Putting them in the exact same situation but in reverse. Insufficient experience in classroom, expecting them to be experts in a field that isn't their specialism, and taking them away from the ASN pupils who need them? There is another gap appearing in education alongside attainment gap, and that is the inclusion gap. And let's not even talk about the fact we can't even get reliable wifi in schools, never mind moving towards 'greater use of technology to deliver the curriculum'. Investment is needed in digital infrastructure, in ASN provision, and in administrative staffing to cover all the cuts that have been made over the years so teachers can reduce their workload and focus on improvement in the classroom. There are some council services that you can reduce that don't have a massive impact on a lot of people, education affects the lives of every single young person on our council area.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	With the reduction in ASN provision in WL and schools now being flooded with children requiring high levels of support, the decision to further reduce support in schools will be catastrophic. School staff are already working in impossible conditions and I fear this will result in many leaving the profession and further difficulty with recruitment. Again specifics are lacking here to make further comment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Cutbacks on staff in schools should not be an advantage to saving money as that means less teaching and more stress on teachers as it is already.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As a teacher who was off during the pandemic due to maternity leave I have noticed a huge drop in confidence, resilience, respect and initiative in learners, and behaviour in particular early secondary. Unfortunately delivery of curriculum through technology will be devastating to the future generations and putting those who want to be successful at a detriment. Having teachers in the classroom is what makes lessons!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	It is right to review services across WL; The issues for me WL do not have a true understanding of the roles that Admin and PSW full fill ; They are amongst the lowest paid with many on temp contracts; Due to a lack of specialist provision for asn pupils; PSW will be charged with supporting very specific needs; They more than class teachers will face the brunt of abusive threatening behaviour as well as assaults; To change the role of PSW or Admin would require a job review ; ; 3rd Party Providers covering after school clubs(active schools) already in school; They can charge what ever fee they wish - schools under enormous pressure to keep the cost of the school day down; They have limited space so is not open to all; Will only take baccs transfer for payments ; No primary school has the facility to pay this way; Schools are required to provide administrative support to support these clubs; Every external provider should have mandatory first aid qualifications ; Again school staff are required to provide support in this role; ; WL sports festivals - schools not encouraged to charge ; Transport cost often running into hundreds of £; Where are schools to find this cash; As pupils have not to miss out; ; After school clubs run by school are a source of cheap child care; ; Swimming assessments; School to pick up the transport cost; ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	It is outrageous to think that you expect teachers to provide the same level of education, whilst trying to bridge the gap that's was already there and was made worse by covid, by removing pupil support workers. More hours are needed in this area, not less. Technology cannot deliver the same curriculum as people.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am slightly concerned about the suggestion that digital resources will be used to 'deliver' the curriculum. I would like further clarification on what this actually means. I feel that schools are already well stocked with a range of IT equipment. ; ; if it means providing online materials like we did during covid times, then I am horrified at the suggestion. This method of 'teaching' did not reach our most disadvantaged children. Their education and life chances suffered hugely during lockdowns, due to the poor engagement of families, lack of suitable IT equipment at home, lack of knowledge of how to use the equipment they were provided, and lack of human contact and direct teaching in person for our pupils who need it most. This was not a good model for education. It was the best we could do in a situation completely outwith our control but it should never be repeated. Children need to learn in school from real teachers, face to face. If we learned anything during covid, it was this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	I am very worried that these changes may result in a reduction of staffing numbers, including teachers but especially in reference to school support staff. Pupil support workers are an invaluable asset to our schools and an essential part of our ability to ensure that pupils are adequately supported in their learning. We are already woefully short of support staff in schools and need more, not fewer, of these vital staff members. ; ; ; Finally, I have concerns about the number of people in education who are going to be out if work following these changes.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Money needs to be invested in our education system to ensure we have a population for the future. At present we are failing a lot of our children due to lack of staffing to support their needs. This cannot be allowed to decrease even further.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	We need pupil support staff to support our most vulnerable children. Children with additional needs are no longer gaining places in specialised schools and therefore attending mainstream schools. Without support staff we will not GIRFEC! At present we don't have enough support staff to adequately deliver the best possible outcomes for our children. If this service is cut then more children will not reach their full potential. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil support has been diluted over the last 10 years and teachers are finding even more difficult to deal with class sizes if 33 with mixed ability and special needs without help.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is a terrible idea. Pupils need continuity and third party coming in don't know what has gone on before. Teacher needs to be able to speak to parents about everything but they won't know what happens during third party times.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are already struggling with the current model of not enough support staff and it has already been proven during covid that technology is not the answer. This will have a serious impact on children with ASN who are already at a disadvantage with current resources stretched to the limit. We need to look at more support staff in schools with ASN and most definately not less.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Technology cannot replace teachers face to face teaching. I just doesn't work. Children don't engage and parents cannot manage working and supporting children at home.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The Council has well established practice of supplementing excellent classroom teaching with effective use of technology. The two are complementary, rather than alternatives.
Modernising our council	1D Allocation of School Resources	Schools absolutely cannot afford to lose any support staff. Schools cannot function without them. Given the increase in mental health issues in young people, especially since lockdowns due to Covid 19, support staff provide crucial support to our young people. There is also an increasing number of children with additional support needs requiring extra support in school to achieve their potential. Without skilled Pupil Support Workers to enable this, we will not be meeting the government GIRFEC guidance. Therefore our young people are being disadvantaged on a daily basis. We absolutely cannot lose Pupil Support Workers!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I'm unclear about what 'devolved school resources' involve and would appreciate more information on this. I would be hugely concerned at reducing pupil support staffing arrangements as this will hugely impact all children and teachers and would be incredibly detrimental for children with additional support needs who are so often already dealing with other issues including poverty, disabilities or other family difficulties.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Terrible! Decisions made for schools by nooln educators or those who are out of touch with modern classroom experience. Presumption of mainstream means *more* support is needed, not less!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Proposed savings through the use of technologies is concerning. It was evident with the attempt to use on-line learning during COvid that children and young people need access to qualified teachers in person if they are to progress in their learning. The savings proposed also suggest that there would be unqualified teachers delivering content during teachers non-contact time. Again the children need to be taught curriculum content by qualified teachers at these times. With increasingly difficult class composition because of the presumption of mainstream and lack of alternative placements for children with ASN any reduction in qualified teachers and pupil support workers would be detrimental to the children and to teachers workload and mental health. I foresee a number of practitioners leaving the profession if these proposed savings should go ahead.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	School funding should not be diminished in any way. This will result in the pandemic affect children being even more affected and their learning experience further diminished. A more appropriate way to achieve these savings would be to have schools cooperatively working to share resource, including 3rd party providers, more effectively and efficiently. Its disgusting as it is that teachers are buying basic school provisions to cover the lack of supplies. Less costs associated with the managerial team and a streamlined council education dept with cooperative and imaginative solutions to issues, such as better use/increased use of social organisations providing free/cost lite activities and services. Also many parents such as myself would like a mechanism to donate to the school to provide for our children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Sitting in front of screens all day watching on line lessons!! May as well be at home	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Additional support of administration support in school is always a positive, support functions do make a difference in school. However I would hate to see a reduction in support function because funds are not available.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School budgets and resources are already stretched thin. By reallocating resources, this may take away essential resources which WILL have an increased impact on learning.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Our children need staff not technology to deliver the curriculum.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There is a steadily growing number of children with additional needs in terms of learning challenges and barriers caused by social and emotional factors - particularly since the Lockdowns caused by the pandemic but also because of the growing problems caused by societal issues such as poverty, mental health issues and substance abuse.; Do not sacrifice the education of children to save money. Special bases, units and schools are key to inclusion and meeting children's needs - not least those without challenges and barriers whose learning experiences are often affected adversely by children who require support not receiving it.; Children are the future of West Lothian - it is a false economy not to invest in them. Closer connections with the Social Services, Health Sector and Voluntary Agencies may be the answer - change the model not the money.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Any changes to the DSM model would have a significant impact on the pupils of West Lothian. Head teachers, deputes and principal teachers are already overworked and underpaid. This proposal will result in fewer and fewer people applying for SMT roles and existing SMT leaving the profession altogether - you only need to look at the recent EIS survey that highlights that workload is the most pressing issue for education staff.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	What do you mean by greater use of technology to deliver the curriculum? Pupils need interaction with teachers and support staff. We should be investing in their future not cutting back on spending.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I work in a school as a PSW. We support staff are the backbone of a school. Without us the school would not be able to function. We are paid a very low wage but the expectations for the job had got bigger and bigger over the years. I can't see how you can run schools without support staff ?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Making better use of technology to deliver the curriculum requires good internet services in schools. If changes to administration staff and support staffing arrangements mean less staff supporting in schools then I would need to disagree; With this. This would take away support from our most vulnerable pupils.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Cuts should not be made to Education that reduces staff, there are too many children with complex support needs in mainstream schools already and staff are doing more than their roles with the workload increasing almost daily.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Not sure this will work. I have a son in secondary and doesn't have teachers for a couple of subjects just people standing in! I also think subjects like religious studies are pointless and with 2 yrs of covid closures kids need more education!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The education is one of the most important thing for the country. Teachers definitely need supports from admin and support teachers and they can deliver good quality education without these supports. I am not happy with this change.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Education is essential and providing great service is an absolute must even if it means increasing council tax or something else, the children already use more technology than ever they definitely need humans supporting their development this is an absolute must and should not be getting cut at all	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Please do not be fooled by the 'digital technological revolution'. Many people are unable to learn from digital formats. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Pupil support is already understaffed and children are not getting the required support due to budgets .; Getting it right for every child is not happening.; ; Schools are being asked to provide more than just education so cutting resources is going to put more pressure on everyone involved in the front line of education.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools/education should be invested in not cut. Using greater use of technology to deliver the curriculum is denying children the attention they need and crave from education providers. Technology cannot respond to pupil's needs or notice additional support that may be required or any social issues. Pupil support workers already have a huge amount of responsibility and are asked to do a lot more than what they are paid for. Staffing levels should not be reduced. It is problematic for the pupil, the pupil support worker and for the future of that career choice.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	"Greater use of technology to deliver the curriculum" is fine in theory but it only works if the technology is available. Technology costs money so I don't see how this is a plausible suggestion for saving costs. ; ; A revised DSM funding model sounds ominous and I don't like the potential impact that this could have on the children we educate. As I teacher, I already see the financial struggles that my school faces, with staff often buying their own resources and children not receiving the support that they need due to a lack of support staff. The very last thing that my school needs is a reduction in funds and a consequent reduction in the ability to employ qualified teachers and support staff. If anything, the children need more support as the years pass. This becomes more apparent every year, particularly with the hefty demands placed on our shoulders to raise attainment. Funding for staffing needs to rise and not fall. The education and future of our children relies on it. ; ; It is also clear that budget cuts mean less opportunities for staff to be promoted and develop their careers. If we are trying to entice the very best young people to become teachers, this is not a good way to do it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As a secondary teacher, I find it very alarming to see the council considering £5m of cuts to allocation of resources. Schools need investment of £5m, not cuts. The main impact will be to the detriment of our young people, as well as increased stress and pressures on staff trying to deliver the best for their students. We need more, not less, support staff in schools otherwise we're failing our young people.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	; ; I question how technology can be better used to deliver the curriculum in an effective way when IT resources are so scant and poor in quality at the moment. WIFI in our school is awful and the idea that students can 'bring your own device' is laughable. We can't even use the school laptops in classrooms where the WIFI doesn't reach, let alone personal devices. Desktop PCs are so old they take a full period for a student to log into. Where is the funding to allow teachers the means to deliver relevant, engaging and tech centred courses which will allow us to prepare our students for life after school? ; ; In short, I feel provision of education is already on it's knees - budgets have been getting chipped away at for years and the impact is already keenly felt by teachers and staff who are trying to deliver on the principles of Cfe and all other education priorities. I find it hard to see how 'efficiencies' = better outcomes for our young people.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	So schools should be focused on effective learning both academically but socially too. Different people learn different things in different ways. During the pandemic I can whole heartedly say some teaching was non-existent. If you are going down the route of online digital learning ensure teachers are equipped and trained to be confident online. I think technology is a good aid but it's just an aid. Children need to be stimulated and encouraged to be curious perhaps.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I can only go on feedback from my children and that most of his classes are staffed by teachers who don't turn up .. he has more free periods than ever and quite frankly encouraging him to stay on was the worst decision I made I wish I let him leave and get that job that goes nowhere .. schools are very disappointing .. this should be a priority	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

They are underpaid and undervalued and must be protected moving forward	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Cutting back on school resources will just impact the parents further as in order for the schools to continue to provide things as they currently do they will need to fundraise and that money then has to come from the parents!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Modernising our council	1D Allocation of School Resources	We are unable to cope with inclusion and the very little support provided at the moment. More cuts in support staff will drive professional teachers out of the job or it will become a childcare facility rather than an educational setting.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	You just know that won't work! Modernising our council	1D Allocation of School Resources	; You are devaluing teachers and the profession by even suggesting the our young people can get the same learning experience through technology rather than with a teacher - a trained professional! It is not acceptable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The school system over the years has been incredibly squeeze - and both staff and students suffer. Employing the use of technology to deliver the curriculum is not a substitute for teachers and is not acceptable. I do not want my children going to a school where they are required to watch screens/technology to learn parts of the curriculum because there isn't a teacher there to teach them. Screen/technology can help aid the core learning and even enhance the learning experience but it shouldn't be the primary source of deliverance ever! ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Reduction of teacher / pupil contact time in primary schools is not a long term effective strategy. It would be harmful for children, already impacted by Covid interruptions. More resources, not less, should be allocated to both primary & secondary education to enhance attainment levels resulting in greater long term success for the county. Reducing teacher contact time undermines the Scottish government strategy of investing in our children. Our teachers are highly educated professionals whose skills should be valued, developed & utilised to the enhancement of all in our community.	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools have already been reduced to breaking point. Lockdown learning has shown us the importance of having pupils in class with teachers and support assistants and not learning online. Technology is already used effectively in schools and moving lessons more online or increasing class classes would only lead to a reduction in learning. Support assistants are already understaffed in many schools and are vital to the learning for pupils with additional support needs. Reducing their number further will lead to more pupils with additional support needs achieving below their potential due to not receiving the support they are entitled to.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Education is core and should be supported and invested in, especially following the challenges of Covid. Many good teachers and other school staff are leaving due to current workloads and expectations. I realise that change can be effective but concerned about the impact that further demands will bring. The health and wellbeing of all our staff should be priority for the future of our young people in West Lothian.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Very wordy and difficult to understand statement! Perhaps hiding the true impact on children and their education.; Nursery Education has already been compromised by cuts making it a child minding service with little impact from fully trained professional teachers. I do not want to see this happen within schools. To take away fully trained support from children and supply them with support from people with very little training would be detrimental to Scottish Education. I strongly disagree with this saving!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I feel that children have already suffered due to the pandemic and are already struggling to catch up. Changes at all to staffing would cause children to fall behind more especially children with additional needs. They need their teachers, support teachers to help with their learning in school. All school staff have a vital role to play. My own child has been shown so much support at his school from receptionist, support staff and teachers. I fear that if any of that was to change my children would not be getting the correct support.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	No 'third party' arrangement can effectively replace professional teachers and PSWs in school, I am opposed to this. School staffing must increase not decrease. Too many people in development roles in civic centre or working from home. Cut these NOT in school support.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	We are concerned that any changes to support staffing will disproportionately impact those who; are already disadvantaged, which would undermine the goals of inclusion and equity.;	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	.; ; We are concerned that changes to resourcing will have a negative impact on teaching and; learning.;	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The high value of this saving implies to us that it is likely to lead to a reduction in overall staffing; levels with a resulting impact on curricular provision. The loss of any support staff is likely to; impact wellbeing significantly, and we ask that this there is no adverse change to pupil support.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Teachers within our schools need to be strongly supported by Pupil support workers and advanced pupil support workers. The amount of children who need support in a class or one to one basis is paramount to the rest of the class being taught adequately. A child with ASN must be supported one to one at all times, cover is also required over break and lunch times to support individuals. No support within our schools would put far too much pressure on the class teachers and management, who rely so much on support of a PSW. The classes cannot be taught and well within curriculum with children who are at very different levels and need significant support in their learning.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The Education sector must be an area of development where the human resources are irreplaceable. All the schools, especially the Special School settings have been have known better days. At the moment, we have lack of staff to support our children with complex and additional needs. I propose;; - More Advanced Pupil Support Workers per class (review ratio Pupils:PSWs).	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I think this means for our children, less time spent with qualified teachers although it's worded vaguely. ; I don't think this is a good idea as it moves towards childcare rather than education. Could workload be reduced for teachers while maintaining pupil contact time? My teacher friends complain of endless paperwork.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Out sourcing to private companies to save money is a false economy if the services that they provide are profit driven as care for the needs of children should not be competing with a private company's need to make a profit.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Our schools are supposed to be 'Getting It Right for Every Child', they are already failing so many. The schools are already Under staffed in terms of being able to meet the needs of all pupils, particularly those with additional needs. The staffing within schools feels completely stretched and I am extremely concerned about how any school would cope with further cut backs. We new seeing a huge increase in pupils with ASD in our main stream ELC and schools, we CANNOT meet their needs. The presumption of main stream is a great idea but it need to be carefully thought through and resources including space and staffing need to be put in place to meet all the needs of the children. The SFL within schools has already been cut back and we cannot meet the needs of all learners. If there are further cut backs then more and more children will be failed.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Utilising resources provided for additional support for core staffing will result in less resources for children in need of additional support. ; Those that need help the most will suffer in the long term.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Our schools are supposed to be 'Getting It Right for Every Child', they are already failing so many. The schools are already Under staffed in terms of being able to meet the needs of all pupils, particularly those with additional needs. The presumption of main stream is a great idea but it need to be carefully thought through and resourced - schools are already lacking in space and staff to support these pupils. ; Why would anyone think cut backs in this area are acceptable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Please do not disadvantage our Children - they are our future. ; ; It is also not fair to further penalise those with additional learning needs by reducing their support staff. Nor is it fair on the other children in their class. I am very concerned about this proposal and do not support any part of it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Modernising our council	1D Allocation of School Resources	I am very concerned about this proposal. The technology resources my son uses in school are horrendous- American and way more game than actually learning anything. Especially after covid, teacher contact time is absolutely key and I am very against any reduction in this. ; ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	; A further, extremely worrying, aspect is 'greater use of technology to deliver the curriculum'. I worry greatly that West Lothian council are looking to host online lessons or pre recorded lessons without a physical teacher in the class with pupils. Again, undermining the teaching profession and essentially declaring it as glorified babysitters. Technology can be used as a tool through which children access the curriculum but it simply cannot be the medium through which it is taught without a QUALIFIED TEACHER with a degree, experience, knowledge, care and understanding of their pupils needs. ; ; This is a terrifying proposal. You must reconsider all aspects of this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	I am absolutely SHOCKED and appalled at these suggestions and absolutely implore the council to rethink the savings they are looking to make. There are so many issues within this one paragraph that one simply cannot address fully in one response. You are proposing absolutely shocking amendments to our education system in West Lothian. Firstly, teachers are already stretched so thinly within their roles with the current class sizes and minimum pupil support staff already. This is going to greatly impact both learning for our pupils and teaching for our staff. The Scottish Government's main aim is GIRFEC Getting It Right For EVERY Child, something which we are already failing at in our schools as there are so many children with ASN whose needs just simply cannot be met by class teachers and this is not for a lack of trying. I fully understand the aim of inclusivity and the hopes that come with including those with ASN within mainstream but in many cases this is failing the child, their families and their futures - it is simply not the equity which our Education Scotland continuously say which they aim for. I also worry that changes to administrative staff will put further pressure on teaching and management staff in schools as the admin staff are already working on a very skeletal model which will take further attention away from learning and teaching of pupils of West Lothian.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools need INCREASED funding and staffing. Not decreased. In any way.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Unfortunately, as the consultation seeks to explain, the council must cut expenditure, not increase it.
Modernising our council	1D Allocation of School Resources	I do not agree with cutting pupil support. This is an essential part of the school. Without them, the school teachers will spend more time managing class dynamics and difficult behaviour and less time teaching. Teachers will burn out, and the education of all the children will suffer.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Sounds like a large reduction in staff which will adversely impact on curricular provision. Support staff have had their work cut out during and since covid and any loss of staff here could impact on pupil's health & wellbeing and, would probably affect the more disadvantaged.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are already on their knees in terms of support for pupils. Any move to reduce spending by further cutting the support available or by reducing face to face time with qualified teachers would be enormously detrimental to our children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School staffing has already been cut to the bone with reductions in support staff over recent years. Any move to further weaken the education system, including replacing qualified teachers with support staff or technology would be severely detrimental to education.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are on their knees and need huge amounts of investment, not reduction. Yes to investment in digital. West Lothian is behind many Scottish councils with regards to the digital learning available to their primary schools. Schools such as St. John Ogilvie need extensions as children are packed into classrooms like nothing I've ever seen, particularly p4b. Staffing increase is essential. Teachers cannot fulfil their remit without support staff. Children have a variety of different needs and the staffing is not available to sufficiently meet the needs. Reducing PEF funded APSWs in West Lothian schools is catastrophic for children, families and schools. The covid catch up programme can only be effective with sufficient staffing and support in place.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Unfortunately, as the consultation seeks to explain, the council must cut expenditure, not increase it.
Modernising our council	1D Allocation of School Resources	Education is one of the key areas where funding already seems pretty stretched this is an area I would not be in favour of cutbacks	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I strongly feel that children do not need "greater use of technology to deliver the curriculum", but rather high quality teaching staff that can deliver in-person, face-to-face, high quality teaching that meets children's needs. If by "changes to administrative and pupil support staffing arrangements" the council is proposing to reduce staff, I cannot support this. Schools need all the administrative and pupil support staff they can get.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am concerned that any changes to support staffing will disproportionately impact those who are already disadvantaged, which would undermine the goals of inclusion and equity.; I have not been able to locate a Child Rights and Wellbeing Impact Assessment in relation to this proposal, and request that one is carried out in order that impacts are highlighted and mitigated.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am concerned that changes to resourcing will have a negative impact on teaching and learning. ; I raise the fact that this generation of young people have faced extremely challenging years, and applaud all efforts the schools and local authority have made to prioritise mental health and wellbeing in the months since lockdown. ; The high value of this saving implies to me that it is likely to lead to a reduction in overall staffing levels with a resulting impact on curricular provision. The loss of any support staff is likely to impact wellbeing significantly, and I ask that this there is no adverse change to pupil support. ;	2. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Our schools are supposed to be 'Getting It Right for Every Child', they are already failing so many. The schools are already Under staffed in terms of being able to meet the needs of all pupils, particularly those with additional needs. The staffing within schools feels completely stretched and I am extremely concerned about how any school would cope with further cut backs. We new seeing a huge increase in pupils with ASD in our main stream ELC and schools, we CANNOT meet their needs. The presumption of main stream is a great idea but it need to be carefully thought through and resources including space and staffing need to be put in place to meet all the needs of the children. The SfL within schools has already been cut back and we cannot meet the needs of all learners. If there are further cut backs then more and more children will be failed.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools, Teachers and PSWs are already struggling to meet the needs of children due to increased specific needs. As with the increasing number of children requiring additional support, violence towards staff becoming a regular occurrence to the point that it is being normalised. Reduced specialist places to provide needs of pupils as they leave primary schools as reduced spaces being offered. Councils should be investing in the future of our children and not sacrificing it for cost cutting measures. As schools are already on their knees I can guarantee this will be detrimental to education and those that suggest these measures are obviously completely unaware how schools are already struggling and will manage to justify these decisions with no accountability.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This causes me serious concern to the extent it will affect the support provided to pupils with additional support needs. My son in p5 has a spelling age of a pupil in p2 despite his hard endeavours, 1 session a week with the additional support for leaning teacher (the most the school can provide!), and with pupil support workers in the school. What happened to 'getting it right for every child'? The system is already failing my son. Please don't take away the little support he gets.; He's in a class of 33 with at least 3 others with additional support needs. How can a teacher deal with that with reduced support?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I would be wholeheartedly again reducing the education budget at all. The increased use of digital technologies can be justified for academic reasons however not for cost reductions as the experience is note same. We need to do the best we can for the education of our children and we already need to improve and so should not reduce budgets for schools. Pupil support workers are an important part of the school ecosystem and the only wat to deal with current large class sizes and students with varied needs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I have concerns regarding "greater use of technology" to deliver the curriculum?? This could potentially mean reducing the number of teaching staff. The changes to administrative and pupil support staff and third party providers - what would this look like and what they will provide us an area of concern.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupils are entitled to a qualified teacher through their 25 hours in school. Any cuts to this would be to the detriment of every child.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	It is also crucial that technology does not and cannot replace good teachers- pupils cannot ask questions, seek clarification from or enter into dialogue with a screen.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Devolved School Management can result in greater costs or the lack of ability to deliver particular aspects of school life and support. For example, several schools may be able to share the cost of a member of staff to visit each place to deliver a particular curricular area, where one school would not manage on its own.; Pupil support workers and admin staff are already incredibly stretched and to further diminish their numbers would have a terribly negative impact on schools and young people. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is very worrying in terms of the access to highly trained teachers and pupil support workers. Our children are some of our pay vulnerable, they are our decision makers and business people of the future, yet they are potentially facing some of the largest cuts. Why? It is also worrying re the prospect of reduced support for those needing it, support in schools is almost skeleton in parts already and a reduction will only lead to further distress, trauma and frustration for all those concerned and relying on these services.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Cutting teachers, PSAs and support staff with further damage a service already cut to the bone. Greater technology to deliver the curriculum means teaching pupils via teams, doubtless with no training or support, which is a shabby substitute and will further alienate pupils & damage their life chances	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is an area where funding is already lacking pupils not recieving the level of support required to allow them to reach their full potential. To take some of the funding away would drastically affect children's learning and development further.	2. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	There is a chronic lack of ICT in schools currently, and what is available is outdated and inefficient. Learners using their own devices raises significant issues (e.g. how can this be adequately monitored to ensure appropriate use? What about equity? Furthermore, young people are addicted to their devices - a societal problem that schools should not be exacerbating); ; What does "greater use of technology to deliver the curriculum" even mean? We have experienced two periods of online learning during the COVID-19 pandemic which demonstrated that replacing face-to-face learning with a technological solution was ineffective for the majority of learners. No significant learning can occur without a significant relationship.; ; In sum, more support staff are needed, not fewer.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Teachers are in high demand and have options - it is absolutely critical that in any changes to the model of 'determining devolved school resources' does not further compromise our ability to attract high quality teachers to West Lothian. I daily take the train to Edinburgh alongside private school pupils and can immediately see how divergent their experience is. It is devastating to see how poorly resourced our public schools already are (if I compare to my own school in the 80s/90s what we are able to offer/resource in e.g. art or CDT is extremely poor). The paragraph above talks in euphemisms and barely acknowledges the potential impact on young people or on school staff. It is almost impossible to recruit into teacher training and I fear a whole generation are missing out and we are exacerbating previous educational inequalities.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am concerned that changes to administrative and pupil support staffing means fewer members of support staff. Schools already face decreasing numbers of support staff who are essential in helping to properly support the wide range of needs and behavioural challenges within schools. Schools need more staff to be able to give children one of the most important resources - our time.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am a teacher and classes need support of pupil support staff due to the inclusion of diverse children attending schools. This is an absolute requirement to help Closing The Attainment Gap. I don't believe in relying too much on technology for teaching and learning. Literacy levels are best achieved through books and traditional writing practice.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

Schools cannot operate without administrative staff either. ; ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	"Utilising resources provided to deliver additional support in schools"? What does that even mean? ; ; What I take away from the "proposal" above is that the council mean to demote schools to glorified child-minding services. This is NOT what schools are for. We need to EDUCATE our children, not just have them pass the time of day while a non-teaching member of staff supervises them. ; ;	2. Modernising our council	1D Allocation of School Resources	Please do not overburden staff who are already struggling to manage workload. Staff leaving in high numbers especially in West Lothian - this will cause damage that cannot be undone.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Outsourcing to private companies often results in poorer service and poorer terms and conditions for workers	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	As a parent of children in WL primary school and nursery I am extremely concerned at the proposal to increase the use of technology to deliver the curriculum. This suggests to me that our children will experience their learning using online lessons or apps etc rather than with a teacher in front of them. The use of technology should only be used to support the professional teachers to deliver a lesson and not to replace them. I think it is a disgrace that West Lothian council would even think that this is a reasonable proposal! Our children are constantly encouraged and lured to be 'on-loine' in every aspect of their life. We are being told to reduce our children's screen time, in order to help their mental health yet the council are proposing to increase this area of life within school. As an ex-teacher I am also aware of the issues that are often faced when using technology within the class. A computer is never as reliable as a human!; It is also concerning that pupils support staffing may be changed/reduced. Support for learning within our schools already seems stretched and the needs of some children are already not being met. If more children with additional needs are being placed in mainstream schools, their needs must be provided for and not forgotten about. By reducing pupil support the council will be failing so many of our young people, in a time where our government are telling us that 'Getting it right for every child' is what our education system is all about.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Stop cutting staff and relying on computers to teach our children ! Children spend enough time on technology they need paper, pencils, good teachers and support staff who care about their pupils, less technology. Stop cutting funding in places that need it. Schools struggle as it is to function !	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	What are the changes to administrative and pupil support staffing arrangements that are being proposed? This has been left so vague! There is already not enough support in schools for pupils with additional needs and administrative staff are already stretched. Education is the wrong place to make cut backs our schools are already financially struggling. How are we 'getting it right for every child' by cutting back on support, we are failing our children.; Greater use of technology to deliver the curriculum? What does this even mean? After everything our young people have been through during covid, please do not make them spend any more time in front of screens!! Are we considering their mental health? We cannot replace our teachers with screens!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are already overstretched with severe lack of resources and staffing. If any staff are absent, it seriously affects pupils - particularly those pupils who are part of nurture groups and health and wellbeing interventions. Schools need the proper resources, staffing and support to deliver high quality education to young people. They will not thrive without this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Outsourcing and losing jobs in the process.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As a member of education staff, some of this is very concerning. "Greater use of technology to deliver the curriculum" does not necessarily mean that learners will benefit - teachers are trained professionals and students' learning experiences will be diminished if classes are delivered via online learning.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Working in a school is a very challenging and demanding role, although very rewarding; however cuts are having a significant impact on pupil and staff wellbeing. Education staff are not mental health specialists or social workers and pupils are suffering as support is being cut from other areas (outside schools - e.g CAMHS waiting lists, lack of mental health support in the meantime) - changes to pupil support staffing arrangements (especially if it means less staff) will not benefit pupils and can lead to longer term issues and mean schools fail to "get it right for every child." This will also negatively impact attainment. ; I appreciate difficult decisions need to be made and that funding/the budget is a major issue but underfunding vital services costs far more in the long term and this should be taken into account.; Schools have been working incredibly hard, including though the pandemic, which has been stressful and are still continuing to deal with issues relating to the pandemic, on top of everything else. Should cuts negatively impact schools, it is clear this will have a massive impact on students (wellbeing, attainment, engagement) but also on staff which could lead to staff leaving in the future for less stressful, better paid jobs. This should be taken into consideration as all staff I have worked with have been amazing and do so much for the young people they work with and would be a great loss.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	£5million is an incredible amount of money to cut from school resource budget. Schools are struggling already - lack of staff as the main resource. Staff absence seems to be at an all time high and this will hit even harder.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Covid has shown digital delivery for education is not effective.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Support staff are such a valuable tool to assist classroom teachers raise attainment. 3rd party providers do not have the training of either teaching staff or support staff. Knowledge of child development, various teaching strategies and of any additional support needs is vital for all children to progress. 3rd party providers do not have this training, expertise or experience. This would be entirely detrimental to all children of West Lothian. The curriculum is already packed, so to try and take away time from that is not acceptable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Given the impact of covid on our young people there needs to be a large number of pupil support staff available to allow our young people to fully access the curriculum and to support mental health and families given the reduction in other services which has meant these now fall into schools to support.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Education is of prime importance and must be properly run to give the pupils the type of education they deserve, that will benefit them throughout life and add quality in the building of the country. They must have quality teaching and support and not use so much technology to run classrooms if pupils don't understand what it's telling them, it can't provide support and guidance.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	schools will not run effectively if you have to reduce any hours of office staff but also pupil support workers are very much needed in schools as there are a lot more children needing one to one support in Main Stream Settings which i think is great to see the inclusion	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I disagree that resources for delivering additional support in schools should be redirected to core staffing. There is not enough support in main stream schools for pupils with ASN as it is just now, the pressures on school staff and the resulting negative effect on all pupils in schools would cause significant harm to the education of all children. Schools are working with minimal staffing as it is, both admin and support staff, I do not see that it is possible to reduce these areas of staffing without having a negative effect on teaching and the education of children. Also, the negative effect this would have by increasing the workload and stress of all staff that would be left in each school.; If the staff in schools is to be reduced, then decisions will need to be made on what parts of the education service will no longer be provided and parents should be told by the council what to expect. There are no new technologies imminent that will reduce the workload of admin staff and technology is unlikely ever result in a significant reduction of the workload of support staff, particularly for ASN pupil support.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I have concerns about using technology to deliver the curriculum. The usual classroom dialogue and relationship between teacher and pupil becomes impossible - both of which are at the core of good learning and teaching. There will be an impact on attainment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The school staff work-load has been increased over the last 10 years with no consideration for changes in job remit; School staff are paid just more than minimum wage for a job remit that now seems them taking on devolved duties from other parts of the council due to lack of staff and management of resources; ; Schools just this year have been tasked with processing all young scot cards because partnerships centres no long have the staff to do this. Staff in schools are already under-paid and under-staffed for the remit that grows each year	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I don't understand what you a proposing.; Our students do not have enough support as it is. Why are you considering reducing the support staff?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The need for support for pupils is becoming ever greater, and this is an area where reduced funding or redeployment of additional support resources to core requirements will be detrimental to staff, pupils and families. It will no doubt also lead to an increase of the workload of class teachers.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil support staffing are integral component of all schools support staff.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Very difficult to comment as that isn't clear to me, maybe because I don't have children at school and don't work in the schools but I do find the statement greater use of technology to deliver the curriculum very concerning. During the pandemic we found many school pupils did not engage with remote learning, switched off from education completely and I think this shows we need the human touch in education. Technology can enhance the learning experience but that cannot be at the cost of the human element.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Do not cut PSW's in Schools - genuinely the schools would be unable to function.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Categorically no more use of third-party providers should be permitted.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	By cutting the funding allocated to DSM by £5 million, this will have an immediate impact on schools directly and the means available to Head Teachers to directly benefit the children and young people in their schools through the resources used, the staffing available, etc. If the DSM is reduced it potentially means less promoted staff will be available to carry out management tasks. Therefore, these would be devolved further down. As a result of reduced staffing, there may be fewer classes and class sizes will be larger as the major cost to a school is staffing. Furthermore, as a result of budget reductions, there will be less development opportunities in terms of development posts in both primary and secondary schools. This has major knock-on effects in terms of reducing opportunities to develop the skills and experiences needed to gain promotion. ; ; In secondary schools, smaller classes may not run and fewer subjects may be offered in course choices for young people from S3 and above.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Admin and support staff work extremely hard and deliver vital support to schools. This workload will not go away by reducing staff numbers, it will merely mean the staff who remain will have to take on a greater individual workload.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Deliver of the curriculum via tech only should only be used in emergency situations and not relied on as a way of saving money by using teachers across more than one classroom/school.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil support staffing levels are already stretched to deliver what is necessary to Pupils with additional support needs. Staffing should be increased, not decreased.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Unfortunately, as the consultation seeks to explain, the council must cut expenditure, not increase it.
Modernising our council	1D Allocation of School Resources	As long as children are being taught in classrooms by teachers - digitally delivering the curriculum and non-teachers delivering core curriculum is not acceptable for our children	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This would be catastrophic to education in West Lothian! Schools are already underfunded and under resourced dealing with students who have multiple complex needs. More than ever after Covid we need to provide additional support assistants to help teachers educate the future generations - not reduce this valuable resource! If Covid has taught us one thing in education is that there is no substitute for students being in class, mixing with their peers in front of a teacher with support assistants to provide the best educational environment!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	With the policy of inclusion it is vital that the resources are in place to support our children with additional support needs in all schools. Cutting budgets for Pupil Support Workers or specialist teaching staff would be detrimental to the education of all children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are already cutting costs as they are, combined with managing the cost of the school day and supporting families who are struggling with the cost of living crisis - we cannot cut their budget any further.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	A large number of children and teenagers education suffered through lockdown(which was unavoidable), however a lot of these children and youths are still suffering and playing catch up. Personally within the family we had a young relative who this year has just started primary school, but had specific support needs that nursery would have helped with and is currently struggling at school. To reduce some teaching resources would put him back even further. Kids who have missed out through the lockdown period some are still struggling to catch up as home schooling was not always available or met their needs. Would be a shame to see the children bare the brunt of this again and education suffer.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	As an advanced pupil support worker i fail to see how cutting numbers would help in West Lothian pledge to raise attainment, Teachers are leaving the profession in droves due to the increased work load, lack of classroom support as it is and the fact they are dealing with the fall out of the pandemic. Pupil Support are not only in schools to supervise lunch/play times. We are skilled trained individuals that deliver the targeted interventions to raise the attainment. I personally am a qualified Maths Recovery Teacher and all my colleagues are individual specialist in certain interventions including, literacy,numeracy, health and wellbeing and more niche practices, eg mental health, drawing and talking,	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	With the increase of ASN children in mainstream schools due to the closure of specialist facilities, most of support workers time is taken up with helping either the pupils or the teacher, can you explain to me how a teacher with an average class of 30 including several EAL children a few ASN,ADHD, ODD are going to be able to individually manage needs and teach to the required attainment levels, as well as managing behaviour, needs etc ?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	3rd party providers should not be used. All services should remain within the council and teachers and education staff be paid fairly taking into the account of current inflation levels and add an additional 2 percent to any pay offer.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. The Council will honour all national pay agreements, but will not introduce local supplements.
Modernising our council	1D Allocation of School Resources	How would this realistically look in schools? I am both a parent and an ASN teacher within the council. A lot of the young people I work with refuse to engage with online learning and although it is tough 1-1 in person, this is far more effective for their mental health and gives them a chance to see other people than their families.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	schools need more resources, not less! my wife is a teacher and the amount she spends on resources because they don't have proper funding is unreal. we buy costumes for kids for book week that can't afford it, specific learning aids for kids that need them, its shocking if you cut teaching resources.; the number of kids with diagnosed additional needs is far below those that actually have learning abilities.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Unfortunately, as the consultation seeks to explain, the council must cut expenditure, not increase it.
Modernising our council	1D Allocation of School Resources	Without more information pertaining to 'devolved school resources' and understanding the logistics we do not feel able to answer this question. However, a £5 million cut to school resources is a frightening concept considering we are aware of local schools begging for help to fund the very basics of education	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Alarming to think of Third party involvement what would the cost in the long run I'm sure it would outweigh the saving in fact it would probably increase the cost	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is a huge amount to cut from the education budget. ; At very least at Early and First level maintaining a high adult to child ratio, including classroom assistants and specially trained support for learning staff, is essential to provide the interactions required for the development of fundamental skills especially those linked to language, phonological awareness and early concept development.; This is a vital stage in establishing literacy and numeracy skills and making cuts here that impact on those children who do not come to school with the pre-requisite skills for establishing early literacy and number in place will ultimately mean higher costs and a failure to meet the Government agenda for GIRFEC.; Failure to meet needs and provide appropriate intervention in the initial stages will inevitably result in greater cost pressures further through the system.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Reallocating additional support budgets within schools will mean the children who have the greatest needs will be let down by West Lothian Council. This is not a good area to try to find savings from, we should be adding to school budgets not reducing them.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Unfortunately, as the consultation seeks to explain, the council must cut expenditure, not increase it.
Modernising our council	1D Allocation of School Resources	With more children coming into school who have additional support needs a cut in the number of Pupil Support staff is a big concern. The need for these services are vital within the schools and the support they provide for both the children and the teacher is vital. the current trend strongly indicates that their support will; needed to be increased as more children from Early years are identified as needing additional support.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Please don't remove funding from school or make staff cuts, our children need a quality education and we are already way behind other countries. We need these services.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are in need of a higher number of pupil support workers. The extra, trained person in the class on a more regular basis has a greater impact on the learning and well being of the child than anything else we can put in place. Yes improving digital technology in schools and providing more equipment would be lovely but their is still a greater need for trained support assistants.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	It's essential to support pupil support. They are already massively stretched and as practitioners expected to do advanced work at minimum wage	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	This does not seem like a good idea. The quality of school services in Bathgate are already on the limit to "poor" this change will risk further degradation.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Additional needs provision is poor. Too much cost cutting, not enough staff. Should not be cut to meet ridiculous targets. Pupils must come first. Efficiency in schools great but not to the detriment of additional needs support. Basics first.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School support staff are an absolute essential part of the functionality of a school, and the teachers would be unable to teach without this resource. The role of pupil support has evolved much more in recent years in terms of pupil liaison and family liaison also. A removal of this resource will have an impact on classroom disruption and will impact on the curriculum. I am unable to provide further input as the level of detail within the estimated saving briefing doesn't allow me to.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Curriculum delicately should be peer to peer as much as possible. Technology may increase costs for poorer families who can't afford computers etc. Parents will find it harder to assist with homework. ; There is overwhelming evidence in psychology to show younger children with increased screen time lack the eye to eye contact required to attain social skills and communication skills	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Unsupportive if this has an impact on the range of learning resources schools have. Given the mix of children in mainstream schools and the number of children with low level additional support needs, need to make sure as much resource is available as possible to support learning.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	It's concerning that utilizing resources for additional support needs is top of the list. Educational outcomes for children with additional needs are already poor. These children need more support and small group settings should be introduced in most schools. Exclusion rates for autistic children are abysmal so utilizing (using) their support elsewhere is upsetting to hear as a mother of 2 autistic children who has had to fight for them to receive appropriate care and support in school for the majority of their time there.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Support staff and core staff;; We currently have access to a number of different agencies and specialists in schooling to help deliver and achieve the appropriate additional support for children who need this. Stripping this away and replacing it with staffing already in place, without additional training for the people who will now be responsible, will lead to a reduction in support from staff who are specifically trained for their needs, greater stress burden on staff whose expertise is unlikely to correlate to complex needs presented by children under their care and this will come at a detriment to the children in schooling.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School staff are already under pressure with more needs in the classroom and lack of support workers to help. We are focused on raising attainment for every child which is incredibly difficult in a class of 33 with no support. Making further cuts to this support will make it harder to implement GIRFEC.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I don't feel this is fair at all. Why should the children miss out on resources when they've already been affected so badly with the closure of schools and recent isolation. Why is this the biggest saving? Taking from the youths of the future is not the answer. Kids need that extra support whilst at school because home life has become far too busy for the parents. Parents can't be expected to work even harder and longer while they're kids are devolved!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Saving £5million on schools that already have suffered with savings and cuts. There is not enough staff members adequately trained to look after and support kids with additional needs within schools. School teachers and nursery practitioners are already having to fund things themselves as there just isn't any money for them to carry out their curriculum to the fullest potential.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The same goes for school's no cuts should be made to staffing here and more funds should be provided. Again, not enough staff and too many kids. Teachers and youth services are already heavily under funded. It would be an absolute joke to cut from here.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	I do not believe youth services should have any reductions in funds. It has already been cut to the bare minimum half of youth clubs across West Lothian were shut in the last savings and the very little that is left are over worked and over stretched. Too many kids not enough Staff or clubs! The same goes for school's no cuts should be made to staffing here and more funds should be provided. Again, not enough staff and too many kids. Teachers and youth services are already heavily under funded. It would be an absolute joke to cut from here. ; How about looking further into the structure of road management services. Council workers for road digs, traffic management, pot holes bad road resurfacing. It would seem there is an over staffed issue here. Many times I have seen and it is widely seen by others. 5 men on the job but only 2 working. This is actually a laughing point by many. West Lothian Council can't staff there schools but can pay street services to sit and watch the show.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. This question does not, however, relate to youth services or roads maintenance which are covered elsewhere within the consultation.
Modernising our council	1D Allocation of School Resources	Schools really do need the extra support staff especially as more children with additional needs go to main stream school and its impossible a teacher on their own to give all the extra help required with 25-30 people in a class. More mental health issues will likely arise in pupils and staff if we don't get supporting this fully.; Too much technology happening in schools not always needed as children never get a break from it as alot will be on it at home also.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I would like to refrain from changing the costs in schools I think education is important and teaching time should not be substituted for technology. There is too many children with additional support needs in Main Street classes. Taking money away from school will compromise childrens learning	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Absolutely not cuts should be made to education. Especially the allocation of pupil support staff members half the children aren't being supported appropriately as it is never mind scaling this back, schools have severe lack of resources at the moment it's highly concerning this is being proposed as the mother of a child who requires additional support at a low level I feel for the children who will be let down by the system, fall through the cracks and ultimately failed the chance at a fair and equal education,	2. Modernising our council	1D Allocation of School Resources	Children have suffered enough during the pandemic and do not need a cut in school services	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Conditions are already difficult in schools. Almost £6 million including the below, this is frightening.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The schools are already massively stretched with staffing. I strongly disagree with any reduction. I also disagree with increasing technology- kids need to learn through doing and people interactions. There is already too much emphasis on using technology and it's having an impact on childrens mental well-being.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Do not cut school funding, this is wrong! Mental health in children is at an all-time high post-pandemic, recovery of this will take 10 years, schools need investment, not cuts especially the additional support staffing. As more and more parents fight for rights of children with disabilities to attend mainstream schools, this should not affect their ability to do this, however for schools to manage this they need the right support and investment or all the children suffer. Deprivation and social class divide will get worse.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	We absolutely do not support changes that reduce the amount of teachers or teaching assistants in any West Lothian school.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	We absolutely do not support a return to online teaching. The teaching during Covid was dreadful and alienated many kids, my own included. Class sizes cannot be increased. ; What service would be provided by third party services. Your question gives no other information. Why would external be cheaper than WLC staff as well as being to the same or better standard ?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Why are you using third party? Surely it can be done within services in the council? If not, why not? ; ; Education is vital to children, as are safe buildings.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School funding is at an all time low. Any costs that can be saved whilst much needs support given to teachers and staff without further disruption / impact on students would be required.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	do not reduce staffing in schools as school numbers will be going up in some areas so a reduction in staff will provide a poorer service to our young people	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Reducing class hours or staffing numbers or pupil support would just not be acceptable how are children expected to be able to get a full education and the support they need with out these fundamentals	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pointless, reduce support reduce quality of service. More technology in schools is just throwing money away. More support and staff make a difference to the quality of education not chucking iPads and interactive whiteboards about without the ICT support to maintain them.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I do not wish to see my child doing a lot of their work on a computer/laptop. There should always be a Teacher at the front of the class NOT Robbie Robot.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Stop cuts	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Completely disagree with this option and not supportive at all. ; The education system is already a disgrace and it's a concern that a reduction in service is even an option.; Surely education should be seen as a higher priority rather than looking at ways to reduce costs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools have continually been hit by budget cuts and it is beginning to show in the state of school buildings. Our children deserve the best possible education and will not receive this if resources and experiences schools can provide are constantly being reduced.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The schools and education system requires as much help as it can get, pupils are suffering badly at the moment	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	If some of the above implies cuts to staffing [especially special needs] never forget that the earlier in a child's life the investment in additional support is made, the better the return both financially and developmentally.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The only thing you should be doing with schools is putting more money into them!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Unfortunately, as the consultation seeks to explain, the Council must reduce not increase expenditure.
Modernising our council	1D Allocation of School Resources	Please protect face to face time especially for kids living in areas of deprivation or with known risk factors.	2. Modernising our council	1D Allocation of School Resources	I work in a primary school and I cannot see anywhere that cut backs would be beneficial. ALL school staff are overworked and go above and beyond to ensure the smooth running of the school. I would definitely NOT consider any reduction of Admin staff or Support staff. As an admin myself, I work over my hours on a daily basis. Our school also continually reviews best practice to save money on resources and to use technology within the school to it's potential.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

Modernising our council	1D Allocation of School Resources	School pupil Support are a great asset to the pupils, the teachers, there are a lot of pupils who need that extra support and the teaching staff don,t often have the time to work with these individual pupils as they have a full class to support in their teaching. The administrative staff have a very challenging job and their is never enough of them to do this job.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I know from experience that some third party providers are vital to schools, whereas some are not. A review seems sensible.; ; Changes to admin and pupil support worries me, these roles are vital within schools.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This proposal to adapt the allocation of school resources is extremely worrying. Schools are already pushed to breaking point to make things work the way we currently are - any changes to administrative and pupil support staffing arrangements would significantly impact the wellbeing and achievement of all West Lothian pupils who require additional support. Their education and the classroom learning experience generally would be severely negatively affected. We cannot provide an education to be proud of with less help than we currently have.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Welcome Devolved School Management as it should always be the schools themselves making important decisions on funding as they will know what is required. There should be no cuts in teachers or support staff as education is a priority.; Cutting back on janitorial and cleaning staff should be reviewed to make sure there is not a decrease in service especially if it is proposed that staff be shared. These staff were essential during the pandemic and should be supported going forward. They should not be contracted out as funding for these services should not go to profits for external companies.; Although using technology to aid in teaching can be a good thing, there is a concern that there will be a loss in social interaction and engagement and some vulnerable pupils will be isolated with this move. Communication skills need to be developed and sitting at computer for hours does not help with this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Third party is always more expensive and less tailored.; Use of technology in education may further increase the gap for those who is poorer and those who suffer from lack of warm human interaction (poorer, ASN). ; There is nothing better than human interaction in early age, and emotionally wiped out teachers only may not be enough.; Further reduction of resource in schools will increase the societal class gap and disadvantage.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Any changes to schools and the way education is delivered should be considered carefully. I can only comment in my experience, (child at Whitburn Academy) this school is stretched as it is, there are numerous problems at this school. I believe funding should be increased to help education and teachers should be encouraged to remain in posts for duration of school terms - not jumping to other jobs half way through the school year.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools must have sufficient staff to continue to provide a high quality services. Mainstream schools have high numbers of staff with ASN and need the staff to include these children. Admin is a huge part of school life and must have staff to support this. There is a limit to what can be put on HTs and teachers. In the world outside schools what seems like a small change can actually be a huge one.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is the the important factor for our future generations and should not be reduced at any cost.	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Any reduction in administrative and pupil support staffing arrangements in schools will increase the workload of teaching staff who are already undertaking strike action in the near future.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The supplies in school are not always the best of quality and therefore do not last long which in return means more money is spent in the long run as need to be replenished more often; Admin and pupil support workers are key to the day to day running in a school making changes and reducing numbers will have a huge impact to pupils learning this would mean some pupils would not be able to access the curriculum without the additional support they get . It would also make day to day work for teachers more difficult.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Wholesale changes to school staffing provisions is a huge concern. Having two teenagers in school (with around 1200 teenagers under on roof, an already struggling staffing system before staff even begin to deliver learning AND support the mental health pandemic that's followed the Covid pandemic, the impact of this proposal is much wider ranging than cost saving and I fear a step too far at the wrong time for the mental health and well-being of our young people.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	My son uses pupil support, and he needs even more of it, so reducing it for kids with need of it would be catastrophic.	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am concerned that changes to resourcing will have a negative impact on teaching and learning.; ; This generation of young people have faced extremely challenging years, and applaud all efforts the schools and local authority have made to prioritise mental health and wellbeing in the months since lockdown.; ; The high value of this saving implies that it is likely to lead to a reduction in overall staffing levels with a resulting impact on curricular provision. The loss of any support staff is likely to impact wellbeing significantly, and as such there should be no adverse change to pupil support.; ; I am concerned that any changes to support staffing will disproportionately impact those who are already disadvantaged, which would undermine the goals of inclusion and equity.; ; I would request that a Child Rights and Wellbeing Impact Assessment in relation to this proposal is carried out in order that impacts are highlighted and mitigated.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	It is vital that school resources (including staffing levels) are not reduced. We must continue to invest (including the current, or greater, level of school resources) in children and young people - especially given the significant impacts on them from the pandemic.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This option needs to ensure no reduction in teaching quality and impact to students. School funding teacher pay and resource needs to be increased and not the subject of drastic cuts.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Absolutely no cuts should be made to the already struggling education sector. Classroom sizes are already too big, there isn't enough support staff and resources are limited. Children's education should not suffer due to any proposed changes!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are an essential service and I believe student support staff are essential to helping educate our children. The education of our children is essential and all school services should be maintained as much as possible.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This isn't the time to be reducing the wellbeing, mental health and 1 to 1 support that the pupil support service and the admin teams provide.; The children are already suffering from classes being staffed by poor quality and non subject expert cover staff when teachers are off or being used in other capacities.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am opposed to the overuse of digital technologies in the classroom. Teaching is as much about inspiring children as it is about delivering the curriculum. An iPad/tv/computer does not provide the inspiration that a teacher can. ; Pupil support is vital these days to support wide ranging academic and behavioural issues. Funding for pupil support should not be cut.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	West Lothian has wasted vast sums of money already in technology in schools. The children are not performing better as a result. My children have been squeezed into vast class sizes despite promises these should reduce. My teenager reports that wonderful quiet dance teachers are being burnt out with their workload and instead that she is required to do a digital course in PSE which is foolhardy as well as ironic. There are not nearly enough nurture or support staff in primary schools but those that do exist are doing an amazing job with vulnerable children freeing up Core staff to teach the academic kids. Replacing talented staff with tech is a pure nonsense. It is not evidence based and. I can't imagine anyone with the slightest expertise in education would condone it. Bill Gates himself insists his children go to a school with small classes and absolutely no technology. I think that says it all.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	No cuts, children need people to teach them not more IT	2. Modernising our council	1D Allocation of School Resources	The use of technology in a school environment has a certain level of importance however children still need to be taught core skills without the use of technology including social skills, writing etc	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There are currently not enough support workers to support all the pupils with additional support needs. As a council we are meant to be 'getting it right for every child' and this is just not happening for all of our most vulnerable people in mainstream classrooms. This will be made worse by these proposed cuts. The use of technology can be used to really engage pupils and enhance their learning, but this will only happen with the proper ICT in place. The wifi isn't suitable for this at my current location, and the lack of ICT means that this just isn't an effective way forward. Technology should be used alongside teachers rather than as a replacement for them. Schools and learning settings can only run with the support of admin staff, again your cuts will have a detrimental effect on the running of schools, more and more admin tasks will fall on the teachers and lead to more of them burning out and needing to be signed off. This is already a major problem, and many teachers not able to fulfil their current role with the time constraints of their contracts.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As for reducing or re-allocating classroom assistants and student support teachers, this proposal appears to suggest the Council no longer will be under the same statutory requirements to provide additional support for learning or other purposes. On the other hand, if this question relates to additional staff provided separate from those supplied to fulfil specific statutory requirements, then I wonder whether the result will be insufficient staff for breakfast club, outdoor play, and field trips. Removing these opportunities will put the children of West Lothian at a particular disadvantage, and will call into question the Scottish Government's commitment to improve education for children across Scotland.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Greater use of technologies in schools during covid did not appear to result in any measurable learning advantages (compared to the alternative methods of in person teaching or taking home jotters) at Linlithgow Primary School. The cost of the school's various homework apps, their lack of efficacy in terms of student buy-in, and the resulting consensus amongst students, staff and families that these apps will only be used as a last resort, paints a picture that suggests the acquisition of the homework apps was not at all good value for money. Let this be a lesson: replacing teaching with technology does not create so great a savings if the technology being used is not capable of achieving its intended aim. ; ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Modernising our council	1D Allocation of School Resources	I don't agree that any savings on school resources will be beneficial for children and young people.	2. Modernising our council	1D Allocation of School Resources	Any changes to support staffing will disproportionately impact those who are already disadvantaged, which would undermine the goals of inclusion and equity.	2. Modernising our council	1D Allocation of School Resources	I am concerned that changes to resourcing will have a negative impact on teaching and learning.; Our young people have faced extremely challenging years, and school staff and local authority have done to prioritise mental health and wellbeing in the months since lockdown.; The high value of this saving implies that it is likely to lead to a reduction in overall staffing levels with a resulting impact on curricular provision. The loss of any support staff is likely to impact wellbeing significantly, so as many young people depend on this support, it is essential that it continues.;	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I do not agree with reducing the PSW support. I also feel that teacher / pupil should not be reduced in favour of a tablet / iPad.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Pupil Support is vital in any school, making cuts to resources would not be beneficial as we work with the bare minimum as it is.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Third party providers is a terrible idea. Schools need more investment not less. The schools are already underperforming and under pressure.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I strongly strongly disagree with any proposals which dilute the education provided to our young people. Families choose to live in West Lothian due to the strong performances of schools. This should not be diluted and headteachers and teachers should continued to be support to directly engage with pupil performance.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Education has to be a priority and should not include any cuts but additional resources to ensure the best chances for all young people. Additional funding should be made available to support young people with additional support needs to maximise their learning opportunities that meet their needs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Unfortunately, as explained in the consultation, the purpose is to identify opportunities to reduce expenditure due to a reduction in available resources.
Modernising our council	1D Allocation of School Resources	We can't use technology to deliver school resources, we need people and they have to feel valued.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am deeply concerned about school resources and the saving of £5mill!! As a retired education professional, I know that the provision of additional support is vital within an inclusive setting. Teachers are leaving the profession because if being asked to meet demands for children that are not possible because of lack of funding. Basic resources are often provided by teachers and lessons cannot be delivered successfully due to the lack of additional support for challenged learners ie additional needs, support for learning, behaviour and providing challenges to develop learning further for gifted children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Sounds as if stringent economies should be made but I am worried that this will diminish standards. If these cuts are now vital, why haven't they been investigated before?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Unfortunately, as explained in the consultation, the purpose is to identify opportunities to reduce expenditure due to a reduction in available resources.
Modernising our council	1D Allocation of School Resources	Again, it's hard to discern from the description exactly what is proposed. However, it seems to suggest the impact would include removing additional support for schools (it is unclear what this support is) to subsidise core staffing and removing some support for pupils. On face value, both seem particularly hard to support because it is hard to identify whether there are negative impacts on students. It sounds as if there will be.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	The removal of any funding from education is abhorrent. Countless children are already being failed by the education system. My ASD grandchildren - who have funding provided - get virtually no support in school. Specialized teaching is practically non-existent in mainstream school and access to Ceder Bank is I believe limited to 16 places for the whole of West Lothian. They are effectively being left to self- exclude when they can't overcome their anxiety and enter the building. Added to that no work is given because it has to be teacher led. What will happen to these children if the budget is further cut. If their disability was physical appropriate provision would have to be in place. Their - and many other- disabilities are invisible and so it seems are these children. What happened to Getting It Right For Every Child.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The schools underfunded already next generation deserve the best chance possible	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Better allocation of staff - split headship? Over 2 clusters? Where does this make sense? This is an organisational flaw from the top,;	3. The respondent advised that they had no comment to make or posed a question of the measure.	This practice is already operating successfully in West Lothian schools.
Modernising our council	1D Allocation of School Resources	teachers are stressed enough with the way they are being treated (by pupils and parents) assaulted and abused at every turn. They work in excess of the hours they are required in order to provide the best service they can to their school their pupils their community. I am not a teacher but i see this personally and through family. earlier you stated that you were looking at cutting third party assistance here you state you want to increase it?	3. The respondent advised that they had no comment to make or posed a question of the measure.	The proposal will not affect the relationship between teachers, pupils and parents, or national conditions of service.
Modernising our council	1D Allocation of School Resources	Funny how you can only save 500,000 on management but 5 million on Schooling, changes to staffing so less staff ? or no wage rises for staff ?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Will this impact children from disadvantaged families?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Specific allocations such as Pupil Equity Funding, Scottish Attainment challenge and many council funding streams take account of deprivation and disadvantage, and these are not affected by the proposal.
Modernising our council	1D Allocation of School Resources	Unable to comment on this point - I do not have any experience of how the curriculum is currently delivered or how school resources are currently allocated.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Not qualified to comment other than as a parent - schools so underfunded and stretched - our problems are more then just budget related.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Have no children. I believe the teachers you have would be your best resource here	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	My daughter (also not in West Lothian) is a Pupil Support Assistant and so I know from what she says that her role is vital to helping the teachers manage those children in their classes with Special Needs - and how important her help is to the children who need her help. She has had lots of positive feedback from parents of the many children she works with	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There is not enough information supplied above to make a comment on this other than that admin and pupil support levels are already stretched.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	No idea. I'm not sure teachers can survive this	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I don't have children at school so I don't find this relevant to me	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Not sure what exactly you are planning to do in the schools.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	This would depend entirely on more detail. The use of technology is helpful but sometimes work can be sent home that is not practical on a phone or tablet. If you don't own a printer then this can be difficult to achieve and sometimes the printing option is not available. This can sometimes mean kids who are at a disadvantage cannot keep up or participate properly	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School "back office" arrangements are already under significant pressure. How is this going to reduce that?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I do not know enough about the revised devolved school management funding model to make comments on this proposal.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Seems a very high saving but kids have missed out on enough last few years	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Saving? Without detail, again vacuous. Even with it, cost of provision that is inadequate now could hardly decrease and still be barely adequate.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Are the third party providers going to deliver a good service no service is better than a badly delivered service.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I have a lot of experience interacting with an Academy in relation to my child.; Due to a condition, my child can not attend school on a full time basis. Teams are supposed to be used to communicate and set class work and homework. In my experience this is an extremely under-utilised tool, I am exasperated asking school for work to be put on teams. Some teachers do but not all.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I think training for teachers to use teams effectively is needed, encouraged and expected.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	At the end of the day, if you start cutting staffing and vital services in schools, you severely disadvantage students, who already face many challenges outside of school. We are witnessing the aftermath of a pandemic on a generation of children. Five million pounds needs investing, not stripping away. A shameful suggestion.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Does that mean cutting additional support and hiwndies that fit with GIRFEC requirements?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I feel my child's pupil support is already short staffed they work so hard to support kids going through so many difficulties I find it hard to think you can cut it any more as they are our first point in contact. It's outrageous to say we will cut that as who will look after the kids when they are suicidal or needing help? You will have kids not coming to school and then have others problems down the line. Who are you going to cut and why? I bet it's the lowest paid people who suffer most and work hard each day despite all the cuts you have already made. My kids school will suffer and they already have so much disadvantage compared to Linlithgow academy.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	What about kids with support needs? Will they just be left behind and we will undo all the hard work that's been done. Technology doesn't work for all and we learned that through covid my sons would never learn that way. Cedarbank better get more spaces as that is where I will be sending my kids if you take suppprt out of school.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I do wonder about the funding model noted and would welcome more information on this. How would you ensure the NIF priorities remain a priority? How do you continue to nurture equitable outcomes and subsequent attainment?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	In regards to finding - what quality assurance has taken place on school funding? I also wonder which model you intend to use to assess the appropriateness of the use of public money	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Technology would be welcomed to supplement learning and teaching but it is clear that current technology is already outdated and variable across the authority. I'd therefore conclude that this would be incur more costs that it would save. If for example you are considering the Egsoil E learning offer. The resources do not constitute nor do they substitute adequate learning and teaching. Those who have the self efficacy to learn largely independently will do so and those who struggle will suffer.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	So far schools seem good. My child is only in primary 1.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I would like more information what this actually means. Staffing in schools, particularly support staff, is already under resourced. Cutting this further will have an adverse impact on learners.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Concerned about the consideration of third party providers for schools - what does this mean? Cheaper than teachers? Different regulations? Concerned that this could impact attainment, etc.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is the part that is most concerning. The statement is very vague. What would this look like? Schools already are hugely under resourced. By putting more of an emphasis on using technology, that would mean spending much more money to ensure that this was equal in all schools, which makes no sense. Also, what is meant by changes in pupil support staffing?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Is this really going to be best for children? Getting children to access technology has challenges and often issues with equipment. Already pupil support has been reduced and at a time when recovering from covid, additional family issues relating to cost of living there should be more support rather than less.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I do not support this action at all as some pupils who have extra needs already do not get the help they need so are you saying that anyone who needs additional needs should not be in mainstream school	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Why is the largest cut you are looking for so far coming to the education sector?? It is proposed that the model for determining devolved school resources is revised further to identify opportunities for more efficient service delivery? Are we not efficiently delivering education to the students in West Lothian at the moment? This may include utilising resources provided to deliver additional support in schools for core staffing requirements, Staffing in schools and education is already cut to the core if you start cutting out staffing in buildings, They are not going to be cleaned/ repaired or maintained properly at this moment schools deal with daily leaks in their roof and flooding of areas within schools effecting the proper teaching of students. these cuts will make things worse. Key machines are also outdated or not being repaired due to their high costs.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Not sufficiently knowledgeable about how schools are resourced to comment.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	They need consistency in pupil support staff and if you are taking this away by using elsewhere, again not sure what you are meaning! but If you are meaning third party provider like an agency for teachers then for ASN you would be making a fundamental mistake as you will only unsettle the kids who are used to and have a need to know who they are about to meet in school, keep surprising them then you aren't GIRFEC you would be getting this wrong!	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	What is the question you'd like us to comment on?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am not familiar with the Devolved School Management and do not feel able to comment.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Anything that helps the schools get more money as they are seriously underfunded	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Not a parent nor a WLC resident, so can't comment on this.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Neutral; Would need more specific definition of the changes proposed to be able to provide feedback	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	That would appear to involve a huge reduction in support staff. What impact will this have on children and families?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is very vague and doesn't explain exactly what is planned. Greater use of technology to deliver the curriculum is great as long as it's not replacing GTCS qualified teachers who are the experts in their field.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Administration is also something the school needs on site, not sure where the savings would be here but struggling to see where we could trim staff without it impacting service and the work we do.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	However, it is not clear what is meant by third party providers, and whether £5 million can be saved by any other way then cutting support classes and increasing class sizes	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Unsure how this impacts practically - what specific benefits; Local nursery reports low staff levels seems to have worsened since eldest daughter attended 4 years ago. Breakfast club options reduced, daughter used to have some choices but reports only basic/fewer options compared to first returning after covid. Free school meals - daughter reports free fruit and starts options never available?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	It's difficult to comment on this as I don't really know what it truly entails.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I would like more detailed information on this ...	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I have concerns around proposals relating to additional support need services being redirected to core staffing requirements. This is an area I understand to be stretched already. What will this look like and what will be the learners who require support and thereongoing pathways and pisitive destinations?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Classes are already stretched with all students in mainstream education, very limited support for students and teachers completely overworked. Many children are already not having their needs met to enable them to learn. We need more teaching staff, not less.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are already on a tight budget and constantly have to cut back/reassess spending. How do you expect your teaching staff to deliver high quality and engaging education if you cut them even further?!?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As parents, we're aware of the harms to our children's physical and emotional well being that excessive screen time brings. Our nervous systems coregulate with one another and loneliness is a huge worldwide health concern. Children need more connection with humans, not devices.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	More information would have to be provided because "Devolved School Management funding model and through a review of provision by third party providers" is not enough information to provide accurate feedback	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are already stretched. How can you justify further cuts?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There isn't any real details in this statement so I can't comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	No comment, does not impact on myself.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	What are devolved school resources? School facilities should be made available to everyone at a cost eg sports facilities, halls for events, and run as a centralised business across the region.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I understand the need to encourage children to use technology however children need face to face interaction in a school environment. School teachers and other staff are already working at capacity never mind trying to reduce resource! Not agreed.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	What are the changes you plan to make? School resources should not be cut. When you say greater use of technology to deliver curriculum - do you mean Teams sessions?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Significantly more information required in order to comment on this. What spend would be required to realise the outcomes? Which 3rd party providers would be involved? What would be the scope of review and works?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Provision by third party providers - what will the governance structure look like ie how will you hold them to account etc.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1D Allocation of School Resources	I don't have enough knowledge to comment on this as don't have children.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Don't know much about that so would have to trust your judgement	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This needs to be very carefully done, as children and staff in school cannot work at their best if their funding for resources is slashed.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Schools are already being told to do more with less. With the range of needs across mainstream schools, changes to pupil support is going to have a detrimental impact on all learners. All children have a right to education and without the proper support in place, whether in mainstream schools or not, then the local authority are going to fail children. As the local authority continue to allow contractors and housebuilding companies to build more and more houses, there is going to be continued need to provide spaces in local schools for these new families that may be moving into the area. There needs to be consideration for the growing populous as the local authority continues to grow in population.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Outsourcing is not always cost effective. Due diligence will be required to ensure that expected savings are real in the long term	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I would wonder what the review of provision by a third-party would cost? And schools would need to be heavily involved in the consultation so as to feed in their individual needs.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	A big saving here. Need to understand more about it though before I can give an opinion.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The Devolved School Management funding model needs to be explained here. How it will work, how it will affect the teachers and the children etc? Again, many fancy words without actually explaining how these schemes will work.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am unsure about the value for money from "Third Party Providers" I feel any companies procured by the council usually come with a high cost. I would need further information before I could comment further.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School resources are limited already I think if they were limited further this would have a direct impact on the quality of childrens education.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I would like further clarity on this and if there are examples of other local authorities who have done this successfully. Unless working in education and fully abreast of what this would mean in working practice it is difficult to make comment.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I think you need to explain what 'devolved school resources' are. This seems like corporate jargon. The wording of the above statement is difficult to interpret. During covid technology was used as an essential tool in delivering education remotely when there was no other alternative. We should be under no illusion that it is an appropriate tool for engaging learners without the support of trained adults. Teachers, parents and learners are now quite disenfranchised with learning through technology, particularly in the absence of appropriate first level support to help resolve issues in accessing the learning. The council and government should be working together to invest in learning for those of school age. Why all the investment in ELCs if it means reducing the amount and quality of provision in the critical years of P1 - S6?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	What does this actually mean? More and more parents are already supporting / supplementing their children's education with private tuition due to schools already being stretched. What provision will be made for neurodiverse pupils?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I don't and can't have children so i don't feel it's fair for me to comment on this question.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Not able to comment as unaware of school resources	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	More detail required on this to understand impact on all schools in West Lothian	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Further detail is needed on the impact of these proposals on ASN and pupil support staff who support those more in need of help at school or nursery. Reducing additional support to pupils will impact on outcomes and only seek to widen the attainment gap.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Devolved School Management/resources don't know what this is can't comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

Modernising our council	1D Allocation of School Resources	Unsure	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	As before, without detailed information I don't see how I can comment on this other than to say that the language used here is pure gibberish. I would prefer that words like 'opportunity' weren't used when discussing cuts. They aren't opportunities, it is a situation we are forced not because the Tory Government believes in a small state and have driven councils and other services into the ground. Please be honest about this.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	No idea what this actually means.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I can't understand from the description what you are actually intending to do.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Don't know what this actually means, before I could respond I would need to ask for clarity on "changes to pupil support staffing arrangements "	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	no comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Not able to answer with my full understanding of what this means for local schools and the value of £5m reduction and how this will impact them.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am unable to provide further input as the level of detail within the estimated saving briefing doesn't allow me too.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This gives no idea as to what you are going to do another bit of flannel	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	no comments	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	You haven't really said what this will involve. Please elaborate	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Seems like all staff are being reduced.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Does this mean that additional support will no longer be available or reduced for those who need it? If so, this is a terrible idea and limits future opportunities for children.	3. The respondent advised that they had no comment to make or posed a question of the measure.	The Council will continue to meet its statutory obligations to meet the needs of all pupils.
Modernising our council	1D Allocation of School Resources	Again, all words but doesn't mean anything.; The children need resources but not all children can use/access technology. Yes, teachers can use technology to deliver certain aspects of the curriculum, but we shouldn't be reliant on technology.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Proof that people need the help. Not just for everyone	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is a huge saving. Educational opportunities are crucial in any area. Can these savings bring about improved educational opportunities?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I would like to know more about what these cost cuts would look like and about the provision provided by third party providers.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The cost provided with this change is very large. Will schools have suitably skilled staff to manage more complex budgeting?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Schools employ staff to manage their financial resources and these are supported by a small central team.
Modernising our council	1D Allocation of School Resources	No strong views on this. Any purchasing activity could be reviewed to ensure that compliant contracts are used, along with any additional benefits that could be secured through compliant contracts.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Let teachers teach, carers care, etc and leave the management and support of that to others. There is not a one size fits all answer to schools and the curricula they deliver	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	This will need careful analysis ...beyond my knowledge	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Preferable for future build but need to have audit system to review how school utilizing the fund . Need to have a check & balance system and responsibility accounting system .	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Presumably a “devolved school management” funding model will mean that decisions are made by people who have nothing to do with the schools they are making decisions for?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Devolved school management means that as many decisions as possible are made within the school.
Modernising our council	1D Allocation of School Resources	As long as students still learn how to write on paper and not only digitally I am not entirely opposed to this. Also need to make sure that students get all the support that is required. Sometimes cost of reducing staff is not for the best of people who get the support. Currently I have a child in primary school, and I can't say I like that so much technology is used in their learning: for example, Microsoft Teams? We are talking about 8-year-olds and at this age and time all most kids do at home is phones, tablets and games on TV. Therefore, I am not particularly enthusiastic about this all-digitalised approach in school.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Cannot really comment on this as we are now out of the schools system and its not fair to talk about changes we don't recognise. But always a supporter of identifying and pursuing efficiencies when they are suitable.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	????????????	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	You say you want to provide a more efficient service delivery but how can do you know that these methods and technological assistance will maintain the curriculum delivery standard of a qualified teacher ? Or are you more interested in saving money than delivering a quality education to our children that we pay for and are constantly be forced to pay more and more and receive less for our tax money	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As long as kids who need additional support still have their needed support staff.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Modernising our council	1D Allocation of School Resources	I believe that at the moment there is so many different ways to control your child progress and child education like parental portal, government getaway accounts, Microsoft teams, bookings for online meetings with teachers, which are 6 minutes and connection is weak, I believe from the school end, usually, didbook accounts. Ipayimpact, mygovscot etc. So many of them and very low quality as well...need just 1, I believe and it should be near to perfection	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The education system is in a bad way, it is all over the news, good luck with cutting any more	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Contract tendering and limiting contract overspends needs to take priority so that savings can be made without impacting the teaching methods.	4. The council is already doing this.	The council is bound by regulations contained in the Public Procurement Legislation which set out the procedures to be followed at each stage of the procurement process leading to the award of contracts within certain spend thresholds.
Modernising our council	1D Allocation of School Resources	Pupils will always need support especially after the trauma of the last 2 years re mental health	4. The council is already doing this.	Specific support for counselling and mental health has been increased using national and local resources,
Modernising our council	1D Allocation of School Resources	No truant officers in West Lothian I was advised by a teacher. More pressure on those educating our children	4. The council is already doing this.	West Lothian Council has robust attendance policy which is kept under review with input from schools.
Modernising our council	1D Allocation of School Resources	Covid lockdowns have had a huge detrimental affect on those moving to secondary and many pupils are struggling to move beyond level 2 curriculum without support. More in class support is required along with the provision of it where necessary. Those who do not attend school or who wander corridors all day should be fined.	4. The council is already doing this.	Each school put in place a COVID recovery plan and monitors and supports the progress of individual pupils. There is no legal basis on which the Council could impose fines.
Modernising our council	1D Allocation of School Resources	The consideration of the demographic of a school, ensuring that those in more deprived areas have the same opportunities as those in affluent areas. Staff go above and beyond for the children they work with and it should not come out of their own pockets.;	4. The council is already doing this.	Significant additional resources including Pupil Equity Funding, Scottish Attainment Challenge and council funding streams reflect the demographics of catchment areas
Modernising our council	1D Allocation of School Resources	New establishments that are state of the art, with excellent facilities etc, but what about some of the der establishments that need investment to ensure they keep up and that the educational experiences they provide include BGE including practical subjects, for which, some excellent above the more academic subjects.	4. The council is already doing this.	The Council's capital programme provides funding to refurbish and where necessary extend existing schools.
Modernising our council	1D Allocation of School Resources	There is an issue with the re-allocation of funding from additional support for pupils to core staffing requirements. Children who need additional support need it for a reason and if they are just left in mainstream classes without that support there is a risk that no-one will learn anything as the teacher ends up spending all their time with the few rather than equipping the many. ; Using technology to deliver the curriculum sounds good but everyone learns in different ways so it wouldn't suit everyone and while it is good to have a wide curriculum the focus needs to be on delivery of the core curriculum to equip pupils for the world of work, not the world of university which isn't for everyone or just as a reason to keep pupils in schools past the school leaving age (which is still 16)	4. The council is already doing this.	The Council implements the national presumption of mainstream with appropriate support; extensive experience gained during the pandemic has improved use of technology including ensuring it is accessible to all pupils; support to progress to a positive education includes all positive destinations, not just higher education.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	School staffing needs more "on the ground" teachers and support workers - there needs to be a review of the specialist provision (bases/more places) to help the many pupils with significant needs who are struggling in mainstream and whose support means that other pupils with lesser needs do not receive an equitable share.;	4. The council is already doing this.	The council is establishing small group settings and nurture groups in schools to provide this support.
Modernising our council	1D Allocation of School Resources	If we are now focussing on the presumption of mainstream and specialist places are few and far between, the council needs to invest in staff and resources for children with complex needs. Mainstream children are losing out on pupil support due to them being pulled to support these specific children. Pupil support is vital in helping to close the attainment gap which is already nigh on impossible. The treatment of pupil support workers is also shocking - stop the temporary contracts and offer them permanent jobs. Invest in pupil support! If more powers are devolved to head teachers then perhaps the heads of education should take a reduction in pay - how do we justify salaries of £100k a year?	4. The council is already doing this.	The proposal does not reduce specific funding to support pupils with additional support needs. Pupil support workers benefit from the same good employment practices and policies as other employees of the Council.
Modernising our council	1D Allocation of School Resources	Open up all schools for community use - cost of hire to be re-considered and competitive rates for local communities/customers.	4. The council is already doing this.	School lets are available. Community access to all council facilities is kept under review.
Modernising our council	1D Allocation of School Resources	Foster links with employability services and opportunities	4. The council is already doing this.	Support is provided to pupils to progress to a positive destination in partnership with other agencies and also local employers.
Modernising our council	1D Allocation of School Resources	The use of technology in schools requires improvement in infrastructure. The delays in accessing tech online due to devise speed and internet speed and connectivity impacts learning and cripples lesson. ; Supporting staff need a pay rise, especially APSW's. There jobs are far more intense than other mainstream support staff, and there skills should be indicated in a pay difference. ; Delivery and speed of services/allocations/decisions needs to be addressed.	4. The council is already doing this.	West Lothian Council has invested significantly in IT infrastructure in schools, Pupil Support Workers benefit from a nationally negotiated pay award, and jobs are graded in comparison with all other local authority jobs.
Modernising our council	1D Allocation of School Resources	I am not convinced that greater use of technology to deliver the curriculum is a cost-saver. I try not to use technology/apps in every lesson as there are equity issues with this: not all pupils have devices, some pupils don't have data, and the school WiFi which pupils have access to is not always reliable. I feel that the need for pupil support is likely to increase - already it feels as though there are not enough pupil support assistants to enable all pupils to access the curriculum and achieve their full potential.	4. The council is already doing this.	West Lothian Council has invested significantly in IT infrastructure in schools, and support to access on line resources at home.
Modernising our council	1D Allocation of School Resources	School management are not financial experts so someone to oversee this is essential. The support staff- admin and pupil are the backbone of schools. These jobs need to be protected and valued	4. The council is already doing this.	Support is provide through Business Support Managers, Resources Officers and the Financial Management Unit.
Modernising our council	1D Allocation of School Resources	School closures during covid showed how vital face to face contact is for pupils. It is essential that this is not reduced for the sake of both pupil progress and for their mental wellbeing. Extra pressure should not be place on teachers to deliver both digital and face to face courses.	4. The council is already doing this.	There will continue to be an appropriate mix of face to face and digital learning to support young people but also to prepare them adequately for the digital world
Modernising our council	1D Allocation of School Resources	Utilising resources that are targeted in terms of provision, fair and support equity across the curriculum and schools is essential with this proposal	4. The council is already doing this.	Resources will continue to be allocated according to a fair and equitable scheme of devolved school management.
Modernising our council	1D Allocation of School Resources	Not everyone one has broadband and home computers or a home space for study.; Centralised procurement would help with benefits if bulk purchases.; Class sizes already at breaking point, so staff reductions will impact. Use of teaching assistants will not help core teaching requirements and are not a substitute for teachers.	4. The council is already doing this.	West Lothian Council has invested significantly in IT infrastructure in schools, and support to access on line resources at home, including supply of hardware where appropriate. Class sizes are within nationally agreed norms. Schools will continue to employ an appropriate mix of teaching and support staff within their budgets.
Modernising our council	1D Allocation of School Resources	Pupil support is so important in schools to help pupils to access the curriculum when children with additional support needs are placed within a mainstream class not only is it support to the pupils but teachers too	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	If individual schools worked together rather than as a single unit with it's own budget they would get far better deals. It seems like each school works as if it is a single unit rather than being part of a larger service.	4. The council is already doing this.	Schools benefit from being part of the Council's overall purchasing and procurement arrangements.
Modernising our council	1D Allocation of School Resources	Must include consultation with school staff.	4. The council is already doing this.	This survey is available to school staff.
Modernising our council	1D Allocation of School Resources	Pupil support is essential for those with learning disabilities any reduction will have life long consequences.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Greater use of technology and less; 1-1 which is desperately needed. Sounds like working through another COVID	4. The council is already doing this.	There will continue to be an appropriate mix of face to face and digital learning to support young people but also to prepare them adequately for the digital world
Modernising our council	1D Allocation of School Resources	As long as virtual learning isn't heavily relied on, it doesn't seem like an efficient method for teaching	4. The council is already doing this.	There will continue to be an appropriate mix of face to face and digital learning to support young people but also to prepare them adequately for the digital world
Modernising our council	1D Allocation of School Resources	Schools need funding, but school transport should be looked at .	4. The council is already doing this.	School transport is the subject of a separate question.
Modernising our council	1D Allocation of School Resources	Schools could not run effectively without admin or support staff. These members of staff are the ones who keep the schools going!	4. The council is already doing this.	Schools receive an allocation for admin and support staff in the scheme of devolved school management
Modernising our council	1D Allocation of School Resources	Providing additional support requires specific skills and resources. While it is ideal that core staff is equipped with such knowledge, they are already working at full capacity. By doing so, it needs to be considered carefully whether this is done in the expenses of less attention being offered to other children in the class. What about the core staff well-being?	4. The council is already doing this.	The Council works within the national presumption of mainstream, nationally set class sizes and national quality standards.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Whilst there is a role to utilise technology to support learning this should not come at the expense of employing in class teachers . Teachers should not be expected as a matter of course to live stream lessons to other children (virtual campus) whilst they teach in person. Teachers should be employed to deliver the curriculum within those schools if it is a priority to deliver a breadth of curriculum. Ensuring parity of IT resourcing across schools in the authority should also be a priority as some schools lag behind in this area.	4. The council is already doing this.	There will continue to be an appropriate mix of face to face and digital learning to support young people but also to prepare them adequately for the digital world
Modernising our council	1D Allocation of School Resources	I believe it is incredibly important that additional support staff are used for precisely that. The cuts to in class support continue to make the job of a teacher more difficult than ever. Having staff who know pupils based within a school continues to aid and benefit those with the most complex needs.	4. The council is already doing this.	The Council works within the national presumption of mainstream, nationally set class sizes and national quality standards.
Modernising our council	1D Allocation of School Resources	Anything that involves reducing any school staffing would be a huge mistake for any local authority. Retaining and employing school teachers and support staff are vital and should be a top of the list priority for funding!	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Save money by closing small schools and look at your catchment areas.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Also do not employ Admin staff who do not know the systems used in a school office! Experienced Admin Assistants end up supporting new starts with every aspect of the job. The BSM and ROs are nowhere to be seen and have been known to say "I don't know how to use the systems used at the school office so if you wouldn't mind just popping in to ***** Primary School and showing ***** how to use the systems". Surely this is their job to offer support!	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Education is a priority	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools should consider how their facilities/estates could be used out of hours for social enterprises and businesses to deliver to customers. This could generate a rental type income to supplement schools. E.g use of school grounds/gyms for after school sports clubs etc.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Look at other costs - catering, cleaning etc.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Controlling staff absence should be a priority. Perhaps the sick pay policy is too generous. But all schools are impacted by long and short term staff absences. No one seems to do anything about it.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Allowing individual head teachers to make their own decisions sounds risky. Better to make funding decisions at a council-wide level so all schools are equal	4. The council is already doing this.	Headteachers are budget managers
Modernising our council	1D Allocation of School Resources	Less CPD but more online and evidence based.	4. The council is already doing this.	Most of CPD on line.
Modernising our council	1D Allocation of School Resources	Ensure pupils not digitally connected are not disadvantaged	4. The council is already doing this.	Access to digital devices /internet for disadvantaged pupils being progressed
Modernising our council	1D Allocation of School Resources	Technology is already used to deliver the curriculum.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As a Teacher in WLC Digital learning is no substitute for in person actual learning from professional teachers and should be avoided as much as possible. Digital learning requires students to have Digital devices to a suitable standard which may reduce WLC costs in one area but you are going to have to subsidise this in other ways probably through school budgets. Councils like the Borders region have spent vast amounts on money giving out I-pads to all their students but these cannot be used for every lesson.	4. The council is already doing this.	The council's well-established Anytime, Anywhere Learning Strategy affords the opportunity for children from P5 upwards to bring devices to school. Schools ensure all pupils have access to devices.
Modernising our council	1D Allocation of School Resources	Also the council need to seriously update technology available in schools so that our children can compete in the world.	4. The council is already doing this.	The council's well-established Anytime, Anywhere Learning Strategy affords the opportunity for children from P5 upwards to bring devices to school. Schools ensure all pupils have access to devices.
Modernising our council	1D Allocation of School Resources	Schools service delivery needs to be a top priority. Education for young people has been in turmoil for some time particularly in light of Covid19. Going forward we need to have motivated staff and positive outcomes for young people in WL.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	You need to invest in education as opposed to making cuts. Presumption of mainstream has been and will continue to fail our children while the schools have no budget to think creatively. A large number of children are currently not being educated at all because school cannot make their environment fit the children. Falkirk has enhanced provisions. How about bringing back something like that?	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Many schools are already struggling to provide the relevant support to their pupils in school on a limited budget, particularly for those pupils with additional support needs. I think giving schools more autonomy over how they spend their budget is good, but some schools have a much higher level of need than others so care will need to be taken to make sure this is equitable for all	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Will this take into account more support for children who need particular help? For example, I am aware that where children have a special need (autism, dyslexia and such), some schools in West Lothian have a really good team and support network, but some other schools do not. Will this be considered?	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	What proposals are you talking about with the devolved school management model.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Emphasis should be on contracted suppliers for resources, we should streamline available suppliers to ensure good value and market efficiencies.;	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There's a danger with this approach that the school will only be as good as it's head teacher if more things are devolved. There needs to be consistency across WL schools	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The schools deliver virtually all school learning through technology as it is. The days of books are gone in schools	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	put a stop to schools, spending the remainder of their budgets on none, essentials at the end of financial year.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As a school we are proud of the developments we have made, using a flexible approach to technology. Our pupils use their own devices in most classrooms, mainly because we have no other choice, however, it is an unfair model especially on the leaders who are struggling to drive forward a Anytime, Anywhere learning vision with O365 at the heart - but without the resources.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Linlithgow Academy is in a terrible state while nearly all other schools in the district have been upgraded or rebuilt. This needs addressed, the building & facilities are atrocious.	4. The council is already doing this.	The has been capital investment at Linlithgow Academy - new sports hall, refurbished HE rooms, science room and assembly hall .
Modernising our council	1D Allocation of School Resources	As someone who pays in though my council charge but has never had any children, I DEMAND that the priority is that every child leaves school being able to read, write and count. Make sure that message is clear to all teaching staff. For any child leaving without these skills, the Education Dept has failed. After that, then there should be a scale of whats next, I'll leave that to the teachers to decide the priority, as they should know best. And should also be targeting the best for that individual child, not how many of x qualifications have been achived at the school.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Ensure that school staff come on board with changes as they seem to be overloaded at moment	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	House builders need to contribute to building and the provision of school in areas where there is no capacity for students - devolved school management could create a division in more affluent areas	4. The council is already doing this.	S75 agreements are in place for developments to contribute to school infrastructure.
Modernising our council	1D Allocation of School Resources	Effective use of technology is always promoted and a priority within school curriculum, however, within areas of socio-economic deprivation this can fall down, despite being provided with the necessary tools. This needs to be carefully considered about parental expectation and engagement, which can be a real challenge.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	In Education this relies on families having access to the internet and to IT equipment. It is proving a struggle to engage pupils and families online after school hours already	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Engaging with all school staff would help highlight areas THEY feel need improving...	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	teacher jobs is an area close to me a a probationary teacher as there is already a lack of jobs with many teachers having to retrain and find alternative posts.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Devolved school management is the key. I worked in schools in England where that was done and surprised not done in Scotland	4. The council is already doing this.	Schools in Scotland do have devolved school management but maybe you mean schools run with a Board of Governors.
Modernising our council	1D Allocation of School Resources	There is a need for new nurserys, schools and high schools in west lothian. The population is growing.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	West Lothian should adopt a principle of educating all children who live in West Lothian including returning children who are currently educated out with the local authority by private providers. The only exception to this would be if the child is violent and too much of a challenge to the service, but this should be the exception.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Look again at staffing as we have schools being forced to take nursery staff when the demand is not there thus using up a head teachers budget in an inefficient manner	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The vat increment on resources I hope returns to the relevant school. ;	4. The council is already doing this.	School purchases /invoices less VAT
Modernising our council	1D Allocation of School Resources	Head teachers budgets should not include building upgrades that is stealing from education resources. ;	4. The council is already doing this.	Property budgets not within schools
Modernising our council	1D Allocation of School Resources	Third parties do understand what is exactly required within the school support system. Schools should have greater say in how they allocate support to pupils and have the gumption to remove pupil support who are not efficient take too much time off as they are on temporary contracts.	4. The council is already doing this.	The proposal is not specifically about pupil support or staff absence.
Modernising our council	1D Allocation of School Resources	This proposal concerns some greatly. I understand the value of skill mix and external experts delivering some services however I believe there have been dubious choices made previously in this area. I believe Head Teachers are best placed to effectively deploy resources within a school as not all schools are equal in need. I think the Councils role financially is to allocate monies and ensure it is used to best impact through a robust governance framework. Therefore the suitability of this proposal is best assessed, imho, by those who actually deliver the service and those whose children use it.	4. The council is already doing this.	The large bulk of resources are deployed by Headteachers under the scheme of devolved school management.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	See previous comments on working smarter. Staff at all levels should be included/consulted in proposals to ensure valuable insight from those working in the roles is not missed.	4. The council is already doing this.	The consultation is open to staff.
Modernising our council	1D Allocation of School Resources	I am very concerned that "Technology to deliver the curriculum" means pupils will not have a qualified teacher to deliver the curriculum.	4. The council is already doing this.	All pupils will be taught by qualified teacher.
Modernising our council	1D Allocation of School Resources	more cost effective to use teaching staff experienced on both sides of the subject if specialised courses were provided by a set of school and offer to take students from other schools	4. The council is already doing this.	This is the Campus model, already in operation
Modernising our council	1D Allocation of School Resources	It is more cost effective to use existing teaching staff to deliver both parts of the curriculum - theory and practical. If schools offered specialised specific courses these could be opened up to other schools. Not every school offering the specific course - have some schools being the champion in specific courses	4. The council is already doing this.	This is the Campus model, already in operation
Modernising our council	1D Allocation of School Resources	it would be more cost effective if schools be used for specific courses which could also mean more students could take part	4. The council is already doing this.	This is the Campus model, already in operation
Modernising our council	1D Allocation of School Resources	more cost effective to use teaching to staff in both fields of work. if schools offer specialised courses they can be opened up to other schools.	4. The council is already doing this.	This is the Campus model, already in operation
Modernising our council	1D Allocation of School Resources	more cost effective to use teaching staff to deliver specific courses. ; ; have one school have a specific course thats open to other schools to save from doing it at multiple and saving resorces.	4. The council is already doing this.	This is the Campus model, already in operation
Modernising our council	1D Allocation of School Resources	more cost effective to use teaching staff or schools offered specialised courses and pupils from other schools attended the specialised courses.	4. The council is already doing this.	This is the Campus model, already in operation
Modernising our council	1D Allocation of School Resources	more cost effective to use teaching staff experienced on both sides of the subject. if specialised course were provided by a set school and offer to take in students from other schools.	4. The council is already doing this.	This is the Campus model, already in operation
Modernising our council	1D Allocation of School Resources	More cost effective to use teaching staff experienced in both sides of the subject	4. The council is already doing this.	The Council uses staff experienced in their subjects.
Modernising our council	1D Allocation of School Resources	Pupil support needs to stay and need yo be a break out space in every school for kids with ASD / ASN / anxiety or if they need a break .;	4. The council is already doing this.	The proposal will not impact on ASN provision.
Modernising our council	1D Allocation of School Resources	School resources are important for children to receive a high level of education. That could be Human Resources or physical resources such as items being bought for the school day, outings that widen the children's experiences, staff who enable and support children with ASN that also allows other children to not have their learning interrupted.	4. The council is already doing this.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	School staffing is important in my opinion. i think it would be good to have more staff in schools, especially to help and support pupils that have learning difficulties such as dyslexia, and those with behaviour problems too. I don't think there is enough support of this kind in schools in my experience and lots of pupils leave school feeling they haven't achieved as well as they could have and lack in confidence	4. The council is already doing this.	The proposal will not impact on ASN provision.
Modernising our council	1D Allocation of School Resources	Devolvement is not always best. Central supply/buying can gain greater cost savings due to order sizes. Not every pupil is online or has computers available.;	4. The council is already doing this.	The council uses central purchasing and supports pupils access appropriate devices and online services
Modernising our council	1D Allocation of School Resources	would this have a big impact on children from more deprived areas ?	4. The council is already doing this.	The Council devotes significant resources to closing the socio-economic attainment gap.
Modernising our council	1D Allocation of School Resources	Support staff are some of the most important staff in the school for those who have learning difficulties, those who struggle to/cannot go to class. If there are staff cuts here many of these pupils may not come to class or could in turn disrupt others learning ; ;	4. The council is already doing this.	The Council will continue to meet its statutory obligations to meet the needs of all pupils.
Modernising our council	1D Allocation of School Resources	Support teachers cannot be reduced as for some students that is how they get through their day. Some pupils are not able to go to class due to mental health issues, and that is where the support teachers help. They are vital for our schools to run, and they cannot be cut	4. The council is already doing this.	The Council has invested in counselling and mental health support services.
Modernising our council	1D Allocation of School Resources	Not all children are able to academically prove what they have learnt, but could practically show you what they have learnt - how would they do this if it was only via tech.; How do writing skills improve if using digital platforms all the time in school? (eg, using tablets etc)	4. The council is already doing this.	Technology is used to support, not replace, existing forms of learning and teaching.
Modernising our council	1D Allocation of School Resources	Technology to delivery the curriculum is not effective - current arrangements for virtual learning in the senior phase are unmanageable and problematic - the best learning takes place when students are in front of a subject specialist teacher. We need more support staff rather than fewer - we are currently seeing the impact of covid on the social and emotional skills of pupils and this may get worse over the next few years. Students in many classes already do not have adequate support.	4. The council is already doing this.	The council is already making effective use of digital learning, building on the experience gained during the pandemic.
Modernising our council	1D Allocation of School Resources	I'm also concerned about "third party providers" - as a parent I expect the best for my children and that should not fall short of a qualified teaching staff! I send them to school for education and not childcare (the two are very different things).	4. The council is already doing this.	All pupils will continue to be taught by qualified .teachers,
Modernising our council	1D Allocation of School Resources	This needs to be carefully planned so that schools are not left with inadequate support staff and therefore attainment is impacted.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	I firmly believe that a Head Teacher of a school is the most appropriate person to make decisions of how to support the needs of the children in her care. Schools at the moment are not overstaffed so to imagine that removing staff will make them run more efficiently is strange to say the least. School should be given more resources to provide the best possible education for children rather than having resources cut. I would like to hear more about the use of technology to deliver the curriculum - until it is explain what it is and how it will work no judgement can be made on whether it is a good idea or not.	4. The council is already doing this.	Headteachers have significant delegated decision making authority.
Modernising our council	1D Allocation of School Resources	I am also the mother of a teenage daughter who has depression and anorexia. She attends a mainstream school in West Lothian and she struggles to find support staff in her school when she needs them. ;	4. The council is already doing this.	The Council will continue to meet its statutory obligations to meet the needs of all pupils.
Modernising our council	1D Allocation of School Resources	I am a teacher in a special needs school and we are currently facing a staffing crisis. The young people I work with require specialist care and support for the medical, therapy and personal needs. Without the hard work of our support staff the school would not run safely and we would fail the pupils in our care. ;	4. The council is already doing this.	The Council will continue to meet its statutory obligations to meet the needs of all pupils.
Modernising our council	1D Allocation of School Resources	I have limited experience in this. Personally, I have liaised with schools for my own children and find that by establishing a positive working relationship, pupil's needs can be addressed. I do feel there is a lack of support currently for supporting pupils with their mental health, which impacts on their attendance and learning.; How many Play Therapists does the local authority employ? Children need this to work through any trauma and other adversities, before being able to fully apply themselves to their learning. (In my opinion)	4. The council is already doing this.	The Council will continue to meet its statutory obligations to meet the needs of all pupils.
Modernising our council	1D Allocation of School Resources	There has to be a focus on children with additional support needs to ensure they continue to get the support they require.	4. The council is already doing this.	The Council will continue to meet its statutory obligations to meet the needs of all pupils.
Modernising our council	1D Allocation of School Resources	Sharing between schools of provision and staff etc may assist, as well as clearer transparency around delivery of ASN in schools, and where necessary showcasing that in mainstream provision to support families and encourage less preference of special schools. In the expectation that this delivers a cost saving. Ensuring teachers are clear about their responsibilities and roles in terms of delivering budgets and the Education Authorities priorities in WL.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Children pick up technology so quickly - please ensure that teachers and school staff are trained appropriately.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is not a solution. Using resources for additional supports in schools to meet core requirements will have serious unintended consequences in other areas causing increased investment being required to meet needs of our most vulnerable children. A more measured approach to allocations to schools being focussed on Pupil needs would see a significant increase in attainment and achievement. Provide robust training to all teachers and support staff to allow them to feel confident in managing behaviours that challenge. Please ensure when making decisions around attainment that you consider the attainment and achievement of our most vulnerable pupils to.	4. The council is already doing this.	Budget allocation reflects socioeconomic need; the attainment strategy focuses on closing the socio-economic attainment gap; robust staff development is provided, and staff can suggest topics to be covered.
Modernising our council	1D Allocation of School Resources	There already is a lack of Pupil Support Workers within West Lothian to adequately meet the needs of all learners in mainstream schools. Any reduction in staffing numbers would ultimately impact attainment and jeopardise getting it right for every child.	4. The council is already doing this.	Raising attainment and GIRFEC remain priorities for all schools.
Modernising our council	1D Allocation of School Resources	While technology can be helpful for children in educational settings, it should be put in place for that reason alone, NOT simply as a money saver. Any new introduction of technology to replace staffing in place to support children should be piloted and impact assessed to show proven benefits in reaching the Council's commitment to GIRFEC before being rolled out across the board as a money saver. ; ;	4. The council is already doing this.	The Council is using technology appropriately and effectively in the classroom to support learning and teaching.
Modernising our council	1D Allocation of School Resources	Pupil Support services simply cannot be cut any further. As a parent of an Autistic teen in mainstream school it is imperative that these support services are not cut any further. There is nothing in place sufficient for those children who are not eligible for a SEN placement but find mainstream very challenging. The schools are doing their best but already are so stretched and are unable to provide support that is required.	4. The council is already doing this.	The Council remains committed to its statutory duty to meet the needs of every child.
Modernising our council	1D Allocation of School Resources	Pupil support is vital for any school to run smoothly. Since the pandemic pupil support is even more in demand from highly anxious pupils or parents needing many different types of support. I work as part of the pastoral care team in a secondary school and our work load and demand has quadrupled since the pandemic. Our day consists of constant phone calls from parents very concerned about their children's mental health and also their own. I have a constant queue at the door of pupils who are all needing attention for many different reasons. We cannot keep up with the demand for counselling sessions in a school day. Also the need for support for learning is desperate due to the pupils being home schooled. We need more staff in pupil support not staff cuts. Staff cuts in this department would be devastating for the mental health of many pupils and could even be catastrophic.	4. The council is already doing this.	The Council has invested in counselling and mental health support.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	This seems like a disproportionate saving to be made. I don't see how additional support can be offered with less money. Support for learning budgets have been cut already over this past decade, and yet needs are rising. Mental health, parenting, pandemic etc have resulted in children who need more support, not less.	4. The council is already doing this.	The Council has invested in counselling and mental health support.
Modernising our council	1D Allocation of School Resources	We MUST ensure that the individual child is at the forefront and that the people who work closest with them are consulted. There is no point in someone deciding outcomes who does not know the child/family or circumstances. Paperwork for parents and practitioners should be made simpler and less time consuming.	4. The council is already doing this.	The Council is committed to GIRFEC, and minimising the bureaucratic burden.
Modernising our council	1D Allocation of School Resources	Using technology in the classroom is a great idea in theory but never in practise. The AAL approach is not cost effective. The range of devices that children bring is vast and teacher's often don't have the expertise to troubleshoot all types of devices. There are issues with logging in on some devices. Not all children have the same software/apps on their phone so again troubleshooting with devices takes time away from the actual lesson. Plus you have the everyday running of devices especially charging devices.	4. The council is already doing this.	The Council is supporting access by all pupils to digital resources through appropriate technology.
Modernising our council	1D Allocation of School Resources	education properly funded ensures the next generation can be good citizens	4. The council is already doing this.	Creating good citizens is one of the aims of curriculum for excellence.
Modernising our council	1D Allocation of School Resources	Schools are struggling to afford technology and maintain and improve their stock so I'm unsure how greater use of technology would implement savings as investment would be needed first. The Capital Refresh Funding is so low now and will stop in the next couple of years.	4. The council is already doing this.	The Council is supporting access by all pupils to digital resources through appropriate technology.
Modernising our council	1D Allocation of School Resources	Are the 3rd party providers vetted sufficiently to ensure they do actually provide the best value for money when purchasing resources especially if those resources cannot be bought from procurement suppliers?	4. The council is already doing this.	All suppliers of goods and services are measured against the best value framework.
Modernising our council	1D Allocation of School Resources	Digital learning is watered down. No research out there to the contrary. What about the poverty rerated attainment gap? This will have a huge impact on this. Headteachers should have more autonomy and less top down approach from the centre. This would save money.	4. The council is already doing this.	Headteachers have control of devolved budgets with which to meet the needs of their pupils in line with the 'empowering schools' agenda.
Modernising our council	1D Allocation of School Resources	Concerned that young people if using technology will arrive at school with devices uncharged. Given current cost of living crisis it all adds up to charge numerous devices at home.	4. The council is already doing this.	Thank you for your comment. Schools will support pupils to use technology effectively and appropriately.
Modernising our council	1D Allocation of School Resources	There is a lot of children who need support with school due to Mental Health issues. After lockdown they need help and support to deal with anxiety and depression.	4. The council is already doing this.	Thank you for your comment. The Council has identified funding for counselling and mental health support..
Modernising our council	1D Allocation of School Resources	the service provision that could be continued needs to be at the very least of the same standard as we have now, if not better.	4. The council is already doing this.	Thank you for your comment. This is the intention of the proposal.
Modernising our council	1D Allocation of School Resources	"Devolved School Management funding model" sounds remarkably similar to the PPP taken on by Edinburgh Council several years ago which resulted in something as simple as a lightbulb change being carried out by an external company at a grossly inflated price.	4. The council is already doing this.	Thank you for your comment. Devolved school management is not the same as PPP.
Modernising our council	1D Allocation of School Resources	Staffing in schools is vital, particularly support staff. Rather than cutting staff in schools, more savings should be made by cutting higher salaries council management.	4. The council is already doing this.	Thank you for your comment. The consultation contains specific proposals to reduce management.
Modernising our council	1D Allocation of School Resources	; There are many different, but related, support services for supporting education, each with their own management structure. If these were all part of the same team the management structure could be streamlined and the service delivery would be more efficient. As a teacher in West Lothian, it can be difficult to know what support is available from the center and which service is the most appropriate for the need.	4. The council is already doing this.	Thank you for your comment. The consultation contains specific proposals to reduce management.
Modernising our council	1D Allocation of School Resources	Greater use of technology to deliver the curriculum would require adequate IT resources in all schools.	4. The council is already doing this.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	It is vital that the council consults teachers and other school staff and key stakeholders in this regard, and that their input forms the major decision making considerations, these people are the experts and they know best what is needed in our schools and education facilities. Council management and quite frankly 'pen pushers' should not be making these decisions lightly or without input from those who will feel the impact most.	4. The council is already doing this.	Thank you for your comment. The consultation is open to teacher, school staff and other stakeholders.
Modernising our council	1D Allocation of School Resources	We do not have enough technology in schools as it is to deliver more of the curriculum digitally.	4. The council is already doing this.	Thank you for your comment. The Council has invested in providing technology and supporting access to technology at home.
Modernising our council	1D Allocation of School Resources	Greater use of technology for curriculum provision - part of this would surely entail each pupil having a device which is certainly not the case at present.	4. The council is already doing this.	Thank you for your comment. The Council has invested in providing technology and supporting access to technology at home.
Modernising our council	1D Allocation of School Resources	The council must ensure additional support pupils are provided for with specialist resources and placements	4. The council is already doing this.	Thank you for your comment. Pupils with ASN will be supported to benefit from the presumption of mainstream wherever possible, with appropriate support.
Modernising our council	1D Allocation of School Resources	Consider perhaps reducing unnecessary management structures and performative posts being created but then absorbed into school programmes to compensate for staffing shortages and thus minimising impact on attainment. ; ; How much did the talking bins cost?	4. The council is already doing this.	Thank you for your comment. The consultation contains specific proposals to reduce management.
Modernising our council	1D Allocation of School Resources	I worked in a secondary school and when budgets were not used up there was a rush to spend at end of financial year and lots of unneeded items bought so needs to be more control of what is actually needed	4. The council is already doing this.	Thank you for your comment. Proposals in the consultation are informed by an analysis of current patterns of expenditure including carry-forwards.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	; Staff is needed to ensure children are not falling through the net from disadvantaged families how do you staff breakfast club, free lunches, teach, support, mental health care, social care clean clothes, tooth brushes etc.; School is not just education anymore .	4. The council is already doing this.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Stop the culture of schools spending all of there budget for fear of not getting the same amount next year. Return the unspent money back to central budgets. Also specialist PE teachers cost when class teachers are trained to provide PE. They are a number of additional "active" services provided by teachers that again can be done in house by schools.	4. The council is already doing this.	Thank you for your comment. Proposals in the consultation are informed by an analysis of current patterns of expenditure including carry-forwards.
Modernising our council	1D Allocation of School Resources	Pupils should always come first, giving every child opportunities to improve their situation and prospects.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As a parent council, the lenses we're using across our responses are equity and inclusion, mental health and wellbeing, teaching and learning. We raise the fact that this generation of young people have faced extremely challenging years and applaud all efforts the schools and local authority have made to prioritise mental health and wellbeing in the months since lockdown.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	We have not been able to locate a Child Rights and Wellbeing Impact Assessment in relation to; this proposal, and request that one is carried out in order that impacts are highlighted and; mitigated.	4. The council is already doing this.	Thank you for your comment. The Council will conduct integrated impact assessments on all proposals agreed for implementation.
Modernising our council	1D Allocation of School Resources	Additional resources to suppprt education is a positive, we must invest in young peoples education recognition should be given that not all are naturally academic or have the financial assistance of parents and carers or in some cases the support of.parents and carers to encourage them to steive for success	4. The council is already doing this.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Provision by third party providers should only be considered if there is not the required skill set within existing council workforce, and after the reason for this has been evidenced.	4. The council is already doing this.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Have Heads and pupil support staff been consulted? I work in a school and have not heard about this so am doubtful this has been well communicated.	4. The council is already doing this.	Thank you for your comment. The consultation is open to headteachers and pupil support staff.
Modernising our council	1D Allocation of School Resources	Anecdotally, there does seem to be a disparity between schools in terms of the allocation of a range of resources (e.g. one secondary having a handful of Pupil Support Workers and another having more than twenty, despite there being a significant need in the former school), so some review of resourcing would be welcome.; ; However, any notion that PSWs should not be allocated on a permanent basis to a particular school should be vehemently rejected, as learners benefit immensely from the relationships formed with these staff.; ; I am not aware of any surplus in my own school, in terms of administrative or other support staff, with such staff always being busy.;; ;	4. The council is already doing this.	Thank you for your comment. Headteachers have delegated authority to decide the best mix of staffing to meet the needs of their pupils.
Modernising our council	1D Allocation of School Resources	Provide proper education to all children	4. The council is already doing this.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Devolved resources should operate within a core framework and infrastructure.	4. The council is already doing this.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Using technology to deliver the curriculum only works when pupils and staff have access to appropriate resources. For example, WiFi fit for purpose, pupils with access to appropriate devices. Staff given resources to deliver via technology. Many pupils only have a phone, which is no use for using Teams, writing essays, accessing other resources. Schools which are "all digital" have issues with pupils losing / damaging laptops, and with theft. Parents being expected to provide laptops / replace laptops is not sustainable. See previous comment on PECOS.	4. The council is already doing this.	Thank you for your comment. The Council has invested in providing technology and supporting access to technology at home.
Modernising our council	1D Allocation of School Resources	If further use of technology is going to be used to deliver education then there needs to be a large investment in the technology available within schools and for use by school aged young people. The resources currently available are not fit for purpose.	4. The council is already doing this.	Thank you for your comment. The Council has invested in providing technology and supporting access to technology at home.
Modernising our council	1D Allocation of School Resources	Schools at the moment are not operating to their full potential at all. It is not meeting the needs of the young people who are using them. It meets some of their needs but not holistically. There are too many young people, who require additional support to access education and are unable to have this support.	4. The council is already doing this.	Thank you for your comment. Pupils with ASN are supported to ensure they benefit from the presumption of mainstream wherever possible.
Modernising our council	1D Allocation of School Resources	Children with additional learning needs such as ADHD/ ASD do not have adequate support/ understanding while in mainstream school. There is lack of training on how to best work with these students. As such these children then are isolated and this then puts more strain onto social policy- children and families.	4. The council is already doing this.	Thank you for your comment. Pupils with ASN are supported to ensure they benefit from the presumption of mainstream wherever possible.
Modernising our council	1D Allocation of School Resources	Schools require more technology	4. The council is already doing this.	The Council has invested in providing appropriate technology for use in school and at home, and in supporting pupils access to technology.
Modernising our council	1D Allocation of School Resources	need to weed out staff who do not perform there duties or who do not complete there shifts ie go home then come back then go home early. more control on how school budgets are spent lots of money spent at the end of the year no nothing its like a free for all in the schools.	4. The council is already doing this.	Thank you for your comment. Proposals in the consultation are informed by an analysis of current patterns of expenditure including carry-forwards. Managmeent arrangements are in place to monitor staff performance.
Modernising our council	1D Allocation of School Resources	Schools need to be staffed correctly and all pupils should be given access to appropriate levels of support. All schools should be financed correctly and allocated resources for all.	4. The council is already doing this.	Thank you for your comment. This is the intention of the proposal. Class sizes and supervision ratios will be maintained.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Individual schools should have the autonomy to spend budgets the way they see fit, not be hemmed in by budgets that have been stipulated to be spent in certain ways. Of course schools should be accountable for the way in which they spend the money but surely they know what's best for their learners?	4. The council is already doing this.	Thank you for your comment. Devolved school management means that as many decisions as possible are made within the school. Ring fencing, where it exists, is largely the result of Scottish Government initiatives.
Modernising our council	1D Allocation of School Resources	PSWs are the most valuable 'resource' a school can have and you should recognise that value with permanent contracts, fair pay and training to develop and upskill them to cope with the huge expectations placed upon them. Many are working with young people with huge challenges and needs, due to the lack of funding and places in specialist provision.	4. The council is already doing this.	Thank you for your comment. PSW posts have been assessed using the national job evaluation tool, and PSWs benefit from Council employment policies and practices.
Modernising our council	1D Allocation of School Resources	Improve technology within schools. Layers of management in school.	4. The council is already doing this.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Try using pre-recorded tutorials or online live sessions that can be shared between different schools at the same time. perhaps music lessons online etc?	4. The council is already doing this.	Thank you for your comment. These options can be considered as part of the virtual campus and the revised model of instrumental music provision.
Modernising our council	1D Allocation of School Resources	Use what you learned during Covid - enhance the good and review what didn't go so well and why	4. The council is already doing this.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Greater use of technology to deliver the curriculum.; I am for children being given all possible opportunities to access the curriculum through technology and develop their skills as they do so. This said, the number of devices currently available to use by children in primary schooling doesn't match the number of children in classes. There has been reference to bringing children's own devices in order to alleviate this issue. A reliance on devices being brought in by children this will be pejorative for families who do not have financial means to buy technology. This will further disadvantage children who already experience barriers to their learning associated with financial deprivation. Furthermore, our current method for tracking progress through technology is often online jotters on Teams. These are not an effective way of showing long-term progress through schooling as they are deleted when the child moves to a new Team. Not all staff are confident to deliver teaching and learning through digital means as we often have visitors to our class and school to see ways we deliver the curriculum digitally. We would need to invest time into doing so prior to relying on this as a means for developing and delivering the curriculum.	4. The council is already doing this.	Thank you for your comment. The Council has invested in providing technology and supporting access to technology at home.
Modernising our council	1D Allocation of School Resources	Changes to administrative staffing arrangements;; The current administrative burden on teachers is high. The core admin for a teacher is that; they are expected to complete registers on Seemis at the start of the school day and after lunch break, complete and check lunches on iPay, to hand out the correct number of lunch bands to the correct children, to complete evolv for any excursion and risk assessments, complete wellbeing surveys for their children and upload these online, ensure that all monitoring and tracking is completed and up to date online for all children in their classes, handout letters for every event or trip to the correct children or families, look up usernames and reset passwords for children on Active Directory Users and Computers, Glow and third party providers such as Sumdog. Should there any children present additional needs within the classroom it is highly likely that a teacher will need to complete regular paperwork needing response for medical professionals and other outside agencies, other types of paperwork if a child's wellbeing is compromised and track these needs long term. Should any incidents occur within the school a teacher is also expected to record these on Sphera. This list is not exhaustive. With this taken into consideration a further reduction in administrative staff would lead to a greater burden being placed on teaching staff with a reduction in their ability to perform their teaching role.	4. The council is already doing this.	Thank you for your comment. Reducing the administrative burden on staff and ensuring that tasks are carried out by the correct staff in partnership with the professional associations is a priority for the Council.
Modernising our council	1D Allocation of School Resources	Will more up to date technology be provided to be able to use it? Where I work, the laptops barely work and we only have 4 ipads in our class.	4. The council is already doing this.	Thank you for your comment. The Council has invested in providing technology and supporting access to technology at home.
Modernising our council	1D Allocation of School Resources	Would actually really just like you to be transparent in fixing and re opening knightsridge primary, pay your teachers more so they won't strike causing disruption to learning further than covid already did and screwing working parents who need to find childcare cause of this. Considering how childrens learning has been affected due to covid you may want to look at actually funding the education instead of saving and taking away. I have seen the affects in my own children and also the young people who were doing exams during covid who are now on training programmes to gain skills because of their low skill set from school.	4. The council is already doing this.	Thank you for your comment. Unfortunately, as the consultation seeks to explain, the council must cut expenditure, not increase it. The future of Knightsridge Primary School will not be impacted by this proposal. Teachers pay is set nationally, not by West Lothian Council.
Modernising our council	1D Allocation of School Resources	Already dual remit of some schools support and administrative staff. More of this could work although classroom support is very important, hopefully not much compromise of these given hours.	4. The council is already doing this.	Thank you for your comment. Headteachers have devolved control of budgets and can introduce these arrangements where beneficial.
Modernising our council	1D Allocation of School Resources	School resources need to be focused on actual education, not on excessive force of woke ideas.	4. The council is already doing this.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	More up to date technology will give children more opportunity to learn better.	4. The council is already doing this.	The Council has an established programme of investment in IIT devices and infrastructure, and the effective use of technology in the classroom.
Modernising our council	1D Allocation of School Resources	The schools still need to have enough staff to support the pupils in class.	4. The council is already doing this.	The Council will continue to meet national class size limits and supervision ratios.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Having the most up to date technology is good for the children however they will still need to have the support of teachers.	4. The council is already doing this.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Pupil support staff dont get paid enough, I am familiar with this role.; Working in additional needs schools , I used my qualifications in social care and this is transferable. The rate of pay should be the same as residential child care staff and maybe people could work across the board in all social care/educational settings . ; Alot of pupil support staff can't afford to remain in their roles due to dwp work conditionality , made to find better paid jobs .	4. The council is already doing this.	Thank you for your comment. PSW posts have been assessed using the national job evaluation tool, and PSWs benefit from Council employment policies and practices.
Modernising our council	1D Allocation of School Resources	Give them a rise .	4. The council is already doing this.	Thank you for your comment School based staff will benefit from nationally agreed pay rises.
Modernising our council	1D Allocation of School Resources	Too many one to one staff for (children with behavioural issues (in main steam schools ie high schools	4. The council is already doing this.	Thank you for your comment. The Council provides resources to support pupils with ASN in mainstream schools.
Modernising our council	1D Allocation of School Resources	It is important to ensure educational technology remains invested in to ensure children's education is up to date, modern and ensures children are equipped with skills to compete equally with other education systems.	4. The council is already doing this.	The Council has an established programme of investment in IIT devices and infrastructure, and the effective use of technology in the classroom.
Modernising our council	1D Allocation of School Resources	Schools should get funding to help single parent s or low in cone family's on uc or have health issues could get help with equipment at hone they need such as eg Internet laptop as all info is given in emails we do t all have money for these things scheme should be set up thanks	4. The council is already doing this.	Thank you for your comment. The Council has invested in providing technology and supporting access to technology at home.
Modernising our council	1D Allocation of School Resources	Efficiency reviews should not affect the quality of education provided.	4. The council is already doing this.	Thank you for your comment. This is the intention.
Modernising our council	1D Allocation of School Resources	Core staffing requirements are what matters.; Our school, Uphall Primary is excellent, please keep it up. Thank you.	4. The council is already doing this.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	There are a number of ASN schools that have been extended or completed recently. More needs to be done to strenghten core education values such as literacy and numeracy which is evidently lacking in recent years.	4. The council is already doing this.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Yes, before we had a system one fits all, now we've got a shift and children with less focus can have more progress in school. Hope will stay this way and improve even so that future generations will have a better chance to thrive than we had.	4. The council is already doing this.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Why not teach kids life skills in school! Teach them about savings, running houses, how to budget, how to do a weekly shop. Nat5 maths is Getting no one anywhere. No one uses it. Teach kids about discrimination, racism! Knowledge is power! Give them access to more clubs, training courses. How to be contributing citizens! Too many kids are sitting on their phones all day learning morning! Ban phones in classrooms to get their full attention! Early intervention is key! They are so impressionable! Teach them early, educate them early! Earn their trust! Kids need more structure in their learning! They are bored in school your teachers don't have a clue how to deal with them and worker pander to them or speak to them like it's a prison camp. Start learning trades in school , apprenticeships. Teach them about babies and how hard it is! Send them home with the practise babies do they see how much of a commitment being a parent is! Honestly you need to apply common sense here! Instead of drumming into them about she/ her and binary! That's not life!!!! That's other peoples choices!	4. The council is already doing this.	Thank you for your comment, although these suggestions do not relate directly to the proposal.
Modernising our council	1D Allocation of School Resources	I am in favour of more local control.	4. The council is already doing this.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Is the money being saved by cutting more essential services that all schools require more now than ever given the increase in mental health issues in children on top of trying to integrate children with additional needs in mainstream schooling without adequate resources to support both them and the other pupils who because of the needs of others are often not given the one to one teaching they need	4. The council is already doing this.	Thank you for your comment. The Council has identified funding for counselling and mental health support and for meeting the needs of pupils with ASN.
Modernising our council	1D Allocation of School Resources	The children need to have a good standard of education from teacher and support staff as well as up to the minute technology.	4. The council is already doing this.	Thank you for your comment. Headteachers have devolved budgets with which to meet the needs of their pupils with an appropriate balance of staff.
Modernising our council	1D Allocation of School Resources	More full-time teachers instead of 'Support staff". Sometimes the needs of the few are outweighing the needs of the many.	4. The council is already doing this.	Thank you for your comment. Headteachers have devolved budgets with which to meet the needs of their pupils with an appropriate balance of staff.
Modernising our council	1D Allocation of School Resources	Schools need to have ring fenced funding to ensure that there are adequate teaching to manage and educate all children in the class. ; This should include extra resources and support for children in mainstream classes who have additional educational needs. This should be a priority if the scottish government truly wants to close the attainment gap. Again 3rd party .not needed ; Pay more to teachers who do a great job	4. The council is already doing this.	Thank you for your comment. Teaching staff will benefit from the national pay award.
Modernising our council	1D Allocation of School Resources	Additional support for pupils must stay. Teachers and school staff are still supporting kids through the aftermath of the pandemic and removing additional support will have a catastrophic effect on staff and pupil wellbeing. Do not remove anything to support pupils and staff- if anything, they should be getting more, not less!	4. The council is already doing this.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Additional Supports Needs provision needs be staffed adequately to meet their needs effectively and reduce anxiety for them and their parents.; ; Schools like Cedarbank and Beatlie and Pinewood do an amazing job and need to have good staff and enough of them to meet the needs of young people	4. The council is already doing this.	Thank you for your comment.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Please do not reduced staffing in ASN schools. Fighting to get into a school is tough enough. Please don't then change what is good. Staff in Cedarbank are amazing and always listen and change things for my son. Don't reduce staff numbers please	4. The council is already doing this.	There is no proposal to reduce services for ASN pupils.
Modernising our council	1D Allocation of School Resources	At present we do not have the devices in our schools to deliver the curriculum through technology. We have a situation where pupils are asked to bring their own devices to school. The range of devices is poor, from old phones with small screens, devices with little memory etc.	4. The council is already doing this.	Thank you for your response. The Council continues to invest in ensuring pupils have access to appropriate technology including devices and connectivity.
Modernising our council	1D Allocation of School Resources	Essential that the relevant trade unions are fully involved in the process.	4. The council is already doing this.	The council is committed to working with employees and trade unions in managing changes to its organisational structures and staffing requirements. The council will seek to achieve agreement to change through constructive and open dialogue.
Modernising our council	1D Allocation of School Resources	the school needs more say on how they spend their money and all the services. the school and teachers are hands on they know the pupils better	4. The council is already doing this.	Thank you for your response. The large majority of education funds are devolved to schools, with Headteachers having delegated authority to spend them as they see fit to best meet the needs of learners.
Modernising our council	1D Allocation of School Resources	I think the equity fund should be brought back and should be allocated to children that need it but also school and council have to prove where money is going to make sure that child that needs it get it. more people support workers playground assistants.	4. The council is already doing this.	Pupil equity funding is allocated based on need, and the allocation and expenditure is monitored and reported to Scottish Government.
Modernising our council	1D Allocation of School Resources	need extra people support IAP programmes each school can delegate to their own needs could be a good idea	4. The council is already doing this.	Thank you for your response. The large majority of education funds are devolved to schools, with Headteachers having delegated authority to spend them as they see fit to best meet the needs of learners.
Modernising our council	1D Allocation of School Resources	Having to use peacos is very expensive as opposed to amazon	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The council is bound by regulations contained in the Public Procurement Legislation which set out the procedures to be followed at each stage of the procurement process leading to the award of contracts within certain spend thresholds.
Modernising our council	1D Allocation of School Resources	The provision of religious schools in West Lothian is out of date and costly. My view is that a significant saving could be made by phasing out this old fashioned educational model. For example, in Winchburgh we have 2 new secondary schools which means 2 head teachers, 2 (or more) deputy heads and duplications of other staff and resources. Apart from the cost of this duplication the separation of children based on their religion is no longer appropriate in 2022.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The provision of both denominational and non-denominational schools is governed by legislation.
Modernising our council	1D Allocation of School Resources	Looking at the 1140hrs model for ELC and how drastic savings can be made across the Authority.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	1140 hours mandatory for the council to provide.
Modernising our council	1D Allocation of School Resources	Being back proper mainstream and have special needs schools, this would save a lot of money. This will increase life quality for people. Why struggle in mainstream when can shine in special needs school? I have disabled family so this is close to me	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Cut all spending on Gaelic.	5a. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Get rid of the religious school system. If people want religion they can go to churches. Having two streams of schools is massively wasteful.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	We spend far too much money trying to achieve unachievable targets. Technology is no good if you don't have the wherewithal to use it at home. We have pandered to teachers too much since the Mccrone report and it's time to go back to basics. More class time and opportunity for teachers to teach. You can't rely on parents to share the SG's ideals and to replace teachers in the process.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I think the allocation of PEF needs to be reviewed. Some schools have huge PEF allocations and are known to spend it on resources which are perhaps not vital or immediately required in order not to lose allocation in future while other schools are finding it difficult to ensure basic resources are available due to a lack of funding. Would it not be better to allow the schools who feel they do have excess money to contribute to this to a cluster pot so those with less PEF could make use of it?	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	PEF allocations determined by Scottish Government with strict reporting requirements on spend and impact of spend in schools.
Modernising our council	1D Allocation of School Resources	This is I find a strange one where everything is sourced through picos thus not ensuring best price practice. ;	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Council standing orders requires use of PECOS to comply with Procurement legislation
Modernising our council	1D Allocation of School Resources	Do away with denominational schools, school is about education not religion!!! All religions get taught so children have choices and not indoctrination.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Lets have a look at the procurement system which is used by West Lothian Council. When making any type of purchase we are at liberty to do this vis Pecos which is a subsidiary of Ecommerce who generate trillions of pounds world wide for its owners annually.; I have been given permission to make purchases of materials for several years through Pecos and when price checking with local and smaller retailing companies these materials were costing 50% less for the items I could purchase from companies who were not on the Pecos listing of permitted retailers. How can this be justified other than large profits gained by the persons or Governments instructed by the ecommerce sector to use as the only means of purchase for our local authorities.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The council is bound by regulations contained in the Public Procurement Legislation which set out the procedures to be followed at each stage of the procurement process leading to the award of contracts within certain spend thresholds.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Schools close on Friday, half day anyway so 4 day week	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Schools must open, by law, on a defined number of days per year, but this suggestion will be discussed with national partners to determine whether it could be taken forward.
Modernising our council	1D Allocation of School Resources	I fail to understand why denominational schools are being built. Building & therefore running 2 secondary & 2 primary schools in Winchburgh seems a significant waste of resources. This was an opportunity to unite people yet we continue to fuel division. There is no need for segregated education.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The provision of denominational and non-denominational education is governed by law.
Modernising our council	1D Allocation of School Resources	Pecos makes things more expensive already	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The council is bound by regulations contained in the Public Procurement Legislation which set out the procedures to be followed at each stage of the procurement process leading to the award of contracts within certain spend thresholds.
Modernising our council	1D Allocation of School Resources	Pupil support in schools needs more funding, not less. ; Pastoral staff take on workloads that reduce those of social workers, currently. This isn't something we can afford to lose.;; Money could be easily saved from combining RC schools with mainstream, non-denominational, secular schools across the authority.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. The provision of denomination schools is covered by specific legislation.
Modernising our council	1D Allocation of School Resources	The cost of supporting multiple primary schools in the same village is still a puzzle. Not only does it make little sense financially but also divides and separates children, leading to divided and separated adults.;; Do not support less teachers in the classroom.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. The provision of denomination schools is covered by specific legislation.
Modernising our council	1D Allocation of School Resources	Why in this day and age when we preach inclusivity and are trying to stamp out racial & religious hatred do we have protestant & catholic schools and are involved in building 2 new separate schools in Winchburgh?	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. The provision of denomination schools is covered by specific legislation.
Modernising our council	1D Allocation of School Resources	I personally feel all denominations should be in one school rather than split by having a catholic school and other denominations	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. The provision of denomination schools is covered by specific legislation.
Modernising our council	1D Allocation of School Resources	Less Teachers and more pupil support staff would be good for schools as more and more children are needing one to one support and also adults to monitor the lunch hall as schools are also struggling to staff this especially if there is sickness too.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The Council employs the number of teachers required to meet national class size limits, and to fulfil the statutory duty to raise attainment.
Modernising our council	1D Allocation of School Resources	I think if we extended the school day by one hour Monday to Thursday and completely closed the building on a Friday we would provide the same amount of school teaching hours for pupil but would save on heating and electricity on Fridays as there would be no need to open the schools. It would also save on transportation costs as we would only need to provide transport Monday to Thursday .	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. The number of days on which schools must open is set by regulation, but national discussion could take place to determine whether the Scottish Government would be prepared to change this.
Modernising our council	1D Allocation of School Resources	In 2022 we are still sending kids who may live next door to each other to 2 separate schools. In this day and age it is a disgrace that we are still doing this. We are told from governments and media that we all have to be inclusive, but this obviously excluded kids going to separate schools. If everyone went to the school in their area would save a fortune in transport, traffic congestion (parents driving kids to schools). In another way it would go along way to make in roads to solving sectarianism.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. The provision of denomination schools is covered by specific legislation.
Modernising our council	1D Allocation of School Resources	We are fortunate enough to pay for school meals and pens and pencils. The school has to stop dishing out things to everyone. Pls only support those in need.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Some universal provision, including free school meals, is required by legislation.
Modernising our council	1D Allocation of School Resources	Having to use peacos is very expensive as opposed to amazon	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	The Council's purchasing strategy is based on achieving best value across all aggregated purchasing, not on individual instances where a cheaper alternative may be available.
Modernising our council	1D Allocation of School Resources	The sector is top heavy with high earning executive type roles like EO's and Pedagogy officers whose main function can appear to support HTs to produce data rather than pupils to produce results.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	West Lothian Council has a lean central education team whose support is valued by schools and is an integral part of the raising attainment strategy.
Modernising our council	1D Allocation of School Resources	PCOS costs schools money - we are unable to purchase goods and resources from cheaper (but still reputable) suppliers like supermarkets and shops.;	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	The Council's purchasing strategy is based on achieving best value across all aggregated purchasing, not on individual instances where a cheaper alternative may be available.
Modernising our council	1D Allocation of School Resources	We need more support staff in early years. With more ASN children attending ratio's need to be looked at to ensure opportunities for high level learning experiences.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	West Lothian Council follows national staffing and quality standards.
Modernising our council	1D Allocation of School Resources	Third party providers are only there to get as much money as they can get and are not always the better option.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1D Allocation of School Resources	Review all contracts and seek to get the best for the money spend. No cronyism	5b. Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Ordering resources through YPO etc is more costly than likes of Amazon Argos Asda etc. Would cut costs drastically if schools were able to "shop around"	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	The Council's purchasing strategy is based on achieving best value across all aggregated purchasing, not on individual instances where a cheaper alternative may be available.
Modernising our council	1D Allocation of School Resources	Therefore should not be a large number of promoted staff within a school. In Linlithgow Academy there are a significant number of PTs for support, this should be a normal teacher salary or admin scalee.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure. Modernising our council	1D Allocation of School Resources	more cost effective to use the same member of teaching staff	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	You could solve some of the expenses in Education but allow purchasing to be done via a wide range of outlets. For example purchasing Flour via PECOS is not only more expensive but means there is/can be huge amounts of waste because in PECOS you have to purchase multiple bags when you might only need 2. They extra bags now need to be stored and may go out of date because it wasn't needed.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Pupil/teacher ratios should not be reduced but should be increased and not with the use of assistants. Pupils need better "1to1" help, especially now coming out of covid to enable them to catch up.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	National pupil/teacher ration will continue to be applied.
Modernising our council	1D Allocation of School Resources	Streamline management layers within education sector. Is it absolutely necessary to have education officers, for example. What real impact do they have in the success of schools??	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Education Officers make a significant contribution to quality improvement and raising attainment.
Modernising our council	1D Allocation of School Resources	Schools are already understaffed and under resourced. There needs to more clarification on the use of greater technologies to deliver the curriculum. What does that mean? Teaching online? I hope not. ; You need to allow schools greater management of where they source resources. Using PECOS is expensive. Goods can be purchased at a much more cost effective price from elsewhere yet schools are not permitted to do this.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Central purchasing results in cost savings overall.
Modernising our council	1D Allocation of School Resources	PCOS is costing schools money - let us buy locally at Argos and B&M when we have to please.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Central purchasing results in cost savings overall.
Modernising our council	1D Allocation of School Resources	1D Education budget aim for devolution of revenue resources should be 100 % based on need and schools should buy any central support they need from a small specialist central resource operating on a trading account. Capital Expenditure should be needs based and commissioned by central experts based on a condition survey	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. The Council does not intend to introduce trading accounts due to the significant administrative overheads inherent in this approach, which has been previously tried in local government, but subsequently abandoned.
Modernising our council	1D Allocation of School Resources	Some savings could be made by not having to order items via procurement which cost far more for exactly the same item than if they were ordered from general vendors.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Central purchasing results in cost savings overall.
Modernising our council	1D Allocation of School Resources	Third Party Providers;; The use of PECOS should be reviewed during this. The comparative cost of resources on these websites in relation to elsewhere is often much higher. This means that we are unable to obtain cost-effective resources and often end up paying grossly inflated prices for the exact same goods. Reviewing this buying model could save individual schools and thus the council considerable amounts.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Central purchasing results in lower costs overall.
Modernising our council	1D Allocation of School Resources	Open on a Friday afternoon, like the rest of the country and extend lunch breaks so all the kids can eat in a timely manner.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. The Council has not plans to extend the school week. Longer lunch breaks could form part of the proposal regarding the secondary school day.
Modernising our council	1D Allocation of School Resources	How about using the facilities at The Civic Centre as an over spill option for all schools currently bursting at their seams.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Additional capacity now available in new schools in Core Development Areas e.g. Winchburgh, Calderwood.
Modernising our council	1D Allocation of School Resources	Ridiculous that primary children are being asked to take own devices to school! Yet again highlighting the gap between rich and poor! Kids hand writing and numeracy is suffering	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The council's well-established Anytime, Anywhere Learning Strategy affords the opportunity for children from P5 upwards to bring devices to school. Schools ensure all pupils have access to devices.
Modernising our council	1D Allocation of School Resources	Education could come under planning with a education executive then becoming a manager thus more savings.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Close the worst performing Schools, the pupils can then become an asset to the Local Community for a change be performing Litter Picking, basic road maintenance and drain clearing. They should work in a group attached together to avoid wandering, the more capable could entertain the Elderly. ; ; Parents of disruptive, abusive and otherwise poor performing Children should also be fined heavily to increase Council Funding.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	These suggestions are not in line with the Council's commitment to supporting the attainment and achievement of all pupils.
Modernising our council	1D Allocation of School Resources	"Technology" almost always adds to geater inefficiencies due to the advent of real people having to respond to completion of vast increases in data aquisition and interpretation. Good practical management has never relied on spurious "tech" solutions to achieve cost savings. ; Though it may not be witin the remit of this survey, the support given to "Faith" schools should be completely withdrawn, and where religions wish to maintain separate education for children they should pay for that from their own funds. Would such a saving not ammount to more than £5 million?	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Thank you for your comment. As young people will progress to employment in a world where use of technology is required, it is necessary to include effective use of technology in education. The provision of denominational schools is covered by specific legislation.
Modernising our council	1D Allocation of School Resources	Staffing should be checked across the council in schools. In other words, it should be checked that budgets are not being spent on depute head teachers if they are not needed due to school size and the number of classes. This could be a saving or could be reallocated so that the money goes further.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Thank you for your comment. Funding is devolved to Headteachers on the basis that they are best placed to determine what spending will best meet the needs of pupils. This national approach is designed to empower headteachers and schools.
Modernising our council	1D Allocation of School Resources	ASN pupils already suffer by being in mainstream education when a more appropriate/targeted approach may be needed which cannot be offered at the moment - what hope is there for them when you make 'efficiencies' in this area?	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Thank you for your comment. Pupils with ASN will be supported to benefit from the presumption of mainstream wherever possible.
Modernising our council	1D Allocation of School Resources	PEF schools are now receiving too much and children in other schools are suffering through lack of funding. the balance needs readdressing.Digital can not take the place of staff. Pupil support workers are essential and should not be reduced as they are vital.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Thank you for your comment. The Council has taken steps through its budget allocation to schools to address the socio-economic attainment gap, and this remains a priority for the Council.
Modernising our council	1D Allocation of School Resources	Pupil experience should not be compromised. Inclusion is letting children down. It is not helping the children with asn or the others. Any further cuts would be immoral.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Thank you for your comment. Pupils with ASN will be supported to ensure they benefit from the presumption of mainstream wherever possible.
Modernising our council	1D Allocation of School Resources	Funding for schools should not just be allocated to deprived areas. The council talks about equity, but how is this achievable when some schools have technology/resources in abundance and others do not as they maybe don't have PEF funding or smaller school role!	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Thank you for your comment. The Council has invested to reduce the socio-economic attainment gap, and this remains a priority.
Modernising our council	1D Allocation of School Resources	Has the council considered closing school swimming pools - individual pupils must only be in a school swimming pool for a few hours throughout their secondary school experience, what does it cost per swim? Class sizes are regulated nationally, why can we not exceed maximum class sizes by one pupil rather than employing additional teachers?	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Thank you for your comment. The Council is committed to maintaining nationally agreed class sizes. The provision of swimming pools for school and community use is an area of expenditure that can be considered.
Modernising our council	1D Allocation of School Resources	Cut the pension contributions and stop McCrone time, There'll be lots of money for support for additional needs then!	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Thank you for your comment. The Council is committed to the proper financing of pensions, and to upholding national agreements.
Modernising our council	1D Allocation of School Resources	Still too many ASN children unsupported in mainstream schools. More places in ASN school need to become available for children with ASN. There needs to be more PSWs employed in mainstream schools. We cannot close the attainment gap when all our PSWs are consumed by children with complex needs. The teachers are getting no support with the majority of the children who pose no threats or difficulties.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Thank you for your comment. The Council will ensure that as many pupils as possible can benefit from the presumption of mainstream, rather than provide more places in ASN schools.
Modernising our council	1D Allocation of School Resources	Reduce reliance on technology and return to paper based learning. Let teachers teach without the distraction of technology.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Thank you for your response. Educating children and young people to work effectively with technology is essential in order to prepare them for life and work.
Modernising our council	1D Allocation of School Resources	What about the schools estate? The new Winchburgh and Sinclair academies are only opening to an S1 cohort, surely this isn't cost effective? S1 to S3 would have been much better.	5d. It is proposed that this suggestion is not taken forward because it has been previously considered and will not be progressed.	The phasing of new school openings are considered carefully to take account of the needs of all pupils at all stages, the impact on existing schools, and the successful establishment of the new school.
Modernising our council	1D Allocation of School Resources	Also pupils should be in school on a Friday afternoon, the half day is and out dated practice and kids need as much time in school for a number of reasons. Very few councils in Scotland have a 4.5 day week.	5d. It is proposed that this suggestion is not taken forward because it has been previously considered and will not be progressed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Implement hybrid schooling 2 times a week and 3 x practical school days, 2 days of Zoom for children at home. Losing the school for 2 x days	5d. It is proposed that this suggestion is not taken forward because it has been previously considered and will not be progressed.	Schools must open, by law, on a defined number of days per year, but this suggestion will be discussed with national partners to determine whether it could be taken forward.
Modernising our council	1D Allocation of School Resources	Schools are already on their knees working with the bare minimum, in my opinion there is literally nothing else you can take. It would help if schools could buy resources from outwith the system to save some money, PECOS tends to have the same resources as some online retailers for over double the cost but our hands are tied.	5d. It is proposed that this suggestion is not taken forward because it has been previously considered and will not be progressed.	Central purchasing results in the best overall value for schools.
Modernising our council	1D Allocation of School Resources	If schools were permitted to purchase resources at the more competitive prices available outwith PECOS then budgets would go further.	5d. It is proposed that this suggestion is not taken forward because it has been previously considered and will not be progressed.	Central purchasing results in the best overall value for schools.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	School would benefit from being able to source a large number of their own resources rather than being restricted to the contractors that provide these. While I understand that the council have procurement responsibilities, schools are spending far too much on resources they could obtain at a lower cost elsewhere, This is not best value for school budgets.	5d. It is proposed that this suggestion is not taken forward because it has been previously considered and will not be progressed.	Central purchasing results in the best overall value for schools.
Modernising our council	1D Allocation of School Resources	Improvement of allowing greater volunteers tuition for under privileged kids would also be welcome. ; Eg I am a maths and computer science graduate, retired after many years in It industry. I am also a qualified sports coach and fully pvg checked yet find it impossible to volunteer to provide tuition for free. In England there is a national scheme to volunteer to tutor online or in person which one can sign up for . You are missing a fantastic resource pool usage	6. The respondent suggested an improvement. Officers will consider how this could be developed.	The national expansion of out of school care may provide an opportunity for volunteers to provide positive educational activities for young people.
Modernising our council	1D Allocation of School Resources	We need to seriously look at closing under utilised schools. Primary schools operating under 50% capacity located in a town / village with other primary schools present need to be closed down.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	You should consider specialist teachers covering more than one school or offer subjects at one school and have pupils travel to a school that offers that subject,	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Current campus arrangements and the proposed virtual campus will take this idea forward.
Modernising our council	1D Allocation of School Resources	Local communities must be key to this process as the blurb suggests closure of services reading between the lines.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1D Allocation of School Resources	Really believe that more investment is needed in West Lothian school to address youth outcomes. They are the parents, workers and citizens of the future and we need to level up their opportunities. What the pandemic taught us is that technology cannot replace a good teacher who understand how people learn. Also with so much concern about health and well-being being so poor and the cost to us ithrough proving services and interventions will only get higher as well-being drops. Again the cost far exceeds the saving and it would be incredibly short sighted. The council should invest in an education delivery review and upskilling staff to support young people better.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	You could shorten the school day in line with eg Germany and have 8am-1pm and more homework for secondary pupils to do at home in the afternoons. Concentrate on the more academic subjects instead of ones like drama	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	More resources for children with educational needs	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	More teaching assistants to help writhing the class rooms as teachers are struggling	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	More teaching assistants to help writhing the class rooms as teachers are struggling	6. The respondent suggested an improvement. Officers will consider how this could be developed.	No additional funding available to provide teaching assistants.
Modernising our council	1D Allocation of School Resources	Less reliance on paid for resources such as the risk assessment platform.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Sponser system could help	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Technology is useful and necessary but not the only approach. Not all children learn best using technology and do better with personal support and time from trained staff.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	New teachers? Clearer curriculum to enable both teaching staff, pupils and parents alike to follow the same path and align with each other.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I would suggest closing small schools like Seafield and Dechmont and transporting the children to other nearby schools. Children will have a better school experience with more opportunities to make more friends	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Admin staff and PSW staff work very hard daily. Often working more hours than they are actually paid for. However there are staff in schools who do not (I.e) PT does as little as possible and has Admin, PSW and Teachers picking up the slack! If staff all did what they were paid to do, maybe reductions could be found. Please don't penalise the staff who go above and beyond and work hard and are proud to work for WLC! Look at the big picture and you'll easily see the staff on big wages who bring nothing to the table!	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Needs to be balanced with kids educational needs. Technology can only be relied upon in certain circumstances and a back up needs to be in place to support kids that struggle with this type of learning	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Children need adults to help them learn and we are seeing a growing number of children who need small group support, 1-1 support. There are a lot of SMT in schools who are non teaching, surely they could be put to better use.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Recycling/ upcycling old furniture in schools could help with costs. Any furniture i.e desks, chairs, old equipment could be used/sold to companies or places starting up business. This would reduce costs further and also a great way to being sustainable	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School support staff must be utilized to enable pupils to access Thier education and as such are an essential connection for pupils to better deal with mental health issues that impact on ability to learn from teachers. Support staff are an essential part of school wellbeing and building resilience. Savings can be made in management team and better distribution of responsibility through PTC/ teaching staff and less repition of duties. Outside agencies can be intimidating to pupils better use in school staff saving costs and maintaining good community spirit in school.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Any savings made in education must be ring-fenced and reinvested in education. We don't fund education sufficiently today, so removing further funding should not even be on the table.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Devolved school management sounds like one headteacher for say three schools which seems unrealistic. Perhaps some of the money spent on EO's could be spent on delivering the curriculum rather than checking that the teachers are doing so would be an alternative route.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There are definitely ways to bring down costs in schools. Schools need to be able to access best value when purchasing and reduce what is wasted on inflated prices. Schools need to identify what kit they need and make sure each school has this as a starting point. From there, they could bid for money from a central budget to buy things over and above this or to replace broken materials. Bids would be backed up by the audit process to make sure schools have what they need.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Significant savings could be achieved but may have an impact on educational delivery, particularly concerns around using technology to deliver curriculum. Would be a shame to loose any face to face teaching but other resources such as cleaning and school meals could be outsourced	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	More support and resources is needed for schools in deprived areas and possibly less in more affluent areas. School is a refuge for a lot of children at the moment and to take away anything at this time will have a big impact.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As for greater use of technology? This is surely a joke? I have access to a suite of computers in the school I work in. Pupils in my classes struggle to access MS Teams and OneDrive as the WiFi in the school is so poor. The WiFi 'boosters' on the wall aren't even switched on ! The computers I speak of are between 6 and 10 years old. The software updates are leaving the ageing hardware behind. Our music technology software is out of date. In general, our school doesn't have nearly enough IT, and much of what we have is well out of date. Most pupils have IT at home which is way better than what we offer in school.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The antiquated way schools must spend their budget must change. The approved sellers are far too costly and do not give good value for money. 5 million seems like an awful lot to save from education when they are already struggling with budget cuts.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The DSM need to walk a day in the shoes of an already reduced service to see the impact of the cuts at ground level. Staff are doing the best that they can in very stretched circumstances.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Again - technology is great and has a place but actual real people who are 'hands on' is required more and more in schools. I volunteer regularly on school trips and the variety and needs and issues requiring support astounds me each time... more pupil support workers are going to be required to provide a safe and nurturing environment for our children.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This can only be acheived by technology and the West lothian Academy is central to that. It is sector leading but needs to be resourced and utilised in a way that increases collaboration between schools and provides a platform (that it has proven to be) for attainment to continue across schools on a sound financial basis. Savings for the WLA amount to millions over the last 7 years when compared to the inclass cost	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	We are also extremely short on available digital technology equipment as a school and even more so as a department. This has been raised several times with senior management as it is proving almost impossible to deliver our Music Technology qualifications with less equipment than is required to deliver the courses and give pupils the experience and opportunities that they deserve.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	All schools prioritise their devolved resources to meet the needs of the curriculum and needs within the school community.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	We are already stretch incredibly thin - any move to more digital MUST necessitate digital infrastructure improvements - a third of our school building has almost no internet access. We currently have very few PSW we cannot meet the needs of every learner and support inclusion with fewer. Data shows that there are more pupils with ASN in mainstream than ever - an uneducated populace will further serve to impact on future financial issues.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The only way savings can be made is by reducing the quality and quantity of the offer to the children. This will have a detrimental effect on wellbeing of pupils and staff. Any reduction of administrative support will push an ever increasing administrative burden onto Headteachers. Headteachers in West Lothian already report working longer hours than counterparts in other local authorities and already identify that more of their time is spent on functions previously covered by Central teams / other departments in West Lothian and by admin staff.; ; The only way budget savings of this kind could be found would be by reducing the days children are in school to 4 - adjusting the end of the school day by a 30 minute increase - ensuring that all RCCT and CLPL took place on a Friday and reducing support staff hours / admin staff hours accordingly	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Schools are currently required by regulation to provide 190 days of Education. A national debate on the future model of education provision, taking account of the future needs of society would be beneficial to ensure the future relevance and effectiveness of school education, as well as efficiency.
Modernising our council	1D Allocation of School Resources	Admin and PSW are already very poorly paid, therefore to increase the workload and reduce the number of teachers and business managers will lead to these groups of staff leaving and or the quality of these staff groups diminishing. Better training and career growth for both would pay dividends and a better rate of pay.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	School support staff provide good value for money in that their costs are comparatively low. Efficiencies in management roles create more significant savings.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Technology within schools needs to be improved and upgraded so all pupils have access to a device at all times during the day - schools technology budget does not allow for head teachers to invest in netbooks for each student making this impossible.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Proposing changes to allocations of resources is hopefully for the better good of the individual departments as it is not clear if the changes would be for the better good or cuts if the latter i would be very concerned at how teachers, technicians could continue delivering a practical based subject without a good injection of funds and deliver an effective service.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As a support staff employee within a school as a Science Technician, I have seen over 20 years of service a three person practical job become one and the volume of work increase . As technology changes the Science does too and our cuts within our budgets and procurement rules have resulted in less money to spend and equipment badly needing replaced and duplicated to modernise new courses, they may be tested and properly maintained year to year but the money is not available to buy new up to date equipment for the future children to come through secondary school and have a modern experience within Science.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Schools are not great at reaching out and working in partnership with each other or even with internal partners to make best use of resources. I think if this was done better large savings could be made.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I hope WLC will have really clear assessments of the current situation, and a clear idea of what success looks like BEFORE they undertake any of these cuts. It might be worth starting by deciding what schools are for. If they are only for exam assessed outcomes then moving to more online teaching makes sense. If they are about broadening life experiences, then make that clear publicly and fund the experiences and trips that families are struggling to make happen. Are we still trying to bridge the gap in educational attainment? What are the success figures for online learning for lower SIMD?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As the schools were one of the last areas of the public sector to fully reopen after Covid, there is a lot of work to be done. Maybe some detail would allow taxpayers to form a view of the plans,	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Staff in the early years are very over stretched and undervalued at the moment. There has been many changes to the EY, they are the starting point for our young people yet hours change to suit parents but not staff who have children. Nursery nurses covered by support staff which has effect on care/ education and quality of work. Parents are not utilising extra hours to work and it is not getting it right for every child. More and more children are entering the education system requiring support that is just not available.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Take away lollipop men/woman form traffic lights, place them where there are no lights/dangerous busy roads	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	My child is disabled and need a support worker to assist his needs as there are not enough disabled schools or places to give him what he needs, the school tries to give him what they can, but resources for disability are not always there nor the class types he would need so gaps are filled with what they have, they do try to provide something for him but it's not a specialist school, sometimes there are not enough support workers to assist his needs due to exams and I have to collect him early or he will have to sit in a room and not in a class. Please look at how disabled children are looked after in main stream schools if there are not enough specialists schools.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Can we outsource some teaching to the private sector of the health service? How are we using the excellent experience gained during Covid to teach at home, empowering parents and itinerant teachers (cf home health workers). Learn from other parts of the world where home schooling over the air is the norm eg in the Outback of Australia.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Budgets would be better spread across the service rather than some schools being able to provide different services to the children due to their working costs.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1D Allocation of School Resources	Each school should have funding for the pupils they have coming through their doors not by catchment - school must take pupils regardless of level of need but the funding may go to another school !!	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The Council would surely need to share an Impact Assessment proving that they were benefitting children's experiences and well- being before implementing cuts. This should involve decision makers making regular visits to their schools to experience the day to day realities children and staff are coping with and to properly consult with ALL service users, children included.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Concern at impact of children's education. Teachers should be focussed on classroom delivery and not admin. Concern that more children with additional needs will be in main stream education with teachers attention being further split. Review of school transport why are buses continuing to operate from polbeth to Parkhead park. This is a saving and not an essential service. Things like the council need to stop.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Removal of school transport out with statutory limits is a proposal as part of the current consultation exercise.
Modernising our council	1D Allocation of School Resources	Please ensure that resources are assigned to pupil support for mental health. The brains of our future need the right positive support especially when home life is challenging. We need to build resilience in children but to the point of realising that sometimes things wont be ok and that they are ok to feel challenged and ask for support. Without this foundationally any plans for school resource is not robust	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Again metrics in trial data must show this approach works first!	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Additional support staff are essential in schools and should be prioritised in any reshuffle	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	With regards to staffing there are still some support staff who have 52 week contracts who should be reviewed as they have little work during the summer and would make a saving.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Staff contracts will be kept under review.
Modernising our council	1D Allocation of School Resources	Nursery and nurture bases. Cups/plates glasses have all to be purchased as per policy for children in nursery and nurture base. Schools no longer allowed to purchase plastic sets. Increase wastage do not understand the rationale behind giving 3 and 4 year old glasses and plates to break. Then to be replaced by the school additional cost. This surely must be reviewed. You will streamline funding through DSM but schools still expected to follow policy. Expected to support struggling families. PEF funding is simply not the answer. Pupils not to lose out. Schools expected to do more with less. Priority should be given to education. Getting the basics right. Extra curricular activities should be under the control of the parents	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment, although they do not relate to the specific proposals being made.
Modernising our council	1D Allocation of School Resources	There are many teachers serving our community being treated like commodities already on rolling fixed term contracts with little job security. Teachers are our most valuable resource and deserve permanency. Offering dedicated professionals job security will have a positive impact on staff wellbeing, consistency for our service users and cost effective retention.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. The issue of permanent contracts for teachers is not directly relevant, however.
Modernising our council	1D Allocation of School Resources	Any changes in this area should be proven to have no detrimental impact on pupils or should not go ahead. It's essential we give our children the best start in life and this should be a top priority for the council.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	school and properties require to be closed and roles amalgamated with other schools in same areas	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	The staffing in schools is stretched at the moment so any changes to assist the few number of teaching and support staff would be beneficial. Third party providers may not always be the cheapest and best. Should look at in house catering and also in house maintenance	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Children should all be allocated the exact same device to do with school. And phones put in a box at start of lesson.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Rather than implementing further cuts to school resources, can savings be made from reducing the number of school buildings? Nobody wants their local school to close, granted, but surely its better to maximise the use of spare capacity to gain savings from property running costs etc rather than school resources which will inevitably impact on the quality of education provided to our children.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	There needs to be a greater collaboration between schools and council as the recent fiasco at armadale academy trip to Borneo proved and wasted money and disappointed the kids. If you can't afford things then don't offer them. Allow schools to decide what's best for them in terms of booking out their facilities, share facilities between schools.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Unfortunately it is not directly relevant to the proposal.
Modernising our council	1D Allocation of School Resources	I don't know if it falls in this box, but there needs to be consideration of wrap around care for children who have two working parents. For example in Calderwood, East Calder there is no after-school provision except one that is 1.1mile walk in all weather which really upsets my young child, so we can't use it. I've heard the Calderwood school can not be used as an after school location. There needs to be consideration of after school care as it's not possible for all parents to pick up their kids in the middle of a working day. Hopefully these services will be supported through a devolved model or the school could be allowed to charge a provider for the facilities and make money from the after school provision to benefit everyone. Or make after school care provision mandatory in some form	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. After school care is not directly relevant to this proposal.
Modernising our council	1D Allocation of School Resources	privatisation - go Labour! Can only be better i suppose then my nephew who just started 1st year and has had no Home Economics teacher at all but does get to watch videos at those periods although not about home economics'	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	unless its got significantly better since i was there school teaches nothing useful to society, especially diet, health, not drinking just because its legal, anti social behaviour (house parties are not acceptable to neighbours) and anti litter (its the wee (redacted) just left school and driving chucking (redacted) out of cars). techs ok till is goes down then what ?!	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Children at St Kents should be offered to play bagpipes as there are less and less pipers out there.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Instrumental music will continue to be supported at current levels, but expansion is not proposed.
Modernising our council	1D Allocation of School Resources	Sounds like a way for councillors' mates to rip off the west lothian taxpayer.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Children are suffering, teachers are not trained properly, 14 years old children don't understand analog wall clock. Basics of education are not met. LGBT, ALCOHOL, SEXUAL RELATIONS, DRUGS, change of gender are the main topics in school. Waste of money and time. Sorry to say all this, but Education in Scotland is in regressive mode, just to make our children stupid on purpose. That's my honest answer. Thanks for reading.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Maybe if the schools focused less on the kids who cause a scene and don't want to be there the others may benefit.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Please don't try and teach our kids remotely or through teams. It was unhelpful and kids need the interaction with teachers and other school staff. We will risk failing a generation of learners if we don't teach them to be socially aware in the real world. Don't rely on tech more than teachers.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	How about education system Scotland where once leaders world wide and that far far from the case infact I find the education system nothing short of robbery for our children's future.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Modernising our council	1D Allocation of School Resources	Concentrate on practical education not nonsense like the sex survey created by a (redacted)	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	As parent who had three teenagers coming through school during the pandemic I see the after mouth of what happened and what is to come. Two out of three with no positive outcome right now as the teachers and school were too busy supporting their staff	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	remove unnecessary administrative burdens on teaching staff, and posts within schools;	7. Modernising our council	1D Allocation of School Resources	This needs further clarification. Where exactly are you saving £5 million?	7. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	schools are the future.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Sounds poy	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Huge saving.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I know cuts have to be passed down but this is unbelievable. The UK and Scottish Govt should work together and forget indie2!!!	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Again just reminding you school achievement is rock bottom is west Lothian, secondary school league table is important	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	no undrestand this msg	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Students may feel less safe of unknown non-teaching staff	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	the politicisation of education must be halted, and education vastly improved. scottish kids are now thicko, and outperformed by third world.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Also would be very concerning for a member of staff about having their lessons recorded for malicious purposes by the children or adults and shared on social media sites without their consent. How can that be policed?! Can children's responses/work also be shared maliciously in this way also from the sessions?!	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Staff and pupils follow social media guidelines.
Modernising our council	1D Allocation of School Resources	Sorry again we have do not have much say as we are not in control of funding, the whole world is in a bit of a state due to Covid and mismanagement at local UK and Scottish Governments. Although we realise that cuts will be made, it is a very depressing read with cost of living, Covid Recovery and world events, Leaving EU etc. My answers will be mostly similar throughout this consultation as I would not like to make decisions as when it comes down to it, people will lose jobs. I believe that we have to support Economic Development and Employability, we need to try and invest!	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Same again here. For example West Calder High school, has a big roof, wind turbines again.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	If you can save five million through some simple fixes, who should you fire for not pointing it out years ago? More managers?	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	The comment does not include any positive ideas or suggestions.
Modernising our council	1D Allocation of School Resources	Kr***** (redacted)	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	All children should be treated equally this special bus and taxis for some is money wasted everyone should get on the same bus from the same schools. Parents who use cars when it is raining or snowing should either use own transport all the time or school transport not both. This is a waste of money and all these cars at schools are a safety risk. Exclusion zones around schools bus only areas.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. The consultation contains specific questions on school transport, but this question does not concern school transport.
Modernising our council	1D Allocation of School Resources	Failed in England with academics privately run bad idea	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. The proposal is not for privately run academies.
Modernising our council	1D Allocation of School Resources	Change the arrangements of Torphichen primary school - currently the children have free reign on structuring their day and are not actually "taught" - I feel my childs education is suffering as a result and lots of children in his class are now being offered additional support for learning as they are not progressing	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. It is not directly relevant to the proposal, however. Any issues with the education in a particular school should be raised with the Headteacher in the first instance.
Modernising our council	1D Allocation of School Resources	1. Sports and extra activities after school; 2. Educational trips; 3. Organizing Annual events.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	School parking at st Joseph's primary in Whitburn is terrible the teachers are getting verbal abuse from people that think it's ok to park in disabled spaces without a badge. Money should be spent on school patrols to enable people to park at a safer distance. They teachers don't deserve it	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Unfortunately it is not directly relevant to the proposal. Issues of school transport are addressed elsewhere in the consultation.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	The only way to save money is to reduce your salary and pensions, but how can you persuade the unions?	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council is committed to working with employees and trade unions in managing changes to its organisational structures and staffing requirements. The council will seek to achieve agreement to change through constructive and open dialogue.
Modernising our council	1D Allocation of School Resources	Also tighten up on those who qualify for school; Clothing Grant and Free School Meals... There are too many parents pretending they are single and live apart from their partner when they don't!!	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Benefits are determined by Scottish and UK Governments, including the qualification criteria for access to benefits.
Modernising our council	1D Allocation of School Resources	Do not touch Education. The councils only focus is exam results yet you seem to think you can still get high results with reduced support, staff and this constant obsession with digitising everything! Schools should be run by the national government and not local government as you have done a pretty awful job so far.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	There should also be more money coming for schools from UK government	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Modernising our council	1D Allocation of School Resources	The government in England doesnt give the Scottish government enough funds to pay for the education in scotland	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	But no detail of what is intended so difficult to comment	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	A significant saving within Education but very little detail of what this will mean for the educational experience of young people and those who deliver it?	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am a professional qualified individual and I have no idea what this means.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Please explain this in English how savings are proposed to be made, not management speak.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Seems to be a whole load of things wrapped up in a paragraph of text that doesn't actually say anything about the pupil experience or impact on outcomes for pupils.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	No idea what this would mean for the experience children and young people would receive. The proposal contains no information to allow me as a parent to comment in a meaningful way.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Again this description is too general to allow me to make informed comment.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Again, as there are no details here, it is difficult to provide substantive comments. As a general observation school resources in West Lothian seem to be at full stretch especially with the large number of new homes currently being built or at the planning stage. Intuitively, this would seem to call for an increase in educational resources rather than a reduction. Please, please do not cut back on the ability of school children to learn music, go on school trips, etc. The provision of support for those with additional educational needs and those brighter pupils who need more challenging work should not be cut back.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I do not understand what this means in practice and how this will affect me and my children and I have 2 masters degrees. Not sure how you expect most people to provide useful comments.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	It is impossible to comment on this without the detail of the proposals. What exactly does 'This may include utilising resources provided to deliver additional support in schools for core staffing requirements, greater use of technology to deliver the curriculum, and changes to administrative and pupil support staffing arrangements' mean?	9. The respondent made a comment on the survey question.	Details would be worked up if proposal agreed by elected members.
Modernising our council	1D Allocation of School Resources	This section makes me laugh as West Lothian Council spend millions on state of the art new schools while others are falling apart and resources are scarce and children suffer as a result. Allocation of funds is currently unfair.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	What an unambiguous statement. 'Utilising resources provided' means absolutely nothing. Much greater detail is needed to explain this. Technology cannot replace a teacher, it will be to the detriment of the education, social care and health of our children. Who will do school admin? Teachers? This will again have massively detrimental effect on the education provided. Devolved school management funding, meaning schools a manges but a business? It will be a disaster and again not conducive to education of our young people. 'Will enable the council to continue service provision' I think you will find you have a legal requirement to provide this service. I thought Scotland was meant it have one of the best education systems in the world. It is in crises at the moment and you want to strip it back flans destroy it further.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Not really sure what is being proposed here. Any proposal that reduces class time with their teachers or removes pupil support assistants from classes would be unacceptable.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	It is not clear what the proposals are or how they will benefit the pupils. Each school has it's own specific needs linked to the area they support and the pupils within that catchment. Support staff are essential and already thin on the ground, it is unclear how centralising will cut costs without cutting staff or asking them to spread themselves even thinner for the same low wage.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Also without support staff how are you intending to manage 1F where you reduce teacher contact but not pupils in school time. Without seeing a more detailed plan this reads like something which will negatively impact pupils with the greatest need for support, from the most disadvantaged backgrounds and those with additional support needs who struggle to engage with learning without support.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	All jargon! Absolutely zero detail or anything meaningful!	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I don't understand the details here, so can't comment	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	it is not clear from this description what is being proposed. I understand increasing use of technology as long as it is support rather than replace the teachers.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Once again, it would be useful to know the detail of these proposals. Successful learning is predicated on effective relationships. Moving away from people, may in some cases. challenge the relationships which currently exist to support learning.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Even as a retired teacher I haven't a clue what this means!!	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This statement is completely opaque	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	The proposal is also very vague and for the local population to fully understand how this is going to impact their children, there needs to be more information.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I think your only telling half the story id like to see the full manuscript to see what exactly your saying fully about what use really intend for school from a parent perspective I wouldn't agree till I see everything you have planned in front of me I do not trust the education system or government anymore use could say one thing and add on many more thats not disclosed	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Not enough detail to judge the impact this might have.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I don't know what this means.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Can't determine what this actually means as no detail given	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Don't fully understand the proposal	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	No enough info - does 'changes' mean cuts?	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Unable to make provide a constructive comment as there is no detail.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Without details if what this would actually involve it is Impossible to comment.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	How is the devolved school management budget already decided upon? Seems silly to ask for comments on changes when not setting out how it is different to current as well as the impact of what the saving would be?	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is very difficult to understand. I don't know if you are being deliberately obtuse.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Cannot comment as I don't understand what is being proposed.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I don't fully understand this part	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Impossible to comment on this without receiving further detail on the proposal.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	dont really know what this mean	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Is this really a consultation or just a tick box to say you have done one? Is anyone seriously meant to comment on the level of information supplied?	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	The format of this survey is poor and does not lend itself to true scrutiny of the proposals. The survey is badly designed and off putting to many given the large blurb of text under each heading - the language is in business speak which is essentially meaningless. There is a lack of clarity on the proposals and the reader is left to assume what the blurb is getting at. This survey should have been in plain English with examples of the proposals which would support greater engagement with the activity. ; ; There should be space for feedback on the methodology being used also - this has not been made available which adds to suspicion that the whole process is already decided, and course of action is already determined. The council and COSLA must do more to protect our communities and demand a fair settlement from the Scottish Government. This exercise highlights the political failure of the funding model and it will be the local community that suffers as a result. The end of the survey does not have a 'Finish' button, merely a 'Next'. Overall - very poor approach.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Are the opportunities for more efficient service delivery because of revision of school resources actually better described as cuts to funding? Does "utilising resources provided to deliver additional support in schools for core staffing requirements" mean we will have only money for basic class teaching but not support for learning and nurture? What will happen to the children who need more intensive input? Does "use of technology to deliver the curriculum" mean high quality remote learning? Does "changes to administrative and pupil support staffing arrangements" mean there will be fewer vital members of staff in school supporting the most vulnerable of our children? Does "continue service provision" mean keep the children off the streets for the duration of the school day and hope that is enough? What effect will these cuts have on our children's outcomes as measured by teenage pregnancy rates, involvement in the prison and probations services, alcohol and drug use, low mental health, self-harm and suicide?	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Would like more details about how this will look in practice. It appears some schools/areas do much better than others. Eg, some areas have fantastic new build schools with new resources, whilst other schools (of which my daughter is enrolled) being under a PPI system, are lucky to get a roof tile fixed and maintance is poor. How would greater use of technology make savings? - again more detail is needed to be able to comment.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I am not clear what is being proposed here? Does increased use of technology to deliver the curriculum mean children watching even more YouTube content in schools? If so, I do not support this. However, there may be more innovative ways of delivering content using technology which I may support. I don't think this consultation has been written in accessible language for the general public to understand.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Further explanation of the implications and intentions of "greater use of technology to deliver the curriculum" . What exactly does that entail?	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This doesn't make any sense. Please remove the jargon and ask again	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Unclear what this actually means in regards to staffing levels. The language used is not clear so this makes it very difficult to agree or disagree with the proposal. This is particularly concerning when it is about our children and their education. ; ;	9. The respondent made a comment on the survey question.	Thank you for your comment
Modernising our council	1D Allocation of School Resources	Your proposal does not explain the negative impact of this efficiency so it is difficult to determine if this is a good idea	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Confused on you can achieve this and save money.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	Insufficient information is provided on what the impact will feel like to staff and students for there to be sensible comments. I'm all for more efficiency, but often this is just a euphemism for cuts to provision which is then felt.	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Who could oppose 'more efficient service delivery but what does it mean? See my answer to 1A. The vast majority of people would have no idea what this means in practice	9. The respondent made a comment on the survey question.	Thank you for your comment
Modernising our council	1D Allocation of School Resources	Education, education, education. The Linlithgow and Linlithgow Bridge Community Council would have substantial reservations about anything the dilutes the quality of education in the County. The text above seems opaque in terms of what is actually means. Substantial engagement will be required with the community before any changes to education are made.	9. The respondent made a comment on the survey question.	Thank you for your comment.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Again, this is being worded to hide what it actually means. If you do not define the reduction in public service and quantify the loss of jobs, and you describe everything as efficiencies and continuing service provision, why are you consulting and asking these questions? why not just make the saving if it's clearly a good idea. There is no clear definition of the public service and the pros and cons of the savings. Also, if you have quantified the number at £5 million, this implies you have already identified 'efficiencies' and 'opportunities', you're not going to be exploring and identify opportunities if you've already done it? Honesty with the public is generally the best policy, and the one the public will respect.	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	The format of this survey is poor and does not lend itself to true scrutiny of the proposals. The survey is badly designed and off putting to many given the large blurb of text under each heading - the language is in business speak which is essentially meaningless. There is a lack of clarity on the proposals and the reader is left to assume what the blurb is getting at. This survey should have been in plain English with examples of the proposals which would support greater engagement with the activity.	9. The respondent made a comment on the survey question.	Thank you for your comment about the survey, the council will carefully consider all feedback and use it to review and improve our consultation approach.
Modernising our council	1D Allocation of School Resources	The lack of real facts and figures about what is going to change makes it a challenge to comment effectively. More information is required before any meaningful consultation can take place. We should be provided with a statement for each section and the option to agree, disagree or have no opinion. I would strongly urge the council to re-present this consultation in a more user friendly format.	9. The respondent made a comment on the survey question.	Thank you for your comment about the survey, the council will carefully consider all feedback and use it to review and improve our consultation approach.
Modernising our council	1D Allocation of School Resources	What does this even mean? You ask for our opinions but you write paragraphs that say absolutely nothing about what your proposals are. Any money saved by efficiencies in schools should be ploughed back into schools. Do not just look at what can be saved but what can be done. Taking money from education will only hurt us all in the future. Scrap any idea you can remove £5m from education. Make the efficiencies sure, but keep that money in there	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Certain themes seem to be recurring - cheaper efficient technology, 'realignment' of staff allocations and remit.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	This is hard to comment on as I don't fully understand what a devolved school management funding model looks and what does changes to administrative and pupil support staffing arrangements mean.; ; Using 3rd party providers is worrying when they are already stretched very thin and very under resourced.	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Sounds like bla bla bla to me basically cutting teaching asisstants by any chance	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	That's a large saving without great detail on how it will be achieved	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	As a resident of West Lothian I find the structure of this survey very misleading. It contains very broad sweeping statements which in no way provides any detail as to the impact that the proposals will have.; The administrative staff and pupil support staff in school have varied and numerous duties, any cut to this would have a severe impact on the day to day running of the school community for pupils, parents/carers and school staff. ; Does greater use of technology to deliver the curriculum mean that teachers are going to have a class in front of them and pupils on line? How can this be managed? The pandemic highlighted how important it is for pupils to have a GTCs registered teacher in the room with them, not only for the attainment of the pupils but also their emotional well being. Schools are so much more than a place of learning, they provide support for our pupils in every aspect of their lives, which considering the current economic climate, teacher - pupil relationships are even more crucial than ever. ;	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Insufficient detail to make meaningful comment	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Much more detail required	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	First the text is nothing but blown up blah blah. Please provide concrete details and examples. What do these models look like compared to now snd where and how exactly are you saving money. You should not save money on schools, education and services. Those children are our future.	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Clarity is needed what school resources or third party providers you are proposing to cut.	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Unable to comment again due to lack of available information. As a parent with two school age young people I am really concerned about lack of consultation. I only found out about this through the council website which I feel doesn't show a willingness of the council to meaningfully engage with the public.	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	As a resident I do not understand what this will mean to the schools my grandchildren attend due to the vague and broad terms used in this consultation document.	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	What does this mean for kid's education? Too little detail here. More information required.	9. The respondent made a comment on the survey question.	Thank you for your comment.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1D Allocation of School Resources	Don't understand how using third-party providers will provide maintained/improved quality, or indeed long term savings, in a school setting. Insufficient detail on impact to make any assessment. Additional moneys should be coming from UK following budget statement.	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Without details it is difficult to comment. I'm all for efficiencies, but it depends how detrimental it would be to services.	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Wow didn't quite understand the question there but yes education to a large degree is important read write arithmetic are basics however music /foreign language /cooking skills etc I personally feel is based on interest and aptitude: like to go back to the basics and if a individual shows flair give them a platform = academic or natural affinity11 plus or grammar schools?	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	So what does this actually mean ? Stop using big words & just say exactly where the cuts are getting made & how will they actually affect school/kids.	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	Schools already appear very stretched in terms of staffing and resources, it's unclear from this statement the cost of the 3rd party review, why it can't be done internally and who the devolved funding will be managed by? Is it per school? Who is responsible for the management of funds?	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	The terminology in the above statement seems quite opaque to me and it is not really clear what it mean in real terms. Firstly, I think that it should be spelled out much more transparently in order for us to make a proper judgment on the proposals. However, I have hopefully understood the thrust.; ; The amount of £5 million is quite frightening. We need more staffing in schools, not less, in order to meet the targets consistently being set. Adequate staffing in schools is vital to making progress, especially as schools now deal with so many other issues, apart from the education of our children. With depleted staffing 'getting it right for every child' will become more and more difficult.	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	No idea what this means as you have not actually said what you will do. Significant amount of jargon. Plain English required. ; ; I do not support any cuts to education services. The schools are already on their knees.	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	I don't know what this actually means - what are you taking away	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	You haven't outlined how you plan to do this, therefore not giving West Lothian residents the chance to support/oppose your plans, or how it's going to affect them, through child care when they are at work.	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	It is difficult to comprehend what is being proposed here. ; I can read one item as using funding designed to deliver on "additional support" to pay for "core" activities and would be interested to learn what additional activities would be dropped as a consequence of this. ; Other proposals are very confusing E.g. re third parties is the intention to reduce use to deliver cost savings or increase use to find efficiency. This should be explained with examples of third parties and/or services under consideration.	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1D Allocation of School Resources	This is all jargon, no real examples of what this actually means in practice. I cannot comment fully on this as I don't know what you are planning to do.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1D Allocation of School Resources	I need further clarification on exactly what these proposals are before I can commit to supporting them. Our young people have borne the brunt of the negative impact of the pandemic restrictions over the past couple of years and I am determined that their education provision should not be further impacted.; This is the issue that most residents have also raised concerns about, but I feel I can't comment further until I know exactly what the proposals are.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Would not personally affect me but again happy with the cost savings if efficient and inclusive.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree school clothing grants should be kept but you need to do more to ensure everyone entitled is accessing it.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It is right to review breakfast clubs as schools aren't there to provide childcare. If the free lunch offer is more than the SG funding is provided for then yes it should be reviewed but there needs to be some discretion to accommodate families who don't have much but are over the thresholds that might be in place.; Agree school clothing grants should be kept but you need to do more to ensure everyone entitled is accessing it.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think the school hubs and breakfast clubs also child care is a great way to help out in the cost of living and will help alot of families out the schools do a good job with this and good it's continuing	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Education should be taking a share of the cuts. Overly protected by politicians at expense of many other vital services.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Musical instrument provision is a hobby and should not be made universally available and is a service where savings could be made.	1. The respondent advised that they agree with the proposal.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Yes these are a govt initiatives and should be fully funded by them	1. The respondent advised that they agree with the proposal.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is fantastic, especially in these uncertain times where money is tight . Parents will be reassured their children will be fed an have good quality school uniforms.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I support free school meals and widening this if possible - the mere thought of kids going to school hungry in one of the richest countries in the world is unbearable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Ensure instrument lessons are costed and charged appropriately	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	All areas listed are important and continued provision within budget is positive	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This should be continued	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These things should continue to be free. All of them are important to the successful outcome for pupils.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Clothing allowances, I get the idea of this but not everyone needs this and can be unfair to people who are really needing it but are refused, keeping it at the lower minimum is a good idea, enough is enough something has to give and to keep someone in a position to educate I would rather we cut the budget for clothing	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	See previous comment - not all parents need this and it should go back to being means tested instead of rolled out to all... absolutely not needed and a total waste of money!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	seems a sensible approach, although would be cautious at what impact this is likely to have for those in low-income families who are likely to make use of these services particularly in light of the cost of living impacts	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Make such provision targeted and means tested	1. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	We rely on breakfast club to be able to make our working hours. By all means make it a paid service if you must. But you will lose income from higher rate taxpayers (and therefore full council tax payers) if you remove breakfast clubs.	1. The respondent advised that they agree with the proposal.	The proposal does not intend to introduce charging for breakfast clubs.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Reduce the level of school clothing grants to what is funded by the government - they provide what's needed. Stop wasting money showing off. It's fully costed by the government - don't go over on any of them.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Scottish Government should be providing funds specifically for this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Essential for low income families and students for a start in life, as long as standards are improved or maintained	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Yes to clothing grants where needed but no to free school meals unless on benefits or in vulnerable category	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	End ALL duplication with Scottish Government and voluntary sector including on holiday activities and school clothing school budget.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It is vital that the council continues to support free school meals, breakfast clubs and clothing grants. Instrumental music tuition is a discretionary service and should only be continued if it is fully funded by parents, otherwise it should not be a priority for the council.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Whilst this is essential to ensure pupils have access to meals and breakfast clubs, it is my experience that parents use this provision as a 'babysitting' service with little impact.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	West Lothian provides the help required with free school meals/ breakfast clubs and this should not be considered for any cuts. In the circumstances that families face themselves in now this is possibly the best chance some children have to be fed in a day, meaning able to concentrate better on schoolwork as not continually hungry.	1. The respondent advised that they agree with the proposal.	This proposal will continue to provide these services in line with Scottish Government funding models.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The benefits given to all parents should be enough for them to provide adequately for their children. A packed lunch can cost very little. The public can't keep being asked to fund these issues which in most cases come about because of poor budgeting skills or the refusal to prioritise their spending. Having worked as a housing officer it's an eye opener where money gets squandered.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Means testing for free breakfast club, good idea.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I would agree with this for some kids free school meal is not required. This is the same with breakfast club	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I hope we do not lose free breakfast clubs- these are essential	1. The respondent advised that they agree with the proposal.	Breakfast clubs would be retained in line with Scottish Government funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree - we need to ensure that everyone entitled to this receives it though	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast club - was seen in the primary school where I worked as cover for working parents/free childcare provision rather than their child needing food in the morning.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals - at the primary school where I worked, a tiny number of children needed FSM's and yet many took it.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Good but I'm torn as to why those with significant incomes get these benefits.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree - if the Scottish Government doesn't adequately fund this, the council should not be subsidising it.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	this was unsustainable and requires to be more targeted	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The free instrumental services are fantastic! This should be well maintained as the children will get benefits from all aspect of the social, emotional, cognitive, spiritual and physical wellbeing. A fantastic piece of news!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Services such as school clothing banks and other charities should assist!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals for families who can afford to pay is a waste of resources but appreciate this is Government decision	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Very important	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Sorry do not agree with School clothing grants as these parents are already getting enough funds from the Government.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As long as the children receive the same entitlement how it is delivered should be as efficient as possible	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This seems reasonable and it is great that WLC have been able to provide extra in recent years. Again it is important that there is a way that less fortunate children can be identified easily and still given free meals/milk/access to music and so on.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Many parents would not object to paying for breakfast clubs or lunches when they are in a position to afford it. At the moment services are provided to all for free in all areas which encourages a higher uptake where the free services are not needed and reduces the available funding from those that do need the support.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	agree with this!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Some areas will require more free school meals than others. Not all children need them. There isn't the same stigma attached to having free school meals now & no one knows who has one because schools are cash free now. Only give to families that actually need them.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	My child will not eat the school meals, so she gets a packed lunch, I do worry about the level of food waste with FSM (I'm aware in the grand scheme of things this probably doesn't matter very much!). Removing stigma around FSM is fantastic, provision at the most inclusive level should continue where possible.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	School music tuition impacts a minimal amount of young people. Music is provided in the core curriculum and can also be provided externally by charities. I would welcome a review of this. Music tuition in my opinion should be cut before any other areas above.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I agree with means tested school food provision.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think this has always been a good idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I feel the breakfast club helps working parents and also children who are not having sufficient meals at home. The clothing grant is good however schools are very good at promoting second hand and my childrens school have an amazing "free shop" where the children and collect uniforms. I would be happy for the clothing grant to be reduced.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This could be a potential saving.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Sounds as though the budget is being reduced so the service will suffer slightly. However, if it is using the funding from the Scottish Government, then fine.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Nice	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	We require some these for some families but not all , there are plenty who would happily pay for breakfast club xnd school meals etc and don't require it. Thus saving money there .	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals for all is not equity, it is equality. Free school meals and clothing grants, should be for those in need only.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is well received. Children should not become the victims of budget cuts.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	After reading the above, I will continue to trust your decisions in the areas I have no experience in , but thank you for the opportunity to co-operate !	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Given circumstances maintaining grants at current levels may be the best option.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	review arrangements for free school lunches with central government, can parents discretionally contribute towards the 'free meals'.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	WITH THE ADDITIONAL BENEFITS BEING PROVIDED BY THE SCOTTISH GOVERNMENT WHY IS THERE STILL A NEED TO PROVIDE FREE SCHOOL MEALS, BREAKFAST OR SCHOOL UNIFORMS. THIS SHOULD BE CANCELLED COMPLETELY.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Whilst I understand the desire to be careful around providing free school meals to some not all kids. However, as a middle-income earner I think it is wrong to provide help for families like myself instead of increasing help to those more vulnerable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I can see the reasoning in school meals and breakfast clubs being free to all children but feel a lot of parents could afford to pay for this and that the money could be better used for resources in schools.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	There currently is no music at my child's school already; Agree that free meals could be means tested	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I agree that these vital services should continue for children and young people.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I agree. So long as no child is unable to access food, heating or education.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	scottish government wants these things but cannot fund them - align with what they offer and challenge them to fund this rather than the embassy and independence nonsense.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	A reduction of school clothing grants to the Scottish Government level would be ok ; More publicity for other school uniform options - charities, school supply, recycling were uniform too small can be returned to school and given to other children.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree with this. Although, free school meals for all children shouldn't be supplied. Only for those who need it most	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Alignment with Scottish Govt funding levels is sensible approach	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	agree to an extent. I am not sure what the difference is between funding levels and council spend though to know what this actually means.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If these services continue at a lower cost, it makes sense.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Services should be provided to meet the needs of the local area and this cannot be achieved with a blanket policy.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	music should be axed if savings need to be made.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I agree with this and keeping all clothing grants for children also the provisions of free school meals, milk, breakfast club etc	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I agree that these provisions are extremely important and should be maintained.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These grants have been out for years I got free meals and clothing grants for my children when they were at school times are getting harder for one parent family and the working family's	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	There is very little detail in the above statement. If you're able to save this money without impacting on pupils having access to breakfasts, lunches and clothing for school then I support it.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Maintenance of free meals .	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Recent funding from the council has been extremely helpful. Uniform grants etc are really good. School meals not so great.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This would be alright as long as the funding given to the Scottish government by Westminster was adequate enough to cover the continuation of these services at no additional cost to Scotland.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is a vital resource that needs serious consideration. Food and clothing a must... music not. Its a shame but if it is between eating and instruments then food it must be	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I do agree that this area needs to be considered however, in the current climate, many middle income families are really struggling and they are the ones who seem to be offered the least support. This needs to be seriously considered or we may end up depriving the Children who need this the most.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The free hot lunches that are provided to every child in theory is a good idea e.g no child should go hungry, however, the enormous amount of waste in both the schools and nursery does not justify the money this costs. It is a sorry sight to see this amount of food being thrown away daily.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Just need to ensure that no children who rely on breakfast clubs to provide food are not disadvantaged.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agreed. Would also suggest a used uniform drive, as many school uniforms are outgrown but still in very good condition, so having something in place to collect uniforms to distribute to those most in need would be good and save items being thrown away.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This sounds a sensible and sustainable approach to match government funding	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree with this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Doesn't look like we will be/should be making any savings here from the words being used?; I agree with the sentiments, and so we should be not declaring any savings in this area.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This should be cut back. Uniforms are not that expensive	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Supporting this 100%. Anything to help out those most in need should be so without persecution.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think it is extremely important to maintain and even expand free schools meals, however I am firm believer if parents are financially able to make a contribution to music provision, they should.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I agree the school clothing grants should remain.	1. The respondent advised that they agree with the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Adhere to the government guidelines only.	1. The respondent advised that they agree with the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Great initiative.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Your comment would indicate WL is providing about Scottish Government levels. If this is the case then I would agree to align.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree. All the above are vital.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	free for all, not viable in current climate, I'm sure those who can pay, would rather that than staff/services being cut else were.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The Council should not be aiming to save money on areas where they have already received direct provision related funding by the Scottish Government and where the Council is being used solely as the conduit for this support. Otherwise I would be encouraging central Government to top slice this money from Council budgets and allocate the money directly to families requiring this support.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I'm not convinced it should be on councils to supply clothing. Meals should be retained but costs of music training should also not be met	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	good idea but i dont see how this is saving money? Unless provided by a seperate budget through scottish government and not through education budget set by local authorities.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The Scottish Government bear responsibility for the levels of these benefits and should he adhered to.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	All free provision in schools should be equal to the Scottish Govt position and not increased by the Council, this makes it fairer all round and would be beneficial if it generates a saving.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Unification of these services if it reduces red tape and bureaucracy would be beneficial	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If you think you can do this fairly and without disruption then go for it.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Reviewing the school clothing grants and free school meals is essential as the current benefits system ensures recipients receive sufficient financial support to clothe and feed their children without other financial support through the grant system	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As long as the level provided is enough thats ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Happy for this change to go ahead.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think this is a good and crucial move especially now that families are suffering with increased energy prices and cost of living.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	agree with this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Pleased to hear this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If the service is still being delivered to the same standard, any saving would be beneficial	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I agree that help should still be available for those that need it.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	in what way is instrumental music vital to anyone - it is perceived to be vital to the 2% of pupils who are entitled enough to think it is vital and to the counsellors who are rubbing your back and making you think it is vital too- it is absolutely not. Free schools meals is vital. Uniform is vital. Reducing homelessness is vital. Reducing drug deaths is vital. playing a violin badly- is not	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These services are needed, but music tuition fees could be paid by parents and delivered outside of school hours.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It is important that help for families/school pupils who are struggling continues. I would agree with the above, however, much depends on Scottish Government and I am sorry to say their priorities are questionable at times.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think aligning these benefits should be considered. Often there are lunches thrown around the schools particularly on a Friday afternoon, which is very wasteful. I don't agree with the music provision, I would class this as an extra curricular activity and like Karate, Sports clubs etc parents don't expect the schools to pick up the cost for these other activities so why music?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These provisions are there to support for the right reasons, however, in practice, often fails in areas of socio-economic deprivation. This is mainly due to lack of support at home to engage in musical practise, forgetting to bring instruments to school - alternative has been for school to take up this role, which has limited success. Breakfast clubs have changed their offer and this has resulted in lack of update/engagement with this service.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As long as the most vulnerable children do not suffer from this as many rely on these services, especially the ones regarding food	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Music is an important part of education and development and should always be protected	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This saving makes no sense, if you are aligning with SG provision why is there such a high cost in the first place? Is it because of the extra payments over and above what SG already provide, if so then fine, other councils don't pay more, why are we when the cost of this has a detrimental effect on other services? this money would be better used in schools for ALL children not just those from low income families.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	School meals are integral to some families and therefore these families should be supported. However not all families require this additional support so while it is a good service I am not convinced it is essential for all.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Yes we do not all need free school meals or subsidized breakfast and music tuition it should be means tested.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As long as it improves core services.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is positive for our children and young people that are from lower income households.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This should have been done years ago. Those who are able to pay should be then perhaps that money could have been used more efficiently and stopped the £5 million cuts to education now! Families who need support should definitely receive this, however I am more than able to pay for my children's lunches but they have been getting it free for years!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This seems a fair basis for the council to determine resources available to these areas given the level of savings required. Reasonable the councils should base its budget on the monies that the Scottish Government have provided for policies it has agreed as new commitments that council's need to provide.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	as many families have low incomes I think this will be well received	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Why wait. Just get on with it now	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free instrumental lessons should remain for all pupils. Free school meals and breakfast clubs should not be above the level paid by the Scottish government, parents receive welfare benefits to assist them in feeding their children. School clothing grant should be lowered to Scottish government paid level or abolished, parents who do not work are given welfare benefits every fortnight/month (and some who work receive top up benefits) to enable them to meet their children's needs. Alternatively, abolish the need for school uniform and let children wear their own clothes, which would negate the need for any school clothing benefits	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Could be a good thing, especially with the cost of living.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Totally agree this can affect pupils when there is a class/monetary divide.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree -	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree with this measure	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I agree with this proposal.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Support	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Can only be a good thing, especially in the current economic climate.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Sounds great.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Good idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	No issues	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think this is fair.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Reasonable proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Great news!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree, sensible move	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is acceptable and makes sense	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I would just like to comment that I don't envy the Council having to make these cuts and they will not be popular. It would be worse if Scotland was Independent!!! I cannot believe the state of the country just now under Scottish Government. If they would concentrate on the day job!!! I am very depressed with this consultation. If cuts are needed then so be it. IO know WLC are looking aheads but what a mess!!!!	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Reluctantly support	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree with this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Makes sense.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think this is a fantastic idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Sounds like a reasonable approach.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This makes sense for budget cuts.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Accepted	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Maintaining clothing grant levels in line with government recommendations seems reasonable to remove "post code" lottery of payments.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Strip this back to the minimum levels rather than go above and beyond.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Reduce grants to align with other councils please	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Glad that clothing grant level being maintained.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This would be benefit many and be a wonderful proposal to take forward.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think school clothing grants should be brought inline with the average amount covered by other councils. The grants aren't fairly distributed. Why pay more than other councils when you need to save money? It doesn't benefit everyone equally like free school meals for all kids do.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Food poverty is getting worse and I also think meals being provided is more important than uniform. The statement doesn't say what Scottish gov funding levels mean for these services. I know breakfast club is not free in Edin and other councils so maybe bringing it in line is a fair way to reduce costs.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think music tuition being free at the moment means poorer families are not unfairly disadvantaged and it would be a shame for that to end but if cost savings need to be made it's definitely a nice to have rather than a necessity for the council and parents.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As a working parent, I would be willing to pay for breakfast club & school meals to help funding go elsewhere to help education/families who are entitled to free school meals/clothing.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Fully support this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The council must do what is required to align itself with government requirements however I think Holyrood needs to reconsider what are the priorities for education and what outcomes we, as a society, actually need. The route we are taking at the moment is going to result in a decline in the literacy and numeracy levels attained by our children to the detriment of the country.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree with this but how do you check that school clothing grants are actually spent on that, Would advertising provisions of which schools have gently worn uniforms help. this should be done in conjunction with schools	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If you need savings pay the level at the statutory level. These are hard decisions for hard times but they have to be made	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree this should be realigned to funding levels.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree meals should continue to be provided	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Very good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agreed.	1. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Ok yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I'm favour of this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Great	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Yes agree, very good initiative.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree, no further comment	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This makes sense. I fully support the change.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Very happy with this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	the government should maintain the free provision in line with the Scottish government levels	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Sounds like a good idea but we need to make sure the less fortunate children and those living in poverty do not go without a meal at school if the parents cannot provide them with one either.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This make sense as the Scottish Government are providing a level of funding for those provisions.	1. The respondent advised that they agree with the proposal.	Thank you for your comment
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	i would agree that if there are processes where exisiting funding and commitments are not affected drastically while saving money can only be a positive	1. The respondent advised that they agree with the proposal.	Thank you for your comment.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This proposal should have been employed years ago. It's appalling just how much tax payer's money has been squandered throughout the decades.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Continuing free school meals is good	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree - the council should only spend what it receives from the Scottish Government for these services - not a penny more	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Emphasis on service provision in relation to Scottish Government expectations nationally.	1. The respondent advised that they agree with the proposal.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This makes sense - SG policies should only be implemented where SG provide the funding in the current financial context	1. The respondent advised that they agree with the proposal.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree, if the Scottish Government want to deliver these priorities they need to fund councils accordingly. The council would never move to universal provision given the constrained resources. The Scottish Government are overcommitting and underfunding and other council services can't bear the pain of that any longer. This isnt local prioritisation.	1. The respondent advised that they agree with the proposal.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Think this makes sense , can't overfund this. Scottish government need to fund this if want more	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think this is good as there are many children who received free school meals where parents can afford to pay towards this cost.	1. The respondent advised that they agree with the proposal.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Excellent. Meals, breakfast and music are essential. I was delighted to hear music cover is now reinstated, although My daughters were in the years in which we were forced to pay a lot of money for this service which was a disgrace and I'm sure many students had to drop music lessons because families could not afford it. Good to hear it will be covered again for families moving forward.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If services are maintained on a more efficient way, then fine. We do not see much musical instrument / lessons at the moment. Would be good if breakfast club started at 8am.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree with this. It is the responsibility of the Scottish Government to properly fund school meals, breakfast clubs and IMS. In particular, the council should only spend on IMS what is given in funding by the Scottish Government. ; I agree school clothing grants should be maintained at the current level.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I agree with this proposal access should be for people who are on the poverty line	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I agree provided childrens parents/guardians should be means tested....no child should go without.....there has to be limits	1. The respondent advised that they agree with the proposal.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is a positive of Scottish government continues to recognise the importance of providing sustenance for body and mind.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Council should only provide if funded by Scottish Government and/or paid for by user	1. The respondent advised that they agree with the proposal.	Thank you for your comment.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As long as those most in need don't lose out.	1. The respondent advised that they agree with the proposal.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Scottish Gov should be paying for it	1. The respondent advised that they agree with the proposal.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If kids require healthy food and clothing this is not an issue but there are people in West Lothian on benefits who are set for life and people out working for less than benefits. Maybe start cookery classes for adults. Plenty cheap food but unless they know how to cook it the cycle will continue to cost the council money. People in desperate situations are different and the uniform idea is good.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast clubs are essential for the positive start to the day a lot of our pupils need in order to settle into school and do well there. No real concerns over school meal/ instrument/ clothing grant alignment	1. The respondent advised that they agree with the proposal.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I agree with the music provision at Scot Gov funding levels.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast clubs are great but are not required by every family. The resources should be targeted at those children from low income families only.;	1. The respondent advised that they agree with the proposal.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I would support this being considered, however if it impacts those most at need in our community it would be completely unacceptable	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I do not agree with exceeding any levels set by Government.. if government are making promises to cloud cloth and feed children whilst at the same time cutting council budgets, then it's up to government to provide the money. If they don't provide enough they should be asked for more. If they don't and are breaking thier electoral promises then it should be made public. If they then punish the council by cutting ther budget at a more severe level then this should be made public..	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree to keeping free services the same as it is with Scottish Government funding	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I agree with the school meals all day long! ; Free music lessons! Where is that going to help someone run a house a pay their bills; How about free courses! Cooking skills. How to do a washing how to make beds! How to budget for a weekly shop! How about introducing the theory test for senior students and support them in that ! Partner up with the AA to introduce lessons for kids ! It's more realistic than free music lessons! That's for a minority! Nearly everyone wants or needs to drive! Teach them about drugs and the pit falls the dangers and addiction! Teach them to deal with their ACES! Prepare them for the big bad world we now live in!	1. The respondent advised that they agree with the proposal.	Thank you for your comments. The Council is committed to providing both instrumental music tuition and appropriate life skills.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Why not?	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	as far as there are no cuts in this thats good.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Seems reasonable but I think school uniform costs should be minimised. There is no place for blazers or other such archaic clothing in rainy Scotland.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Fully agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is a great idea if the Scottish government funds do not cover the costs that should be highlighted to the public and the government. More funds should be provided to WLC if needed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	There needs to be a review	1. The respondent advised that they agree with the proposal.	This is what is proposed, following analysis of consultation responses.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	For people who are not working or are in problem is good..	1. The respondent advised that they agree with the proposal.	Thank you for your response.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Review	1. The respondent advised that they agree with the proposal.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Yes, keep school clothing grants the same and try not to impact free breakfast's because that would affect children in poverty the most.	1. The respondent advised that they agree with the proposal.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It is vital we keep these provisions	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Keeping free school music tuition;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, but specific funding will now be provided by the Scottish Government.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I don't understand why you would reduce the funding for this vital service, reduce the amount of monkeys in suits , but no you wouldn't do that just take food n clothes away from those in need shocking	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	To be honest WLC has already more or less destroyed the instrumental music provision.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Yes this is the most important as everyone is struggling with money just now so myself personally rely on the school clothing grants and free hot meals for my children	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Benefits to the less well off should not be a race to the bottom to other councils poor levels.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The nurture of our schoolchildren should be a key priority. They are the future, no child should not be unable to concentrate because they are hungry in this day and age,	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It is so disgusting that we as a nation still have to feed and cloth our kids so they can attend school. If we had a system that truly looked after it's people they should never have to go cap in hand. Schools funds should not be cut.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It's absolutely imperative that the school clothing grant, free school meals to all pupils not just for P1-P5. I am a single parent who has a child in P6 and have recently taken residence of my 3 year old niece. I work full time and I cannot afford to pay the £1.96 per day for a school meal. So this results in packed lunches. Which adds more onto my shopping bill and sometimes we struggle.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Cut nearly a million pounds while inflation races away, but improve provision. Fiction.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I am against anything that impacts on young people - they are the most impacted by poverty and there is nothing they can do it their age - we must keep services that support our most vulnerable and enable them to have the best chances in life.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Does this mean that less children would qualify for free school meals at a point in time where families are already struggling to pay for basics and parents are having to make decisions between heating and eating?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Removing funded music provision will be a disaster for West Lothian and the council have tried before - it's not the right thing to do	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Do not adjust this part of budget as i feel and fear it will most definitely be needed by more children family over coming years	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Vital services should be maintained.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Support in these areas is very important.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Music is so important to the development of the child and should not be cut.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Align??? School services should not be cut.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Align = reduce given there will be a saving. Not acceptable. The council should be supporting our poorest and most vulnerable children regardless of cost. There must be a real terms increase in support.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	There is a vast difference between deliver and provide. As described above it can only be assumed services like music will be cut....a wrong move....if parents have to give more financial support towards this then the elitism WLC have tried to eradicate for years will be born again. Pupils will have their experience of the arts restricted or removed. So much for developing the 'whole child'.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Surely clothing grants need to be increased, to match the increased cost of clothing?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again the end user, ie, us will take the hit for your cuts	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Needs more money put into school meals as a lot of secondary school pupils are feeling the cost of living and are spending all their money at break times because they are so hungry and then not being able to have lunch.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These are important things to keep because families rely on this help	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Pupils from deprived homes have a difficult life, having a decent school uniform and a school meal may be the only constant in their lives, don't think this is an area where any savings should be made.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Should definitely be free school meals for all	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It seems that the proposal is to provide less school meals, breakfast clubs and instrumental music provision than currently otherwise how could substantial savings be made? In my view, this would be a lamentable, retrograde step.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It is not possible to support this - a reduction in supports for children and young people during a cost-of-living crisis is unacceptable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council will continue to offer customers choice in the way that they access services, including telephone, face-to-face, email and contacts via the council website. We understand that some customers may find digital services challenging and there are alternatives in place to allow them to continue to access council services in other ways. The council must though find ways to reduce operating costs and make our processes more efficient and this will involve supporting more customers to move to digital services and making better use of technology.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I'd be anxious that in our current cost of living crisis more and more families are struggling and children will go hungry and miss out. I don't think all school meals should be free but you have to be in significant poverty to qualify under previous calculations - why not charge a small cost and make half the savings. Please don't undervalue mental well-being by cutting music again!!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school music - very important. Allows non academic children to learn another skill. It also has many educational benefits.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast clubs are a valuable way of ensuring children can start the day well and should be encouraged.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast clubs are VITAL for many families I support via my job, no cuts.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Children should not suffer under council cuts. Children and families are struggling enough as it is and this could be detrimental to many families.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	"align free school meal, breakfast club and instrumental music provision with Scottish Government funding levels". What does this actually mean?!? No child should ever go to school hungry and any persons attempt to reduce the funding for this should hang their head in shame. Too many teachers cry when asked about the kids in their schools and tell tales about some of whom have no jackets for the winter and the only meal is eaten at school.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Instrumental music tuition needs to remain free for our families. Music is one of the best tools for closing attainment gap. These young musicians contribute so much to community, schools and council!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals and breakfast club are an absolute lifeline for some families in our school community. Our children might not be getting hot or healthy meals at home therefore rely heavily on being well fed at school. Please do not cut food provisions. We do not have the school funds to be able to feed our children when they are hungry if this gets cut.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again, I think making big cuts in areas that support children is something to be done with extreme caution. Music provision is so minimal as it is and school meals are probably being a god send to some families during this cost of living crisis.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The children are suffering across the country with the austerity they need these services.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Proposal is not clear? Disguising the end impact on pupils. As above, any potentially negative impacts on school children/education should be avoided.	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Considering the socio economic status of the majority of students in our area (WL) I think it disgraceful the council would pat themselves on the back for cutting programs that are literally the difference between a child going hungry or a child not having uniform. Disgusting.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is no time to make savings on school meals. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals are essential. Music classes should be still provided free of charge	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These services in schools should be increased, not reduced. Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I'm not sure what this even means. Some children only have one hot meal a day, in school. This would add huge financial pressure to already struggling families. Inflation will mean families receiving, and some who are not eligible for, benefits will be living far below the poverty line. In cold houses with not enough food. The last thing we should do is stop feeding children who are hungry. Also the instruction service allows for musical enrichment, so important for long-term mental health.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The labour-Tory council coalition has some serious questions to answer if this goes ahead.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	What does this mean in alignment with Scottish funding. Your argument would be strengthened if you gave some actual figures to substantiate your points instead of generalised smoke and mirrors comments. Misleading. Surely, there is a very good reason that West Lothian has offered more in the past, because there is a significant need. In the middle of an economic crisis with families being forced into economical precarious positions and the council wants to take away more. Shameful.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As a single dad of 1, and working in a local distribution centre as a forklift driver, i would like to say that help never reach me and I have to pay for everything, others are spending time with children, not working and live in a council housing, that is question to those people and believe me, I am struggling, safety shoes is my daily foot wear. Thanks.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Data and research clearly shows the link between a poor diet and health and educational achievements. We must focus on providing free, nutritious meals within a budget but without cutting costs	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Don't care about music as only posh families who take this up. Free school meals being taken away is outrageous- at a time like this? Who will feed them? How will they learn if they aren't fed? Have you read the about cost of the school day? Do some work on auditing the canteens and processes before you remove the right to food. Outsource or tender contracts more efficiently to make your savings don't add to already disadvantaged kids difficulties.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These services are needed now more than ever	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It would be extremely regrettable should instrumental provision become chargeable or music opportunities for young people decreased.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Children certainly benefit from free school meals and help with uniform. Sometimes that is the only hot meal they receive as times are really hard just now. Help with uniforms also makes them the same as every other pupil so they are not embarrassed. Not everyone needs help but a lot certainly benefits from it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As a parent of a child who benefits from free musical tuition we could not afford to offer her such an opportunity at this time.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free provisions should be targeted at those who need it and not provided to all. While I appreciate not paying for my daughter's school meals, I am in the fortunate position of being able to afford to pay, and should. The provision of education services, including music, should be funded for all and should be a core part of the curriculum.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free breakfast club is an essential service in many schools in West Lothian. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Musical tuition should be provided for all children, not the elite whose parents can afford private tuition.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Just don't make any cuts to these services , they're life savers to many	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Instrumental tuition was removed then re-instated - please let it continue.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	At this time there should be no cuts to lunch and breakfast club provision our kids are hungry and for many it is their only hot food.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Do not reduce it not clothing grants.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Our region has a long and proud tradition of musical and in particular brass tuition that has led to world class professionals as well as many talented amateurs this should not be reduced by going to the minimum levels.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	In times like this with the cost of living, this would be of a massive disadvantage to our learners in WLC through cutting the budget for vital services such as free school meals and breakfast club. If a child is unable to have access to a nutritional meal, it makes their access to education unavailable as their needs are not being met. Additionally, cuts to music provision would be detrimental to many learners who find a passion within this area and may be disengaged in other aspects of the curriculum.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These are all important services that should be maintained.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	In the current economic climate I find it morally repugnant that you would chose to make cuts that effect children and some of our most vulnerable families.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These are vital services that should not be reduced. You could save money by not providing free lunches to management who are paid well enough and don't need a free meal daily.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again, unsure how this would impact my costs. For example the free breakfast club is vital to allow me to continue to work. Any extra costs in this area would be a massive issue for myself and other parents.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is very worrying indeed. This suggests that we are currently going beyond relative funding levels from Scot Gov and that there is room to pare back our current provision. The last time WL introduced charging for the Instrumental Music Service, scores upon scores of children handed back their musical instruments - sometimes doing so in tears. With the negative impact of Covid, combined with the introduction of charges (which surely flies in the face of an ethos of equity and inclusion?), the number of pupils opting to study music in the senior phase slumped. This will ultimately have an effect on school attainment - with 21 out of 23 of our Higher cohort last year achieving an A pass. Our strong musical heritage in West Lothian has been built up over many years. It has been hard won - and has taken much work and dedication to grow and preserve it. All of this can be wrecked in a trice - but could take a generation to recover if it is damaged. Instrumental music staff provide an invaluable contribution to pupils, both to pupils who are sitting National Qualifications and to those sitting no exams. The service contributes much to school ethos, is inclusive, and provides self-esteem and a sense of achievement to some pupils who may not be high academic achievers.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Keep free school meals	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Keep free school meals	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Disagree, as above, educational is absolutely vital and we should be supporting it above all else	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	West Lothian have a proud history of going above-and-beyond the minimum requirements as laid out from Scottish Government in terms of universal offerings as well as a rich local history regarding instrumental music. Any proposals that would impact on either universal provisions or on the delivery of the high-quality instrumental music service are unacceptable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	West Lothian has a proud history of going above-and-beyond the minimum requirements as laid out from Scottish Government in terms of universal offerings, as well as a rich local history regarding instrumental music. Any proposals that would impact on either universal provisions or on the delivery of the high-quality instrumental music service are unacceptable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	West Lothian have a proud history of going above-and-beyond the minimum requirements as laid out from Scottish Government in terms of universal offerings as well as a rich local history regarding instrumental music. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It has been great to see how innovative WLC has been with this provision and it would be so sad to see a U turn with this. Especially music provision	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Every child in all schools, Primary and Academy must obtain free school meal as the increase of cost of living.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Universal Free School Meals is the responsibility of the Scottish Government.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	890k of cuts with the same service. It looks too good to be true, and I am afraid it will result in cuts of a service that help a lot of children	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	So in a climate where more people are struggling to heat their own homes you want to cut some provisions that stop young and vulnerable people from starving. Churches are offering to give the Council access to their buildings to help with keeping people warm, Offering them food and you want to go on record and cut these vital services. WLC should be proud of what they provide and continue with this policy.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The free school meals is a must in the current economic climate. The meals kids get at school could be all that some kids get now given how hard even those who were considered comfortably wealthy will now be struggling to pay for everything	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals and breakfast club are a fantastic service and totally needed.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The instrumental music provision I have personal experience of, my son was part of 3 of the instrumental orchestras in West Lothian and went on to be a member of Edinburgh Youth Orchestra and gained some amazing life experiences playing in venues in Glasgow, Aberdeen and the fringe in Edinburgh. This was only possible due to the provision of free instrumental lessons. I also campaigned alongside others a few years ago when they were looking to abolish this provision and make it a fee paying service, all children deserve to expand their talent regardless of their families financial situation.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Children and parents are struggling with cost of living. More is actually needed, not less. This would have disastrous consequences for our kids.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Please do not cut instrumental music provision. It provides children with another outlet for their energies, especially if they have other educational issues.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It is critical that the council continues to fund free school meals, breakfast clubs and music provision. This is so important due to the increase in the cost of living. The prices of groceries has increased as has the cost of energy and fuel. Everyone is struggling at the moment and children should not be left cold and hungry. The continuation of school clothing grants all really helps.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I feel that these free services are vital for our children and young people	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The provision of instrumental music tuition is vital...there's no way I could have afforded to let my son try trumpet for the year without the government funding. It's such an important thing to be able to let all pupils have a go if they want to-not just the wealthier ones.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Yes, with a decrease in parental finances our children will suffer. I fee; these services should continue to meet pupil needs and give them the best start in life.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This would have a huge impact on their wellbeing and learning and further increase the poverty gap.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This will harm those who cannot afford childcare and allow them to get out to work. It will harm those in a time when people are struggling with paying their energy bills/ mortgage/ rent and will put families under undue stress. Children do not learn well in this circumstance and the gap between the haves and have-nots will increase.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Potentially limiting this important service to only FSM children will have a huge impact on children and families wellbeing. There are already immense pressures on families in the current climate and this will only heighten the stress, increasing the poverty gap even further.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Potentially limiting this important service to only FSM children will have a huge impact on children and their wellbeing. There are already immense pressures on families in the current climate and this will only heighten the stress, creating a poverty gap.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Limiting those entitled to free school meals and breakfast clubs at a time where families are already experiencing financial pressures will lead to an increased poverty gap. Families are already having to chose between heating and eating and schools are seeing an increase in children coming to school without snacks or suitable lunches.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Potentially reducing the threshold will have a significant effect on children and families wellbeing. There are already immense pressures on families in the current climate and this will only heighten the stress and poverty gap.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If this results in a reduction in availability, then this is not an avenue that should be explored - the financial saving in the short-term is more than outweighed by the negative impact on our young learners both now and in the future.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	No money should be cut from school budgets! More money should be allowed to schools and less to bonuses for higher management within the council.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Also, with the cost of living crisis the demand for breakfast clubs etc will surely increase and these areas should be for investment rather than budget savings.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	What does this mean for instrumental music? With the amount of money being suggested saved in this area, but demand increasing for instrumental music this seems like it might mean less provision? Also, with the cost of living crisis the demand for breakfast clubs etc will surely increase and these areas should be for investment rather than budget savings.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Keeping these services are essential	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	All children should be given the best possible start in life. Continued free school meals and clothing grants are key to ensuring this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I'm not convinced that's going to save money	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals and school clothing budgets will be essential for supporting families moving forward, when the cost of living is increasing so rapidly	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It is essential to keep all of these services and not cut funding	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast clubs are a vital resource and should not be cut especially given the current financial climate and the amount of young people living in poverty in WL. Cuts to instrumental music tuition will result in music only being accessible to the rich. This cannot happen. Music is an important part of our culture and heritage, build essential skills in young people and must be protected.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These are vital to so many people and shouldn't be cut	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Further cuts to an already struggling and under performing education department are indefensible.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free Instrumental music tuition cannot go! When charges were introduced for this a few years back, it completely wiped out our instrumental pupils. Our catchment area is of a very mixed demographic and this led to a very unequitable situation where many pupils that wanted to learn an instrument, could not. This obviously then impacted on our uptake at senior level and hindered the progression into further education in music completely. I would be honestly disgusted if there were to be charges brought in for this again and will always advocate for my pupils and equity and equality in their education opportunities.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals and breakfast clubs are a lifeline to many families especially during the cost-of-living crisis. I'm assuming Scottish Government funding levels represents a cut to the service currently provided and that's simply not acceptable. Hungry children cannot learn. We need to make sure all our young people are provided with the nutritious meals they need to allow them to concentrate and fulfil their learning potential.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	West Lothian has a proud history of providing music tuition. This would also be a cut to a service which has had so much trauma already over the last years. Learning to play an instrument is beneficial on many fronts including with mental health and wellbeing and increasing learning potential in young people.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	In terms of the 'closing the gap' agenda I believe it will be devastating to cut these services. In light of the ongoing financial crisis happening around us it seems unbelievable that another attack on the least fortunate of our children could be considered. We all know our families are currently facing some of the most challenging financial times in memory. The way things look there will be many working families who are extremely stretched financially. The expansion of free meals has been one of the most successful innovations recently - we know our children are regularly receiving good, healthy food - and so do their parents.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This proposal does not lead to a significant saving of money for the council but could have hug implications for families already struggling with the cost of living at the moment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Food is a human right. We should not be considering any cuts to providing what meals we can to children and young people. In this economic crisis, it would be good to remember that it's not just families on benefits who are struggling but also working families. Anything helps.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Music and the Arts are a type of intelligence, don't take away the opportunity for young people to excel in an area they feel happiest in. We need all sorts of experts in this world, music should not just be for the well-off or those that can afford it. We should embrace those children who show intelligence in music and art, not penalise them.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This should stay in place to help with the cost of feeding and clothing kids for school as it is costly	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I would be concerned that ALL West Lothian's young people would miss out on the opportunity to experience music/instrumental provision. West Lothian has an excellent reputation in this field which should be allowed to continue.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	No. These services are essential and we cannot try to make "savings" on pupils hungry stomachs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	There are already no piano or singing teachers in the council. The instrumental staff that are employed are stretched as it is with some visiting as many as 10 different schools and STILL not every pupil has the opportunity to learn an instrument.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	West Lothian prides itself on the delivery of breakfast clubs and instrumental music provision. Cutting these to bring them in line to Government levels would be detrimental to staff and more importantly pupils.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If the council is proposing to cur anything that helps the most disadvantaged in the community it is obviously a poor idea.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The school meal provision and school clothing provision should stay the same.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Please don't cut the instrumental music service. Add to what the government are funding and create a fabulous service that as many students can access as possible!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The loss of instrumental provision would make this hard to ever access for so many families.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	At our primary school, there were only 3 instruments available. They all went to children from advantaged backgrounds. It was unclear what the criteria for being chosen was. My daughter missed out.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again these services should not be minimised especially in the current climate.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These are needed in every way to help children and parents do not take any of these away	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As a teacher, I can see the rich and varied experiences instrumental music provision gives our young people, including those from the most deprived backgrounds. It is a travesty that instrumental music provision could be considered for cuts. The Council should not underestimate the strength of feeling from pupils, parents and teachers alike when it comes to instrumental music provision in the authority.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	West Lothian Council has a long and proud history of instrumental music provision, going above and beyond the Scottish Government levels. I benefited from this myself as a pupil at a West Lothian Council school, through involvement in school and county orchestras, even going on a trip to Germany.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I would like to see breakfast clubs maintained at current level, huge benefit to kids getting settled into school environment before going to class as well as obvious benefits to those who need food too.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As someone who has 3 children & currently on benefits the help given is a godsend & I hope the assistance continues.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree we need to keep the clothing grants and other funding.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Reduce the school clothing grant to be online with other councils	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	There should be no cutbacks on any of these services	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	West Lothian have a proud history of going above-and-beyond the minimum requirements as laid out from Scottish Government in terms of universal offerings as well as a rich local history regarding instrumental music. Any proposals that would impact on either universal provisions or on the delivery of the high-quality instrumental music service are unacceptable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Given cost of living crisis trimming the provision of free school meals, breakfast clubs and music provision seem especially bleak and counter productive to stated council aims.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	You are not clear at all what you mean by 'aligning to Scottish government funding'. The inference is that you will be cutting free meal provision. A mistake in a council that desperately needs it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This should be reduced not all children need this provision should only be made available to those in need for free school meals and breakfast clubs	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I feel strongly that all pupils should be given access to a free school meal and breakfast club. Music tuition should be free for those who are selected.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I feel there is space for cuts with regards to provision of lunches. I am in the position where I can afford to provide lunch for my children, some people are not and lunch provision should be provided to them.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Music provision in schools is also an important service that will have a knock on generationally with the numbers of children growing up engaged with music being drastically reduced.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast clubs and free school meals ensure that children who are at risk of not getting regular meals are fed. It is a vital service and these children should not be penalised by the councils need to save money.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The uptake of free school meals and breakfast provision is very high in the school that I work in being in an area of multiple deprivation. I think if some of the families were for example to pay for breakfast this would impact on some of the most disadvantaged families.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The arts need to be supported in schools. Music should be part of the curriculum...its so important ...some children are not book learners ...May excel at other creative lessons such as music etc. Without music being taught there would be no choirs or school orchestras or bands	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	For many children, the free school meal served in school is the only hot meal they have in a day. In the current economic crisis, many families rely on support with meals and uniform as the cost of living rises.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The way you have played about with Instrumental Music Provision in the last few years, it's surprising anyone takes it up. Sounds like more cuts. Very poor.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I want all these services to remain the same or get more budget.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Given the figure quoted, this appears to be a swathing cost cutting measure, without any targeting whatsoever, unless I'm very much mistaken.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These are crude service cuts which the Council should shun. It is chicanery to propose to "continue to deliver these vital services" while stripping out nearly £1m. There is no honest statement here of what will be cut and who will lose. I write as a pensioner who will not be directly affected, but if this cannot be a meaningful consultation if the impact of the cut is not described in plain terms.	2. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I find this very scary. Some young people have no food at home and rely on the amount of nutritional support offered by West Lothian.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Does align mean a reduction!! This is a necessary provision and should not be reduced.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I assume the word "align" is code for REDUCE.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Many kids rely on free school meals and breakfast clubs. This cannot be allowed to happen. This hits the most vulnerable kids in Scotland. Is that what Holyrood wants ?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As a local authority, our young people benefit greatly from current levels of provision in these areas. Surely, we can't be advocating a change which is not an improvement. Moving to the lowest common denominator is not progress.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Retain this provision	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I believe that scaling back on free school provisions, when the Scottish government have promised free school meals for all children, is unacceptable. In a time when there are more people falling in to poverty than ever and harder times to come, failing to deliver on these promises is simply immoral.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If it hadn't been for the free music provision, guitar lessons, I wouldn't have been able to afford them. I noted that (in Linlithgow) only the middle class kids got the expensive instruments but that's fine. No one asks for someone to play the trumpet at a party.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These essential services for the most vulnerable children must be protected. Children cannot control the finances of their parents and therefore should not be subject to cuts	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals are vital to the equity of children, it is imperative this support remains at current levels or is expanded further	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	do not cut these vital services. so many kids rely on. if we dont supportbour kids with free musical tuition and instruments today then we are going to struggle to fill our orchestras tomorrow. ; once again. do not cut any school budgets.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Not sure any savings here would be good news for our children, children shouldn't feel isolated or different if they have free meals.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again it sounds like you want to cut food from children. This is a bad idea	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again, this sounds like it's the most vulnerable that are being targeted, breakfast clubs are vitally important to kids and parents. Instrumental tuition should be means tested.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	School should be free, instrumental music included. It is morally wrong to charge for this. Free school meals and breakfast clubs provide a vital function for many pupils it is their only hot meals in a week. The council should consider their moral obligations at a time of increased household costs when looking to reduce this area.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These provisions should not be restricted further and should be offered to all those in need.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again, these are real terms cuts which would negatively impact many. It would move music lessons out of reach of many of our pupils whose parents cant afford them.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Music (instrument)teaching is essential and beneficial for us as a society.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	You are already behind on the delivery of free school meals, this should've been in place for P1 to P7 long ago. For some children this is likely to be there only decent hot meal of the day, you will be even more a disgrace than you already are if you take this away.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These are essential services which need to continue! I am sure there will be people who can pay, who would be willing to pay rather lose or see these services cut.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Disgusting taking free meals and breakfast clubs away from the most vulnerable in society whose families are already struggling in this financial crisis. This would put children in danger of being hungry at school and would put huge financial pressure on families. Really shocked that under equity the council feel this is a cost cutting option. We are not closing the attainment gap by doing this to children in West Lothian.music tuition is so important and should not only be for those that can afford it. Music is an expressive art and is part of the curriculum not an add on if you can afford to pay for it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Music provision is taught by qualified teachers and provides the opportunity for children to flourish and excel. Removal of this opportunity profoundly impacts the wellbeing, education and development of children and the arts in Scotland.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This would have a negative impact on the quality of music provision, with the biggest impact on those of least advantage but does seem reasonable considering the saving that needs to be made.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Punish the most vulnerable children in society for fault that should be laid at the doors of the wealthy? Need more be said?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Music is part of the curriculum and therefore should be free. Learning to swim is a life skill and should also be free. Reading for pleasure - all school kids should have access to their local library - visits by library bus!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again, we know this decision makes things worse for people. How on earth can anybody make a decision like this? But there's no money. Why is there never any pushback? This is an absolute disaster and anybody who pretends otherwise is a charlatan. I do really feel for those who are having to make these decisions. I live in WL, I have a young son in school here, and I teach here. I honestly despair at what is happening.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If clothing grant payment amounts matched the minimum amounts set by the Scottish Government i.e. £120 primary and £150 secondary then a saving could be made. It should not always be a contest between local authorities as to who is paying the highest. If needed the amount given to each school to run their clothing store could be increased allowing schools to support the most needy.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These are vital and essential services, and should be preserved	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Why is music provision lumped in here? The offer of free school music tuition should be provided to give children the opportunity to experience and develop their skills. Not all parents are able to provide these kind of opportunities and as an education establishment that is our role to offer a wide experience of the curriculum. Music specialist are a must to provide this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again - hitting the most vulnerable again - the children. Some children don't have breakfast or a hot meal as their parents can't afford it!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I am confused by this. Do West Lothian council currently offer more provision than the government funds? Please do not remove/reduce provisions of food and funding for clothing.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I don't see how any savings could be made in these services in the current climate when costs of food, clothing and resources are set to increase again.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Children from vulnerable families will not be given the opportunity to participate in music. It will lead to a 2 tier system whereby only those who can afford can access.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I Hope that instrumental funding will continue as it has made a huge, positive difference to so many kids who would never be able to access it if charges were reintroduced	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The current economic climate is extremely precarious. I strongly support free school meals and breakfast clubs. Families and young people are going to suffer with the cuts.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Any reduction in school funding for music provision will decimate the music in west lothian which is only just starting to show small signs of recovery post covid and the previous music funding fiasco.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Too many families are struggling with the cost of living at present so these services within schools are a priority and much needed provision. Staffing essential for these services. Investment not reductions required.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Just means poorer children will not have access to music provision.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These are vital services that cannot be dropped.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Young people thrive in West Lothian due to the extended support they receive from this, taking this away to be more in line with the minimum would cause more students to slip through the net of disparity. This meaning that more students are left without the support they need due to parents/carers not being able to 'fit into a box'	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Please continue to provide those facilities as there are always a significant portion of the population in Scotland that depends on it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This needs to be protected.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Cutting costs for the needy mmmmmmm	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Pupils who require free provisions should get it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	School meals must be maintained. .	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	breakfast clubs must be maintained.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	clothing grants must be maintained.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals are more important now than ever before.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	breakfast club are more important now than ever before.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	school clothing grants are more important now than ever before.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Reduce all	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Any cuts are deeply disappointing in this area.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is a retrograde step	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	kids lose out again	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	There should be no change here	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Unacceptable!!!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This cannot be cut.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	No	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Unclear why this is not already the case	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	IM not happy with this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Instrumental music tuition and the provision of free breakfasts etc are an essential for some pupils. Many pupils live just beyond the income amount that qualifies them for these services. This would result in pupils attending school having not had any breakfast or access to a hot meal at all.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	It is intended to keep both provisions and fund these in line with Scottish Government funding models.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Instrumental music tuition allows pupils to build self esteem and skills that would not be available to them otherwise.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If the musical tuition returns to being charged for I think you are then denying this opportunity to many children, families can't always afford the £300ish annual charge. Music tuition should remain free to all- music is surely part of the curriculum.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Realignment sounds like fewer and I am opposed to any cuts	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	We have already had the fiasco of you asking people to pay for instrumental and it caused a huge problem. The instrumental departments in West Lothian used to be something to be proud of and again this is something else you have destroyed. There is now not enough pupils who play instruments to run bands etc.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Many rely on free school meal entitlement and breakfast clubs. Some families may be above the FME bracket but only just above it, meaning that a loss of these provisions would cause many problems for families, at a time where the cost of living crisis is affecting the majority of families.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Instrumental music should remain free as this is a great facility for pupils to develop outside Cfe. There is a great team in WLC already who work on this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Maintain existing levels where possible, but also ensure students with diet conditions can access these services.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I disagree, free provision of services to school age children should be maintained as an investment in West Lothians future particularly as the crunch on family finances will mean that these services are even more appreciated by children who may otherwise go hungry	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I do not think there should be any further reduction in music instrumental tuition. This has been proved to be beneficial to young people's education and the opportunities should be enhanced and not reduced.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think more money than they're allocated now.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Musical tuition should be free for all	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast clubs and after school clubs help working parents in fulltime or part time positions which in turn helps build our economy. To stop this would leave a lot of parents paying over the odds for childcare and resulting in more unemployment and benefits. These need to be supported more	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Our schools are struggling enough already, they cannot take any more cuts! Our kids deserve much better state schooling than they currently get! The gap between state and independant schools is widening and it simply is not fair. It's not our kids fault the country is in tatters, but if we don't arm them with a decent education then how are they going to be the change that fixes this mess!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Children need clothes and food, i would NOT support this cut.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Instrumental provision was previously under threat with the indication that pupils would not receive this as part of their tuition and a fee would be introduced. This massively undermines a child's learning and growth potential and detracts from their learning experiences and future skills and career aspirations.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	IF THIS IS NOT BROKEN DONT FIX IT.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is fantastic that this is a priority and when we start making cuts on this then the gap widens and the most deprived children suffer most although everyone suffers. There is so much talent from West Lothian and this is something which should be capitalised on and celebrated. I don't think we are regarded as a really 'cultured' area where the arts and talent are thriving and I think this needs to be embedded in the curriculum more with real life, relatable examples and successes.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The provision should rise to match inflation levels, otherwise it is an effective cut.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	We cannot go any cheaper on school food. At present what the children get at lunch time (first hand experience) is shocking. The quality of food supplied by the contractors is poor and seems to be heading to mainly vegetarian which the children are not eating.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	School meals are produced in line with legislation. The new legislation limits what we can offer and the frequency which has made it very difficult to provide a wide and varied menu.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Disagree. Do not cut funding to education.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again, this proposal hits the most vulnerable and this reads like a political game between the local authority and the Scottish Government. Considering this relates to the most vulnerable children, this is not a good look for any local authority and merely adds misery onto struggling families to prove a point.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Important for poor er families	2. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I do not support any cuts to these services.	2. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Don't think anything should change with free school meals / grants . Especially with cost of living crisis, money is tight even in a 2 parent working household.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision of free school meals and breakfast clubs would continue in line with agreed national funding models.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Sorry again we have do not have much say as we are not in control of funding, the whole world is in a bit of a state due to Covid and mismanagement at local UK and Scottish Governments. Although we realise that cuts will be made, it is a very depressing read with cost of living, Covid Recovery and world events, Leaving EU etc. My answers will be mostly similar throughout this consultation as I would not like to make decisions as when it comes down to it, people will lose jobs. I believe that we have to support Economic Development and Employability, we need to try and invest!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Spot on	2. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is terrible news, we are in for a rough time	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Do not do this. Keep everything at the current levels. West Lothian have an extensive history of producing excellent musicians. You quite happily use them to show off (60th anniversary concert recently) cut anything for IMS and you would be called, quite rightly, hypocrites.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Find cuts elsewhere!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I as a parent really rely on school clothing grants	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These things are seen as 'extras' but for many young people they are vital. West Lothian has a long tradition of excellence in instrumental music provision. Additional cuts will decimate it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again, this is abhorrent. There are more families accessing food banks now than ever. The already feeble free school meal provision that is in place- with an extremely low means threshold, means that children of single parents and low income families are unable to buy lunch or can only afford water. Teachers in schools are buying stock of breakfast bars/crisps/water/tights/school uniform etc and keeping this aside for kids who do not have the money or luxury of receiving free school meals.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, funded from a different source.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	That sounds okay as they are vital services, particularly for our most vulnerable children!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	There should be no cuts to this area given the cost of living crisis where many pupils in West Lothian struggle to access opportunities to improve their final positive destination. Many schools already run a food bank to support struggling families outside of school hours never mind during the school day. Instrumental tuition is a staple in the West Lothian school area with hundreds of pupils taking up the opportunity for free instrumental tuition which has enabled them to join the West Lothian school brass band which has seen decades of success in Scotland and in Europe, touring to play concerts and then go on to attend the royal conservatoire in glasgow or play as part of NYBBS and played in tours around the world. The thought of withdrawing that service to pupils in West Lothian is outrageous.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Every child in West Lothian should be entitled to free meals.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	We need these to support families.	2. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	All school pupils should receive a free school meal regard of family income. Many pupils do not access their fsm due to stigmatisation, opening this to everyone would remove the barriers.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Also must stay in place to nurture young people and their needs.	2. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again, saddening to think that the council had money for talking bins but ensuring children have food is not a greater priority.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Any free provisions should be maintained especially as a result of covid. In particular instrumental music tuition which has such benefits on health and well-being. Any other measure would be counterproductive.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again the most vulnerable of our children will be affected and the children who don't seem to be in need, but in fact are will lose out. We should be investing our money in future generations.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The charging for musical instruments changed the musical opportunities in school meaning loads of kids gave up, houses not low earners still struggled to afford an instrument.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The IMS has already seen cuts in previous years (Cutting all Guitar Teachers in (2016) from the service, in favour of Wind and Brass - is clearly appalling and bordering on discrimination). There is very little provision for Guitar Teachers in schools yet the demand in school to learn this instrument is greater than Wind and Brass.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast Clubs are important - supporting low income families and those who are working. Free school meals - equally important as many children are living in poverty.;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I feel breakfast club should still be open to everyone and should not be only if you are getting certain benefits. The one that needs to be considered is that the cost of the uniforms might go up with the cost of living and should really be looked at wether there is a way of making uniforms cheaper to buy.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	.; ; We are concerned that changes to resourcing will have a negative impact on teaching and; learning.;	2. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	There are families in West lothian that can not afford to feed their children, breakfast club and free school meals are essential.	2. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I also do not support a reduction in music lessons. This should be an option for any child who wants it not just those who can afford to pay;	2. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Please do not penalise our children. If you are going to offer meals, it needs to be good quality, nutritious and filling food.; ; I do not support any part of this proposal	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Children need to eat. The current levels keep children fed so that they can learn. Hungry kids cannot learn. ; ; Music provision is pathetic and lacking now. To reduce what little is offered would be to tell children that the arts don't matter (which, due to lack of music and visual art education as it is happens to already be the message...)	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I trust that those who have been receiving free school meals, breakfast clubs & clothing grants will continue to do so.; Music tuition etc is already limited and I would not like to see further cuts as arts education is incredibly important for mental health (my children continuing their instrument tuition over teams during lockdown was a real life and sanity saver some days) and is something I wish more children had access to.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Think there should be no school branded uniforms instead should be the same for every school. ; Children should receive a lunch and this should be for primary and high school it could be the only hot meal they get.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	1E Would oppose any reduction in School Meals budget and Clothing grants	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, but funded from an alternative source,

Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The funding provided by the Scottish government for Instrumental Music lessons is less than half of the actual cost of running the service. The IMS budget and staffing has been cut at every budget review over the past two decades. Reducing the budget to this level will mean half of the staff would not be able to be employed. If there is half the number of staff how can each pupil/school receive an acceptable amount of time for their lesson? Is the council going to resort to removing some disciplines as it has tried previously? I have been a Music Instructor with West Lothian Council for over thirty years and have seen it continuously devalued but still called on to provide young musicians for public concerts such as the recent event to celebrate Livingston's 60th anniversary.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These support provisions should be made available at no charge to all who would benefit from them.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	are we seriously thinking about taking away food form kids? that didn't go well for Thatcher, it wont work for you either.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Keep free school meals for children, that should be a much higher priority than music.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Maintain current levels of funding	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, but funded from an alternative source,

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This needs to be kept	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, but funded from an alternative source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agreed, it is vital that children at least get a free meal at school especially with so many families struggling to feed their children at home.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Strongly disagree that any savings should be made at the expense of the lower income families in our communities.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	School meals and uniform grants to deserving student must not be disturbed in this crisis time where inflation is already touching its peaks	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	People are in poverty unable to feed themselves or heat their homes. School meals are a lifeline for many. To take this away is barbaric!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think free school meals and instrumental music provision should remain in place	2. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Instrumental music tuition, school bands and other provisions by the instrumental music service are already limited, and I would oppose any further cuts to their existence. This is due to the importance of arts education for mental health, and due to equity. As a parent of an S6 pupil who has been given the opportunity to play an instrument, have weekly lessons, be part of school bands and WL bands, I can not emphasize enough how important this has been to their enjoyment of school, confidence and learning perseverance and skills as well as nurturing their wellbeing.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	How could there be a cost saving. This can only mean that less families will receive help putting more into poverty than already is.. More funding is needed not less.	2. Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	You cannot cut the support for those who most need it. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Unsure of the changes that would flow from the "alignment" of free school meals, breakfast clubs and instrument music provision, with Scottish Government funding levels. Without this knowledge, not sure how significant the changes would be or the impact this will have on the West Lothian students. But an £890K saving is a significant goal to achieve.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	So by aligning to Sc Govt funding does that mean cut if you are looking to save £890k?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Is this just for parents on benefits as there are more working poor more than ever?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Provision will continue at present, but specific funding will now be provided by the Scottish Government.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If a saving of £890,000 is to be made do we assume that the current provision is in excess of Scottish Government funding levels? If so, how much in excess, who would be impacted, would this be across all schools, what options would parents have to pay for this themselves in order to retain current levels etc etc etc. Another "consultation" question that does not provide any detailed information to allow meaningful engagement.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Sorry where is the saving here?????	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	What does alignment mean, obviously a cut in spending or quality of provision as you are making savings. You may still provide these services as you say, but not as good as before I epuld imagine.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Where are the savings to be made, exactly?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Not sure what this means	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	There are too many young people going hungry, especially with the cost of living crisis and with the financial hit people have had with the pandemic. I think school meals should be free for everyone in accordance with UNCRC 'the right to food' which is a basic requirement. Currently this is not being met and more and more young people are being forced into food insecurity.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Access to free school meals will continue in line with national funding
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Shrug. Not really clear what you want me to comment on here	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	"The council would continue to deliver these vital services for our children and young people". So how do you achieve £890000 saving?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This sounds like a reduction without you quite saying that - it must be to save money. Who would it impact? You acknowledge the services are vital so who's losing out?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Slightly more detail. Align? Euphemism for what if leading to almost a £1m saving.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I fail to understand this section which talks about realignment and maintaining thus saving £890,000 in simple language there will be cuts.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If you are going to maintain the same levels, how are you going to do that with less money? Again, stretched to breaking, there are no more corners to cut.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	How would this save money if nothings changing?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This needs to be very carefully handled, especially in light of the cost of living crisis - too many pupils may just fail to meet the threshold for help and thus be consigned to education qnd health poverty.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Don't understand how this saves money?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If you are aiming to maintain this provision, how and where is the proposed saving made?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Unsure how this would result in a saving if the current levels are maintained, however, I would worry about the impact on vulnerable young people and families if free school meals and breakfast club provision was reduced	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Not sure I understand this. If these areas will continue to be funded, how are savings being made? Are we going to cut the number of grants etc? If so, then we cannot possibly continue to fund them to the same level or am I misunderstanding this?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Not sure what the Council is doing which is above SG funding levels?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	this is difficult to comment on, as it is very vague. If it means no increase from what is currently paid by the area, and that is where the savings come from, then that sounds fair. However, as so many are already struggling, to make any cuts on this provision would widen the gap and put many children and families further into poverty.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Would this mean that there would be a reduction in the number of children who receive free breakfast club when families are already struggling and having to choose between heating or eating?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Unclear from this proposal who would be directly impacted by these changes. How many pupils would lose free meal/music lessons?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Ditto	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Will West Lothian Council propose to reduce the cost of clothing grants to make the saving?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Neutral; Insufficient information on current and proposed provision to make any informed feedback	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	What does this mean? That you are going to reduce the numbers available? Many families are struggling to survive now and taking away this or amending it to less provision will put families and therefore children into further poverty.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree that these are important, though concerned that there is a saving to be made - does this mean a cut to some of the current provision down to the minimum required?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	What does "align" mean?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Does this mean that WLC won't go above whatever funds are assigned from Scottish Government? Do they at present? This isn't clear from the statement.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	are less pupils expected? how is this saving achieved?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As above, you plan to throw the most at need pupils under the bus to save £890k?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	No comments other than a question on provision of "free" benefits such as school meals. Are all children entitled to free school meals - there are substantial numbers of parents who could (and would) pay for school meals - is this part of the review?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Not sure if means testings is applied here but i would rather a child that needed the school meals had it over a child that did not. I have no school age children yet so cannot really respond.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Not clear how this proposal creates savings. Does West Lothian currently provide more than the government guidelines?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals, breakfast club and instrumental music provision are all terrific initiatives that will really help kids.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	How are you saving anything if you are not changing anything or are you not going to provide this support to more families?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Where are you wasting £890,000 at present?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	What does this alignment mean in laymans terms?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I don't have enough knowledge to comment on this as don't have children.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	West Lothian has areas of great deprivation, what affect will this have on pupils who will not receive a meal at home? The east/west split, the west of West Lothian has some of the greatest deprivation areas in Scotland.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I am not sure what effect this would have in practice.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	What will be the overall impact for those families who rely on these services?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	At last a question I understand but I have no idea what the Scottish Government Funding levels are so how can I comment if this is a good or bad decision??!	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	How can there be a saving by maintaining current levels? I assume the SG levels are below WLC's.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Does this then signal a drop in funding for free school meals etc? It would be good if this was much clearer in this form. I'm not sure how people can comment without any detail.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	What would the reduction be to make this saving?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Needs proposal re 'alignment' clarified	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	More clarity on what you mean by 'realigning' is required. I would agree that free school meals should be means tested. The Council should not be spending money feeding children whose parents can afford to do that.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	How will this provide a saving???	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The explanation provided provides no real detail in how this alignment will save the council money. If the budget is aligned with the Scottish Government what does this mean? How will this impact our pupils? Does this mean children will eat less? If this is not clearly explained then this means no objections can be made. Probably exactly why the question was framed in this way.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I don't know what this means - it doesn't explain how you will save £890,000?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	What do you mean by realign? Are you going to scrap free breakfast club and reduce cohort that will get free school meals?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	What does this realignment mean? How exactly will this impact children and young people? As a teacher working in schools I think that it is not only the availability of free school meals for children and young people that needs to continue to be made available but I also think the quality of these meals needs to be looked at and improved.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	In what way is West Lothian providing over and above the Scottish government requirements for free school meals at the moment?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Not sure how aligning provision would result in savings this would need further explanation.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I don't know what this means. Does it mean that the free school meals/ breakfast club services would still run but with a reduced food offering, or that those who don't qualify for free school meals would have to make a contribution to use breakfast clubs? How do you save money if they are still running? It reads as WLC are funding all these at a level beyond SG funding. What would 'alignment' look like?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I wonder what you will be cutting from this to make a 890000 pound saving ?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I don't and can't have children so i don't feel it's fair for me to comment on this question.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	no comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	no involvement	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	no comment on this- as above.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	No comment.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	No comment to make on this	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	don't know enough about this	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	How can you realign free school meals? P1-7 is a government requirement and eligible secondary school students so what is being realigned?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I don't understand how there can be a proposed saving here when the need is increasing.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	So if continuing to deliver these where is the saving being made? What is Scottish Government funding levels? Does this mean reducing quality of meals provided (which is already low)? Children need access to a nutritious hot meal every day.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	More detail needed on what this actually means for free school meal provision - to align it with SG funding levels. Is this mean a reduction in pupils eligible? Does it impact on the nutrition and quality of food served to pupils? What impact does this have on holiday hunger programmes for children and young people?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	What does 'align with Scottish Govt funding levels' actually mean? I'm unable to comment as you've not made it clear what this means and now I'm worried that you will charge again for instrumental music.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I'm not sure how this saves money. The wording doesn't make it clear.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	To what extent does the alignment mean reducing the provision in these areas? This is not made clear. If these is to be an estimated saving, this can surely only mean a reduction in provision in some way, detrimental to those families that already rely on it.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Are WLC satisfied that the school clothing grant levels are proportionate given that other councils provide less? Could savings be made in this area while still providing adequate provision?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It is not clear how this would save money, if you are continuing to do what you are already doing!	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	See above	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It's not clear what the impact of this is, if aligning with Scottish government what is the reduction /impact to West Lothian young people ? Your description does not make this clear so I cannot comment.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I have no opinion on this	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This has no impact on me so I will refrain from commenting	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Unable to comment again due to lack of available information.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Nothing to add to this change	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	No comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	So what will actually be cut?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	no comment	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I am unable to provide further input as the level of detail within the estimated saving briefing doesn't allow me too.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Not clear at all where the reduction in service is or the impact this will have	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I cannot respond to something I have no details of.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Hard to comment on this as again no specificity.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As above - cannot really comment through lack of knowledge.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is very vague and therefore difficult to comment on.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Neutral on this proposal.0	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Who will receive free school meals etc? Does align with funding mean reduce to the bare minimum?	3. The respondent advised that they had no comment to make or posed a question of the measure.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free meals are incredibly useful for people who otherwise would not be able to afford it. If school meal provisions were lowered, how would that affect school meals? Would there be less availability or lower quality?	3. The respondent advised that they had no comment to make or posed a question of the measure.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	No comment, as matching SG guidance and statutory duties minimal requirement.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Where exactly would the cuts fall	3. The respondent advised that they had no comment to make or posed a question of the measure.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	M***** (redacted)	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I don't understand how there could be such a substantial saving when WLC proposes to continue to deliver these vital services.;	3. The respondent advised that they had no comment to make or posed a question of the measure.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	No views on this - particular sensitivity around this given nature of services.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	For all children!!	3. The respondent advised that they had no comment to make or posed a question of the measure.	Provision will continue, funded from a different source.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I can't comment on this. I have no understanding of what the current situation is and whether it exceeds the needs of children. (I would doubt that the current service is exceeding the needs of children).	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Not sure how this would represent a saving	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again, it is difficult to comment on this without knowing details. What is the Scottish Government provision and what are the changes needed to align with it?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These are essential services for children and presenting opportunities they would not otherwise have. Why is this an area to be cut?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Does this mean services are reduced as funding levels are squeezed?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	More detail needed, what does Scottish funding levels actually mean in this context, simd?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Are more children going to miss out on these valuable services and opportunities? Why is breakfast club not means tested?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	How does this save money?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Very difficult to comment as I have no knowledge of what this would mean in practice for our young people and who would have access to this provisions.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I would be concerned that these facilities would be contributing to those in need with the current cost of living crisis increasing requests for support	3. The respondent advised that they had no comment to make or posed a question of the measure.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I didn't realise the school grant is awarded by the local council, I've always thought this was a government basic.	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is very helpful to us all thank you moncomment on this	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Have no idea what I am supposed to understand from that. Leave the kids with their meals and uniforms, least you could do so at least they're clothed n fed	3. The respondent advised that they had no comment to make or posed a question of the measure.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	How can savings be made if you propose to maintain current government provision. Does that mean your current spending is wasteful???	3. The respondent advised that they had no comment to make or posed a question of the measure.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	How is this realignment going to be implemented?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	How can you save £890000 by aligning the services to Scottish government funding? So are you saying that Scottish Government funding is less than WLC funding this you are implementing a further reduction in services which contradicts the above statement. How can you maintain current funding and provisions with £890000 less in the funding pot for this specific sector ?	3. The respondent advised that they had no comment to make or posed a question of the measure.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	was continued to provide free school meals and transport	3. The respondent advised that they had no comment to make or posed a question of the measure.	Thank you for your response.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	breakfast club and music tuition is vital to our children	4. The council is already doing this.	Both provisions will continue under the proposals.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Having provided services at this level now is not the time to reduce funding or ask parents to pay more given the cost of living crisis that is impacting many households in the area.	4. The council is already doing this.	Under this proposal funding will be replaced with specific funding received from the Scottish Government
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	We must continue to provide support to all vulnerable groups from all groups within our communities	4. The council is already doing this.	Significant additional support is provided to vulnerable groups, including the Pupil Equity Fund, the Scottish Attainment Challenge, and the new Scottish Child Payment,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	In challenging times this is essential to ensure that education is accessible to all - it provides a pathway to allow individuals to progress beyond their class and to fulfil their potential.	4. The council is already doing this.	Education has the aim of closing the attainment gap, and maximising the attainment for every pupil, as well as supporting them into a positive destination.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Quality must be maintained while cutting budget availability.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	More staff in schools especially where classes are bigger and where needs are greater.	4. The council is already doing this.	Significant additional resources including Pupil Equity Funding, Scottish Attainment Challenge and council funding streams reflect the demographics of catchment areas. Class sizes are with national agreed limits.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Keeping free school music tuition; Allowing families to use the free lunches element for either child - I have a p4 who's entitled who doesn't take but a p7 who isn't entitled who likes a school lunch. ; Re thinking the term inclusion - children who need alternative provision should be able to access it regardless. ;	4. The council is already doing this.	Provision will continue, but specific funding will now be provided by the Scottish Government. Access to free lunches is a statutory requirement which the Council cannot change. The Council makes provision to meet the additional support needs of all pupils in Additional Support Needs Schools and Units or in Mainstream Schools with appropriate support.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It is important that children from all communities have the opportunity to access affordable instrumental music provision - it would be unfair if it was put out of reach of people because of cost	4. The council is already doing this.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Essential services at these times.	4. The council is already doing this.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think that it is vital that we continue to provide free meals, breakfasts and support parents with clothing.	4. The council is already doing this.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	A shame West Lothian was spearheading the way for other Councils. Unfortunately, it's the poor and most vulnerable in society that need really need the extra provision	4. The council is already doing this.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is an important need for every child	4. The council is already doing this.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Does this equate to a saving because West Lothian Council currently provides more free school meals/ breakfast clubs than the Scottish Government provides funding for? I think it is difficult to put a number on this "saving". Yes, there might be some money saved initially, but if pupils are then going to school without breakfast/without access to a free school meal then their learning will be impacted - and the knock-on effect of that could well cost more than any savings made here.	4. The council is already doing this.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These areas deserve the full delivery of these vital services for the young children and young people	4. The council is already doing this.	Provision will continue, but specific funding will now be provided by the Scottish Government.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Hopefully the music programme will not be cut.; Free School Meals is a great benefit to customers.	4. The council is already doing this.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Unsure of how this can possibly constitute a saving? Are children who do not get free school meals not to be entitled to breakfast club, an often vital resource for working parents?!	4. The council is already doing this.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	SG supporting and keeping to these commitments vital especially with the cost of living crisis	4. The council is already doing this.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	All parents should get free entitlement whether working or unemployed	4. The council is already doing this.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The middle range of people are now in debt and deficient parents have 3 jobs this is not acceptable. Families on benifets are getting more help than workers. Not fair and or equal at all. Feed all children regardless of income. You simply do not know what's going on at home!!!!!!	4. The council is already doing this.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Middle range young people are now slipping through the net at St Kents sad to watch and its true. I believe all kids should be supplied with uniform not a gamble. if a family has money or not.... uniforms.now.being paid on credit cards..... how is that correct. Those.on benifets get a grant working people struggle use credit cards and get into debt not correct on any level. Some don't play sport as they have no pe kit	4. The council is already doing this.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These are important initiatives and should be kept. If not already in place offer an opt out option to parent who do not want their children to have free breakfast or lunches.;	4. The council is already doing this.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	There is a significant amount of food waste on a daily basis - there needs to be a real and detailed look at meal provision. ; Children should continue to have access to music- this can provide valuable holistic benefits.	4. The council is already doing this.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Does this mean a cut in staffing levels for Instrumental Music? Currently Music Instructors are spread thiny across many schools in a week. Further staffing reduction would make their jobs more difficult?	4. The council is already doing this.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Totally unclear what this means from your short statement. However Instrumental music provision should not be cut. And neither should free school meal provisions	4. The council is already doing this.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	All children's meals should be free in schools.; Prioritise this above anything else.; Good nutrition is key to all health, wellbeing and education.	4. The council is already doing this.	The Council is providing free meals in line with Scottish Government direction and funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is more important than ever in light of the current climate. All children need to be given the highest level of support to ensure their schooling is not affected by poverty. To learn properly each child needs the basics of a balanced meal and warm clothing.	4. The council is already doing this.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As long as this doesn't deliver any cuts to the quality or variety on offer to students this would be good. Particularly during a cost of living crisis it is important to support the most vulnerable. The suggestion above gives the impression that cuts will be made in some areas	4. The council is already doing this.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Is not West Lothian Council obliged to follow Scottish Government here anyway?; So savings of £890,000 spurious.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals are a MUST to assist with child poverty	4. The council is already doing this.	Provision of free school meals and breakfast clubs would continue in line with agreed national funding models.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Everything must be done to ensure children do not go hungry and prepare them for the future	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free meals would be an advantage	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast clubs are vital for working families.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Feeding poor children is essential.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	any free school meals should be means tested and provided unless directly funded by the scottish government	4. The council is already doing this.	Provision of free school meals and breakfast clubs would continue in line with agreed national funding models.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals - Just provide as per requirement - Possibility of standardising menu across all wards to cost effective menu? Or ask Parents to provide pre picked items each week to reduce waste so only those items are made / supplied each day? (Do so electronically or ask office staff to log if unable to do so electronically)	4. The council is already doing this.	Provision of free school meals and breakfast clubs would continue in line with agreed national funding models.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Please make sure the children are fed. It saves lives.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Keep music and PE	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Clothing grants and free school meals are essential for all low income families.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is important, all children should be made to feel equal at school, I completely support school uniforms so no one is made to feel inferior.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think we need to factio in how best to continue to support the most vulnerable families especially in the current cost of living crisis.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast club is good if you require this	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals are still very important as for some children it's their only got meal in the day.	4. The council is already doing this.	Provision of free school meals and breakfast clubs would continue in line with agreed national funding models.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	working with customers who need this in life especially Breakfast clubs, afterschool clubs, holiday clubs that make it easier for parents to work and know their children are safe, fed and looked after	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It is important that all these areas are available to the young people in WLC who require them.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Clothing costs are rising and so the clothing allowance needs to rise in line with inflation to maintain the actual level needed to fund the grant adequately.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Ensure the clothing grants that are being given are being used effectively - being a school employee there are numerous pupils who do not turn up in school uniform although they are entitled to free school meals and a clothing grant	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	There needs to be an impact assessment of how many free school meals, breakfast clubs and access to music teaching are being changed, and the degree to which services are being cut or charged	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals are needed in all schools. In some cases it might be the only meal the kids get that day!	4. The council is already doing this.	Provision of free school meals and breakfast clubs would continue in line with agreed national funding models.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The above services should be available to all families whether on benefits or not. Some parents work therefor not entitled to such benefits and are sadly often in financial hardship, but get forgotten about.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast club highly relied upon - on many levels	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Also breakfast most important meal of day so should be available to all not just those 'entitled' to grants etc	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Not much info given by you here but the free breakfast club is paramount for young people.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast club allows parents to work. Free school meals are essential for some families. And music as part of a rounded education has benefits in increasing grades in maths and literature.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	education for children is important and some families need the clothing grants due to the rise in levels of poverty in the community	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	third party service providers must undergo due diligence and pass on all sections, the council should only be prepared to risk accept low risk on services	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I have worked with west Lothian council in social care for over 20 years, which I enjoy, and hope to continue. As a working mum, I rely on the breakfast club at school in the mornings so I can get to work in time. I also pay for a childminder at the end of the day, so I can work a full day in the day centre. Working from home is not an option for me and I rely on outside help for both my girls who are of school age.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free School Meals	4. The council is already doing this.	Provision of free school meals and breakfast clubs would continue in line with agreed national funding models.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfasts clubs are so important to working parents - it's hard enough when you don't receive any benefits at the moment removing that would make everything much harder	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	At primary school, make sure the children have a hot meal they will eat - it doesn't need to be fancy: the prime concern should be "if the children are only getting one meal a day (which many are) then what will they eat?".	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Make sure that the free school meals money is not wasted - so much food thrown away because the children don't eat it.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Please do as much as you can to provide these extras which are vital in the long run to emotional and physical development.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	All these services and more should continue to be provided	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	free school.meals and breakfast club are vital and allow working parents to get to work and have there kids looked after safely.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Look after those who need to be looked after.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Please ensure that the most vulnerable school kids get adequate levels of support.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	We should negotiate the provision materials and the service we offer to ensure we get the best deal for our pupils and families. We could look at using more local providers in order to do this.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Development of children is important for their future.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Proof of need not just given adhoc. In favour of music education and instrument loan if unable to afford by the parents.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The best thing any Council can do is feed their children. And yes it is the parents responsibility to feed their kids but if they can't the council should. No one learns on an empty stomach.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	We have the responsibility to ensure all children are fed, clothed and have access to all subjects. The Scottish government should be helping the council to ensure no child is left out.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	People that can afford, will make sure that their child has what they need, others that can't afford fall into too bubbles. 1. They can't afford but want to. We must continue to support them. 2. Others can't afford but also couldn't care less. How do we deal with them	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I fail to see how we can make savings in an area that is going to be greatly affected by the current day issues e.g. fuel and actual poverty. Plus parents no longer parent and the council needs to provide these free services to the community.	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I don't understand what is being asked here? How can the council make savings of £890,000 if maintaining current provision? Is the service provided already to be reduced/removed? How will that be done? There is no clarity on the proposal on which to comment!	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Services provided, take up and pupil/parent/staff thoughts could highlight areas for further savings e.g. food waste and how to reduce that.	4. The council is already doing this.	These issues are kept under regular review.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	government should mentaincurrent	4. The council is already doing this.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Government should maintain the fee provision in line the Scottish Government funding levels	4. The council is already doing this.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	the government should maintain the free provision in line with the Scottish government funding levels.	4. The council is already doing this.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	maintain free provision in line with scottish government funding levels	4. The council is already doing this.	Thank you for your comment.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	government maintain provision in line with Scottish government funding levels	4. The council is already doing this.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think the council should maintain the Scottish Government levels of free provision	4. The council is already doing this.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Government should maintain free provision in line with the Scottish government funding levels	4. The council is already doing this.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Meals are non negotiable, students need food in order to learn. hungry students do not absorbed information the same as those that are fed.	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is unfortunate - the existing provision of school meals is excellent, and it appears that this will inevitably mean a reduction in that.; ; However, on balance it's possibly a needed change.	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Does this equate to reducing current funding levels for this service? If so, what would the impact of this be on those services?	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These services also support working parents who have no other childcare option before the school day starts and enables them to get to work on time. School meals enable families to get their child a meal who may be finding it difficult to resources the food items for a packed lunch every day.	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast clubs and school meals help children who are potentially not getting breakfast before school or do not get a hot meal at home. This in turns supports their education and overall learning outcomes. ;	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again, free meals and clothing grants should be remain untouched. I imagine more families would benefit from this with the increase in living costs.	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I understand people are struggling and free school meals are essential to all children but extras such as much should be a chargeable service	4. The council is already doing this.	Provision of free school meals and breakfast clubs would continue in line with agreed national funding models.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This will not improve outcomes for low income families	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Staff are needed to physically work in environments for Breakfast Clubs etc.	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Really don't understand how any savings are achieved here. These services are vital for lower income families	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Definitely a must for all young children whether parents can afford or not	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Force ****(redacted) to pay for it instead of sitting on her pile of Indy money	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals and breakfast club are not the right things to focus on for savings now we are in the middle of the cost of living crisis. More children will need these services more than ever.	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Dont agree with any reduction in funding for breakfasts etc. Schools play an important role in anti poverty measures	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	How can continuing something at the same level make a saving?	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I believe all of the aforementioned should be provided and if any cuts provided it should be based on a means tested approach, but not one that indicates those accessing the services are receiving additional support, this could be a cost effective way of reducing budget savings. Instrumental music provision can be invaluable to a child's development and educational journey, removing this is another gap within education and potential attainment.	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast clubs can be vital to some students whose guardians leave early or cannot afford breakfast. Ig those clubs can be kept it will continue to help those parents who need it ;	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast clubs can act as childcare for when parents must leave for work or for other things and cannot bring children to school in time. This is an issue as if breakfast clubs do not happen how can young children get to school? ; ;	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Schools should be able to fundraise to support these services, but less affluent areas should not be disadvantaged by this. ; ; Services should remain free, but parents can voluntarily contribute (make a donation)	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals are extremely important for pupils that receive them. Many families struggling with the current economic crisis get free school meals and cannot afford to also pay for their children's meals every day, especially now with the rise of cost for living. This could lead to some children going without meals during the school day. ;	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Clothing grant - revised to support low-income families with both parents working.	4. The council is already doing this.	Thank you for your comment
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Every child should get a free school meal at least once a day regardless of financial situation - for all. This reduces stigma for those who need it more than others.;	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free meals, clothing grants and access to music provision should remain free for families on low incomes, however I would be happy to pay for music provision for my two children.	4. The council is already doing this.	Free provision is dictated by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	this needs to be kept as my kids need the free meals at schools. others also need this and use the breakfast clubs.	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Feeding children is and always WILL be the right thing to do, teaching music skills are good, but they are NOT vital, and right now with a MAJOR cost of living crisis created mostly by a corrupt Tory UK WM children and families are struggling, without a good meal a childs education is hampered !	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Happy that free school meals and breakfast clubs are means tested if that is why aligns to government policy means	4. The council is already doing this.	Universal free provision of school meals is dictated by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The withdrawal of music services has had a truly detrimental effect on the number of kids participating. We are still suffering from this decision so I would guard against it.	4. The council is already doing this.	Free provision is dictated by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Provision of any bolt -on service that assists pupils' attendance and performance is to be welcomed	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This would be a real backward step. At this particular point in time family finances are stretched more than we have ever known so providing meals to support families is much needed.	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Proof that people need the help. Not just for everyone	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals can be the only decent meal in the day for many of our children.	4. The council is already doing this.	Provision of free school meals and breakfast clubs would continue in line with agreed national funding models.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Poverty and the cost of living crisis is at its worst. It's great that West Lothian provides these vital services for our young people. I would hope we would invest more in this area and not make further cuts.	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Investment in our children is vitally important as they will shape the future. No child should be hungry as they will not be able to concentrate in class.	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These services are vital for children and young people - from school meals to instruments as not all people can afford these services.	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	With financial problems of late free meals etc are even more important	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I'm all in favour of free school meals and clothing grants etc. Distributed and accessible for those in need in these increasingly challenging times.	4. The council is already doing this.	Provision of free school meals and breakfast clubs would continue in line with agreed national funding models.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Please assess what the affect on primary kids in deprived areas this would have - these kids need more not less.	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free School Meals and clothing grants should remain. School meals costs should not be cut so much if it means the quality of the food provided is poor. ; Many people would rather pay for lunches if they can afford to rather than children be fed poor quality junk.;	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals and breakfast clubs for the children that require it is essential. I see children every day that only eat when in school due to severe financial issues in the home.	4. The council is already doing this.	Provision of free school meals and breakfast clubs would continue in line with agreed national funding models.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	All of these service are important part of school life and the cost of living crisis means easing it for families who are struggling is essential.	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is a vital service that is very much needed, making sure the children are fed and warm is vital to their education and providing the stability for learning. Invest in the children now and you will have a healthy well education next generation	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Keep all	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Music is fundamental to children and tuition should be provided. Look when West Lothian Council asked parents to pay a couple of years ago the uptake dramatically reduced.	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals should also be provided.	4. The council is already doing this.	Provision of free school meals and breakfast clubs would continue in line with agreed national funding models.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Does this mean only the most needy get the provision? I don't understand how savings can be made if funding remains at current levels.	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The services need to ensure that the funding is relevant and/or needed (not all families want a free meal, they would rather know their child had eaten something).; Provision to supply food etc must meet the needs of all establishments and not just suit school hours.	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These vital services are always needed to prevent neglect.	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Necessary for those pupils whose only hot meals are provided at school	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As in align i would hope these would still be offered to children as for some this may be the only food they get. For other music is and art and would be such a shame not to have	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Agree that the council should maintain free provision of the above services. Not ever been sure why instrumental music is deemed a separate provision though when there isn't the same for sports or arts.	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This would mean a reduction in current service provision, in order to reach the saving.	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Kids must not suffer, for some the free meal may be the only hot meal the kid has that day	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is so important, as we are meant to be Getting It Right For Every Child (GIRFEC).	4. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think these services should be maintained without going to government funding levels. Clearly there is a need in West Lothian for these to be above government spending levels. It's the government that should be questioned on their commitment to thee services.	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.

Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I should hope so. Children are our future and they need to be supported through their lifetime of learning and external factors should not affect education	4. The council is already doing this.	The current service will continue, using new, alternative sources of funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	All school meals and breakfasts should be free and use in house caterers across West Lothian to get best value for best quality. Profits should not be made on a basic provision of food for children.	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Please do not reduce the provision of meals for children. WLC should be used as a role model which other Scottish councils should copy rather than downgrading provision here. As a health professional I see the effect of malnutrition and we should ashamed the families are unable to feed their children.	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It is important for all children to have the opportunity to learn valuable life skills e.g. instrumental music provision. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Hard to see what the saving is here, but you shouldn't cut critical functions like free school meals.	4. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Would like to see instrumental music provision maintained or expanded as children deserve to try things otherwise talent might be missed. Music should not be restricted to wealthier families	4. The council is already doing this.	Provision will continue, funded from a different source.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Access to musical instruments for children of all backgrounds is hugely valuable to their development and to an equal opportunity to obtain the skills that come from learning to play an instrument.	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	During a cost of living crisis, these services may be essential to some children in ensuring they have access to the nutrition they need.;	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Whilst the provision of free meals, uniform grants & musical tuition is greatly appreciated there needs to be some review of the actual meals delivered. Whilst a 3 course meal is advertised (which I pay for due to my child's age) rarely do they get the soup/fruit. My child has also missed music tuition due to the one & only teacher being off sick, I had to enquire what was happening as there was no communication from the council whatsoever	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	So basically stopping providing a better service than the useless Scottish government with a reduction in funding	4. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	From the description it sounds like nothing is changing....how can you save £890,000 if you continue to provide everything you are currently providing? 😞 Don't get this one!	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Times are already tough for families this would most likely impact our lower paid working families who rely on these services to be able to work.	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Children cannot learn if they are hungry. The number of children for whom free breakfast and a free school meal provide their main meals cannot and must not be underestimated. Teachers already provide meals for children and most schools have active clothing banks. Children need to feel that they belong in school and providing school meals and clothing grants are essential for this.	4. The council is already doing this.	Provision of free school meals and breakfast clubs would continue in line with agreed national funding models.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These vital services need to be protected. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These are services required by the most vulnerable children in our community and should not have funding cut.	4. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Allocation of free school meals etc should not be the responsibility of WLC. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As always, the decisions to make cut backs affect the lowest income families the most. There has been a massive increase in families needing to turn to foodbanks to survive. Many young people will have their school meal being the most nutrition they will get that day. As cuts are a choice, removing food and clothing from children should not even be getting discussed.	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals for ALL are a waste of money. Charging for the IMS ripped a hole through the musical community in West Lothian which we are still trying to recover from. Not all children are gifted academically but can find a home in music or sport and we shouldn't take these opportunities away from them.	4. The council is already doing this.	Universal provision is required by legislation. Provision will continue, but funded from an alternative source.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I agree to keep the free school meals and breakfast club and music provision as they are brilliant and the children profit from it. I would love the school clothing grant however changed. I am not sure how much children profit from these grants as there is no way monitoring that the funds paid out for these are actually spent on clothes and i fear that a large percent is not actually going to the children. Maybe the council could also look into offering afternoon programs at school. Homework club for example would be very welcomed and many working parents could profit from this.	4. The council is already doing this.	Provision will continue, funded from a different source. After school activities, including homework clubs are offered by many schools, and parents can raise their priorities through the Parent Council..
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I am amazed that there are any cuts to be made here on FSM, breakfast clubs. So-instrumental music again? As a Lothian Region pupil- I had free lessons and access to a school piano. This makes a massive difference to pupils who would not otherwise be able to access music lessons. This helps 'closing the gap'.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	They are all absolutely vital and I can't see how on earth these can be cut!! You can NOT start charging again for instrumental tuition. Some of our children have very little and music hugely helps them. Some of the less academic children absolutely thrive through music tuition and could really make something of themselves and you taking this away again would destroy them.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This would be a hugely detrimental decision for the young people that most need support. We are an authority with large numbers of vulnerable pupils and children living in poverty- we must continue to support them and any cuts to this support is sickening at this particular time when we know families are under more pressure.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	What are the Scottish government funding levels? I assume below what you are currently ploughing into this system? If so, not acceptable. Children, of any age, should not be hungry at any point in the day. Perhaps limit the council employees bonuses to cover this cost?	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I am assuming you are cutting the free part for some, how would this work I wonder is it means tested and does that rule out those with hidden poverty? Many school breakfast clubs are overrun with children who really need it and some for whom it is free child care how though would this be managed. For many children the meals in school are their main meals of the day and this again how do you means test hidden poverty.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Yes these are all vital to support those children. We have already seen a cut in music provision and children are missing out!	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast club, free school meals, support grants and music tuition are all vital and the council should not reduce its commitment to providing these. In order to confront increasingly levels of child poverty due to the cost of living crises, WLC's commitment to its children must not suffer. For some children, meals provided at school may genuinely be the only food a child is able to easily access each day. Services must not be cut in this respect.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I can't even discuss this. The people suggesting these cuts need to come and shadow a teacher for a few days. Pupils are coming to school literally starving. Teachers are providing snacks/fruit/water over and above the school meals just so pupils who don't get free school meal provision have a half chance of accessing and focusing on the learning. Schools are purchasing masses of school uniform, and clothing pupils daily. The current provision isn't covering the need, never mind reducing it. And instrumental music instruction is one, proper effective way pupils can deal with mental health struggles. Music is the one thing they frequently turn to that pulls them out of a hole. Picking yo the guitar or sitting at the piano gives them an outlet. If they never get the chance to learn in school, they never have that mechanism, and they end up on a waiting list somewhere for mental health services that are already too stretched to support them. After that, who knows. Every pupil should have the opportunity to learn an instrument at school. These cuts will have a wider impact on and already struggling society.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,

The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These services are invaluable in our schools.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These services are vital for children as seeing the affects first hand of children who do not receive these things would suggest it actually should be available for all children. More families than ever need this sort of help otherwise it will cost the council more dealing with children who turn to crime instead to get a decent meal.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I cannot agree with this suggestion as once again it would have a huge impact on children and families who already live in poverty. Any reduction in free school meals and breakfast provision will have a major impact on children's learning and often these children have no other food other than what is provided in schools. This is impacting those who need support the most. The reduction in instrumental music provision will also impact those who have the least in society. Some kids who don't consider themselves 'academic' will enjoy and benefit from music provision and this will take away the little joy they have in school.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Services as they are should be maintained.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Cutting music provision is such a short-sighted move and again means children are robbed of life enriching opportunities. ; For those who need free school meals, breakfast club and clothing grants funding for these things should be maintained but not at the expense of other childrens scholastic experiences.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Music tuition is a that all eligible children should have. Music is an expressive and meaningful outlet for many children and pulling this back may have an impact.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast clubs, free school meals and music tuition are opportunities for children that may not have access to them. ; Free school meals and breakfast club are potentially the ONLY opportunities that children may have to receive warm food. Realigning these resources must ensure they are accessible to ALL children, no matter the SIMD status. ; ;	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again another sweeping statement that does not highlight the impact that the savings would have.; ; If there is an estimated saving of £890,000 does this mean that free school meal, breakfast club and instrumental provision in West Lothian will change? Will fewer children qualify for these provisions? If this is in fact the case considering we are in a financial crisis this will result in hardship for so many children.	4. The council is already doing this.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast club helps thousands of parents stay in work. An invaluable service to working family's. Low income family's would not be able to clothe their children in school uniform without the help of clothing grant.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I feel these services are an absolute must for some of our community it will be a disaster if we loose these, our children are the future and need as much help as possible	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Every child should have access to food, clothing and the option of musical training in addition to other core subjects.; Continue with this service.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	All of the above are so needed and possibly more now with the current crisis we are living in, look at the food bank use etc.; People wages are not in line with all the increases in the cost of living.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again, much of this sounds like it will impact the lives of our young people, which is not acceptable. If WL Council currently go above the Government funding levels, some children will inevitably lose out if we now choose to go down this route. As I teacher, I see children come into school hungry, and while I appreciate that the proposal will still provide for most, it should be available to all. We should also be proud to promote the arts, including music and we should aim to encourage more of our young people to realise and develop these skills - not less. Budget cuts cannot impact young people, who have not caused any of the mess that we have created.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Once again our young people are going to suffer. Education is a valuable thing, a treasured thing which is vital! To stop or reduce the instrumental music service provision, which over the last few years has already seen reductions is not the way forward. Music is linked to so many benefits which helps to support other subjects. The expression and creativity offered with music gives our young people a way to express themselves, it is a source of comfort and mindfulness. ; ;	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	All pupils must be able to eat and in the current cost of living crisis these school meal and breakfast clubs are vital for many. The music tuition is also something that many parents and carers would currently not be able to afford and so pupils would be forced to miss out.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response

Every child should receive the best provision. I am not in support of cutting in this area.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As a parent council, the lenses we're using across our responses are equity and inclusion, mental health and wellbeing, teaching and learning. We raise the fact that this generation of young people have faced extremely challenging years and applaud all efforts the schools and local authority have made to prioritise mental health and wellbeing in the months since lockdown.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	We have not been able to locate a Child Rights and Wellbeing Impact Assessment in relation to; this proposal, and request that one is carried out in order that impacts are highlighted and; mitigated.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	We are concerned that any changes to support staffing will disproportionately impact those who; are already disadvantaged, which would undermine the goals of inclusion and equity.;	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The high value of this saving implies to us that it is likely to lead to a reduction in overall staffing; levels with a resulting impact on curricular provision. The loss of any support staff is likely to; impact wellbeing significantly, and we ask that this there is no adverse change to pupil support.;	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast clubs I deem necessary for all families. The provision of free school meals is supported.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It is our most vulnerable who benefit most from these essential provisions. To cut these further will only increase the gap further.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Not clear what that means but with significant numbers of people relying on foodbanks any reduction in food provisions seems like a poorly thought-out idea, hungry children will struggle to concentrate, and this will widen the attainment gap. Music is also already scarcely resourced so savings in this area would seem small and detrimental when put against the benefits to children of having the opportunity to learn music.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals and breakfast club should remain for those who require this provision.	4. The council is already doing this.	Provision of free school meals and breakfast clubs would continue in line with agreed national funding models.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I do not know how the council can propose to maintain current levels but still proposes to save £890,000. I am concerned about what this means for the provision of free school meals, breakfast club, instrumental music provision, and school clothing grants, which, as is stated above, are "vital services for our children and young people".	4. The council is already doing this.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I understand that this saving is due to the Scottish Government bearing the cost of these provisions, rather than by any change to the provision. I am opposed to any entitlement being removed from those who have been in receipt of free school meals, breakfast clubs, clothing grants, due to the disproportionate impact on the disadvantaged.; Instrumental music tuition, school bands and other provisions by the instrumental music service are already limited, and I would oppose any further cuts to their existence. This is due to the importance of arts education for mental health, and due to equity.	4. The council is already doing this. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals must remain a priority for WLC especially in this cost of living crisis and the rising numbers of children living in poverty.	4. The council is already doing this.	Provision of free school meals and breakfast clubs would continue in line with agreed national funding models.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I would like to see evidence of the changes in criteria and how any decisions would be determined.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is an outrageously worrying statement. Breakfast clubs are essential provision for working parents and for families who struggle to give their child the start to the day that they need. The Instrumental Music Service is already on its knees and hanging on by a thread after the disastrous charging policy. To only fund what the SG are currently granting WLC is an enormous cut and would put this service in danger of not being able to deliver any sort of effective service. The demand for Instrumental Music is greater than ever and requires investment, not cuts. WLC is risking cultural devastation and a potential lack of any future opportunity for its young people to flourish, not to mention no music or ensembles to be available to support civic life and important events. Do Councillors really want the concert to celebrate the 60th Anniversary of Livingston to have been the last of such events?	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Many of these services are vital to the provision of equity.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Provide help to all who require it	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These services, especially free meals are lifelines for some pupils and should be protected at all costs.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Additional moneys should be coming from UK following budget statement. Use of reserves should always be considered for these vital areas.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I agree all these supported deliveries should be kept, and others added to supplement the development of children.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If this involves a reduction in any service that affects children and young people, do not bother. Our children deserve better.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Given the cost of living I would suggest the funding and payments for this is increased in line with inflation	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think councils should be not meeting but exceeding targets for schools. Children are important to our future and investment in them is investment in our society	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I am unsure what aligning free school meals and breakfast club with the government would mean. If this would result in the cost lying with the school for breakfast club rather than the council, I would find this very concerning. School budgets are already very tight and the burden of providing breakfast for many children should not fall on schools. I believe that every child should be provided with breakfast to start their day. Families who qualify for free school meals should certainly still qualify for breakfast club. However, as many working families use breakfast club as a 'free' babysitting service before the school day starts, I would not see that there should be any question that if a family does not qualify for benefits, they should incur the cost of sending their child to breakfast club. Providing free school meals for all children is a fantastic service. However, so many families are able to afford this so perhaps this 'vote winning' policy from the government should be scrapped.; Instrumental tuition is a fantastic service within our schools. It allows children to gain so many skills and experiences that they may otherwise miss out on if it they had to pay for it. I grew up in this area and played in brass bands throughout my youth including the West Lothian County band, at the time conducted by Nigel Boddice. This was such an invaluable experience for me in my teens and I am certain I would not have had this experience if music tuition was not free. I have one child who currently has brass lessons, and I would love my younger children to experience the same, when they are old enough. I will not be able to afford to give them that opportunity if the council scraps free music tuition, as it did in the past.	4. The council is already doing this.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again this is very vague as most people won't know exactly what WLC has in place at the moment in relation to the Scottish Governments free provision funding levels. Our children need more not less! Families are stretched to their limits with rising mortgage rates and increasing utilities, so many children will lose out if we reduce these services provided.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I would be interested to know what this would actually look like in practice - it sounds like more pupils will go hungry, be in unsuitable clothing and miss out on music and expressive arts education. This is simply not good enough for the next generation.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again, I realise that times are difficult but West Lothian cutting back to the minimum requirements would be a big loss and a detriment to young people, particularly as music is so important and aids wellbeing.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	All these services are vital and should not be compromised.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	All primary children should receive a free meal; And those who need it in secondary	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This cannot be removed as poverty within our school is evident and a meal is the one item I do not believe should be withdrawn for pupils living in poverty.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The food waste at lunch time in schools is unbelievable. I've witnessed uneaten fruit, yogurts, sandwiches, ice cream and school dinners go straight into the bin. ; Maybe this should be monitored and a solution found - genuinely would save ££££££ ; No Recycling is carried out in schools.	4. The council is already doing this.	Catering Services monitors supply and demand and sets levels of provision at the level necessary to ensure children and young people receive their entitlement. Monitoring will continue.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Partially disagree. It is to Council's great credit that we feed our most vulnerable young people and maintain the school clothing grant. This should continue and seek savings elsewhere.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Important for pupils to get these things	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Where possible free school meals and breakfast clubs are vital as in the current economic climate these could be not just the only warm meal eaten but potentially the only meal received that day.	4. The council is already doing this.	Provision of free school meals and breakfast clubs would continue in line with agreed national funding models.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I feel that it is vital that the breakfast clubs in schools in West Lothian MUST stay open. They are a vital lifeline for so many parents - one of the biggest customers are teachers who are working in West Lothian.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It's vital that all our children have their needs met in order that they access education- they must be fed and clothed!	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Music is a crucial part of education, research shows that children can increase their brain capacity by learning music, so benefitting all areas of the curriculum. They also develop many transferable skills. We must provide them with opportunities! ; Losing so much of the service years ago has adversely affected the opportunities that our young people have had.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If the plans are to cut allocation to free school meals and breakfast clubs, I completely disagree. This is a vital service needed for young people. Free instrumental provision takes away the unnecessary "elite" provision that music can provide for young people. Music can help with so many aspects of a young persons life and to only make that available for the people that can afford it is frankly disgusting.; ; It is not clear what you are proposing here.	4. The council is already doing this.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	So effectively you are removing free school meals for Primary 4-7 at a time when families need it the most!	4. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	With cost of living greater need for free school.meals and clothing Grant's.	4. The council is already doing this.	Provision will be aligned with Scottish Government funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This service needs to be maintained to provide these essential services to the children and young people that require them	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Not sure I can connect the statement with the saving above? It would seem that the SG funding for this has reduced by £890k so you will simply work within the budget provided? So not a saving as such?	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These are vital services particularly free school meals and breakfast club and I hope that any cuts will not affect these areas.	4. The council is already doing this.	Provision will be aligned with Scottish Government funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I feel that this may have an impact on child poverty if accepted, the attainment gap is getting further away and any reduction on this for those pupils could push some families into further poverty, especially if this is the only hot or main meal a child receives that day. I am unable to provide further input as the level of detail within the estimated saving briefing doesn't allow me too.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As a parent of 3 kids now adults I would support free breakfast or free lunches not both - kids need a decent meal at least once a day however do not absolve responsibility from the parents - we birthed them so we gotta feed them - all mammals put their offspring food requirements before there own ...no?	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Important that less well off families are supported through clothins and free school meals.	4. The council is already doing this.	Provision will be aligned with Scottish Government funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If changes are made to the breakfast club this will affect people's ability to work. If people can't keep their jobs because they no longer have this flexibility then they will turn to the authority for support.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals and breakfast clubs must be maintained - these may be the only food some pupils get in a day/week.	4. The council is already doing this.	Provision of free school meals and breakfast clubs would continue in line with agreed national funding models.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I use breakfast club on a daily basis to allow me to get to my job this is the only 'perk' for working parents so this is something I would absolutely like and need to continue. As for clothing grants, I think that should be on an individual basis not just because people are on certain benefits as just because I work, and don't get benefits doesn't mean I can always afford new school uniforms.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Partly responded in previous question. These are vital services and good to be maintained - clothing and meals, breakfast club. Breakfast club delivery dependant on sufficient support staff in school of course.	4. The council is already doing this.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I do appreciate the free meals/clothing grant for my child, thank you.	4. The council is already doing this.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I believe it is vital our children have free school meals, also encouraged to learn an instrument.	4. The council is already doing this.	Provision will be aligned with Scottish Government funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These services should all rise inline with inflation given the cost of everything is going up.	4. The council is already doing this.	Provision will be aligned with Scottish Government funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think this help is a very good thing .	4. The council is already doing this.	Provision will continue, but funded from an alternative source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Think it's shocking p6/7 do not get free meals why should they be any different.; ; More work needs to be done for people who work, and don't get grants it's so unfair!	4. The council is already doing this.	Provision will be aligned with Scottish Government funding.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These service are vital; And life saving to many families and children can rely on these .	4. The council is already doing this.	Provision will continue, but funded from an alternative source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again I do not agree with this, the cost of living crisis means more and more children living in poverty so cutting almost £1m from this when this should be seeing an increase is not acceptable!	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This needs to be done to benefit children	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Definitely required especially in these times.	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I believe keeping all these things a vital in giving all children a fair start and means no children are left behind and are allowing the parents that need services to added stress at an already stressful time	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Schools should set up a fund to help pupils who are struggling the government ; and councils can only do and give so much. Other families at the school can donate every so often.	4. The council is already doing this.	Fundraising to help families cope with the cost of the school day takes place in many schools, but increased partnership with bodies such as the School Bank can be explored.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I am not sure how almost a million pounds can be cut from this budget and services be maintained. Currently, many families are in dire straits and need support with these basics. A cut in instrumental music provision will further disadvantage talented youngsters whose parents are unable to pay for music provision themselves.	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	By aligning a school meals with Scot govt funding levels. I hope this doesn't mean we will lose them. All children need free school meals so they are fed properly without shame or embarrassment.	4. The council is already doing this.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think it's important to still offer lessons through the IMS. My children started lessons when we still had to pay for it. We would accept paying for lessons again, as long as provision was still provided for free for families that could not afford it.	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	In the current climate to make reductions this way is not acceptable. Many working families do not qualify for benefits and rely on schools to help any way they can through various initiatives they have.	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Clothing grants need to be in line with cost of clothing, wanting to admit it or not, the current allowance falls short of immediate need. Cost of living has ensured parents heat or eat, to put a cut short allowance for school clothing on top is ineffective to reducing child poverty and allowing them to learn	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This should definitely stay as I can see families struggling just now.	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Recycle uniforms to be used for those who need them.; Can't cut free school meals as many kids live in poverty but I'd suggest taking ideas from pupil councils as lunches are a huge issue for them. It seems there are a lot of wastage.; Install vending machines as these will bring a profit and ease lunch congestion	4. The council is already doing this.	Recycling uniforms to help families cope with the cost of the school day takes place in many schools, but increased partnership with bodies such as the School Bank can be explored.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Every child should have a free school meal if they choose to take it and should not be means tested at all so there is no stigma.; The catering should not be outsourced so there is a better nutritional quality offered and local suppliers can be used. It could also be part of a grow your own education strategy with a community garden developed so that children are aware of where their food comes from. You don't get that with an external company profiting on bulk production from some central depot miles away using the cheapest junk food.	4. The council is already doing this.	Provision will continue, funded from a different source. The costs to schools of growing their own food are likely to be prohibitive.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	How many children need ; 1 a breakfast with so many parents working to make ends meet; 2 free school meals are in some cases the only meal some kids get; 3 why should kids miss out on musical instruments and teaching because their parents can't afford it	4. The council is already doing this.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	To achieve this saving it must mean cut - is there equity for all ? Or do those who cannot pay - don't get?	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	With the financial constraints it is important this section of the budget must be adhered to, children should not be constrained and deprived through the actions of adults.	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I disagree with the universal free school meal commitment by the SG and believe it should be available at point of need for families. Music tuition should continue to be free or subsidised as part of children's wellbeing and learning.	4. The council is already doing this.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I am opposed to any entitlement being removed from those who have been in receipt of free school meals, breakfast clubs, clothing grants, due to the disproportionate impact on the disadvantaged.	4. The council is already doing this.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Instrumental music tuition, school bands and other provisions by the instrumental music service are already limited, and I would oppose any further cuts to their existence. This is due to the importance of arts education for mental health, and due to equity. If funding this service is in question, I would welcome a consultation on how it can evolve in the current climate without loss of the provision	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As per our answer to 1D, it is vital that the current (or greater) level of resources is maintained in this area.	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Keep this its very good for kids to get a breakfast and access to musical instruments too	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast clubs are essential as are after school clubs to allow parents to continue working and therefore supporting the local economy so such services are essential. Along with the music lessons are key to our children.	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast clubs are essential for working parents as well as non working parents.	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Funding for vital services like free school meals, breakfast clubs and instrumental music provision must not be cut.	4. The council is already doing this.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is a amazing scheme. ; To all low income parents ; Should be cash should be vouchers for the items needed .	4. The council is already doing this.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	School meals are important to enable that children are fed especially as we are in a cost of living crisis which will get worse.	4. The council is already doing this.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Instruments and the development of learning this is important for the children	4. The council is already doing this.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Please do not reduce funding for these services. West Lothian children benefit immeasurably from them and these costs are direct investments into our future. It would be imprudent to make reductions to spending in this area.	4. The council is already doing this.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I understand that this saving is due to the Scottish Government bearing the cost of these provisions, rather than by any change to the provision. We are opposed to any entitlement being removed from those who have been in receipt of free school meals, breakfast clubs, clothing grants, due to the disproportionate impact on the disadvantaged.	4. The council is already doing this.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	At a time where COLC is impacting on children and their access to good food and appropriate clothing. There should be no cuts to breakfast clubs, free school meals or any other services that help the most vulnerable families in the most dignified ways. West Lothian council has been a trailblazer in some of these areas and should co to use ti be at a time of need.	4. The council is already doing this.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is vital for the children who are living on the breadline.	4. The council is already doing this.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Sounds as if stringent economies should be made but I am worried that this will diminish standards. If these cuts are now vital, why haven't they been investigated before?	4. The council is already doing this.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides. Scottish Government Funding was not previously available.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Essential that the relevant trade unions are fully involved in the process.	4. The council is already doing this.	The council is committed to working with employees and trade unions in managing changes to its organisational structures and staffing requirements. The council will seek to achieve agreement to change through constructive and open dialogue.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This saving feels like it should be avoided until a very last resort. Providing funding of this type would align with most large corporates' social commitments (eg, Bank of Scotland, RBS, Scottish Widows, etc). Could the council explore those kind of financial partnerships or charitable style solutions as a way to maintain or improve funding in areas like these?	4. The council is already doing this.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides. The idea of working more closely with partners will be addressed by the Council in its exploration of Community Wealth Building and Community Empowerment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Must keep school meals and clubs, only meals some kids get	4. The council is already doing this.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	was provide school meals and breakfast clubs this may be the only meal children get I wouldget on a daily basis; OK about uniforms	4. The council is already doing this.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	would be good that all school kids would get the same treatment and independently on the amount parents earn. There should be a standard treatment for all	4. The council is already doing this.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	keep the school grants going; and free school meals - it could be only meal a child gets	4. The council is already doing this.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	School meals are often thrown away because they taste awful or are overcooked. This is a huge waste.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I would like to see council's approach local farmers directly to supply their food, this would be better financially for both parties. This would be better for the carbon footprint for all.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I don't think you can combine it all together - feeding the kids and education. Remove all free school meals unless low income	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Whilst this may not be a popular view - school meals should not be free to all pupils. Music tuition should be. Breakfast clubs should be scrapped.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I'd say means test the school meals and make sure those who don't use it are not being accounted for in the budgeting.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	You can't take away the basic necessities for children. The breakfast club is a fantastic idea but if savings are needed keep school lunches and Dutch the breakfast clubs	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Potentially limiting this vital service to only FSM children will greatly impact children and their well-being. There are already immense pressures on families in the current climate and this will only heighten the stress creating a poverty gap.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals should only be given to children who are eligible. There is no need to make it free for all especially because the food they are served is not nutritious at all. If parents can afford it, they should pay for their school lunch.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Parents who can afford to pay for meals could be given the opportunity to opt out of free dinners	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I can't understand how savings can be made on this when the Scottish government want more and more children to benefit from free school meals. Surely this is a cost not a saving.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free meals and music should be scrapped. This service is costly and the majority that use it can well afford to pay. Free meals and provision of this service is extremely costly and should be provided at point of need by the existing benefits provision	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This should be undertaken on a means tested basis as this directly advantage those families who could contribute to the scheme.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The universal provision of free school meals is dictated by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	There are a lot of parents/carers who would be happy to contribute to the cost of services, allowing essential funds to be allocated elsewhere. The council will have to be mindful of hidden poverty and the rising cost of living in its strategies within this change.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The universal provision of free school meals is dictated by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	My issue with all the grants is that the people that just scrape by will continue to pay for those better off on benefits.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The universal provision of free school meals is dictated by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think this needs to be means tested	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The universal provision of free school meals is dictated by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Instrumental lessons must be paid for unless the student is doing an SQA exam. I think this should be revised as it is unfair to some students who are unable to afford lessons ; ;	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Free provision is dictated by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	hell no let parents feed their Own kids, iPhones are luxury not a basic. today's parents are snowflakes and have to take responsibility for their children and choices.; feed your own family, it's not the councils job.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal free provision of school meals is dictated by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think free school meals should be provided to families on benefits, it's the responsibility of parents to feed their children instead of flying off on holidays.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The universal provision of free school meals is dictated by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It seems strange to provide free meals to children whose families are able to provide for them. A means tested approach would allow supporting those in need.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	The universal provision of free school meals is dictated by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Music tuition should be means tested and if parents can afford it they should pay something.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Free provision is dictated by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I disagree with free meals for all anyway.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal free provision of school meals is dictated by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Abolish this entirely, or extend the School week to include Saturdays and Sundays so Pupils can pay back the amounts by manufacturing basic goods for sale. They could also support advertising for local Businesses by holding signs at the side of Roads.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This should not be open to parents who can afford meals for there kids or any other resources for there kids; ; My neighbour get taxi to school for kids who run around in cars who can take there kids to school; Just a minutes along the road; ; Need to consider for the families who need help; So you maybe can save more	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I feel free school meals for all P1-4 is a total waste of money. As a catering assistant their is so much wast and most kids don't eat the food at all and through full meals in the bucket. Parents do t even ask the kids if they like the meals. it's just a case of it's free so you'll have it.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Make sure resources go to the families who are eligible - family link services would help with this and the synergies would be great.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think these things should be income based. Which I believe they are after the free provision. So agree	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If parents want kids to learn an instrument they should pay for private lessons. Many already do. As for free meals, why??? People should feed their own kids.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Some of us do not require funding for our children. Save this money and invest elsewhere.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	MEANS TEST for free meals breakfast club etc	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If needed free school meals should return to primary 1-3 children only. Our school can't even provide it to primary 7 as it's not big enough.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I would suggest a pay-if-you-can model for instrument tuition, meals, transport and breakfast club provision.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I agree with free meals and Grant's for those who require them. However, many families, who can afford to, would rather pay for their childs lunch and have the school structure remain in place as it is.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals should be for those who require them, parhaps raise the threshold of need. Not all primary pupils require free school meals	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I don't feel that everyone should necessarily have free school meals but instead reduce the cost dramatically	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Some services could be means tested.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision of free school meals to some age groups is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Suggest returning to model of free school meals only for those children who qualify, same with music tuition. Yes it's good if it can be extended but not on the present financial climate. Lots of children in the school I work in bring packed lunches anyway, even though the extension of free meals would allow them to get one.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast clubs and provision of free school meals should be means tested to ensure support is going to those who need it most. As a parent I would be happy to pay gor breakfast club.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This should be means tested. Offering breakfast clubs to all is not financially viable. Children do rely on breakfast clubs as they are not getting fed in their own homes due to the rising cost of living.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Don't understand why breakfast clubs and free school meals are not means tested? We are giving free meals to families on high incomes who can afford to pay whilst looking at reducing support in schools??	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Screening tests should be carried out more vigorously to determine the families who genuinely need this.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	My son has no music tuition in his school, which I'm very unhappy about. I work in a neighbouring council and we have visiting music specialists. Very unfair that he misses musical opportunities.; I would be happy to pay/contribute to school lunches and revert back to means tested.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Provision will continue, but funded from alternative resources. Universal provision of FSM is required by legislation for particular stages.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast clubs and free school meals for all primary schools is not needed, this should be revised. much of the food is thrown out as many children do not eat it.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	More free entitlement for those that can afford to pay; ; There should be action taken against all outstanding monies due on payment; These are often parent who can pay but simply don't ; Schools sending out letters simply ignored; ; Breakfast clubs work with school staff support; Often used as child care as child has eaten before they come; Then it becomes all about supervision	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I feel that free school meals for all (breakfast and lunch) is an appalling waste of resources. Working in a school I see day in, day out, the vast majority of this 'free' food being scraped into the bin by children who won't eat it. Wealthy parents continue to order free school meals daily (including on Fridays when their children are eating at home) rather than provide a packed lunch because they now feel it is their 'entitlement'. Their children are not hungry and can, therefore, afford to waste most of this food if it doesn't take their fancy. They bring multiple snacks to keep them going throughout the day. ; ; It is, of course, essential that we continue to offer free school meals for those children who are most in need, however, I am strongly opposed to continuing to provide this service for ALL families in Scotland.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Not all primary children require free meals, it should be means tested. Only the children that meet the requirements should be given help.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I believe free school meals and breakfast should be offered to ONLY those in need... not to all.; Instrumental music services should remain as a free integral part of school curriculum... open to all. West Lothian celebrates the talent of its young musicians in their annual concerts, this will be lost if instrumental music tuition services continue to be cut!	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Can be means tested and reasonably priced. Grants should still be available.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Scrap free school meals/breakfast club for those other than low income families.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Make these means tested.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	There is no need for non means tested free meals or breakfast. It's a waste of public money. The uptake is poor. It should be means tested or, at least, by application. Making it universally free is devaluing the service.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	We don't need free school meals for those that can pay. The meals that are provided are thrown away. A very wasteful policy. Those children who are entitled to free school meals of course should get it but as for everyone else if they can afford expensive holidays etc then they can provide a lunch for their children ! ; ; Breakfast Club is a cheap babysitting provision. Very few children that are dropped off actually eat breakfast ! Again charge a nominal amount a week for those that can afford to pay !	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Music tuition must continue. Scale back on free school meals to save money	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The amount of food that goes to waste in schools is high. There are a huge proportion of children who do NOT need free meals but take them. We have to provide for those who need and make those who don't pay for their meals. Free meals for those who need it should be a constant through schooling but NOT for those who can afford it!	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The council should consider whether free school meals & breakfast clubs are right for all. Perhaps a means test of some variety would ensure the right resources could be allocated to those with the most need. This would also help reduce the significant waste that is associated with these schemes. Provision of these services are vitally important but not to all in our communities. An innovative approach to provision could not only reduce cost & waste but also support those with the greatest need.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	In my opinion the Education budget should be used for education. Meals provided for every child should come out of a social budget. Parents should be taking more responsibility for providing their child with a meal during the day. I agree with Breakfast Clubs to give children a good start in the morning. Perhaps a subsidised school lunch could be provided saving the council the full cost of a lunch for every child.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals for all reduces stigma for those from disadvantaged backgrounds. I'd happily pay towards a lunch for my child but would prefer it's not obvious who gets what.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think you could easily cut the pack-lunches on Fridays. Most children do not utilise these anyway. Free school meals to the most needy is important- but not necessary for all children P1-P5. Free meals to this group could be an "opt in" and then the numbers could be cut significantly and most families could pay for this.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I am in favour of targeting those most in need, rather than free provision for all, however do wonder whether an alternative is to allow subsidised buy-in to e.g. breakfast club or music provision - rather than free vs fully paid.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I assume that currently WLC provides higher funding levels than the Scottish government provides, so by aligning and creating a saving, these services will be cut down to some extent? I hope that any reduced provision will be means tested so that children who are less likely to receive these privately, will have fair access and opportunities.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Not everyone needs a free school meal or chooses to have one so availability so be for those who need it most and cut costs accordingly	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I feel breakfast clubs could be much stricter. These are being accessed by affluent families as a babysitting service.; FSM are vital to those families not working- if there was a way to go back to means tested but make it invisible to all I'm school.	5a. Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I agree as long as it's means tested	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast clubs and free schools meals are great but not all kids take it so money is being spend for meals unused. Also making a lot of it food that doesn't get eaten because kids are kids and don't like most of the stuff that comes along with the meals and it then ends up in a bin. Waste of money waste of food. Better management of how much each school requires rather than giving blanket free school meals for every child then they don't eat half of it is a bit silly. More money is needed to reduce the cost of school uniforms. Such as using a local company to do embroidery that don't charge parents and arm and a leg would help massively	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As a member of staff working in a school in a deprived area, I see first hand the amount of free school meals that go wasted. This needs to be reviewed to ensure only those who would benefit from it receive it - so much food waste as well as a waste of money.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Parents who can afford school meals could pay for them, to free up money for those who can't.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I disagree that school meals and breakfast clubs should be free for all, these should be means tested. Particularly breakfast clubs that are used by the majority of families as free childcare.; Means tested should not just means those that are on benefit, there are working families struggling but do not qualify for any benefit, a family income should be set and those absolutely those above should not receive free meals.	5a. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Effectively a cut in services and will have the most impact on those who can least afford it. Not everyone can pay for instrumental music provision and will have a significant impact for the future.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	free meals should only be for the families that need them, low earners . NOT a free for all. 3 bins full of food a week to the bin because families just take anything thats free.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals are very much needed but should only be available to families who need it.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If 89k already provides these services to people, how can a cut in funding still benefit them?	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	In this current climate I feel that food for children is far more important than uniform, for some of our children its the only hot meal they get. Schools provide pre loved uniform parents can buy for pennies	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Not all children require free school meals it should be targeted to those in need.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Many families could afford to pay for breakfast club and lunches but the current policy prevents this. This is definitely worth looking at.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The provision of free school meals is a must but the menus need to be looked into. There are lots of options that are not necessarily child friendly, the guidelines to give each child everything is also causing a lot of food waste which in turn is a waste of money.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation. Catering services monitor provision and set levels at those necessary to ensure children and young people receive their entitlement. Monitoring will continue.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Provision of free school meals needs to be means tested. Money is being wasted giving EVERY child a FSM when they don't need it. This could be a HUGE saving and the money spent elsewhere. I'm sure that most parents who can afford it would be willing to pay for it.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This does feel rather creatively worded. I take it realignment means reduce, otherwise I can't see where the saving comes from. This shouldn't be a rush to the bottom if it disadvantages children who clearly thrive when they are well nourished. Difficult to see how children won't lose out if you're taking c900k out of the budget.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Children's families who can afford to pay for breakfast clubs, free school meals and music provision could be asked to pay a nominative fee for utilising these provisions. This would reduce the cost to the council of these, some would argue, essential provisions and ensure that children and families are not being placed under strain should they not be able to afford to pay.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I mean as you should. If prisoners can be fed for free at point of service then why is it even a question that children be fed when at school !	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I feel free school meals are very important to support children's learning development as if they are hungry, children will struggle to stay on task and this can affect their behaviour and in turn their learning. However I feel free meals in ELC's are a waste of money and would be more beneficial for children to take a hot meal or sandwich home instead of eating in ELC and the waste that is happening.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Provision in ELC is a requirement of legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	School kitchen provision reckon is best kept in house with council staff. Don't think free school meals for all children is necessary, Children and families who need free meals will get them still, they are assessed for this benefit. Lots of food waste therefore money waste when across the board.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Thank you for your comment. Universal provision of free school meals at certain stages is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think school meals should only be given to children who actually need it. This would save money and food wastage.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	More stringency in the allocation of free to school meals to family's (who clearly can afford designer clothes for there children) and others whom both parents work who are on the bread line and have to pay	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals are best way as it Crete sense of equality and help kids bond more.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Provision will continue, but funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Give parents the option to pay for school meals rather than being free to nearly all primary kids.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I have hadnt to use the clothing grant but believe many families will find this service vital and so it shouldnt be cut.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals including breakfast should only be for those on benefits with safety netting special discretion given to teachers/staff locally who identify a need. Middle class kids do not need this. ; Agree with clothing grants.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This should be for the children who are from lower income families and ones who are really struggling. However There are some parents who have higher income jobs and could afford more for their children like school meals, clothing grants ect.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As above. Stop offering the service free to everyone. Only support those in need	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast clubs, school meals are vital to many pupils these may be the only meals that get	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals would be better target towards those who need them the means testing and not a blanket role out to all. Would be happy as a family to contribute the costs of meals and activities.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	So much food seems to be wasted in school. Maybe not all free meals are needed.	5a. It is proposed that this suggestion is not taken forward because the council is required by law to deliver this work.	Universal provision is required by legislation.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The children in schools need to have access to breakfast clubs, free school meals and support to help more and more families who are struggling.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals is a great idea across the board. In doing this tho, kitchen upgrades within schools would have to happen. For example, providing fridges/freezers for the extra food that would need to be brought in as well as other equipment such as plates, bowls, cooking utensils, serving trays etc. Extra staff may be required to help	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Provide discount/vouchers for primary children who walk to school as an incentive to walk, e.g. money off school uniform etc.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Efficiencies should be concentrated on food waste and recycling of school clothing. Resourcing clothing in bulk to ditribute rather than issue funding may create savings.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	To allow any working parents that don't work in imitate local area commute to work (even breakfast clubs starting at 8am is too late for most working parents)	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Stop the Friday sandwich deliveries from Glasgow and give the kitchens a label maker or similar.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	During covid, people were able to access free food from a variety of different sources - these sources should be identified and stream	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Musical provision should be increased	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Clothing grants should be issued as vouchers to be redeemed at schools, lots of money not spent where its meant to.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Administrative costs for the Council would be significant.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Saving on the level of taxis used to transport pupils to schools, surely a transport grant would save a substantial amount of money.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Savings are proposed to school transport costs by moving to the statutory distances.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Why does the council not just buy the items that it needs itself and then provide the items to the individual parents rather than providing grants or use a voucher service to give to parents . This would save the money being spent on inappropriate items by some parents	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your suggestion. Administrative costs in determining need, and meeting demand, would be likely to be large.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is really good especially now as this would be really helpful to a lot of families.; People would really struggle without this if it was taken away.; Know a lot of people who get this and some of them used it for other things not what they were suppose to use it for. ; A better option would be to give this in a voucher and not cash so it can be used for what its not intended for.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Thank you for your suggestion. Administrative costs would be likely to be large.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	These services should be expanded rather than curtailed.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I believe cutting clothing grants and changing how benefits are paid could help here.. perhaps parents who receive benefits in July and August perhaps get a little extra in the form of shop tokens for school clothes only	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Administrative costs for any voucher scheme are likely to be high.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Should not provide any grant in the name of clothing grants . Need to provide some sort of voucher system only low income people	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Administrative costs for any voucher scheme are likely to be high.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free provision in schools should exceed Scottish Government commitments, if financially possible.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think every primary school child should receive a free lunch as more families go into poverty I also think that the eligibility of clothing grant needs to be changed as a family with 2 working parents can still struggle to feed and clothe their children due to higher bills everywhere else	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	The Council has considered provision of clothing grant in its budget decision making.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	To ensure school clothing is purchases via grant vouchers should be provided instead of money being handed over to ensure school uniform is bought.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Administrative costs of a voucher scheme would be likely to be high.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Given we are in cost of living crisis this could mean people who need this don't gain access to it- the threshold is sometimes too low and this should be rolled out to include more children and young people not less. Free schools meals should be made available to P6/7 pupils too	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	The Council will continue to apply current thresholds.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Would like to see free school meals rolled out to all primary and secondary pupils. For some children this is the only hot meal they get.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Provision will be aligned with Scottish Government funding.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Foster children should automatically be entitled to grants regardless of foster carer income.	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	Clothing grants are intended for those on low income.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It should not be the councils responsibility to feed children 2 out of their 3 meals, 5 days a week. One free meal should be provided, with donations or a fee for breakfast club payable by parents/carers/guardians; School clothing grants should only be paid in clothing vouchers to stop misuse	5b. It is proposed that this suggestion is not taken forward because it is likely that the costs of this proposal would outweigh the benefit or requires additional expenditure.	The administrative costs of a voucher scheme are likely to be significant. Provision of FSM and free breakfasts is in line with national legislative requirements and criteria.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The council would also maintain school clothing grants, which are above the amounts paid by many councils, at existing levels. Lower it further.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The Council has agreed to prioritise funding for the existing level of school clothing grant.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If SG funding is the benchmark for provision of the free school meals etc. Why not bring the clothing grant to the level of funding provided by the SG ringfenced aspect of this funding.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The Council has agreed to prioritise funding for the existing level of school clothing grant.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Why can't we just get rid of a school clothings? They do not have any impact on learning.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	School uniform plays an important role in establishing school identity, increasing equality, and reducing cost for parents.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Why are people entitled to these free provisions not asked even to pay a nominal fee. When something is free it is often taken for granted and abused.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The government and councils must increase the School Clothing Grant as the prices are higher than before, I consider that every child deserves this Grant.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The Council has agreed to prioritise funding for the existing level of school clothing grant.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	feel parents should be able to provide their own kids clothing as not expensive from supermarkets.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Reduce grant levels	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Why are WLC paying more in school clothing grants than many councils? This should be cut to match Scottish Government funding.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The Council agreed current levels of provision when setting its budget.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Opportunity to work collaboratively with other council's and ensure consistent grant funding - no point in WLC grants being much higher.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The Council set current levels in its budget process.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Reduce grants	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The Council set current levels in its budget process.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Is supplying school uniforms really more important than free meals. Could we rethink out uniform and if they need to be school branded. Could we make uniform rules throughout schools less strict so that they get more affordable and needed to be provided by the council. Can we feed kids and not buy their uniform? ; ; ;	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Providing clothing assistance was prioritised during the Council budget process.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	De crease the school grant system and stop the breakfast club & withdraw the instrument entail music system	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The Council agreed to fund these services during the budget process.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Absolutely and drop the school clothing grant to the SG funding level. The people who really need this provision will be able to tap into it through the Advice Shop if required.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Current levels were set during the budget process.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Is it time to say school uniform is no longer a requirement & therefore the need to provide clothing grants could be reallocated? Few European countries require students to wear a uniform & they seem to learn. I appreciate the old adage of it makes everyone is equal but was that ever really true? Times change so maybe an opportunity to review, guidelines could be laid down. Tesco are no longer providing uniforms for their temp staff so there's the barometer of change.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Families may still require support in providing clothing, even if not uniform. Current levels were set during the budget process.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Paying a small fee for using breakfast club would be understandable. Though the cost of living crisis would make this difficult for many at the minute.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	How about no uniform?	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	School uniform has benefits in terms of equity, creating a sense of identity, and safety of children and young people, but consideration will continue to be given to how uniform cost can be minimised.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	School Uniform is nice but not essential to learning and education. There are numbers of budget supermarkets that offer cheap alternatives which could be used instead. Scrape the clothing grant altogether or reduce it - it is far too much especially when budget supermarkets offer the uniform for a fraction of the cost.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The Council has considered provision of clothing grant in its budget decision making.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Clothing grants should be reduced to Scottish Government recommended levels and not higher than other Councils. Ever increasing amounts of money are targeted at those labeled 'vulnerable' - PEF, Scottish Child Payment. West Lothian Council does not need to add to this.	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The Council has considered provision of clothing grant in its budget decision making.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Clothing Grant is far too generous. Doesn't exist for a school uniform so cut it back. Also should cut off free music provision. Not fair that working families who get no help can't afford this so their child misses out but kids of families who do not through their own choice work get free music lessons	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The Council has considered provision of clothing grant in its budget decision making.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	School clothing grants are not needed people get child benefits and other benefits to support their children and most children don't get use of this	5c. It is proposed that this suggestion is not taken forward because it is not consistent with the council's values and priorities.	The council has agreed the provision of school clothing grant during budget deliberations.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Also if you scrap school uniform altogether (obviously no shirt skirts or certain things that may not be appropriate) then you won't need to spend on school uniforms at all, when I was growing up in high school there was no uniforms. Uniforms are nice to look at but it doesn't affect your learning. Please consider this across all your schools as it will save a massive amount on school uniform grants.	5d. It is proposed that this suggestion is not taken forward because it has been previously considered and will not be progressed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Instrumental music provision has a much higher number of participants from higher socio economic backgrounds. Lots of these parents could contribute.	5d. It is proposed that this suggestion is not taken forward because it has been previously considered and will not be progressed.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Perhaps scrap the school uniform policy. This would allow each family lots of savings. They cost roughly £100 each year. I also don't agree with aligning this with government funding. This would lead to inconsistencies in education as the fact whether a child receives music tuition or a free meal would vary depending on that government money. This is hard to explain to a child and opens the gap between rich and poor even further.	5d. It is proposed that this suggestion is not taken forward because it has been previously considered and will not be progressed.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	the free school meals and breakfast is essential for some children and feel this is a necessity. Instrumental music provision could be reviewed with parents/carers paying towards the lessons if they are financially able to do so. this should be a token amount and not the full cost	5d. It is proposed that this suggestion is not taken forward because it has been previously considered and will not be progressed.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Yes, those parents who can afford to pay for meals/tuition should do so, to ensure that those children whose parents cannot are afforded the same opportunities through grant funding	5d. It is proposed that this suggestion is not taken forward because it has been previously considered and will not be progressed.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Access to previously owned uniform/shoes. Often school uniform/staff uniform is in excellent condition and can be reallocated.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Many schools do support parents/carers to pass on uniform items, but this could be considered more strategically.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free provision should be means tested and protected for the most vulnerable children.; Recycling of school uniform should be prioritised to assist with costs to provide uniform.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Many schools do support parents/carers to pass on uniform items, but this could be considered more strategically.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	All children should be given an instrument. See tutti music bring them in with music library. This is a must. Do a St Kent music library. Maybe have a Friday afternoon youth club in the school cook low cost bulk dinners this winter.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Music tuition will continue, including opportunities to access instruments, The expansion of out of school care may provide opportunities such as learning cooking skills.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	All Schools should allow generic non-branded clothing like shirts, trousers, skirts and PE kits which can be bought at affordable prices. Badges to sew/iron on should be provided free or at a minimal cost to the parent.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	This suggestion is in line with the Council's recent response to the Government's consultation on uniform.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again best practice with other councils, in this you could lead the way. Perhaps encourage Scottish Government not to waste money and to make this a priority seeing as a quarter of children are living in poverty and this seems set to rise as Scottish Government devolved responsibility is not being met..	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The council should force all schools to sell patches of the school emblem instead of selling the hoodie or polo shirt as some schools charge far too much for these items making it difficult for some families.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Clothing grants need reassess and should be household means tested!	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast Club - could all breakfast clubs be provided for at a single location (or per number of schools to each area? ie 1 provision for Dedridge area - but caters for 3 different schools) Would a shuttle bus be cheaper than paying staff at different venues? Look at neutral venues located about the ward, such as community halls if bus is a cost-effective measure?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Instrumental Music - could all instrumental music clubs be provided for at a single location (or per number of schools to each area? ie 1 provision for Dedridge area - but caters for 3 different schools) Would a shuttle bus be cheaper than paying staff at different venues? Look at neutral venues located about the ward, such as community halls?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Clothing Grants - Set up clothes banks for old uniforms for those that have outgrown them but are in good condition (also look into local social media pages, set up by locals or the school itself for passing on good condition uniform items). Would also suggest scrapping any emblomed uniforms and revert to typical shop bought polo shirts, shirts, jumpers, trousers, skirts etc... (Pick a colour such as grey, black or navy for each school). Also scrap blazers - huge financial cost to families (who feel pressured to buy them so their kids "fit in" and they are horrid things, particularly in the rain...; Just supply a school tie for that particular school (at reasonable cost). Then clothing grants may be reduced somewhat... Same consideration for PE clothing.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Also, no mortice boards and gowns for nursery, primary or secondary school "graduations" (across board so one child/family doesn't feel left out if it was at one school and not another). Or share, sell or donate supplies across WLC to make fair. (Consideration will have to be given to each school's "graduation" day in this case)	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Could schools remove need for school uniform to help more vulnerable families?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	This suggestion is in line with the Council's recent response to the Government's consultation on uniform.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The quality and portion size in school meals has deteriorated. Schools cannot be expected to serve a P7 the same portion size as a P1. Too much cost cutting on the quality of school meals, quorn options are not significant healthier.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Align the breakfast fee - audit current catering processes. How accurate are our records? How often are these contracts tendered? Is a profit margin of 50% for school canteens appropriate or can that be negotiated? Breakfast clubs are often run for a minimal fee with a big impact. Alignment must be quantified before decisions can be made on this. Consider your uptake in local food banks - are there areas of concern and are we confident that this is the correct move given the current financial climate? Further consideration of this would be welcomed. Nutrition is non negotiable however the contracts and profit margins are surely up for discussion.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Clothing grant is fantastic - however can an agreement be made with a supplier to make savings and streamline via schools or vouchers to provide accountability for this spending? Id prefer money was spent on breakfast clubs than topping up the clothing Grant.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Unfortunately, the excellent idea behind breakfast clubs has become a pre school creche for middle class families to drop their children off early so that they (the parents) can get to work. Would it not be better to offer the creche facility for those who need it - at a price - and then spend the extra money giving the breakfasts to the children who actually need it	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Offer breakfast club for a small feebut mindful to balance with costs of living issues	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Many of these grants are not used for the children concerned and rather than cash an alternative way of clothing allowance could be explored.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Introduce swap shops and thrift shops for those struggling with costs of uniform - not all families 'entitled' to clothing grants and free school meals struggle finically too - these should be available for all	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Think this is a great initiative but is it being utilised. The menu is not of a high standard. Early years are being encouraged to provide lunch in a very short period of time due to not having working kitchens and food is being delivered from other towns. Parents are giving children lunch before the afternoon session. There is not hot provision during holiday time and a basic menu of sandwiches provided. Staff are asked to reduce portion sizes and encourage children to eat in a home from home environment. They then move to school where there is not enough staff to sit with the children or make sure children are eating their lunch. Many of the trays of food go in to the bucket or pack lunches uneaten due to wanting to go outside to lay.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Being a parent I hand in to school shirts and clothing each year as my son grows for other children to get use from the items. I think that providing items you could get a better cost could control the amount spent and also to encourage parents to hand in clothes their child grows out of to hand in for others.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	With regard to breakfast club, this is to enable parents to get their kids to school so that they can go out and work. I feel as a working parent this provision is crucial but there is space for change, such as opening it up before 30 minutes before school.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Instrumental costs could be introduced with grants available for those who need one.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals, free breakfast club and clothing grants should only be provided for those that require them. Free meals for all is not necessary as there are many parents who can afford to pay for this service. While I see the value in instrumental music tuition I do not feel it is equitable as only those with an interest in learning an instrument benefit. What about children who want to pursue dance, sports or other instruments that are not offered? Is there a more affordable model to provide access to music for all children? Could local community groups be more involved at school level?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Instrumental (and vocal) music provision is extremely important and should be diminished in favour of a very bare 3 Rs strategy. There are cultural organisations in the Community e.g. Orchestras, Theatre groups, Folk Festivals etc that would welcome a part to play in this.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Not sure this comment is relevant to discussion however Breakfast club and clothing grants great but parents need to apply for them. Due to government free school meals some parents think they don't need to apply therefore lost government revenue for school so need to find a way to sort this.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I know first hand how much food waste there is on a daily basis both in the primary school and ELC setting for school meals. This is something I feel quite strongly we need to reduce.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again metrics in trial data must show this approach works first	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Music is important and so is playing a musical instrument. There are many in our community who through volunteering and PVG checks could supplement this kind of education in schools. We don't invite the community to support - anywhere near as much as we could!	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Are there any central areas where outgrown school uniforms can be accessed. Given children grow so quickly and 1 uniform worn during first years will still have sufficient wear for another is this not a better initiative and keeps costs down.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The school or PTA should provide a second hand uniform shop, if it doesn't already.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Linlithgow Primary has a free school clothes swap shop which other schools should implement if they haven't already. There's also the West Lothian School Bank. Therefore there shouldn't be a need for school clothing grants. Considering there are no primary music teachers, at least in Linlithgow, Instrumental lessons should absolutely be free. Mental health issues are increasing in our young people because they have not been given the access to creative subjects to explore who they are or what they like or just to be given a breather during the school day from STEM subjects being rammed down their throats! Not everyone who goes to school is academic and music transcends all subjects and can be enjoyed/made by all pupils including those with additional requirements. Especially during a cost of living crisis considering changing access to school meals for anyone is not advisable. Avoid cuts in schools - end of!!	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Greater partnership with the West Lothian School Bank is a positive suggestion.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Remove school dress codes for colours and tie colours. Then clothing could be used across the schools and cause people to need grants less	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Minimising differences between schools and introducing a minimum acceptable uniform which could be worn at any school are positive suggestions.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The quality of the meals are quite poor as it is and not everyone needs a free meal. I would not allow my own children to eat a school meal and I certainly wouldn't eat them myself.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Can the council also link with charities providing uniforms and support PTAs with swap shops on-site	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Increased partnership working with the School Bank and PTAs/PCS will be considered.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Music is such an important part of education and is undervalued. I suggest joining up with some charities/ voluntary groups to bring music groups into schools and asking for public donations to give ongoing support to all these activities. The money would need to be pooled centrally and shared equally.; ; There is a lot of goodwill out there. I'm sure schools could tap into it.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Greater partnership with community music groups could provide additional opportunities for pupils.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	; Our children should always be a priority and there shouldn't be any reduction in services that mean children can receive hot food, opportunities for development. Do away with strict school uniforms such as blazers, different colours like brown and blue that cost parents more. A standard black trousers/leggings and school jumper would be much more affordable.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Consideration of a standard minimum acceptable uniform was proposed in the response to a recent national consultation on school uniform.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I was involved in setting up of breakfast clubs across the Central belt when I was community development manager in Scotmid Coop. If any lay person involvement is required I would be happy to help.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Community partnership may provide useful additionality to help families address the cost of living crisis.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Will this result in a reduction of music tuition? Will there be a partnership between charities such as the school bank in being able to help disadvantaged families with funding being offered by the council to support a much needed service?	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Partnership with the School Bank could provide useful additionality to families to help address the cost of living crisis.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	School clothing grants should be once per year or we could instead of giving this money to parents we should give the money to the school clothing bank and let them make up the uniforms for the children that need them or are entitled to them.	6. The respondent suggested an improvement. Officers will consider how this could be developed.	Increased partnership with the school bank could be explored with the aim of maximising benefit to families.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	stop the music (redacted) anyway does (redacted) good for society. and make the meals a part of 5 a day only (no meat or fried (redacted)). make the uniform a standard across all the country and stop the logos and ties (extra unnecessary material has no part in their future so stop the stupid traditions NOW).	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Why are West Calder s1 pupils getting camp opportunities.... travel to football match opportunities and St Kents has nothing to offer like thisvery disappointing to an area of deprivation. West Calder is not an area of deprivation it could be argued.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think one possible way the council could save money would be to review the way these grants are allocated. If families are on certain benefits or are genuinely struggling the school should be given the power to make these decisions. At this present moment in time I am sure that there would be quite a few families who could afford to pay a small amount to receive these services. As a parent myself, I had to pay for my 3 children's bus fares to school (no free bus travel then). Pay for their lunches everyday plus pay towards any items made at school. My family was not well off but we were not given the hand outs that parents enjoy today.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Too many people get benefits when don't need them as they know how to get round the system. I know members of my family are on benefits and they just chose to not work as lazy, say they are at one address but they are not so get extra money.... Stop this and use the money for those genuinely can't afford to eat or cloth themselves. Those on free school meals shouldn't be boasting about their kids with new iphones/tvs/parents using money for tattoos or piercings or holiday	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This should be means tested	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If the breakfast club got taken away, I would need to pay my childminder and additional fee to look after my girls in the morning. Things are difficult enough at the moment and I'm also working an extra weekend job to cover the bills. I would be happy to pay a contribution towards the breakfast club, If that would be an option, rather than losing it all together.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As some schools currently do not have space for their pupils to have a school meal in a dining hall large enough for capacity (shared space with gym) this will mean that some schools will never be able to provide an adequate lunchtime.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As i have said, I have seen "free school meals" thrown in the bucket, the huge amount of waste was disgusting.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again, children should be our focus if we want to create a better future. People say you should respect the elderly, I believe we should respect the youth and the future we are creating. Don't punish them for our failures.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think providing these services to more people would be better actually. It would be a massive help to cost of living and reduce pressure on social and health services of all children were given free school meals	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Do we really need to be keeping kitchens open during school holidays ...	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The school meals currently provided are absolutely disgusting so this is a bit worrying, these are a vital part of many children's diet and should have more investment.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Ditto	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It is a sorry state of affairs with the UK just now. Food banks, free meals, what is going on! Scottish Government should prioritise on the day job and shut up about Indi Ref 2	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I know cuts have to be passed down but this is unbelievable. The UK and Scottish Govt should work together and forget indie2!!!	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	What is the point if you cannot support the new generation of kids working hard to better their futures	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free instrumental tuition in schools allows those, who may not otherwise, have an opportunity to learn to play an instrument. This fosters many skills for life, learning and work.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	no undrestand this msg	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Why pay council tax.	7. The respondent's comment was either not relevant to the question, inappropriate and/or contained personal and sensitive information.	This comment is not relevant.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals should only be provided for families who are entitled to benefits. The families who can afford it should pay.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Universal Free School Meals is the responsibility of the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Children whose families can afford to pay for school meals should continue to do so. There is no need for everyone to have free school meals. Investing in music provision is important provided that families are not expected to pay high fees.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Universal Free School Meals is the responsibility of the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The plan to give all children free meals is crazy in areas where parents can well afford. The system needs looked at again- payments to families are essential but there needs to be a safeguard that it cannot be spent on other things; IE uniform grant is for kids uniform etc. This money is a lifeline for many families but some of the money is squandered	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Universal Free School Meals is the responsibility of the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Providing free school meals to all primary children should be a priority.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Scottish Government has made a national commitment to the further roll out of FSM to P6 and P7 children. The council will implement this following national agreement.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Breakfast clubs should be charged for again; people are not using them as a breakfast provision for their children but as free childcare.....I know, I run one. Free lunches for all P1-5 are a complete waste of money; the kids don't like them and most of the food goes in the bucket.....I know, I work in the lunch hall.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	FSM for P1-5 pupils is a national requirement across Scotland.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Also I know this is a Scottish Government scheme but Free School Meals to all P1-P5 pupils is a total waste of money. The food waste is staggering, basically we are buying food for children to throw in the bin!! Not all families with children in P1-P5 need Free School Meals... some of our families are very wealthy and do not need this!! We often see children bringing their own lunch from home just incase they don't like the school meal! Total waste of money!!!	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Universal Free School Meals is the responsibility of the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The Scots Government have been promising free school meals for all primary school children for years and each year pledge to do it and then don't. For some kids this is their only hot meal. This needs to be brought in immediately.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. This proposal is out with the control of West Lothian Council.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Providing free meals to all P1-P5 is unnecessary and a waste of money. The daily food waste is astonishing! Someone in authority should visit school lunch halls to see for themselves. Many parents order a school meal simply because it's 'free' and also send their child to school with a packed lunch just incase they don't like the school meal.... Tens of thousands of pounds could be saved here if this was addressed!	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals for all P1-P5 pupils is a waste of money. Many parents do not need this. It would make more sense to increase the benefit cap to capture more parents on middle incomes than give free to all. The food waste in school is enormous with many children bringing their own packed lunch from home incase they don't like the school lunch ordered by the parent.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If the joint household income is in excess of £50,000 a year, then the parents should pay for school meals.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	All pupils who are entitled to free school meals are also not using this service so could a survey be brought out instead of the funding being issued to pupils who are never going to use the service to reduce costs?	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Lunches, uniforms etc should all be means tested rather than a blanket cover such as the current free lunches for all pupils of certain ages.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think these services are key to support our most vulnerable families during very difficult times. I don't think we should provide universal free meals but should focus on the lowest income and vulnerable pupils.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I don't feel free school meals are necessary for those of us that can afford to pay.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Would be happy for this stuff to be means tested.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Happy for those who can afford to pay to pay for their own children	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Children from low income families should benefit from free school meals only	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals should be offered to those who need it even if that means the council using discretion to provide to those who fall out with the govt criteria eg some who really need meals are just out with income criteria and I would like a council who recognises that and protects those people.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I think we could save money by only offering free school meals to those who need it, not everyone. I am happy to pay for my child's food	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school only to children who need it.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Every school child so have a free meal	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Increase the allowed earnings threshold and stop free school meals for all. That would help more families in need whilst saving a fortune.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	yes frre meals for all kids	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals should be provided for all school children.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Clothing grants should be removed. Lots of charities in place for providing free school clothes.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	People receive child benefit and tax credits for the purpose of feeding and clothing their child so this service is really not required	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals for all primary ages would be amazing 🙌, not sure if that will work	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I feel strongly about these services remaining but feel that all children should receive a free school meal.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I don't feel the need for everyone to receive free school meals, milk, etc these should only be provided for the people who need them.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	So where does the saving come from, nothing on your statement about details where savings your claiming will be made with any clarity. I also disagree with the Scottish government approach to free for all, I deliberately provided packed lunch to my children in primary in order to not take up any free provision when I was full able to make payment for school meals. For me as a parent you should be able to opt out of the free school meals and know that money is being allocated to resources elsewhere in the education system. Having a school where all meals are free for all yet the school can't afford to buy paper and pens or colouring crayons for the children is simply wrong!	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Only children who need free meals including breakfast should receive.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Saving on education yet fund free clothing. I bet the majority of people that claims free clothing have a phone contract and at least some spending that could be diverted to an ASDA uniform. Not required.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Fortunately we have no issue clothing or feeding our child so do not rely on WLC to do this. I do know that some parents, even though they do not need it, have their child take a free packed lunch on a Friday for example. This does increase costs which I feel could be redirect to feeding children who really need it.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	We should only be providing help to those who need it.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	At what point do the parents get involved with feeding/clothing their children. HMRC still have Working Tax Credits and Childrens tax Credits which is paid by the UK government to cover these costs. Why should the tax payers foot this cost whilst the parents can easily afford new phones and plenty of tattoos. The cost of school clothing sold by Tesco and Asda are reasonable priced and friends with children at school say some schools work an exchange of uniform once the pupils outgrow them.The school	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The above does not explain what the Scottish Government funding levels are and what change this would mean - more or less free school meals? I presume the latter. Young people and families should be given what they need. Ideally this should be means tested rather than free for all and that is perhaps where savings could be made across the piece. Children should receive more support in school to 'enjoy' the free food that they are provided and adults in that environment should be encouraged to sit down and eat with the children to ensure tummies are filled, but also that waste is reduced. Has the council considered combining the provision of food for children and the elderly in the local community (for those elderly people able to get to school buildings). Does this create any opportunities to reduce heating and resource costs elsewhere? My understanding is that there are great welfare benefits to be had from bringing children and elderly together.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals are vital and for some of our children and families it may be the only meals they get in a day.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Clothing allowances should be paid but it is clear some parents use this money for other things including for themselves leaving children without and services having to step in and provide additional support.	8. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	All young primary school students should get a free school lunch from P1 to P7 and again not just the deprived households.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Scottish Government has provided a parliamentary commitment to provide this. P1-P5 children are already universally in receipt of free school meals.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I feel the free school meals for all is not necessary. Of course those who need, meet requirements for free school meals should get these but currently my child receives free meals, when I could be paying for it.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I disagree with the free provision for school meals and breakfast for all as only those who are in desperate need of this should be receiving this. Why do certain council employees within schools also get access to free meals throughout their day? When this would not be afforded in other workplaces.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	School clothing grants should be vouchers to make sure that it's spent on the children	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free school meals should NOT be available to all children most parents can afford school meals and are willing to pay this could be huge savings for council	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Can the government not be questioned about this provision?	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Many families who would not qualify for free school meals are actually living in poverty and they will become more reliant on free school meals and breakfast clubs etc.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The free school meals provision needs to be reviewed. I was perfectly able and willing to pay for my daughter but was not allowed to.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Not everyone needs a free school meal for their child. This should be done on a means tested basis and only given to those in need. With breakfast club maybe there should be a minimal charge for this, again with means testing to ensure those in need are catered for.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Free meals should be means tested and not available to all. Music provision should be nominal charge only if at all for the future generation.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It is unclear from the above what the change is. Have the council been supporting additional free school meals/ lunches? - it is difficult to comment without more information.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Those most in need should be prioritised. Universal provisions should be reviewed by the Scottish Government.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Universal provision is required by legislation, but this, and similar comments can be brought to the attention of the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I work 20 hours per week minimum wage as a single mum and I apparently earn too much for school meals.	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	Thank you for your response. Provision of FSM and free breakfasts is in line with national legislative requirements and criteria.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Threshold is too low	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council has agreed the provision of school clothing grant, including the level of income below which it is paid, during budget deliberations. Clothing Grants are targeted at those most in need.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	uniform grants thresholds is far too low	8. This suggestion is out with the responsibility of West Lothian Council. Where relevant, we will forward these comments to our partner organisations.	The council has agreed the provision of school clothing grant, including the level of income below which it is paid, during budget deliberations. Clothing Grants are targeted at those most in need.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	What does this mean though? Presumably aligning to sg means reducing current provision if you're saving nearly a million? The political speak in this is ridiculous and you are deliberately being vague so people don't know what you're actually proposing	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	You need to give us facts and figures of where these savings will come from, aligned with who/what!? Again, we are making this far more difficult for families and young people who need our support more than ever!	9. The respondent made a comment on the survey question.	Provision will continue, but specific funding will now be provided by the Scottish Government.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is not clear how the saving would be obtained.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	That all sounds good but what is not clear is how it would result in an estimated saving of £890,000. Again, impossible to comment without a clear idea of what exactly is being sacrificed/rationalized in order to achieve the stated aims.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	What is ACTUALLY being cut here?!	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This statement is vague at best. It does not specify what would be cut to align with Scottish government funding.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	More information would be needed. The proposal doesn't state if the only money that would be used to fund these services would be Scottish Government funding or if the council will continue to additionally fund in addition to Scottish Government funding. The proposal also doesn't provide information about what this will mean practically for these services.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Not sure you are telling me where the saving would come from, this money should be increased due to poverty at the moment.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	All you have said here is that we will continue to do X. How is continuing to do the same saving money? This is vague and ill described.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Align free school meal..'' needs to move beyond jargon and explain clearly that presumably either this service will be cut, or some families will be charged for services - this needs to be spelt out much more clearly as it is too vague	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is confusing.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again what are you trying to say?!!!	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The information being given to be commented on is so vague it makes it impossible to answer and in some cases understand and therefore I have been unable to give Frank response	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again, I'm confused. Your paragraph above seems to extol wonderful initiatives offered by the council, but caveats it with a massive £ value in savings we can get by providing less of it. Maybe I'm missing the point of this whole questionnaire. Is it just to make the Council feel better about shafting people? Or making people agree with the shafting before implementation. Ragged trousered philanthropists indeed!! I want to see a breakdown of your numbers.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This sounds like a reduction in a vital service. The details of the impact of these cuts, and therefore these savings need to be fully detailed to allow a more detailed response to this questions.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	More detail required on this statement. Not clear how you are making a saving?	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Not clear if this means improving, reducing or maintaining school meal, breakfast club etc. Please be clearer about the intention or what is the point in asking people their thoughts.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	What will the changes mean? Again, not enough detail to judge the impact this might have though I would imagine this would disproportionately affect poorer families.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is confusing.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Unable to make provide a constructive comment as there is no detail as to how it would affect individuals.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Not enough detail provided.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	'Tis is not clear about what would actually change! Aligning to government funding doesn't tell me what would be cut exactly! This survey us a disgrace as nothing is clearly explained for the lay person and no clear stipulations are made annoy exactly what and how much things will be cut by.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I don't fully understand this part	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The format of this survey is poor and does not lend itself to true scrutiny of the proposals. The survey is badly designed and off putting to many given the large blurb of text under each heading - the language is in business speak which is essentially meaningless. There is a lack of clarity on the proposals and the reader is left to assume what the blurb is getting at. This survey should have been in plain English with examples of the proposals which would support greater engagement with the activity. There should be space for feedback on the methodology being used also - this has not been made available which adds to suspicion that the whole process is already decided, and course of action is already determined. The council and COSLA must do more to protect our communities and demand a fair settlement from the Scottish Government. This exercise highlights the political failure of the funding model and it will be the local community that suffers as a result. The end of the survey does not have a 'Finish' button, merely a 'Next'. Overall - very poor approach.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Again, unclear where the saving is. What do WLC do just now and what is Scot Gov funding levels?!?! How are we meant to be consulted when the full information isn't shared or made clear.	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	You haven't explained to someone who isn't informed on the details of funding levels what this actually means. Does that mean more affluent families will have to pay for the school meals and breakfast club and music provision? I am supportive as long it works logistically and there's no stigma able to arise between those receiving free provision and those who pay.	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	See my answers above. The proposal appears to be purposely obtuse rather than detailing how the savings would be made	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This appears to psh the focus of what happens in this area to the Scottish Government. That is not something which we view as bad in itself, but again it is going to affect the worst off in society, which is not an approach that the LLBCC can condone. Further engagement and explanation of the detail is requested.	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I can't make an informed comment if the pros and cons aren't clear. Does aligning funding to Scot Gov level represent a reduction in service in West Lothian? Why not just make the saving if it's clearly a good idea, why are you spending money and asking the public to spend time on this survey if it's a rubber stamp? In the context of public savings, if all the options for savings in this survey are as clearly net benefit to public as described, why not save a little more money by not doing this survey?	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The format of this survey is poor and does not lend itself to true scrutiny of the proposals. The survey is badly designed and off putting to many given the large blurb of text under each heading - the language is in business speak which is essentially meaningless. There is a lack of clarity on the proposals and the reader is left to assume what the blurb is getting at. This survey should have been in plain English with examples of the proposals which would support greater engagement with the activity.	9. The respondent made a comment on the survey question.	Thank you for your comment about the survey, the council will carefully consider all feedback and use it to review and improve our consultation approach.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	The lack of real facts and figures about what is going to change makes it a challenge to comment effectively. More information is required before any meaningful consultation can take place. We should be provided with a statement for each section and the option to agree, disagree or have no opinion. I would strongly urge the council to re-present this consultation in a more user friendly format.	9. The respondent made a comment on the survey question.	Thank you for your comment about the survey, the council will carefully consider all feedback and use it to review and improve our consultation approach.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This statement gives NO indication of how this current provision is to being considered being reduced and does not say if the cost savings of £890,000 will negatively impact recipients of the present levels of service.	9. The respondent made a comment on the survey question.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This is worded in a way that is deliberately misleading and difficult to know what is planned. If you are taking away breakfast clubs and music lessons then you are asking the most vulnerable to pay. That will see children go hungry, parents lose work without vital childcare from breakfast clubs and music lessons available on to the wealthy. All of this increases inequality. ;	9. The respondent made a comment on the survey question.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	What does this mean? A reduction of free services or an increase as a result of more government funding?	9. The respondent made a comment on the survey question.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Not sure how there would be a saving here if the status quo is maintained - unless this means breakfast club is not open to all pupils after the cuts. Not clear.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As a resident I do not understand what this will mean to the services I receive due to the vague and broad terms used in this consultation document.	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	What are charging for and how will the service change. Insufficient details to fully consider	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	Can I assume that 'align' means cut here?	9. The respondent made a comment on the survey question.	Provision will continue, but funded from an alternative source,
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	What's Scottish Government funding levels? Don't know how you expect responses when your context isn't fully giving details of proposed savings will be made, not enough detailed information given.	9. The respondent made a comment on the survey question.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	This isn't clear at all what would be cut to align this with budget levels?	9. The respondent made a comment on the survey question.	Thank you for your response.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	As with all other sections, you do not provide very much detail on which the public can comment.	9. The respondent made a comment on the survey question.	Thank you for your comment.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If you are maintaining levels how are you saving money?	9. The respondent made a comment on the survey question.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	How is a saving delivered by by aligning delivery of these activities or payments with what is provided for under government funding or maintains at current levels. Are services currently being provided at costs higher than available funding and if so what specifically would be reduced to deliver savings.	9. The respondent made a comment on the survey question.	Provision will continue, funded from a different source.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It is not clear what "realignment with SG funding levels" means. Does this mean reduction of breakfast club and music lessons etc in line with the reduction in SG funding? How can we meaningfully comment on such a vague and possibly misleading question?	9. The respondent made a comment on the survey question.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	I'm not clear on your objectives here. You appear to be saying you are maintaining levels or aligning services yet you are saving money. More detail required before I can comment.	9. The respondent made a comment on the survey question.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	If these services are continuing how can savings be made? Totally confusing	9. The respondent made a comment on the survey question.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.
Modernising our council	1E Realignment of free provision in schools to match Scottish Government commitments and funding, and maintain school clothing grants at current levels	It's not clear from above where the savings will be found. Please consult with plain language instead of euphemisms.	9. The respondent made a comment on the survey question.	Provision will continue, but funded by the Scottish Government which allows the Council to reduce the funding it currently provides.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the school day	More use of outside providers would facilitate this and enhance children's learning experiences with the added long term benefit of better educated citizens.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	As long as children aren't being penalised and still get the education that they deserve and parents who work during school hours aren't unduly affected by having to find childcare for short periods of time.	1. The respondent advised that they agree with the proposal.	The proposal will not necessarily reduce school hours so there need not be any impact on childcare.
Modernising our council	1F Restructuring the school day	Providing after school activities within a school day may offer children with transport struggles an opportunity to participate. ; Homework rooms, within school hours, this will help with attainment.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Hybrid learning could be introduced for Secondary school which would maintain hours without direct teacher involvement.; Parents should have more involvement at school level to support decision making and impact assessment.	1. The respondent advised that they agree with the proposal.	Opportunities for parental involvement exist through Parent Councils.
Modernising our council	1F Restructuring the school day	Opportunity to support well being of children and young people and develop opportunities for wider achievement	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	This sounds good in theory but schools may need additional resources to do this rather than less.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Education should be taking a share of the cuts. Overly protected by politicians at expense of many other vital services.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	As long as the standard of education is kept I see no problem with this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Whilst this is a possible option, it must be a robust model that is proposed f	1. The respondent advised that they agree with the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the school day	Sea reasonable what is the plan for children to be doing with less teacher face time	1. The respondent advised that they agree with the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the school day	As long as children still learn.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	As long as learning is not going to be impacted - and thought was given around how children during transtion might need a but more direct time with their new teacher.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	If this can be done whilst still raising the levels of attainment then it makes sense. If attainment improvements cannot be guaranteed then alternative ideas should be reviewed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Sounds good just get the holidays sorted out and aligned to edinburgh better. Get Sinclair academy online and reducing transport costs for kids and get kids in from neighbouring school in SQ	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Make this time inclusive to assist varied learning styles, develop life skills and create education in a fun environment	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	As long as this provides a worthwhile and valuable experience for children, then fair enough. It is vital though that this time of filled with "value add" and is not simply a means to get the kids off the books in order to save money	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Without further details unable to comment. However, so long as pupils get the full support they need, especially those with dyslexia, dysplasia and ADHD all of which seem to be increasing, that seems OK, although achievements were down this year. Need to encourage more, not less, assessment rather than exams which put too much pressure on the children.	1. The respondent advised that they agree with the proposal.	The proposal would apply to all children, but the significant additional support provided to some pupils with additional support needs or to address socio-economic disadvantage would remain.
Modernising our council	1F Restructuring the school day	As long as continuity in class is maintained this could leave time for extracurricular items.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	No - education shouldn't be reduced. What's the point of keeping them in school but not learning. They should be learning.	1. The respondent advised that they agree with the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the school day	This sounds like a feasible and manageable solutuon	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Agree. Children don't just learn from teachers,	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Reducing the secondary school week by 50 minutes a week is only a 10 minute a day reduction and can easily be managed without compromising on pupils learning experience. I entirely support this measure	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	As long as staffing hours are not cut or impacting negatively on pupils. Schools are places that is not just for learning but often a way of massively looking after wellbeing and building confidence for them.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	As long as the children gained something positive from the alternative learning experiences	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the school day	If all RCCT was given on the Friday morning to all Primary school teachers, this would help continuity throughout the week for pupils. It would also impact on work overload, mental health (teachers off on long term absence due to stress which costs the council) and disparity in work life balance. It would save money and give children and teachers a chance to experience and deliver a high quality education programme.; If schools were closed on Fridays you would be saving on heating and electricity. CAT sessions could be online. Many parents have child care arrangements already in place for the Friday.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Good idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	What can I say great stuff.yet again	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I think this is a good idea, but that afternoon sessions should be optional so that pupils can choose to do activities outside of school or study in the afternoons.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This doesn't make sense to me	1. The respondent advised that they agree with the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	Looks amazing 😊	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Agree but support needs to be available	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	What would take the place of teacher contact time? Life skills, practical hands on skills would be beneficial at all stages from primary up to high school	1. The respondent advised that they agree with the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	This would be a cost effective way of saving money as there wouldn't be a need to NCCCT teachers and they could be redeployed back into schools only worry this would lead to less jobs?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I'd be open to this. My only concern is that as a Home Economics teacher, 50 minutes is not a lot of time to cook something. I'd be interested to learn more about this.	1. The respondent advised that they agree with the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	Restructure all you want not much learning time lost.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	As long as the children are getting properly supervised and educated within the school is good but what extra activities are being considered when teachers reduce their time with them? Also is it not more expensive to bring in specialist help than for the teachers to educate and supervise the pupils. If teachers teaching time is being reduced will their wages reflect this?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I think this would be beneficial for pupils and families, and would relieve pressure on SLT to deliver RCCT time to teachers. I would be concerned about vulnerable children and families though.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I don't feel 50 minutes would have a significant impact on L&T. I understand this is essential and will be largely unavoidable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	If school opening times are not reduced then this could be a potential saving	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	The time the kids are in school is more than enough.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I think this is a good idea. I feel alternative learning experiences is exactly what children need for many reasons, in particular the variety of new things and possible hands on play and new teaching methods.; For secondary schools this isn't clear what will be done in these hours where the hours are saved? Will the children have more study/break time? This needs to be clearer. It needs to still have structure and children still need to be accountable for this time and be assisted with useful and educational use of this time?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	If you can save 2.4m on this then do so but don't reduce teacher numbers	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This is an interesting concept and would like to see how it would work.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Fantastic	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	After reading the above, I will continue to trust your decisions in the areas I have no experience in , but thank you for the opportunity to co-operate !	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This could work but only by getting specialists back into school, not reducing experts in their field or teachers or support staff in our schools.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Teachers are not coping - workload is increasing to deal with pupil needs/behaviours and endless paperwork. The curriculum is far too wide and impossible to cover. I agree teachers need increased non contact time in order to have any chance of supporting attainment. This would improve staff wellbeing and in turn reduce staff absences and stress.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the School Day	I think that this would be an ideal time to look at enhanced pupil welfare, using non-teaching staff with a social pedagogy approach for that wider learning about the environment etc through first-hand experience.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I would like to see this change as long as there is no loss to the support the children need.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	It is clear that at the moment pupils are being given the best structure to their school day and has resulted in much improved results for them. They already have really positive learning experiences. I believe that the length of the school day does not need to change .What has been proposed is a good way forward as long as it enhances the learning experience, and it maintains continuity.	1. The respondent advised that they agree with the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	I would welcome more opportunities for children to learn more practical skills from the get go.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Teachers are not coping - workload is increasing to deal with pupil needs/behaviours and endless paperwork. The curriculum is far too wide and impossible to cover. I agree teachers need increased non contact time in order to have any chance of supporting attainment. This would improve staff wellbeing and in turn reduce staff absences and stress.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	As long as ample funding was provided for these 'alternative learning experiences'. which may cost more than the proposed 2.4 million saving.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Staff are overworked and stressed and the complex needs in schools are increasing making staff workload higher. Increased noncontact time will reduce stress for staff.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	The government wish to reduce the contact time to 20.5 hours so I think you should plan for that instead.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I agree with a re-structure and i feel the move to a four day working week in secondary, with 4 x 8 period days would help with staff retention and overall wellbeing.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Agree with this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Again this would only work if you can ensure good provision by support staff with a robust training and monitoring system.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This is confusing at least . How do you reduce the school week by 50 mins without reducing start and end times., and how does this make savings ? Teaching staff are contracted 35 hours per week regardless of contact time . At a time when education is recovering from a global pandemic is it wise to reduce teaching time. The 50 minutes of "Alternative Learning Experiences" would create costs when we already have teachers in place.	1. The respondent advised that they agree with the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	As long as they still get schooling have no problem	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I think that non-teaching staff could also provide quality experiences for children. It would be great if people from other sectors could work with schools to deliver part of the curriculum, to help children to learn about different career paths from an early age.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Interested to see the changes implemented here.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	As long as the alternative learning experiences are of substance	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This would make so much sense. As a parent and a teacher, I wholly support this. It would also meet other needs to ensure adequate staffing, children accessing other services and activities they would benefit from, teachers could then plan more effectively.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	If it was a digital lesson at home 1st then maybe	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I would support this measure in principal, however, more information regarding alternative learning experiences would need to be provided.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Broadly agree with this but would like more detail to make sure the quality of learning is not diluted.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Yes, this cost saving of £2.4 M is needed, please proceed with these changes.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	As long as you are ensuring that the children are receiving a full rounded education.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This sounds like a good opportunity to ensure children have the highest quality input during their time in school. 20 quality hours with a teacher, with the other 2.5hrs provided by e.g. sports coaches, arts specialists will provide a rich and varied experience for children. It is important that the only 'worth' is not placed on the direct time in a classroom with a teacher but that the wide and diverse workforce is valued- this is the world our children are entering into and it is important that not only a narrow view is presented to them and that the contributions and skills of others are valued equally to the academic input of teachers.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the School Day	I think this could be a good saving.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	If you can keep education at the same level with no negative impact and save £2.4 million it should have been implemented before now.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	You could do this by extending children's lunch breaks as this is definitely a problem a lot of schools are struggling with. Many children are only getting 15 minutes to eat due to the turnover rate to get them all served and seated. This would free up teaching time and extend learning through play whilst maintaining a healthy mental wellbeing	1. The respondent advised that they agree with the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	I suppose that is ok as long as they are getting the same teaching hours as the rest of Scotland.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This sounds an interesting proposal. Alternative learning experiences work well for some people. ; You would need to be very careful that the staff delivering the alternative learning experiences were fully trained and willing to work with young people, even if they displayed challenging behaviours.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I consider this to be a good idea and secondary schools should be in line with other local authorities'.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Good as long as the changes are instrumental to learning	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	My children attend Torphichen Primary who have really pushed forward with agile learning. The past 2 years have been such a wonderful experience for them with them learning how to learn and explore rather than being taught by rote. This is a much more natural way of learning and should be welcomed across the board so long as there is scope to support children who are unable to thrive in that learning environment. It should be done with respect for the learning style and with appropriate support rather than as a cost cutting measure	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This sounds interesting & would be looking for more information on this.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	So long as right curriculum is taught within the reduced timing	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	As long as every child can read write and count, you can make these changes.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	happy with this arrangement	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Sensible proposal as long as pupil discipline does not deteriorate	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	As long as children were learning and gaining experiences from the lost teacher time there shouldn't be an issue. More info on what this could mean would be helpful.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	What are the 'alternate learning experiences' if not provided by teachers? ; ; Opportunity to think creatively about the structure of the school week? ; ; Asymmetric week could be reduced to 4 days with pupils and parents benefitting from a longer weekend for young people to access community and sports	1. The respondent advised that they agree with the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	I believe there has been a number of studies on different methods of teaching, this might not be a bad thing to consider. Providing the children are actually learning something worthwhile and it's not them finding something to do for 50 mins with no actual gain to them.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	As long as they are in school, it's difficult enough for working parent(s) to work around school times. Not all children will respond to this type of learning .	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I think providing alternative learning experiences is a great idea as everyone learns in different ways and in different settings, however, I will be interested to see how this is managed as it will need to be thought through carefully to ensure it is a worthwhile experience for learners and not just a baby-sitting exercise so teachers can receive their increased NCCT.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This is a very big saving. Is it achievable? Please review carefully; If so just get on with it	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I think getting the balance right for parents and employers to make childcare and resource work is crucial so getting this right for all would be good to see with no impact to education for our future Scotland	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Cut play times and make 45mins for lunch.	1. The respondent advised that they agree with the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	Not a good idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Rethink this is a good idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the School Day	I agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This seems like a reasonable adjustment	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This would be positive, and students would be more familiar with the structure of their day when they transition to secondary school.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Makes sense as long as pupils are still supported and have access to the same amount of learning opportunities	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Good idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Again given the context of the financial savings required by the council, this seems a reasonable proposal that would have minimal impact on learning for primary and secondary school children	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Could be okay but children still need time with their teachers.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Sounds a good plan again as long as the time spent outwith being with the teacher offered stimulation and again no vulnerable children fell through the net of teaching support.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Sounds good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	ok if others do it	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Sounds like a reasonable approach.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	As long as the learning and work being completed to the correct level.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I agree agile learning works and PSW's should engage more if these activities cooking, arts and crafts etc.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Seems reasonable. Don't know why local authorities are not more aligned in their approach to a whole host of service provision.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I think it would be good for the continuity of primary and secondary school contact times with teachers to be the same. Since the pandemic literacy and numeracy skills have decreased. By reducing contact time will this not make the gap increased	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Seems fine if the quality of education is maintained	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Sounds like a fantastic idea. Teachers are not parents. They're to educate. Most children switch of after 30 minutes. So shortening their day might improve what they are taking in.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Seems a fair proposal but use the same mind set on the previous question	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	If the proposal brings us in line with other Local Authorities then that is sensible. However West Lothian typically performs well in Education, and it would be a shame if learning declined as a result of this - however there should be ways to mitigate that.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This sounds fair - the standard of education in your schools is excellent as it is, and savings must be made somehow, so if the Education staff feel that this will not be detrimental to children's learning and wellbeing then I'm all for it.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	A very good idea. However I know of no other profession (than teaching) where contact time is so low- as an alternative could teacher contact hours be increased.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Seems like a good approach. Perhaps investment in this time in wellness activities for staff and pupils. I think West Lothian's school week (half day on a Friday) is a huge accolade.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Very good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Agree.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the School Day	Yes	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Good idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Ok	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Agreed	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	if there were crative options that engage all pupils, this could work.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1F Restructuring the School Day	Children have suffered greatly as a result if the Covid period and schools are only just returning to a sense of normality. To make further changes and introduce new staffing to children already struggling to deal with the aftermath of lockdowns and protocols would be detrimental to their educational recovery. External agencies and third party providers can not replace teaching input.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1F Restructuring the School Day	Changes in the traditional school day should definitely be considered. Learning experiences come in many different ways and should reflect the diversity of individuals and change/develop as the world around us does. It does not have to be a Teacher facing classroom day to be a valuable learning experience.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1F Restructuring the School Day	Could be worse, I guess.	1. The respondent advised that they agree with the proposal.	Thank you for our response.
Modernising our council	1F Restructuring the School Day	Sounds like a good idea but I am assuming that other staff will be trained accordingly. Sometimes PSW can be old school and do not have a nurturing approach. This has to be identified and correct support given especially when pupils will be spending time with these people more. ;	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I would have no issue with this as long as the alternative learning opportunities provided are really valuable. I would not want to see any increase in home-learning/home work as a direct of the reduced teaching time. I believe there is already too much pressure on parents/families to ensure homework is completed on a weekly basis (based on primary school experience to-date).	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1F Restructuring the School Day	Ok as long as it didn't effect school staff numbers or the opportunities available for pupils	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1F Restructuring the School Day	As long as there is no change to the core school hours (as otherwise people with jobs will have to fund additional after school costs, which may make working not viable)	1. The respondent advised that they agree with the proposal.	The length of the school day will not be affected by this proposal which is to reduce teacher hours not school hours.
Modernising our council	1F Restructuring the School Day	Do more at home	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Pupils have had enough disruption over the last 2 years	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	My high school son does tell me a lot of time can be wasted in classes. He spends time on his phone. Anything that can be done to improve this is welcome. le online learning etc as long as it was structured I feel this would be good	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Start and end times for the day , yes too much free time for kids during the day though with many just doing as they please as not in school ground's	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Sounds like a good way to make a substantial saving to the council with no adverse effect on our learners	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	If this does not have any negative impact on the children then I agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Council should experiment in schools to try out new teaching / learning and gather feedback to find the best methods	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This would ok if the assessment system was adapted to cater for that.;	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1F Restructuring the School Day	I would welcome this approach but the reduction of class contact time must continue to be used to develop other skills and interests for children.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1F Restructuring the School Day	What does this actually mean? "Alternative learning experiences"? ; The school day cannot be reduced any further as this impacts not only on children's learning (investment in the country's future) but also in parents' ability to work. But I also think school time which is spent in PE, music is still valuable and benefits their other learning. It needs to be provided for, though. e.g. appropriate instructors.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1F Restructuring the School Day	Lead professionals for children are responsible for their wellbeing and getting it right. While children are in school the staff are responsible for their care. This could be an opportunity to invest more in children's emotional wellbeing if non-teaching staff are responsible for children more?	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1F Restructuring the School Day	Looks like there are opportunities and a desire to challenge the traditional status quo in terms of school hrs etc. I would also welcome a change to the more traditional curriculum with a view to promoting more life-skill type skills.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the School Day	See huge benefits to this proposal and think it should be seriously considered.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1F Restructuring the School Day	What exactly does alternative learning experiences mean? Activities run by lower paid staff? ; No issue at all with possible realignment of school day if it does not detract from quality educational opportunities.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1F Restructuring the School Day	This would be an effective way to delivery teachers non-contact time if alternative experiences were offered by agencies outside teachers or SLT	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1F Restructuring the School Day	If recognising that children have different learning styles and the changes are in line with this then its a positive	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1F Restructuring the School Day	Anything that helps the children grow and learn in a safe and secure environment works for me. Can't quite figure out how the start and end time of school will remain the same but reducing the school week by 50 minutes ?? baffles me !	1. The respondent advised that they agree with the proposal.	The length of the school day will not be affected by this proposal which is to reduce teacher hours not school hours.
Modernising our council	1F Restructuring the School Day	Good idea	1. The respondent advised that they agree with the proposal.	Thank you for your comment
Modernising our council	1F Restructuring the School Day	Good idea as long as the learning is not impacted. If covid has taught us anything surely it is that we need to adapt & support alternative ways of providing the learning experience	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1F Restructuring the School Day	I have no objection to adjusting school day structure however this should be led by learning and teaching theory/evidence. Schools should not be used as a child care facility.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I think this would be beneficial	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	this appears to be a big potential cost reduction for simply realignment of the structure of a school week. If it meets the Scottish Government requirements then why would anyone spend £2.4 M more than needed?	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	As long as there is no change to start and end times then shouldn't be an issue for childcare otherwise could cause issues and be more expensive for the council	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Use the community to provide extra-curricular activities and experiences to pupils as much as possible.; Let out school estate to providers to generate income.; Invest in and value your teaching profession - it will benefit the Council in the long run when the future society it produces is educated and skilled.	1. The respondent advised that they agree with the proposal.	Thank you for your response. Other suitably qualified staff can lead activities in the remaining time, and this can include community partnership.
Modernising our council	1F Restructuring the School Day	I also agree with alternative teaching/ learning opportunities for children as not all children thrive in a traditional classroom basis	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I wholeheartedly align with anything that ensures teachers are given as much support to plan, update etc lessons during school hours without the detriment to the children. ; ;	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	good, frankly the less contact some "teachers" have with kids the better	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Learning doesn't all need to be in the classroom. How about a clubs afternoon with parents/ others helping to lead chess/ music (a choir?)/ sport - table tennis, badminton as well as the usual football. There are some good things we have lost along the way.	1. The respondent advised that they agree with the proposal.	Thank you for your response. Other suitably qualified staff can lead activities in the remaining time, and this can include community partnership.
Modernising our council	1F Restructuring the School Day	Teacher contact may be reduced future. As a teacher I would like contact to be reduced further - but that's a matter for the unions and Scottish government. How can you reduce pupil contact without changing the school start and finish time? It would be nice to have more that 15 mins break and 30 mins for lunch (west calder high) but we need to chaperone the kids anyway so how can this been done?	1. The respondent advised that they agree with the proposal.	Thank you for your response. Other suitably qualified staff can lead activities in the remaining time.
Modernising our council	1F Restructuring the School Day	Only if content will not be removed. The means of teaching can be self-learning, etc. with less teacher contact time, as long as there is an option for supporting those who need it.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Potentially a good idea, but who would provide the alternative learning experiences? Also, this would impact on attainment if children are receiving 2.5 hours less time with a teacher. If active schools or similar were providing the alternative experiences or other agencies that were able to tackle some of the E's and O's from other curricular areas then this could work, with teachers still able to spend the same time on the core areas that are reported on for attainment.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This is a solution focussed idea but the planning around this would need careful consideration in terms of the alternative provision and how in practice this would work. Asymmetrical week would allow for teacher planning time without the need for cover costs which will only become more problematic with the decreased contact time proposed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I can't comment on how this effects primary pupils, from my understanding of what is written above this seems like a feasible solution in secondary that is not detrimental to pupil experience or teacher workload,	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	School should not be used for community groups - they should be in partnerships. Cannot be cost effective to open schools at the weekend.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	If it doesn't effect the learning of a child or lead to staff cuts this sounds promising.	1. The respondent advised that they agree with the proposal.	Thank you for your response.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the School Day	Open to alternative learning experiences as we don't see any additional sports, music, home economics, sewing, knitting etc. I would like the school day to include a (close to) full day on a Friday like the rest of Scotland (not Lothian). It's not convenient for working parents.	1. The respondent advised that they agree with the proposal.	Thank you for your response. No change to the asymmetric week is planned.
Modernising our council	1F Restructuring the School Day	I think play and socialisation are undervalued so this change may allow for more importance and opportunity for both.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I fully support this measure which will deliver savings without adversely impacting on attainment.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I would agreebut would need to be primary only	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This should be used as an opportunity to deliver high quality choices for extra-curricular activities such as sport/fitness/forest schools. This would also help to meet the government incentive to reduce childhood obesity. Children should have at least an hour per day of exercise.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	No major issue with this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	As long as there was no change to the school hours and the alternative learning opportunities were valuable and not simply "filler" then this seems reasonable.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	If the paragraph above is accurate, it seems hard to object to this, however what's key is ensuring that those 22.5hours are in fact fulfilled - too often teachers are absent with no subject specialist supply, and a huge amount of learning time lost as a result. So, reducing the school week by a total of 50 mins is far less concerning than weeks of e.g. no science teacher.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Change the school day to align with teachers.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I agree as long as it primary	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	That may work if children attend schools in their own catchment areas and are not overloaded in classrooms with pupils from out of catchment applications.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	As long as support staff wages are not cut in the process with aligned hours	1. The respondent advised that they agree with the proposal.	Thank you for your response. The proposal will not impact on teacher salaries.
Modernising our council	1F Restructuring the School Day	Good idea! Children can learn in the absence of teachers - fact. Its time the dinosaurs in the teaching profession, particularly those in the 'professional associations', dragged themselves kicking and screaming into the 21st century.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Im in favour of alterative learning experiences but by whom?	1. The respondent advised that they agree with the proposal.	Thank you for your response. Other qualified staff can lead activities in the remaining time.
Modernising our council	1F Restructuring the School Day	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Agree. Has the council considered moving to a four day school week to reduce transport and heating costs which would not impact on school provision?	1. The respondent advised that they agree with the proposal.	Thank you for your response. The number of days that schools must open is set by regulation, but this idea could be explored on a national basis with the Scottish Government with the suggestion that Council's are given greater flexibility.
Modernising our council	1F Restructuring the School Day	As long as the effects were not going to be detrimental to the childrens education and necessary support available.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	To align school times would be good.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Could work.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I see no immediate issues with proposal however I would like further detail on how the significant saving can be made.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Giving opportunities for life skills- this could be used in non teacher times. First aid etc	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I agree as looking as children who find this difficult or have additional needs are fully supported by person to person staffing	1. The respondent advised that they agree with the proposal.	Thank you for your response. No change is planned for support arrangements for ASN pupils as part of this proposal.
Modernising our council	1F Restructuring the School Day	Not supportive unless the reducing in teaching time is meet with teaching the children other life skills like outdoor activities for primary / walking daily miles and life skills for secondary school children rather than additional ' free time'.	1. The respondent advised that they agree with the proposal.	Thank you for your response. Other suitably qualified staff can lead activities in the remaining time.
Modernising our council	1F Restructuring the School Day	Agree to aligning primary school time to 22.5 hours per week.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Good planning very much in agreement here. The delivery of the curriculum does not need to be compromised especially with use of technology, on-line resources, access from home	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I think this could be a good thing .	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the School Day	If there was more digital and online learning, I think this would be positive and help children learn how to regulate their time and learning themselves and start them on journey for many jobs/careers that use this kind of technology for learning/working.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Could work depends on how the non teaching time is filled. Engage with sports clubs and sports governing bodies to provide additional sporting opportunities for this time. Or expressive arts music groups to offer alternative learning opportunities.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This is the only way forward. It will make no difference to educational outcomes.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Yes agreed, children learn better when they start later	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Yes. For 2.4 million pounds let's try this	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Yes absolutely, that makes sense from the way it is described above.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	As long as the alternative activities are good e.g. more sports, play, art, reading etc.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1F Restructuring the School Day	Again as long as the education of the kids is improved then it seems a good idea.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1F Restructuring the School Day	Again, need to see detail but sounds sensible.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1F Restructuring the School Day	Seems a reasonable approach, but again, not fully informed.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1F Restructuring the School Day	I think this in theory sounds good, but what would the children be doing the rest of the time	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1F Restructuring the School Day	I have no bother with the children having a longer lunch time. I think this would bring a saving for many families as children could come home for lunch instead of packed lunches. I disagree that they get enough contact time. Classes are too short and are often not covered by the subject teacher. The standards of education is constantly dropping and is geared purely towards passing tests rather than gaining knowledge.	1. The respondent advised that they agree with the proposal.	Thank you for your comment.
Modernising our council	1F Restructuring the School Day	This doesn't really make sense because it is poorly described. But if children are getting decent breaks and no less teacher time it seems OK. They should be getting evidence based drugs prevention course as per Scottish government recommendations.	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Agree with proposal	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

Modernising our council	1F Restructuring the School Day	Agree	1. The respondent advised that they agree with the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Teachers are one of our most valuable assets and should be treated as required to retain their motivation and quality learning for our pupils. I would be keen to know if the teachers imminent pay award will take cognisance of this proposal to carry our less direct teaching time?; Whilst these proposals are for the school day, consideration should be given to how the extended school day can play a greater role in supporting desired outcomes for our pupils. Suitable extracurricular provision and engagement with community activities are no utilised anywhere near enough to support the attainment, health and wellbeing and development of life/job skills for pupils.	1. The respondent advised that they agree with the proposal.	Thank you for your response. Teachers in west Lothian will benefit from the national pay award based on their current hours of work which will remain unaltered. Suitable alternative and community activities could for part of the proposal, as suggested.
Modernising our council	1F Restructuring the School Day	I think this would be a great idea and if possible longer breaks for pupils or add in things like library time or self study time for secondary schools.	1. The respondent advised that they agree with the proposal.	Thank you for your response.
Modernising our council	1F Restructuring the School Day	Would the 2.4 million be saved with the salaries saved for teachers and replaced by pupil support staff? If the teacher contact time is 22.5 hour pw for primary then it would be realistic to pay for the hours contracted and have the balance of the hours required covered by support staff, if carried out on a rotational basis one support member of staff could be used between all classes	1. The respondent advised that they agree with the proposal.	Thank you for your response.
Modernising our council	1F Restructuring the School Day	Is this another way of cutting teacher pay? It could be a good opportunity to put more value on applied learning or valuing a greater diversity of skills	1. The respondent advised that they agree with the proposal.	Thank you for your response. Teachers in west Lothian will benefit from the national pay award based on their current hours of work which will remain unaltered. Suitable alternative y activities could form part of the proposal, as suggested.
Modernising our council	1F Restructuring the School Day	Sounds as if stringent economies should be made but I am worried that this will diminish standards. If these cuts are now vital, why haven't they been investigated before?	1. The respondent advised that they agree with the proposal.	Thank you for your response. The proposed reductions are necessary now in response to reduced funding.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the School Day	On the Secondary school suggestion, if it is suggesting a similar use of self-learning technology and a similar opportunity to engage with future skills STEM subjects/modern engineering, this would also seem helpful.	1. The respondent advised that they agree with the proposal.	Thank you for your response.
Modernising our council	1F Restructuring the School Day	On the primary school suggestion, it feels like this should be graduate through the school years, with primary one, two, and three children having no reduction in contact time (for social development reasons), but then the increased use of technology self-learn through four to seven. And if that self-learning could also provide opportunities to stimulate those with an interest in STEM topics, particularly the logical building blocks of modern digital engineering, that would seem a helpful proposal.;	1. The respondent advised that they agree with the proposal.	Thank you for your response, which indicates agreement with part of the proposal.
Modernising our council	1F Restructuring the School Day	in higher school but not in primary and the alternative school services	1. The respondent advised that they agree with the proposal.	Thank you for your response, which indicates agreement with part of the proposal.
Modernising our council	1F Restructuring the school day	I can't see how reducing pupil teacher time can possibly benefit the children. You have given no detail on what this would actually mean in hours reduction.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Kids already have limited engagement with teachers. Reducing this further is unacceptable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Reducing school hours will impact on childcare costs and affect the ability of some parents to work. Also reduction in school time for the children that have already missed so much schooling through COVID is a disastrous move.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The proposal will not necessarily reduce school hours so there need not be any impact on childcare.
Modernising our council	1F Restructuring the school day	Any reduction in teaching time would have an impact on education and young people's futures. Not an option. Give the emphasis recently in a communication from the school of the impact of children missing school through unauthorised absences and the impact on education, suggesting removing 50 mins from the school week would equate to around 5 days lost schooling in the year.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the school day	i do not really agree with reduction in the pupil/teacher time especially after the significant lose of education caused by Covid which is evident in the attainment figures.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	The key is ensuring that pupils who are our future are supported as far as possible - teachers are important.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Disagree, how many pupils are concentrating properly given the alternative learning experiences. Armadale academy has a outdoor skills session at the rear of the school and the children are not generally concentrating as the area is open to the public.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Reduced contact time but no change in length to the overall school day. What sorcery is this?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Pupils can benefit from activities and learning not involving direct hands on supervision by a teacher.
Modernising our council	1F Restructuring the school day	as stated previously i doubt very much if teachers are adhering to 22.5 hrs per week if they did then the education system would fail with west lothian council. especially on head teachers who have to do everything from being responsible for the building, looking for terrorist activities in pupils, social workers for pupils and families, health and safety etc etc	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	I do not understand the detail of the changes being proposed here. Given this, I cannot comment on the specifics of this proposal. In principle, I do not agree to teacher/pupil time being reduced particularly as we are currently recovering from the challenges of Covid.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Reducing Teachers face to face time with pupils, brilliant idea NOT, also are you magicians ? Taking 50 minutes away from the school week but not changing the starting or finishing time ?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Pupils can benefit from activities and learning not involving direct hands on supervision by a teacher.
Modernising our council	1F Restructuring the school day	Pupil/student contact time should not be reduced. If anything, it needs to be increased. Education should be a top priority for the council.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	What sort of other activities and how would they be managed. To raise attainment pupils need more support and input not less	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	This could have a huge impact on progress within secondary schools, as it's currently difficult to timetable so that pupils receive all that they are entitled to.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Pupils who have already experienced remote learning as a result of covid should be offered more not less teacher contact time.	2. YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the school day	Less time our children are being taught this is never ever a positive statement I object to this idea. Also those who can take their children to private maths lessons private music lessons and clubs if they can afford to therefore West Lothian Council need to stop cutting back and stealing from our children in terms of schooling and also youth clubs and our children's clubs which are fantastic value for 1.00 entry free. Leave these areas alone. Children have the right to q club to go to in the evenings to hang with friends safely off he street.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Less time.in education. Never do this	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Wow that is a very broad statement - so who would be responsible for the children and where is the quality provision - this is definite no thank you.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	NO NO NO NO - THIS IS UTTERLY RIDICULOUS!!!!!! Our young people have had such a rough deal the last few years, yet you wish to make their education experience even worse!! Some of these children need additional, not less! What a Joke!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	I believe this effectively means - the total period of the school day remaining as is - but direct contact time with teaching professionals reduced, supplemented by increased contact with "unqualified" supervisory staff - probably OK for +50% of students, but an obvious risk on overall student attainment for a significant proportion of the pupils. What is the split on savings between the 2 elements of the proposal? How would the financial savings be achieved - by reducing payment to teaching staff?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Not in favour. Children have already list so much vital class time through covid lockdown. This would disadvantage again the same cohort group	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	From what I can tell this seems to suggest reducing the time children have with teachers. This does not seem to be a great plan for the childrens learning.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	The model in other authorities to have time beyond class for wider experiences has had many barriers in terms of success for learners. If WL were to go down this route, they would have to consider the effectiveness and equity of whatever programme they were to put in place.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Seems like an awful lot of moving the deck chairs on the titanic - how much would it cost to sort all this out? Really feel the young people are so far behind due to pandemic less teaching time is not a good idea.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Would like to see further details but at secondary level contact time with teachers is already at a minimum to deliver teaching needed for success in national exams. I'd be worried there would be a negative impact on pupil attainment if teaching time was reduced.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Not to sure about this one , I fear some pupils will be left behind.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	As a separate comment - if teachers are already only require to be teaching for 22.5 hours a week (!!!) where is the evidence that even less teacher contact time won't impact on educational outcomes. Strongly disagree with this proposal.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The additional teaching hours are currently provided by additional teachers.
Modernising our council	1F Restructuring the school day	Our kids have missed too much education owing to Covid to cut more time	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Totally unacceptable. Our children should not be affected by any more cuts	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Nor reduce hrs in school.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Balance here favours teachers not pupils.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	I have no words for anove proposal! Primary is particular have had enough reduced teacher pupil time in past 2 years. Pupils are way down list of priorities and proposal above supports what I say. Its all about ticking boxes and yet again staff feeling undervalued. Class suzes need to be reduced and increased teacher stuent interaction,not less as you are proposing. Again above statement is just more elaborate waffle	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Less teacher time, less education. Our children are being let down by this, who would look after them as you are turning it into a baby sitting service.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the school day	What would be offered instead? It still needs staffed and children still need to learn!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	So further crippling an education system that is already on its knees and has seen a severe deterioration in effectiveness over the last 3 decades... Does that really sound like a good idea? Unless, of course, you're planning on somehow utilising the extra non-contact time that pupils will have to educate them on how to survive real life in today's world? You know... Things like how to budget, how to tell the time, basic literacy and numeracy skills, how a family of four can survive with 2 parents working 4 jobs between them and still living in poverty... The basics? Yes?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Absolutely not!!! Creating contracts for more school staff to allow children full face-to-face teaching is essential. Teachers need non-contact time but there are no "alternative learning experiences" for children that will be more beneficial than a teacher.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	This is a nonsense that must be resisted at all levels. School is there to educate pupils by teachers and is not simply daycare hours to be ticked off.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	I do not agree with this proposal. Children have missed enough teaching time over the last few years.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Further detail required and clarification on what is being proposed. This statement otherwise makes no logical sense in practice. Proposal is too vague.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	This should not happen, increased pupil teacher time if anything, certainly not reducing it	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	I was under the impression Pupil's went to school to learn and Teachers were paid to teach full-time not part-time, Cutting school learning activities is wrong and will weaken the future for these children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Children have already been negatively impacted by the affects of the Covid 19 Pandemic. I would be very against any reduction in class contact time. Students need alternative learning experiences as well as their core learning experiences. I think this would have a negative impact on young people and attainment. What other local authorities have this model??	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the school day	What exactly does this mean for our childrens education, it's concerning as many working parents rely on schools through the day and then after school care, so more money for the working person to pay out for people to look after children	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Teacher/pupil contact time being reduced whilst achieving a reduction in costs seems like a way to pay teachers less or progressively imply reduced contributions, undermining their contracts. I am very against this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Teacher pay and conditions are set nationally.
Modernising our council	1F Restructuring the school day	A cost efficiency exercise that will have a huge fundamental impact on the lives and education of our future workforce. Many schools are already failing to meet what I would deem satisfactory face to face time with pupils as it would seem there are few posts being filled and they are constantly out to recruitment. Instead of looking at reducing face to face time and replacing it with 'alternative learning experience' why don't you look into why few seem to want to recruit to teaching?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Does this cover the Scottish Governments commitment to reduce class contact time? Any reduction to class time is only going to have a detrimental effect for the pupils and their learning, given that is already been disrupted due to COVID.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The Scottish Government commitment to reduced class contact time will be considered alongside this proposal.
Modernising our council	1F Restructuring the school day	As my response above I strongly believe there should be no budget cuts for our children's education.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	A full time teachers class contact is currently 22 1/2 hours with the remaining 2 1/2 hours of the school week being covered by GTCS registered teachers, who in collaboration with the class teacher ensures that the very busy curriculum is met. The council are very keen to highlight the improved attainment results however can they really expect this to continue when they are considering taking 2 1/2 hours out every week to provide alternative learning experiences when we are still recovering from a global pandameic?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Why when education is so poor in scotland would you want to reduce the contact time?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	This would align with the contact time across several other authorities.
Modernising our council	1F Restructuring the school day	No change should be made to school hours but more resources i.e. online should be available.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the school day	What are kids going to do if they are in school for the same length of time but teacher contact is reduced	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the school day	Disagree. Coming out of pandemic primary teachers in some of our most poor communities are struggling to catch up with learning lost during covid, struggling to get through an already packed curriculum.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	The number of hours of contact time seems low, but without knowing what pupils are doing for the rest of the day it is hard to comment further. Maintaining the length of the school day is important so parents don't need to find more childcare to fill the gap, especially those who are in lower paid jobs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	But how would this work. How would it be staffed.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the school day	Absolutely ludicrous idea .. reduce teaching time when our children in west lothian have some of the poorest achievement in the league tables	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Please DO NOT put our young people "at risk". Far too many management positions seem to be getting protected	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Reducing teacher/pupil contact is not the way to go, some children can only learn with teacher contact, self study does not work for everyone	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Teaching time is important... Cannot think of any cost reducing ideas here. However, would suggest where there are more "demanding" children, there is not a waste of staff resource catering to one particular child at a particular school, but if properly assessed they should be sent to a school that caters to the child's needs for that ward? (ie. one teaching member of staff to one child due to issues that child presents... where is a school or specialised group within a school could help better?) May also lead to better teaching for that child, however, would probably need considered on a case-by-case basis. (Again, may need to consider a shuttle bus and if this would be cost effective). Would remote learning time be a consideration here also? (Could still be carried out under teacher supervision - remote learning similar to what was carried out during covid? Providing more resources electronically could save money and cut costs, but this also comes with investment cost. Perhaps a "reasonable" deposit scheme could be implemented per year for electronic resource that could be refunded if equipment is returned in good condition?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	A nonsensical approach to cost saving at the expense of the pupils who already fall between the cracks because of insufficient support mechanisms to meet current needs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	As mentioned before, we strongly disagree with reducing school funding.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	What is the impact of this reduction of 50 mins on parents? Most are already struggling with childcare and this makes the argument of it being cheaper to be a stay at home parent on benefits argument which would cost the council more in the long run.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. The reduction of 50 mins would mean no change to the start and end time of the day.
Modernising our council	1F Restructuring the school day	Don't agree with this...education is important	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Absolutely bonkers. How is this even being considered? Look at the attainment gap - kids need their trusted adults to thrive.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the school day	This makes less than no sense reducing the week by 50 minutes but not altering the start or finish time?!? Also reducing teaching time so kids just suppose to look after themselves	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	It impacts on the totality of staff required across the week.
Modernising our council	1F Restructuring the school day	The half day Friday is already a difficulty. I would be hugely concerned if contact teaching hours were reduced any further for primary aged children. I could see potential for secondary where digital is a much greater feature of a young person's everyday life.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	This could be extremely damaging for parents relying on children being in school to enable them to work. School may not be childcare per se but it enables parents to work whilst children are safe and critically engaged in learning.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Cutting teacher pupil contact time will damage attainment and disproportionately impact disadvantaged families and children with ASN.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the school day	In doing this West Lothian council will create an education gap further down the line between pupils here and in other areas.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the school day	This is a terrible idea, teachers are already under pressure to complete the curriculum in the teaching hours they have.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the school day	Just no. I wonder what EIS teaching Union would have to say about this?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from professional associations.
Modernising our council	1F Restructuring the school day	Reducing school week? Get a grip! Extend the school week and end the stupid half day Friday.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the school day	Sounds like you intend to give pupils longer breaks or unsupervised study time and paying teachers less. That will definitely boost moral, help the attainment gap, reduce anti-social behaviour, help vulnerable pupils and help with the cost of living crisis NOT.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the school day	Absolutely not! This is not where any savings should be made. SNP have already made a shambles of our education system.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Doesn't affect me, not convinced it benefits children though	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	They are there to learn. They are there to be taught by qualified teaching professionals. I think the pandemic has shown us that most non-teachers are not capable of keeping kids on track or educating them to the required level. Awful idea. Again, these kids will pay into your pension pot, you don't want them earning minimum wage.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The implementation plan will include a workforce plan which will ensure suitably qualified staff matched to each setting.
Modernising our council	1F Restructuring the school day	No as the kids are still trying to catch up from COVID so reducing teacher contact time isn't going to help. Many kids also don't have the support at home of helping with one to one learning	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Pupils are entitled to 25 hours a week learning time. The 22.5 teacher contact time refers only to the teacher. The 2.5 hours remaining is still teaching time and should be delivered by trained, qualified staff not by the provision of 'baby sitting' (good intentioned though they may be) adults with no investment in child education.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the school day	Any further reduction in teaching time makes one wonder if we may as well bother teaching children at all? Already West Lothian has lower school teaching contact time than most English schools. Scottish children will be worse off and their education poorer.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the school day	I'm not sure of the ins and outs of this. What does alternative learning experiences mean? Is this just code for being babysat by less expensive staff?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The implementation plan will include a workforce plan which will ensure suitably qualified staff matched to each setting.
Modernising our council	1F Restructuring the school day	Surely less contact time will result in worse grades. West Lothian is already behind schools in Edinburgh and Glasgow	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the school day	How would the savings be made? By allowing children to be taught by staff who are not qualified teachers? Is there proof that the poverty-related attainment gap has been addressed in WLC? Is there evidence to suggest that children will still progress at the same rate or better, despite having less contact time with teachers?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The implementation plan will include a workforce plan which will ensure suitably qualified staff matched to each setting.
Modernising our council	1F Restructuring the school day	Teacher contact time is 22.5 hrs? So the kids have 15 hours without supervision? How can that be a good thing?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the school day	I think a lot of children would just not bother to learn if there was no teacher there to support them. I don't think this is very clear. Would a support teacher be with them or a parent?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The implementation plan will include a workforce plan which will ensure suitably qualified staff matched to each setting.
Modernising our council	1F Restructuring the school day	This is an awful idea, don't think the kids are at school long enough currently. I think we should bring in a full day on a Friday. In order to currently childcare costs for working parents.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the school day	Who would be helping the children with their work/queries if not with a qualified teacher. Would classroom assistant jobs be increased and would they be qualified enough to do this or even spot potential learning problems	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The implementation plan will include a workforce plan which will ensure suitably qualified staff matched to each setting.
Modernising our council	1F Restructuring the school day	Pupils need a quality education, not some sort of babysitting for part of their week. These young people are our future.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	I don't believe children are at the forefront of any of these decisions. Given covid and the level of education kids miss there should be no change to anything in schools	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the school day	It is difficult to see how this would improve learning outcomes for children!!! Please show your working!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the school day	Totally disagree with this. The future of children shouldn't be based on their ability to do self directed learning. If teachers are paid for a 35 hour week then they should expect a reduction in salary if only providing 22.5 hours.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Teacher pay and conditions are decided nationally.
Modernising our council	1F Restructuring the school day	Poor decision. Scotland has the worst educational system in Europe and to look at ways of cutting contact time shows a complete lack of understanding.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the school day	Really?? After all the missed time at school due to covid? Ridiculous	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the school day	I have a child at high school who is struggling in some classes such as English and not receiving the support they need due to lack of support staff. Unfortunately I can't afford a tutor, less teacher contact time is really going to make their education suffer.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the school day	Absolutely not. There is not enough time in the week to cover the curriculum as it is. 'Agile learning' in its current form does not work. Who will cover the 2.5 hours? Will pupils be plonked in front of a screen and left to get on with it? This is an appalling idea.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This appears to be a reduction in staff (esp teachers) by other means - if teacher redundancies/lack of sessions for newly qualified teachers is anticipated, then I do not support	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Who will facilitate the model of an agile curriculum, alternative learning experiences. Children have already had their learning interrupted and affected through COVID where parents were happy for their children to return to the classroom and be taught by teaching staff.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is committed to ensuring an appropriately qualified workforce to provide appropriate learning experiences, meeting the needs of all learners
Modernising our council	1F Restructuring the School Day	I'm wondering if this is deliberately worded so nobody knows what you are planning??? ; Sounds like a shortened school day in disguise, squeezing more out of children teachers and parents again. Not good. Teacher contact is already poor compared to when I was in school.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	I strongly oppose to this. School hours are already too little in my opinion. Trying to save money by compromising our children's education is wrong. We already have to pay for private tutoring tuition to make sure our children are ready for their exams. Which 50mins will go? Maths? English? PE? If this goes ahead, will the children and parents have a say in what gets cut? My children are in S3 and S5. Will that mean 50mins less per week to prepare for their Nat5 and Advanced Higher exams at the end of next school years.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	If you are reducing teacher contact time, does this mean reducing the number of teachers overall, or reducing their wages? You talk about reducing support staff in 1D - so who is going to supervise the kids for the time that they are not in formal classes?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	Absolutely appalling if this is to happen. Children need smaller classes and increased teacher hours	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	This is a LUDICROUS idea. Children and young people require ALL the supports while in education. This is an AWFUL proposal.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	Once more our children and education staff are being impacted. Certainly by expecting teachers to squeeze even more teaching and learning time in without the valuable experiences the children get from specialists is just a horrifying thought. The children need more meaningful experiences not less! Saving money at the expense of our children is unthinkable...	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	This will not only be detrimental to teachers who will inevitably lose their jobs but also to the well-being of the children in their care. Children should have the opportunity to experience these 'alternative learning experiences' with qualified teachers with whom they have safe and secure relationships with. Children with ASN would not cope with other practitioners without a prior relationship with them.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is committed to ensuring an appropriately qualified workforce to provide appropriate learning experiences, meeting the needs of all learners
Modernising our council	1F Restructuring the School Day	"alternative learning experiences" - really!?! This is the most ridiculous thing to come out of the local government. Perhaps you should speak with the local schools and teachers (the experts) before making any silly changes. Does the Council not consider the education of children a top priority?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Any shortening of the school day or the teaching time would be detrimental to the education and attainment of our children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	There needs to be a clearer curriculum. We need to be putting children in school at 6 with the use of a kindergarten scheme or reevaluate the way primary one is currently structured. The half and half approach is not working for many children	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response

Modernising our council	1F Restructuring the School Day	Back to impact on kids	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	No teacher pupil c9ntact time should not change	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I would like to know what this 'alternative learning experience' would look like before I could fully comment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This proposal is incredibly vague so it almost seems pointless to comment. However, I will add to the discussion based on what I can infer. It sounds like the council intends to remove RCCT teachers at Primary level in order to save on staffing costs. If the start and end times of the school day remain the same then who is supposed to be supervising the pupils while they complete their work, presumably, on a virtual platform? Also, who would be responsible for planning, uploading and assessing the content which is to be delivered remotely? I understand that the council has to make cuts but I can't see any possible scenario in which children's attainment and learning experiences do not suffer as a result of a reduction in their contact time with teachers. Not to mention the extra pressure this would put on school staff who are already being worked beyond capacity. This proposal represents a glaring reduction in service and would not be well received by the vast majority of parents. Many of whom are already skeptical about the benefits of "agile learning".	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This is extremely confusing and unclear. What will children be doing for these 2.5hrs where the curriculum would normally be covered? The impact COVID has had on attainment has been devastating and this would no doubt set children back even further and put them at a disadvantage to their peers across the country.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I'm not in favour of less teacher/pupil contact time. And I fail to see how we are out of step with other authorities given West Lothian has a half day on a Friday.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	Again I fail to understand what are children meant to do if teacher contact is reduced but school day is is not reduced?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	Agile learning is not in every school. And is not for every pupil! What about children with additional needs, dyslexia, autism etc. Who is going to manage the 2.5 hours per week when not in class teacher remit? Until disruptive pupils and lack of consequences for behaviour issues is met this will be bedlam. Where will the teachers be in that 2.5 hours? Some may not be in the building! Are HT's still responsible for safety and building during this time? Teachers are struggling with everything being thrown at them as it is, this will simply add to those stresses and eventually lack of teachers	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	The passage above makes no sense at all as children are already deprived of 1-1 teaching with classes being over populated. Why do people in power mess with a process that is already functioning. If saving money is the goal then what's next.....no teachers at all? It's a disgrace.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	There CANNOT be any reduction to the number of teaching staff, PSW or school admin. We are a completely stretched service and cannot handle any less bodies in the school building than we currently have. Everyone plays an essential part and without them it would be incredibly detrimental to the education of our children. There is no way we can maintain let alone raise attainment with less staff. Computers CANNOT teach, support and provide the same experiences as teachers. The quality teaching delivered during RCCT time cannot be squeezed into the remainder of the school day. It is already crammed enough. Education and attainment will suffer without those 2.5hours of allocated time. Staff also work better with long stretched of RCCT. 15 minutes here and there does not give staff enough time to plan quality education. This will lead to further staff stress, staff leaving teaching, staff illnesses and lower quality education for our children.PSWs are essential parts of the support and provision of education of our children. We CANNOT cope with any less PSW hours. Third party providers seems a ridiculous suggestion when you have a wealth of highly educated, highly motivated and experienced teachers at your disposal. This saving if £2.4 million is awful. DO NOT cut school funding or restructure the day.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	What would be the alternative learning experiences? And less teacher/pupil contact time I do not feel would be good the pupils need this time and the teachers to know their pupils properly.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the School Day	Kids teacher time is already impacted by massive classes and job share arrangements there should be no reduction in teacher contact time. Our kids need more teacher time since covid, to propose less is a total disservice to these young people	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	A big chunk of these council savings seems to be aimed at reducing the quality of education for our young people, I definitely cannot support this.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	The children missed enough education they can learn other things after school. It is important the children catch up with all the problems caused by classes missed and covid.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	How do you expect teachers to deliver an already overpacked curriculum, reduce attainment and reduce the time pupils are in school by 2 1/2 hours? While all these agile learning approaches are great in theory teachers are neither confident in using this approach or have the resources, space and staffing to be able to deliver this effectively. Therefore the result will be even more gaps in learning and even more stressed staff!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	Totally disagree with this proposal	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	RCCT teachers are paid to deliver the curriculum just like the class teacher. There is no way the CT can teach everything within 22.5hours! The children shouldn't be expected to fit more into less time. We are in a time where a huge number of children are suffering from mental health issues & the system can't cope. This will only be increased if you add more stress to their lives. The model proposed is basically providing childcare for 2.5hours in primary & 50mins in secondary. You will still need to pay someone to look after the children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	Absolutely NOT! Why on earth would anyone recommend our children spending LESS time with teachers! How about the SNP pay it from donations to their party given they've caused this by freezing council tax due to actually having any policies worth voting for (unless you are a freedom baying moron) and therefore needed something to have people vote for them!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	Disagree with approach. Damaging to school children and the education system. Teacher time is of critical importance.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	You mean less learning time for students who have already been disadvantaged by Covid, come from backgrounds where education isn't valued and no help is given? This is insane and completely goes against the 'closing the attainment gap' initiative! Teachers are stretched to the limit. I and my colleagues already volunteer a huge amount of our own time to prop up initiatives and clubs/activities/learning support for students where funding has been cut and staff has already been lost. Are you trying to break teachers??	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	I object to this proposal. At present it is very difficult to ensure full coverage of the curriculum within the 25hrs teaching time allocated. Removing 2.5hrs would make it impossible.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	A reduction in pupil/ teacher time is not beneficial for pupils. They need all the time they can get with fully qualified teachers. What are these alternative learning experiences? And they would obviously not be delivered by teaching staff so are a poor substitute.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	Really? School should be main place kids attend during their school years. With parents working full time school should provide as much supervision as possible	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I'd like to know what other authorities you're bringing this into alignment with as hardly any do a 4.5 day week. Teaching time should be increased not reduced. Many children do need an alternative teaching format but for the majority the traditional method is just fine. Use the savings to have more teaching support within schools and allow teachers to teach. Children who struggle can be supported in class or out of it without disruption to the majority of pupils	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	Do not agree with teacher/pupil contact time being reduced or any reduction in the school day. The above does not give enough detail on how this would actually work and what this would mean to pupils, how their day would look ??	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	Teachers should be receiving more non-contact time and this should not be removed or reduced as a result of this realignment. This is a concern regarding the proposal.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I would question how the curriculum could fit into this time, every minute counts in the classroom and children would be missing valuable time in an already crammed week.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the School Day	The run on sentence at the start of this statement suggests a continued need for qualified teachers to be teaching pupils. The use of 'experts' should enrich education not replace teachers. Also how can the pupil day be shortened but stay the same length? And if the 'non-teachers' are absent then who babysits the pupils (because this sounds like babysitting). To me, this sounds like trying to get school staff to provide free childcare/work unpaid overtime.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	The labour-Tory council coalition has some serious questions to answer if this goes ahead.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Pupils benefit hugely from the teaching of specialist teachers during RCCT time. I do not agree with getting rid of this. What are the 'alternative learning experiences' and who is responsible for the children during these times? As a parent and a teacher, I am extremely worried about these proposals.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	How does reducing contact time save money, if salaries are paid regardless of teaching hours. Who would lead this alternative learning? What form would this take? Would parents see any benefit of this. Why do we need to reduce teaching contact time to such a low level when pupils are in approximately 6 hrs for 4 days and 3 on Friday. Shouldn't we be increasing learning time in particular as we have lost so much since COVID.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Students need more contact time or direct teaching time with teachers, not less. Aren't we recovering from a pandemic where two academic years of learning were severely disrupted. More, not less time.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I cannot conceive how we can deliver high quality educational experiences for all with less class time	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	What kind of alternative experience and how will that impact on the learning of young people in the long run?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Teachers' non contact time must be preserved and ring fenced. And teachers should be focused on just that: teaching. Increasing the number of teachers and reducing class sizes with appropriate levels of SEN support when needed may prove to yield better attainment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	School staff need more time to be able to support the increasing numbers of neurodiverse children that are being main streamed. All childrens education is suffering due to lack of support! Safety needs to be a priority	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	It is unclear what the reduction in teacher contact time will be filled with if the school day remains the same length.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	So cutting qualified professional teaching time are replacing it with what? Our children's education is essentially being reduced to child care. I don't think this is good enough for our children. Absolutely shocking suggestion.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Although the current West Lothian school week is somewhat unusual, it works for our situation, and I do not understand the need to change this. Removing teacher contact time seems to be moving in the wrong direction!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Again, this is a poor way to save money. By spending less time with our children in education what is the end goal with this saving? We constantly go on about having to hire skilled workers from other countries. Why not keep the teaching day as is, or even better increase teaching time so that our children at least have a fighting chance in employment circles when they leave school. This is an extremely ill thought out plan with no discernible gain for children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Don't agree with reduced contact time with teacher, also don't understand how this generates savings	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Primary Teachers already have an unmanageably crowded curriculum. Less pupil - teacher contact will only exacerbate this issue. At the moment the curriculum can only just be taught with children receiving 22.5 hrs teaching time, reducing this will make it impossible to cover the aspects of the curriculum children are expected to cover.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the School Day	I don't really understand this idea to be honest. 22.5 hours a week contact time leaves teachers around 12.5 hours for the planning assessment parents night etc that they are contracted to cover. Most teachers seem to work around a 50 hour week so I don't understand how this will increase the attainment of the children in primary school if the teacher that knows them best is taken away from more often - would the day start earlier and finish earlier? Or a flexible start for different classes - i dont understand how you reduce the week by 50 minutes in a secondary school but have the same times for the start and finish unless non-teaching staff will appear to cover learning and classes. Teaching in primary also seems to rely on a huge amount of good will - these ideas seem likely to remove any good will from the teaching point of view	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	Primary school teacher/ pupil contact is already too low due to low teacher vrs pupil ratio. The prospect that alternative learning experiences could substitute this is a fantasy	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This is an awful proposal. When attainment is key we need more teachers in the class not less. school day should remain the same as now. Who would take children for the 2.5 hours? Volunteers? Parents? college students? This is totally unacceptable as a parent or as professional.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	If this change was to go ahead, it would only add excess pressure to teachers to be able to fit all of the curriculum into the school day with less time. Additionally, this adds extra job insecurity stresses to those on temporary contracts that this will result in job losses due to lack of available funds in schools.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	The kids have missed out on so much learning through covid school closure periods. Cutting teaching time with pupil's would not set the children up for success.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	Reducing pupils contact time with a qualified professional will have a direct impact on attainment. These hours of the week are spent covering valuable aspects of the curriculum and replacing this with what will essentially be childcare is completely unacceptable, particularly against the current social and economic backdrop. Our pupils deserve to be taught the by a qualified teacher for the entire time they are in school. This will; only create bigger inequalities across the country if not all pupils have access to the same quality of education. How can WLC think this is good enough for its young people? Not only that, but if these subject areas are not being taught in the 2.5 hours a week, when do you expect teachers to cover these elements of the curriculum? Attainment and staff morale is poor and this will only make things worse. You are failing our pupils and insulting teaching staff by choosing to disregard the importance of the work they do.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	When children are entitled to 25 hrs of education a week then how are they getting this if they only have 22.5 hrs with their teacher? After Covid, pupils are still struggling to catch up - this will last for a few years more so cutting teaching time is not the way to go.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This reduction means less jobs for teachers joining/already in the profession. A reduction also means that teachers will have to deliver the curriculum, which is already crammed, into even fewer hours, whilst still trying to raise attainment. I can't see how this would be good for our young people. There appears to be no clear idea what children would do for this reduced time if school day times are not changing.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	Again, not happy with losing teacher contact time. Not sure what changes are really being proposed here though.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	This looks like a substantial saving brought about by manipulating / cutting a few minutes from the length of the school week. If this is about shedding teacher numbers, then I would not be in favour of this. Scot Gov have trumpeted for years that education is their priority; that they will seek to lower class sizes and increase teacher numbers. However, the opposite has been the reality. Any measure which will cut teacher numbers should be avoided. We all know that fewer teachers will damage pupil education and teacher well-being. More staff is what's needed - not fewer.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Children need more education, not less	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	Children need more education, not less	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	Again, this is a terrible idea. That the council is proposing to find these cuts on the backs of children is a disgrace.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the School Day	Teachers and children are already raising with time to cover core subjects within the curriculum. The less able children will be left behind more with the pace, as it is happening now.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	I believe an overall reduction of 2.5 hours per week in pupil teacher contact time is not an option given the push across the country to raise attainment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This will mean the loss of further job opportunities for teachers, and a significant impact on the curriculum for the young people in West Lothian, particularly in primary schools. The proposal is the cut the pupil week to 22.5hrs in primary schools to align with the current maximum contact time for a class teacher. The current pupil week is 25hrs. Currently the 2.5hrs between a class teacher's maximum contact time and the 25hr pupil week is 'covered' by another GTCS registered teacher, providing high quality teaching and learning experiences for the young people. Any move to remove these high quality experiences with a GTCS teacher are unacceptable. This will have a significant impact on workload – requiring class teachers to 'squeeze' even more into their weekly timetable whilst still attempting to raise attainment – but also significantly reduce those high quality experiences with staff other than the main class teacher across the week.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	Currently the 2.5hrs between a class teacher's maximum contact time and the 25hr pupil week is 'covered' by another GTCS registered teacher, providing high quality teaching and learning experiences for the young people. Any move to remove these high quality experiences with a GTCS teacher are unacceptable. This will have a significant impact on workload – requiring class teachers to 'squeeze' even more into their weekly timetable whilst still attempting to raise attainment – but also significantly reduce those high quality experiences with staff other than the main class teacher across the week. Whilst I fully acknowledge the need for West Lothian Council to make efficiency savings, I do not feel that the proposed cuts to Education will be of any benefit to the children and young people of West Lothian, to teachers in our schools, or to the support staff who work tirelessly every day for the benefit of schools.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	teacher and pupil contact time is imperative to education, pupil understanding of numeracy and literacy. I think this should be a priority to reduce to an absolute minimum	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	Currently the 2.5hrs between a class teacher's maximum contact time and the 25hr pupil week is 'covered' by another GTCS registered teacher, providing high quality teaching and learning experiences for the young people. Any move to remove these high quality experiences with a GTCS teacher are unacceptable. This will have a significant impact on workload – requiring class teachers to squeeze even more into their weekly timetable whilst still attempting to raise attainment – but also significantly reduce those high quality experiences with staff other than the main class teacher across the week.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Absolutely not, I would prefer my child to be taught by qualified professionals, ie, teachers, not babysat / provided with 'alternative learning opportunities'. After school clubs and other activities can provide these, but school should focus on learning provided by skilled professionals. The impact of covid has been devastating enough so to even consider reducing teaching time now is just ridiculous!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This is just insane! Who would be taking the children for the extra time each week if teacher contact time is reduced? Teachers are highly skilled and trained to teach children so how would having another person look after the children improve attainment or their learning experiences? This has clearly not been thought through properly and implementing something like this would be catastrophic for any local government!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	The proposal to reduce primary pupil/teacher contact time after such significant disruption to schooling during the pandemic seems extremely shortsighted. As a mother of two primary school children, I would argue that we should be increasing this time rather than cutting it. School pupils have missed out on so much teacher time over the past two years, we run the risk of causing real harm to their development if this is redicuanu further.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Sounds an awful lot like you propose already underpaid pupil support workers to take charge while teachers have non contact time. Not acceptable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Who will provide the 2.5 hours for pupils if not a teaching member of staff? Interesting that the biggest cuts mentioned to the this point in the consultation are both hitting education? tTis would another another poor decision.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the School Day	So how would primary children be kept occupied for the remaining 2.5hrs each week? Again, how can you possibly ask for comments when there are no details. These changes could have HUGE impacts and they are being covered up by jargon and management speak! I would say NO in theory to any cuts in the Education sector. We need to invest more in the future generation, including parenting classes to help parent support their children and their education more (or even just to support them, without the more).	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Who would organise these learning experiences? Currently they are with a gtc teacher for the additional 2 and half hours and part of curriculum is covered by them . How is a class teacher supposed to fit xn additional 2 and a half hours teaching into a reduced time , when expectations are already so high .	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	Ridiculous..... so you would save money, but more family needs more childcare costs.???? This risks part time workers, PSWs jobs. Kids are unruly and hard to control, esp those who are in mainstream and shouldn't be. I'm sick of hearing about teachers suffering verbal and physical abuse, accusations of things. You should do more, not less for your residents	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This sounds like a great idea if teachers are only contracted for 22.5 hrs contact time but how will this not impact the length of the day? Will children sit for 2.5 hrs of the week on their own fighting over the few devices in school or would they return home to ignore the tasks issued on Seesaw and Teams? Although WL staff are adopting an agile approach, not all families are! This would be a learning loss for those who are probably already struggling with engagement. It would also put extra stress on families as they try to engage their children (lessons learned over covid lockdown- not all will engage, in areas with deprivation, most will disengage!) Widening the attainment gap! Many are struggling with inflation right now. With such a poor economic state, this is hardly the time to be asking parents to reduce their working hours or pay extra for child care to accommodate a 2.4hr teacher contact reduction. Currently the extra 2.5 hrs learning is covered by a qualified teacher providing quality education, can this really be replicated by an agile approach? If so, why have schools open as long as 22.5hrs?! Also, please consider previous argument about staffing shortages and learner support needs.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	I do not agree to changes being made for school especially asking for more on line learning there are already pupils unable to read and right due to the covid pandemic. Personally I would prefer my child to do online learning full time which would eradicate the bullying my child suffers	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I prefer to focus on the amount of knowledge that children obtain during school day beside give them all possible activities to increase their performance and know more about life.I hope teachers take more care about children that English Language is not their first language. Also give parents all resources to help their children to practice more in education and skills.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Less teacher contact is a disaster in my opinion.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	The curriculum is so full at the moment that there is not enough time currently to fit everything in that ensures continued attainment levels. Reducing the time children have access to core learning skills and providing alternative learning experiences may reduce overall attainment.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	So the cuts to Education are adding up to 7.4 million direct cuts and a further cut of £890,000 of free school meals and uniforms ??? Teachers teach students !! remove teachers from teaching what are you then providing? What do you think will happen to the attainment? Are you expecting the teachers who are WORKING FOR AT LEAST 40HRS PER WEEK to create suitable tasks for the non contact time? The Secondary School timelimes are already tight and the schools are already stealing from Peter to pay Paul in terms of meeting the core legislative requirements of education. And you are wanting to make this worse by putting students in the hands of low paid carers instead? (How else will you save money!!)	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	Is there a relationship between teacher/pupil contact time and improved attainment levels. If yes as is implied, will reducing this contact time have a detrimental effect on pupil attainment levels? If yes, this must be taken into account when attempting to save money. Children's education should not be put at risk.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	i absolutely disagree with this. Already our childrens education suffers due to cuts aready made, which have resulted in a lack of continuity of teachers for our children. Perhaps some savings could be made, but i disagree with this as a suitable way forward. If no time is lost in the length of the school day, and teaching contact time is lost, this can only mean a reduction in the quality of education our children receive.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the School Day	This is a significant change which could be complex to deliver and hard to sell to parents. Consideration is also needed of the impact this could have on attainment and achievement of those in quintile 1. It is however, an opportunity to think creatively and consider models which could benefit pupils, but have never been explored before.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	Covering the BGE curriculum without GTCS registered teachers for the whole allocated school time would be impossible as it is already challenging to fit it into the current allocated time.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This would only have a negative impact on the learners as it diminishes the role of the teacher.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This will only have a negative impact on the learners and their future learning experiences. Attainment would decrease without reduced contact time. It diminishes the importance of education and the role of a qualified teacher. Not only is the curriculum already incredibly full, but it would also be impossible to provide a BGE curriculum without GTCS-qualified teachers for the whole allocated school time.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This is completely unacceptable and will inevitably reduce attainment as learners are spending less time with GTCS qualified teachers. Alternative learning experiences will not meet the curriculum needs and teachers will be forced to cram an ever increasing timetable into even less hours.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

It diminishes the importance and essential role that registered teachers play in the lives of children. Not only is the curriculum already incredibly full, it would be impossible to provide a BGE curriculum without GTCS qualified teachers for the whole allocated school time. Attainment would decrease as a result of reduced teaching time with qualified staff.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	This will only have a negative impact on the learners and their future learning experiences. Attainment would decrease as a result of reduced teaching time with a qualified teacher. It diminishes the importance of education and the role of a qualified teacher. Not only is the curriculum already incredibly full, it would be impossible to provide a BGE curriculum without GTCS qualified teachers for the whole allocated school time.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	This cannot be done. Children will not be able to achieve the same levels of attainment while spending less time with a GTCS qualified teacher. It reduces the importance of education and undermines the importance of teaches. The curriculum is already too full to cover in the time we have, reducing this further would mean children are missing out on opportunities to develop their skills and talent.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	This will only have a negative impact on the learners and their future learning experiences. It diminishes the importance of education and the role of the class teacher, not only is the curriculum incredibly full it would be impossible to provide a BGE curriculum without GTCS qualified teachers for the full school time.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Similarly, the burden/pressure this places on teachers to get through the core curriculum in a reduced timeline - and using more technology as per the last suggestion - will without exception result in a further exodus of qualified professional leaving, taking all of their knowledge and skills, although that would generate some financial savings I suppose. This move to a 'realigned' school day cannot be the financial solution when plans in England are to extend the school day to support learning. How can Scotland expect to compete in the global market if our learners come to school and only experience play-based learning until P3, then cram in the core curriculum from P4 onwards by exhausted and inexperienced teachers followed by afternoons of 'alternative learning' - how does this align with the coming changes to CfE from the Scottish Govt?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I cannot begin to express my concerns at this proposal. To reduce teacher/pupil contact when this core relationship is the very thing that has supported our learners through some of the most difficult and traumatising experiences many will ever have seems perverse to me. The negative impact on the young people cannot be overstated, for many of whom, the safety felt in the teacher/pupil relationship is their first experience of being 'safe' - to remove this and replace it with 'alternative learning experiences' seems counterintuitive to me.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	Any reduction in teacher contact time would have a serious detrimental effect on young people. The impacts would also be slow to materialise, but the harms would be long term for those young people.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the School Day	No money should be cut from school budgets. More money should be allowed to schools and less to bonuses for higher management within the council.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Not sure how this saving is being calculated here and it feels rather hopeful. I'm against reduced teacher/pupil time and I don't even have a child, so imagine this will be a negative change for others too	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	After covid when children need all the school time they can get this proposal seems really strange.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	Absolutely not. Agile learning is not about reducing teaching time. It is about meeting needs and that requires staffing and resources. Unless you are keen to pay for more pupils to be on bespoke programmes of learning, I'd suggest you stop twisting words and withdrawing resources. It will cost more in the long run.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Children will also be more likely to confide in their teachers when they spend more time with them, as they are able to bond more and build their trust. If the teacher pupil contact is reduced, children may not seek the help and advice of teachers.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I have personally attended a large high school with 32 pupils per teacher as well as a smaller high school with 18 pupils per teacher. I did far better in the smaller school where the teacher pupil contact would have been far higher than larger school. I struggled in the larger school and was just a number, with teachers not knowing each individual pupil. After transferring to the smaller school my grades increased as well as my confidence levels, and my relationship with my teachers was far more beneficial. I did not feel scared to speak to them when I was struggling, and they knew each individual students' strengths and weaknesses. They were able to offer far more constructive feedback regarding my progress at school. I also started to enjoy going to school. I was never bullied or excluded, in either school, but the smaller school was much more beneficial and enjoyable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	teacher/pupil contact is important, and I don't believe it should be reduced. Children left to their own devices can create more problems. They children need to be monitored and moulded into decent upstanding citizens. This requires role models like teachers.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Many children may have learning disabilities or just struggle with certain areas of the curriculum. If teachers are not with children as much throughout the day, it will be harder to pick up on which kids are struggling or even which kids are not being treated properly at home. Less exposure to children may lead to their struggles going unnoticed.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Who would be educate the children when they were not with a qualified teacher? This will surely reduce provision of a broad curriculum and add to the workload of class teachers.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Modernising our council	1F Restructuring the School Day	No need to restructure the school day.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	why ? half days on a friday are already a barrier to parents working and supporting their families. I was lucky enough to put my child in private education and the main reason for this was that i could take them to school for 8am and pick them up at 17.30. They got a solid mix of subjects from maths and English to sports and recreational, Duke of Edinburgh etc. I would not get this in a school in west lothian. It gave them a good grounding and also made me a better parent as i could work and provide for them too.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I firmly disagree with this proposal both as a teacher and a parent. The time spent with a teacher is a highly rich educational time in which children learn and flourish. Reducing this time by 2.5 hours a week will negatively impact their education and all in the effort of saving money. It is not for the children's best interests. Spending the 2.5 hours through 'alternative learning experiences' will never replace the high quality learning experiences provided by a teacher. Alternatively, teacher's workload needs to be investigated as that is the root cause of teachers requiring time out of class to plan and prepare so much. Reduce workload and let teachers focus solely on their pupils and that way a teacher can provide a strong education for all in the original 25hours.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	Interested to see how this would work and how it will impact on the attainment of the children without increasing the workload of the staff.	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Don't agree with this move at all. The amount of time that kids have in school is already had a minimum, along with their teacher contact time. This should definitely not go ahead	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the School Day	I complete disagree with this. Teachers are already struggling to teach the curriculum. Having another teacher teach certain subjects during NCCT is a huge help to ensure they have a breadth of experiences. The children need qualified teaching staff to teach them. The experiences will not be beneficial to the children if they are not taught by a teacher. This should not go ahead. Again, go into a school to see what it is like before making this decision.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	For primary schools this would mean pupils are denied access to subject specialists re PE, music, etc while increasing the administrative/planning burden on teachers.	2. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	How can we reduce class contact time but still maintain the education- what subject goes in Secondary? That is the equivalent to a period a week - 39 over the school year. If the pupils stay in school the same amount of time they still need to be supervised...who will do this and therefore how does it save money? If we were to increase lunches etc there will be a knock on impact in terms of behaviour/discipline - already an issue within a 45 minute lunch - these breaks also need supervising - by who?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	so the saving would come primarily from not providing an RCCT teaching budget. Where would the responsibility fall for providing the alternative learning experiences? Headteachers - who already work on average more hours than other local authorities? The administrative burden for this would cost significant man hours and would reduce parents confidence in the quality of the provision.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	To raise attainment we need to ensure our children do not lose any teaching time	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	What will the children do in this time difference. This will impact on teachers and their abilities to raise attainment. Teachers are struggling to maintain levels now and these will be impacted negatively if this is actioned. What are the alternative learning experiences? Who is going to manage this?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	How does this fit in with the recovery agenda that we were promised post pandemic for young people who have already missed so much education? In secondary schools this would mean over 31 hours a year less teacher contact time. Again please explain how that fits in with The Council's raising attainment agenda and the concern for young people's mental health if the proposal is to remove valuable tutor time in the morning?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This is absurd! We are basically offering children and young people a second-class education compared to other Councils by taking away valuable properly qualified GTCs teacher time from our primary children. We currently have 25 hours contact weekly in primary school so taking 2.5 hours a week over 38 weeks of teaching time reduces the teaching time for primary children by 95 hours a year. How does this align with The Council's supposed number one priority of raising attainment?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	Children should have the benefit of qualified Teachers - standards that should be a prerequisite for the time spent in school - this will overload the requirements of the rest of the week.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Children are legally entitled to 25 hrs of education a week. Teachers go through a tough training and registration process in order to be able to do this. The idea of alternate learning experiences sounds nice on paper but how would this work in reality? Would children have any choice? Would the staff be trained in managing children with additional support needs? How would the communication work between teachers and 'other' staff? This sounds like a huge administrative burden, putting vulnerable children in unfamiliar situations and a complete erosion of their educational entitlement.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your response. Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	Maybe try speaking with parents and see what they think in regards to this change how can you reduce the school week by 50 minutes yet not change the start/finish times you make no sense at all	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	Who is working the pupils during the 50min if not teachers? Getting an external partner in for a class may be possible but 40 weeks for a full school population doesn't sound feasible. What exactly are the plans for this session and how are you saving teaching contact if these classes still need supervision?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	Already they are reducing teaching time that is very much needed for students that is affective teaching. Reducing this further will only put our students at a more disadvantage.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	The want to improve school attainment is teh issue. In order for school to meet these positive records they aren't focusing on helping students rather moving them on.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the School Day	Absolutely not....	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This will have a significant impact on workload – requiring class teachers to ‘squeeze’ even more into their weekly timetable whilst still attempting to raise attainment – but also significantly reduce those high quality experiences with staff other than the main class teacher across the week. Taking away a GTCS registered teacher is unacceptable - we send children to primary to learn - not to be babysat by someone which is what will happen if they are not being 'covered' by another GTCS registered teacher who has the ability to deliver the same standard of education.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This is of major concern to me as a teacher and as a parent. I am happy that my child has the input of a qualified teacher during the time that their class teacher is on "non-contact" time and I would be concerned that they were then missing vital teaching and learning and skills development time. The added pressure this will bring to teachers trying to "cram" the same amount of work into a shorter time period will be significant and at a time when teacher burn-out is high and staff morale is very very low.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Who is going to provide that additional time in school for our young people? I would be concerned that children are not getting access to education from qualified teachers.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	The currency of education is positive results and raising attainment. These proposals will have a detrimental effect on both - money maybe saved but at the cost of pupil attainment. It's not worth it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	The council push continually for improvements to attainment and then suggest reducing the amount of teaching time. It makes no sense. We're constantly expected to provide more within less time and with less resources.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	kids education is very important they need more education time not less.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	This sounds very vague and even deliberately unclear. How are WLC making savings when there is no reduction to teacher time? How do you shave off a secondary lesson (50 minutes) without reducing contact time or changing start/ finish times?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	how do teachers deliver N5/H and AH courses with SQA time guidelines if teaching time is reduced?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	I disagree with this. Children need more teacher contact time not less. 'alternative learning experiences' reads like a buzzword for sticking them in front of a tv/computer/tablet.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Any reduction in pupil/teacher time is patently an absurd idea.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	This is utterly preposterous.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Pupils have 2.5 hours of quality teaching provided by trained and skilled class teachers that they would not receive. This will deeply hinder their educational progression and put even more unnecessary stress on teachers to deliver more in less time given. This would be awful.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	Surely this makes no sense??? Children should be learning whilst at school these hours should be a minimum and increased rather than decrease.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	I don't think reducing the time kids have with their teachers is the answer. They have already been majorly disrupted by Covid lockdowns. I think moving to a 4 day week and compressing their time into those days would be better. Shut the school on a Friday and save on energy bills. Or alternatively have the kids learn remotely on Fridays with set tasks. I appreciate this isn't going to appeal to everyone but we all coped during complete lockdown. Some employers are moving to a 4 day week, it's adopted elsewhere around the world, I think it's a positive change.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Again...this is a saving for the council at the cost of the education of our young people. Unacceptable.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	A reduction of teacher/pupil contact time does not feel like a good idea. Reduce the number of hours our primary school pupils are taught by a qualified teacher.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	I don't see how this would be beneficial to any student.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the School Day	Pupil / teacher contact time SHOULD NOT be reduced. How do you propose children will learn if there is no teacher.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	I also don't think secondary school times should be reduced. There is already time lost to moving about classes. Our young people should be getting everything from us that they can and there should be not cuts to education.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	The kids find it hard enough to learn in the time they get in school just now. Kids should stay at school until they are 18 to allow them to learn more life skills	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	My daughter is autistic. A one size fits all approach is not suitable. I don't believe your idea would suit children with ASN	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	How do you propose the children are supervised if the teacher contact time is reduced? What/whom would they be with during this time? What would be the expectation of class teachers during this time instead of class contact time?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Fair enough the school day is the same length but cutting out teacher/pupil time will only damage the child's development as in my child's school they are stretched thin as it is	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	If less teacher contact meant more screen time, I have concerns and objections. Building safe, healthy relationships should be a strong part of community that school supports and this needs individuals to be valued.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Summertime definitely a no bit winter time a definite yes	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This indent clear to me, you wish to keep the children in for the same time but teach them less! If a teacher was to have less teaching time what do the children learn? So the children and our next generation simply won't be as clever if they have no guidance and tuition.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	Teachers are qualified professionals, with undergraduate and postgraduate qualifications. Their professional skills and abilities should not be undermined. As a secondary school teacher, I fail to see how the school day could remain the same length, but the week be reduced by 50 minutes. If the Council wants to shorten the school week, then so be it, but failing to adjust the length of the school day suggests the Council is unwilling/unable to admit to parents/third parties that this is what is happening.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	I don't understand how this would save money. Kids need to learn. They've been messed around with enough over the past few years. They need stability now more than ever.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Ridiculous idea.. with covid/ lockdown the kids have lost out on vital interaction time.. if anything they need more not less	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	West Lothian schools currently offer a longer teaching week than schools in some other Council areas, and no direct cause and effect is discernible in outcomes.
Modernising our council	1F Restructuring the School Day	What would be the saving if the teacher contact time was increased to at least 27 hours? Surely the current school week is too short and we need to be investing in our children	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	It would also be a major concern that a reduction in teacher contact time would mean a reduction in pupil contact time with GTC(S) registered teachers. Buying in meaningful external provision would also cost money. You will not continue to Raise Attainment by reducing the amount of hours pupils spend with GTC(S) registered teachers. Indeed, it would be interesting to analyse the impact of this Agile Curriculum longer term (not in a few months) on attainment in the key priority areas. More teaching staff and additional support staff are actually needed in schools, not the opposite. Failure to invest in these areas risks not providing young people with education they need to improve their life opportunities.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	The Secondary School week in West Lothian in terms of pupil class time is already in line with other Local Authorities. Indeed, North Lanarkshire Council recently moved to something more akin to the West Lothian model.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I would not support this. School teaching time is critical for our children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This will have a significant impact on workload. It will also have a direct impact on what can be taught during school hours.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	there is a danger here to parents who depend on after school care for their children due to working to provide for their families	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the School Day	Does this have a direct impact on teacher numbers. generally less teaching seems like a bad idea and 22.5 hours seems relatively low compared with world leading economies	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	homework should not replace less school time	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	If you were to ask my 3 kids about that statement, they'd roll their eyes and laugh.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I cannot disagree more with your opening statement "West Lothian has developed an agile learning culture and approach and delivered improved school attainment results and improved learning experiences for pupils.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Outrageous suggestion.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Unbelieve suggestion. So once again, you plan to reduce teacher/pupil contact time when the exact opposite is required.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Is it worth reducing the quality of the school possibly damaging the future of our children for 2mln?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This is rubbish. Whilst at school they should be getting taught lessons s if not why have them in school	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Ridiculous.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Here's an old fashioned idea for you, School 9am to 3:30pm every day so parents don't have to work less to accommodate their kids half days on Fridays.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Reducing educational time with teacher input is a huge mistake. Again, this will widen the achievement gap and the council will be directly responsible.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I wouldn't like teaching time reduced. But do agree there should be Scottish wide approach to number of teaching hours and holidays	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Our children are entitled to a broad general education. This should be provided registered teachers. Will the 2.5 hours be babysitting/child care rather than education?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	How does less time with a teacher in the same hours of school help improve our children's learning? Education attainment is low already.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I am dubious about what this statement means and would like it to be better exemplified. As it's stands to be read. I disagree with children being in school with less supporting staff or teachers or qualified appropriate supervision.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	If there is less teacher student contact time then this should be reflected in the schools and pupils should not be required to be present. You could reduce overheads by reducing the time children need to spend in school therefor allowing opportunities for home learning or blended learning therefor at parents choice. Some children would be better off in school where as a shorter day or week may allow some children to partake in extra curriculum activities such as attending specialist classes or activities such as sports clubs for example. I don't believe in reducing staff otherwise children will be left wayward in the schools without adequate or qualified or sufficient supervision or safety	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	No - our children are at school to learn and we should be investing in their future, not cutting back.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Our children already don't get enough class time due to time wasters (those that clearly don't want to learn)	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Why would you be considering reducing school days when we already gave an issue with lack of standard of reading and writing	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I am opposed to teachers spend less time with pupils, more work should be done designing processes and procedures to reduce the burden of paper work teachers have to complete.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the School Day	It is not clear how this additional time will be used by the child. This is extremely concerning, as at present the children are supported during these extra hours through PE, music or languages, activities critical to their development. I can not see the benefit to the child by this cost saving and find it very alarming to be communicated without any context on these activities or how you suggest their time will be used. As a parent I wouldn't be supportive.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	This will be detrimental to children and school environment and already so much learning missed due to covid this would cause further damage to future learning.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I am extremely concerned about how this will impact on all aspects of school from attainment to roles within schools. The roles within schools are already so stretched there is no space for additional remits. If pupil support staff are asked to cover classes this will have a huge detrimental effect on these members of staff who are not paid or trained to do so. Why should our children have 2.5 hours of schooling where they are not provided with what they deserve. THIS IS NOT ACCEPTABLE IN ANY WAY.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	As a member of school staff and as a parents of pupils in WL schools I am completely against this proposal. I do not understand how aligning these would give the children continuity? It has not been made clear who or what would be provided during this time?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	I am COMPLETELY AGAINST my child being in school and not being provided with learning experiences from a fully qualified teacher. Our children DESERVE BETTER than this and I am very concerned that this is a slippery slope to ruining our Scottish Education Service. When our children are in SCHOOL they should be experiences the best possible care and opportunities from a TEACHER.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Currently the extra time is covered by a member of the school teaching staff known by the pupils, such as a music teacher, PE teacher or RCCT teacher. Why would taking this time away from pupils be beneficial to them?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Cutting the school day will have a detrimental affect on the education of children in Scotland. It will also apply even more pressure on teachers and schools, increasing workload of teachers who will have 2.5 hours of curriculum to fit into an already packed day. The loss of pupil support workers will have a detrimental affect on children, particularly those who need supported in their learning.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I absolutely disagree with this. It puts at risk the educational needs of a whole generation of children. The school day is not just about the length of time that children are in school but the quality of what is taught during that day and by people who are appropriately qualified to do so, ensuring that children grow up to reach their potential. It is not about having children babysat for a specific length of time per day so that parents can work.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I have concerns over this and how it would effect my child's attainment at primary level and therefore within future education settings.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Whatever the reason, I cannot understand why anybody would think childrens learning will not be hugely impacted by removing teachers, even only for some of the day. ;	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	As stated above 'West Lothian has developed an agile learning culture and approach and delivered improved school attainment results and improved learning experiences for pupils', why on earth would you think less time in class would be of any benefit to our children?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	Teacher- pupil time of 22.5h/ week is borderline low. Lowering the other remaining 2.5h and subsidies with non teaching time it would affect already stretched education level and make it below acceptable	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I am concerned about the 'alternative learning experiences' being suggested. Would this be paying outside agencies to complete tasks? How would this ensure appropriate learning experiences are covered when being delivered by staff who are not trained? Also this would mean a reduction in the opportunity for pupils to have PE and Music delivered by staff who are highly skilled in this area. I am concerned not only about safety but for the health and wellbeing of our children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	The council is committed to ensuring an appropriately qualified workforce to provide appropriate learning experiences, meeting the needs of all learners
Modernising our council	1F Restructuring the School Day	So what exactly would the kids be doing in these 2.5hrs? It seems they are unaccounted for at the minute and the wording used is extremely (and deliberately) vague. Would they lose out of PE or Music time with a qualified teacher? This is completely unacceptable if so. I would oppose these changes until it can be adequately explained what the changes actually look like.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	its hard enough for working parents - if you shorten the school day you are just making it harder	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the School Day	Would parents have to pay / take time off work to facilitate the alternative learning experiences?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I do not agree with the reduction of teacher/pupil contact time. I think it would have serious implications especially for SLT to plan for and provide an alternative learning experience for our children for the remainder of the time.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	The Management of non contact time is very challenging for senior leaders to deliver consistently for a whole staff team due to staff absence, Covid pandemic etc and any increase in non contact time I think would be a significant work load issue for senior leaders. I thought that all children were required to have a GTCS registered teacher so would the alternative learning experiences be delivered by teachers? One positive of having non contact time for all staff at the same time consistently would be a valuable opportunity for staff to liaise and work together on school improvement planning.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Detailed modelling of a new school day would take place as part of the implementation of this proposal, with input from teaching professionals.
Modernising our council	1F Restructuring the School Day	Not sure about reducing school hours.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Reduce the school day by 50 mins...that's a whole lesson being cut...how can the school day start and finish at the same time with 50 mins cut?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I strongly disagree with this proposal. The pupils already don't take Fridays seriously as it is 'just a half day'. There needs to be as much teacher / pupil contact time as possible if we are to deliver a successful education system. The current system is already giving results that fall well below the standard in other countries e.g. Northern Ireland and this propose would be detrimental to both primary and secondary school pupils. Under no circumstances should this be implemented.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Not needed and not going to be beneficial to children. Children need the teachers for support and they definitely need the structure and discipline that comes with having a teacher.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I feel it is incredibly important that children have access to specialist education, in areas such as music and PE from qualified teachers. This is an essential part of their education and should not be cut to meet budget requirements.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	How can you reduce this contact time, when a vast majority of the children will not come out with formal qualifications. You need to provide more time to the teachers to support the pupils who are wanting to spend time in school to learn without distractions but also enforce the no bullying policy within the school. Pupils require more support. There should also be a better system in place for consequences and bad behavior instead of having a child not complete a punishment because they don't want to and they don't have to then get off with it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This will put additional pressure on parents to support their children. I don't agree with it at all.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	"Teacher contact time is currently 22.5 hours per week and there is an opportunity to re-align the primary school day to match this time." - OH! You mean abdicate responsibility to parents who are already struggling to find/afford childcare?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	The removal of this funding would have a severe detrimental impact on the children. It is currently very challenging to ensure the curriculum is delivered within the current school day, removal of funding for staff, resources etc. would only be disastrous.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Absolutely disagree with this. The curriculum is completely crowded already. The only way this would be of any benefit to pupils is if the time was used to be taught specialised subjects BY QUALIFIED, GTCS REGISTERED TEACHERS, thus removing some subjects from class teachers. Babysitting by pupil support staff, coaches, or other non-qualified teachers is inadequate.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	More reliance on support staff instead of qualified teacher.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This is surprising to see that the valuable interaction time between student and teacher is proposed to be reduced with no explanation of the "Alternative Learning Experience." As a parent, my idea is not to leave my child anywhere, for a fixed period of time. From school, I expect a rich, meaningful human interaction that would help my children to grow and flourish. Savings should not be made at the cost of the future of our children.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Absolute madness! It's an erosion of the teaching profession, whereby teachers must adhere to GTC standards and you intend to bypass this to save money.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.

YCYS 2028 Consultation Comments and Responses from Officers (Phase 2)

WL2028 Theme	Phase 2 Proposal	Respondent Comment	Comment Categorisation	Officer Response
Modernising our council	1F Restructuring the School Day	For shame! Cutting two and a half hours from children's education, each week, is a dereliction of your duty to provide a decent education for the children of West Lothian and an attack on their future!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	And when these providers of alternative learning experiences don't turn up or call in sick, teachers will be expected to cover? How would that time be paid back. The whole thing sounds like it was come up with on the back of a stamp because you'd like to remove PE, Music and Art specialists from Primary Schools. And when the requirement to bring in teacher class contact time down to 21 hours, what then?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I suggest you look at your education proposals again but perhaps have some educational professionals in the meetings who can advise you how best to move forward - increase funding in Education, the children deserve investment not cuts.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	This is an outrageous suggestion. How can we seriously expect the children of West Lothian to benefit from having LESS time with teachers?	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	Reducing pupil/teacher time will be detrimental to the pupils I believe. In a world where technology now rules, I believe it is vitally important to maximise teacher/pupil contact and not reduce it.	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
Modernising our council	1F Restructuring the School Day	I am not sure how this would impact primary school. I thought legally children must have 25 hours per week of quality education. This would also mean a reduction in teaching and support staff which would seriously impact on morale in school. MENTAL HEALTH MATTERS!	2. The respondent advised that they either did not agree or did not believe the council should consider the proposal.	Thank you for your comment. Your response will be forwarded to the relevant council officer for consideration.
