

Customer Notice

The Beecraigs Animal Attraction is now closed.

A number of budget saving measures have been approved by West Lothian Council which will allow the council to balance its budget.

The council have significant and sustained budget pressures caused by increasing costs and a growing population, which is combined with insufficient levels of Scottish Government grant funding. The council's funding is less than we need to enable us to continue to deliver all existing services, which means we must reduce spending and change some local services. Over the next five years the council estimate that they will have to make savings of approximately £39.4 million pounds with £15.5 million of savings required in 2023/24. The council is legally required to balance its budget - therefore the council must make savings.

Beecraigs was a working farm as well as an Animal Attraction which meant some livestock were routinely sold. There is no longer any livestock at Beecraigs Country Park. For those wanting to see Highland cattle, some of our herd now live at nearby Muiravonside Country Park, EH49 6LW.

We would like to thank our customers for visiting the Beecraigs Animal Attraction over the years.
